This cure proved almost worse than the disease, however. By 1975, all large PHA's had exhausted their reserves, operating deficits mounted forcing Congress to enact larger and larger operating subsidies. We are to the point now where last year there were 383,000 units located in PHA's that were financially distressed to the point of bankruptcy.

PHA's have not rented units that have become vacant because they lack the money to do so. Incredibly, PHA's have told congressional committees that they are thinking about boarding up additional units that are currently occupied.

In the sixties, Congress was not just concerned about excessive tenant contributions to rent. It also wanted to stimulate private ownership of subsidized housing—in itself a noble goal. So Congress launched a series of rental subsidy programs that directly subsidized owners and landlords renting to low-income tenants. Again, the cure proved worse than the disease. The costs and inequities of these programs—known as sections 235, 236, and 221 programs—led to critical reports by the General Accounting Office. Costs rose so high that a Presidential impoundment of the funds was ordered. Even so, today Congress still funds commitments made under these programs, and will continue to do so for the next decade.

In 1974, Congress approved a new housing program—section 8. This program rose like a phoenix out of the ashes of the previously discredited programs. It was hailed as the solution to the Nation's low-income housing problems. It was said the new program borrowed all the best features of earlier housing programs. But from the start, section 8 proved ill conceived, poorly managed, and scandalously costly. Its initial appropriation was modest—only $42 million. But in 8 short years Congress committed to section 8 more than $145 billion. Some 1 million units were built or leased, and 200,000 are awaiting occupancy. The Congressional Budget Office at one point estimated that a newly constructed section 8 unit could have a lifetime cost of more than $500,000. Eligibility was so broad that 40 million Americans—a GAO figure—were eligible for the subsidy. Abuses abound. Published reports documented that section 8 was a program for the "greedy, not the needy." Elaborate housing was built that lined the pockets of the developers at the expense of the poor. Other scandalous practices were reported:

Section 8 contracts were given to developers who, coincidentally, contributed significant campaign sums to reigning politicians.

Illegal aliens were housed in subsidized units.

Those with incomes exceeding section 8's already broad eligibility standards lived in units built for the poor.

Newspaper and magazine headlines screamed "Billion Dollar Nightmare at HUD," "Very Poor Last in Line to Receive Federal Housing Assistance," "Taj Mahal in New York: Symptoms of Rent Subsidy Headaches," "Housing and Politics: The Way It Works."

In 1982, Congress finally woke up to the horrors of section 8, slashed funding for new commitments by 40 percent, and adopted program reforms.

Even with these desirable changes, the fact remains that in future years Congress will have to spend more money to bail out this program. Poor budgeting and dismal planning plagues section 8 with a huge unfunded liability—estimated by the Congressional Budget Office to be as large as $50 billion—just to keep existing section 8 units available to the poor.

SPENDING ALREADY COMMITTED TO FEDERAL HOUSING

Before embarking on new housing adventures, this Congress must understand exactly what our situation is today after this long history of housing programs. We need to understand what we have already committed and the obligations that have already been fastened on the taxpayers, both in direct, defined commitments as well as the other unfunded obligations that have been built into our structure.

Of the $363 billion Congress has committed to Federal housing programs, less than $90 billion has been spent. That means that if Congress did not commit an additional dollar to these programs, at least $263 billion is obligated to be spent over the next 40 years—quite a legacy for future generations to pay.

Even these figures understate costs since they do not take into account the value of special tax advantages and Federal financing often associated with housing programs, nor does it include future funding that will be necessary to finance deficits in housing already provided.

This year there are 5,680,000 units of housing which are directly subsidized—either in direct tenant subsidies or low-interest loans—by the Federal Government, housing about 13 million people.

In addition, another 364,805 units are not yet occupied for which Congress has previously obligated the Government to build. Again, if Congress does not commit any additional money and only fulfills present obligations, 360,000 units of housing will be provided this decade.

Using President Reagan's 1984 housing budget assumptions, in the next 5 years, the Government will commit another $25.9 billion in new long-term spending for programs within the Department of Housing and Urban Development. This additional $25.9 billion will provide financing for another 234,000 units. But that is not all. The Department of Agriculture's Farmers Home Administration proposes to commit an additional $22 billion to its low-income housing programs and that will provide an additional 212,000 units.

Even these budget figures do not tell the full story about future spending. These figures fail to reflect the overly optimistic assumptions of the President's budget in revealing the potentially large deficits in housing programs. Current housing policy makes it impossible for public housing authorities to meet their spending obligations and their only recourse is to seek assistance from the Federal Government. Also, as a result of Congress initially failing to provide adequate resources to finance the section 8 and other housing programs, Congress will be forced to appropriate more money to keep already subsidized housing projects in operation.

Contrary to the prevailing wisdom in Congress and the media, there have not been and will likely not be any actual budget cuts in housing programs during the first term of the Reagan Presidency. These are the facts:

Housing outlays have and will continue to increase each year during President Reagan's first term.

At least 1 million additional subsidized units will be occupied between 1981 and 1985.

Between 1985 and 1988, another 163,000 units will be occupied—not counting increases in units provided through rural housing programs.

It is true that the spending totals proposed by the administration and provided in the committee bill are much lower than those proposed during the 1970's. It is also true that in 1981, during the heyday of cutting taxes and spending during the so-called Reagan revolution, the Congress did reduce by $23 billion the spending commitments proposed by President Carter for new housing and community developments to be made in 1981 and 1982. But these reductions will not show up in actual outlay reductions until 1984 and 1985. That is because as much as 3 years lapse between the time Congress appropriates funds and the time the money is actually spent. While there were other spending restraint changes—increasing tenant contributions to rent, for example—these will take as long as 5 years to become fully effective.

The bottom line is this: The total savings realized from spending restraint will not reduce Federal outlays during President Reagan's first term.

But even with full implementation of all budget savings, Federal outlays will still rise each year this decade.

Incredibly, the spending cuts in Federal housing programs constituted 52 percent of total budget savings in the first year of the so-called Reagan revolution that was to achieve a balanced budget by 1984.

Yet, I believe a strong case can be made that rather than reduce spending in Federal housing, Congress and the administration actually accelerated spending by authorizing additional financing subsidies for 74,000 new units of housing that otherwise would not have been built.

In sum, Congress has to date committed $363 billion to Federal housing and almost all of that since 1970. Less than $90 billion has been spent to meet these obligations leaving future generations at least $263 billion to pay, assuming no additional commitments are made and that projected deficits do not materialize. Five million units are already subsidized, and by 1988, 6.3 million units will receive subsidy. And far from cutting actual spending, the Congress has, at best, only slowed future increases in spending.

ACTUAL AND POTENTIAL UNFUNDED OBLIGATIONS IN FEDERAL HOUSING

A review of commitments to housing to date still does not tell the whole story of where we stand today on public housing. We must go further and understand HUD budgeting practices which have now created a huge unfunded liability. This has come about through three major practices: First, amendments; second, project reserves; and third, rent supplement programs. They add up to a colossal faux pas in Federal housing policy and add billions in unfunded obligations whose magnitude cannot be accurately measured.

AMENDMENTS

This innocuous sounding budget concept is the cover used to hide billions of dollars in cost overruns run up in the construction and rehabilitation of federally subsidized units. The sums involved are large. Since 1978 alone, some $20.5 billion in amendment funds have been committed by Congress. Additional billions will be needed in the future. In fact, this bill alone provides at least $3 billion in long-term spending for cost overruns. The need for amendment funds originated as follows:

In the past, Congress has told HUD that it must build a certain number of units, and theoretically Congress provides adequate authorizations to build those units. HUD then allocates the money to build the congressionally determined number of units. Yet, these authorizations in virtually every case have been insufficient to pay for the unit—but HUD has already committed the Government to build the unit. Therefore, HUD has no choice but to ask Congress to fork up more money—the so-called amendments—to pay for the previously authorized unit.

Here is an example. Suppose HUD in 1980 entered into a contract with a developer for a section 8 contract. HUD then reserves a certain amount of budget authority—that Congress mandated—for this project. For a variety of reasons, construction will not begin until 1982. In the interim, costs have increased, and the developer cannot build the project for the money initially reserved. So HUD has to reserve additional budget authority for these past projects, and the authority is reflected in requests to Congress in the form of additional amendments.

This policy is nothing more than a shell game. HUD submits and Congress approves the budget supposedly with enough funds to build a certain number of units. Often these estimates are underestimated. But it serves the political purpose of reducing, although deceptively, full program costs. Only much later will Congress pay the full bill for previously authorized units, once the commitments are made.

Second, knowing that amendment money is always available, there is little incentive for developers to reduce costs. Keep in mind that developers frequently are paid on the basis of a percentage of the costs of the total project. Thus, the more dollars, the greater the percentage, the greater the need for amendments.

According to HUD, all of the 800,000 section 8 newly constructed units have required additional amendment funds before they could be built. Therefore, repeatedly Congress has initially understated total costs and then deceptively escalated the authority allocated to these units by using future amendments to cover the actual costs.

PROJECT RESERVES

Even with the cost overrun amendments just described, total housing costs are still understated because Congress has not provided enough money to pay future costs. In fact, this bill proposes to begin the first wave of what will likely be a tidal wave of additional dollars that Congress will be asked to commit just to keep currently occupied section 8 units operational. In part, section 8 units are financed on the project reserve concept. HUD takes the first year costs of operating a project—total rents, maintenance, repair, and other expenses—and multiplies these costs times the number of years for the contract, usually 20 years.

Yet over the course of a 20-year period, costs will rise. These additional costs are paid out of the project reserve. This reserve is the income derived from tenant contributions to rent. The theory underlying this practice originated from tenant rent contributions which will rise with inflation and along with other increases in operating costs.

Like so many theories that comprise Federal housing policy, this project reserve theory is beginning to crumble. In reality funds used in some project reserves have been diverted to other than intended purposes, tenant income and their contributions to rent are not likely to rise with inflation. In addition, other economic assumptions used to determine project levels may be overly optimistic.

For the first time this year, HUD was forced to request that Congress appropriate an additional $6.7 million in 1984 for project reserve funds. The administration now projects that it will have to spend at least $75 million in each of the following 4 fiscal years to keep project reserves adequate and housing projects solvent.

Moreover, I am informed these figures also are underestimated . . . the potential for future project reserves required in each of the next 25 years may be large. HUD is now conducting an intensive review to determine the amount needed for project reserves.

The bottom line is this: Congress is foolish to begin even one, let alone seven new programs and to expand further funding for current programs when we face the prospect of spending billions just to keep the doors open for currently provided housing.

SECTION 236 RENTAL ASSISTANCE PROGRAM

Because of horrible mistakes made when the section 236 rent supplement program began in 1968, the Federal Government faces a potentially huge unfunded liability that the Federal Government is responsible for, and eventually must pay.

Rent supplement and the rental assistance programs were created without an adequate mechanism to pay for future cost increases. Because most projects are insured by the Federal Government against default, the Federal Government is responsible to pay obligations if defaults occur. The effect of this deficiency is to expose the Government to large risk in the future.

To its credit, the administration foresaw this problem, and the 1984 budget proposed a solution that would reduce the Government's risk. This solution, however, is not included in the Senate committee bill.

The administration proposed ending the rent supplement rental assistance program, and converting all insured units to the section 8 program. Specifically, the administration wants to recapture all unspent funds in the section 236 program, convert these funds in the section 8 program, and use the converted funds to pay for currently nonbudgeted rent and cost increases in the section 236 units. After these costs were properly financed, HUD pro-

posed Congress rescind the left-over funds. This conversion would apply only to insured projects; noninsured projects—those projects financed by State housing finance agencies—would be responsible for funding future cost increases that are above amounts funded by HUD.

The Senate bill rejects this approach. Instead, the bill requires HUD to offer increased subsidies to cover future cost increases of all rent supplement units, including both insured and noninsured projects. Because it is optional, not mandatory, for the project sponsor, few conversons would result and for a number of reasons. Yet, while the committee bill creates the obligation, it does not provide enough money to meet this obligation. Depending on which economic assumptions are used, Congress in the next 30 years may need to commit $8 billion in new money to keep the rent supplement operational if conversions do not result. The committee bill authorizes $3.2 billion to meet this and—important to note—other future obligations. So under the committee bill, the unfunded obligations by the Government is at least $5.4 billion, and potentially more, depending on how much of the $3.4 billion authorized by the committee is spent on rent supplement and rental assistance amendments.

SUMMARY

Experience teaches us that public housing legislation leads to uncontrollable costs, waste, abuse, and failure. Congress should never again pass new housing legislation without careful study, extensive hearings, and full debate along with an extensive review of previous programs and critical evaluation of how they are working. This legislation has not undergone anything resembling such scrutiny.

The defects in this bill are only a few that I have identified after only a cursory review of its provisions. I could discuss at length other undesirable provisions, the huge increase in lending authority for rural housing, the Federal Housing Administration and the Government National Mortgage Administration, the provisions for a new, capital subsidy and replacement fund, defects in the method for computing public housing operating subsidies, the inclusion of a new rural housing preservation grant program, the liberalization of the prohibition against providing assisted housing to illegal aliens. It seems like an endless list.

But my basic point is this. The bill cannot and should not pass bearing any resemblance to its present form. Why then are proponents arguing for its passage?

Here are a few arguments I have heard for the bill. "The Senate bill is better than the House bill." That is true. The Senate bill has half to two-thirds the spending levels in the House bill. But that alone is no reason to pass this bill. In fact, the opposite is true. It is reason to defeat this bill so that no version of the House bill will pass.

I have also been told, "We have to pass this bill because the House is holding hostage the International Monetary Fund bill until successful adoption of a housing authorization legislation." If true, the Senate should reject such flagrant extortion. Committing an additional $21 billion in new spending as the price to help international governments keep their loan agreements is absurd, and a price I am not prepared to pay.

I have also heard that, "We must pass this bill. After all, we have not had an authorization bill in 2 years." So what? Then there is, "If we do not pass an authorization, the Appropriations Committee will do so anyway." Maybe, but again, no reason to pass an absurd bill now.

Finally, there is the argument that there are urgent unmet housing needs to fill. Yes; it is true. But no matter how many billions Congress spends, it will never be able to fully satisfy those needs. And it surely never will if Congress continues to blindly and unthinkingly spend money on untargeted rehabilitation grants, Davis-Bacon, and subsidies for the wealthy.

It is easy to oppose legislation, and not propose constructive alternatives. What housing policies do I endorse? Here is what I think should be done immediately:

First, full recapture of every unspent and uncommitted dollar within the Department of Housing and Urban Development and Farmers Home Administration.

Second, inventory every Federal housing project in the United States and the territories. Determine which units that we are now paying for that are either uninhabited or in need of serious repair and determine how much is needed to bring each unit to an acceptable level of habitability, using local standards as the benchmark.

Over the next 5 years, as many as 100,000 units of public housing which the Federal Government is financing will be either uninhabited or should be abandoned. Why build new housing, or provide additional housing until these units are demolished, renovated, or paid for?

Third, determine future levels of spending that will be needed to erase current or projected deficits. Right now, two-thirds of all units are located in public housing authorities that are near bankruptcy. What needs to be done to erase these deficits, replenish reserves, modernize their housing stock, and make them energy efficient and less costly?

In the future, almost all long-term section 8 newly constructed units will have to have additional appropriations beyond what is already committed. Using intermediate assumptions, what are the projected deficits? Can recaptured funds be held in reserve to pay these obligations?

Fourth, immediate repeal of Davis-Bacon and other regulations responsible for increased costs, including the National Environmental Policy Act as it applies to subsidized housing, the use of Federal Building Code standards, et cetera.

Fifth, provide no additional subsidies until we know for certain we have reduced waste, targeted assistance to the needy, and are fully able to meet current and future obligations.

Sixth, of course, the best housing policy is one that would help permanently to lower interest rates. To keep interest rates down we must reduce the future deficits now projected. Rather than freeze spending levels, this bill actually increases spending and thereby does nothing to solve our country's basic economic problems and opens the door for future increases in interest rates.

In the meantime, I urge defeat of this housing authorization legislation.

Mr. President, I ask unanimous consent to have printed in the RECORD statistical reports which emphasize the concerns I have expressed.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APPENDIX.—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT COMPARISON OF BUDGET AUTHORITY AND OUTLAYS CARTER BUDGET, REAGAN BUDGET AND ACTUAL

[In millions of dollars]

	1981	1982
Budget authority:		
Carter	$38,390.9	$38,209.0
Reagan	32,830.7	23,040.8
Actual	33,350.4	20,084.7
Outlays:		
Carter	13,304.9	15,507.4
Reagan	14,082.4	13,934.8
Actual	14,033.4	14,490.6

Outlay increases in 1981 were due primarily to interest rates increasing and remaining at substantially higher levels than projected for the balance of the year. For 1982 the Reagan Budget projected lower interest rates which did not fully materialize.

[1] Represents amounts appropriated for 1983; public housing total includes $405 million provided for interest rate adjustments.

Note.—1978–81 data on a net basis; 1982–88 data on a gross basis.

APPENDIX 11.—GAO REPORT, RENTAL REHABILITATION GRANTS

ISSUE

HUD plans to replace the section 8 Moderate Rehabilitation and section 312 Rehabilitation Loans programs with a new rental rehabilitation grants program.

PERSPECTIVE

The Administration is requesting $150 million for fiscal year 1984 to implement a new rental rehabilitation grants program. This program would provide grants to States and units of local governments for up to one-half of the cost of rehabilitating both single-family and multifamily rental properties. An estimated 30,000 rental units would be rehabilitated under the program in fiscal

year 1984. This proposed rental rehabilitation program has the potential to be effective in upgrading a badly deteriorated rental housing stock, but without specific congressional guidance regarding program objectives and approaches, States and local governments will tend to design programs which (1) are targeted at housing units without adequate consideration for benefiting needy renter households, (2) have costs higher than necessary to improve the housing conditions of lower income household, (3) have the potential for significant displacement of lower income households, and (4) have little evaluation information available.

Based on past work, GAO believes that many communities eligible to receive rental rehabilitation grants would probably use low interest loans to rehabilitate single-family housing, although they estimate a greater need to rehabilitate and provide assistance to multifamily rental housing for lower income households. Eligible communities would have wide discretion to determine the type and level of rehabilitation assistance. Under the Community Development Block Grant (CDBG) program, which has many similarities to the proposed program, nearly half of the entitlement cities have undertaken some rental housing rehabilitation, but far fewer cities have had extensive recent experience in designing, implementing, or evaluating rental rehabilitation programs. The CDBG program has no explicit targeting criteria for rehabilitation and many communities emphasized rehabilitation of single-family housing, while reporting that renters were in greater need of assistance. Further, the most common subsidy mechanism used by CDBG communities was low interest loans, which has resulted in substantially higher average per unit rehabilitation costs than other financing methods such as grants and interest subsidy payments.

The rental rehabilitation grants program could encourage communities to allow unnecessary improvements in order for the rehabilitated units to be marketable and competitive with other non-subsidized units. The higher rehabilitation costs associated with these improvements imply higher rents, which heightens the potential that low-income families will be displaced in favor of the more affluent. Rental rehabilitation grants would be used to subsidize the cost of rehabilitating rental properties at competitive market rents rather than at rents affordable to lower income households. Under past rehabilitation programs there has been a tendency by communities to allow repairs beyond those necessary to bring substandard and deteriorating units up to code. The Administration estimates that the average cost to rehabilitate a rental unit is $10,000. Based on a recent survey of 64 CDBG communities, however, GAO found that the average rehabilitation costs per unit (excluding a few cities with very high costs) were less than $7,000 per unit. Although housing payment certificates would be provided to eligible low-income renters to help them afford the rehabilitated units, these units would not be affordable by many low-income households without housing certificates if sizable rehabilitation expenses resulted in substantial increases in rents. Early indications are that rehabilitation costs under the Administration's rental rehabilitation demonstration program are much higher than under CDBG. In the past, housing rehabilitation programs have been conditioned on the use of the housing for lower income households. Actual experience under the past programs, however, has shown that, in the absence of clear guidelines on targeting, many communities fail to assure that benefits go to lower income households.

Furthermore, program evaluation has been relegated a minor role in local rental rehabilitation programs. Our past research on the CDBG program has identified several problems relating to the reliability of data used to report program activities and beneficiaries. Unless program evaluation is made an integral component of any new rental rehabilitation program, evaluation information will be inadequate to effectively administer the program.

QUESTIONS

How would eligible communities be selected? Will housing need be the major factor?

What is the average funding level that eligible communities will receive and how many units will this enable them to rehabilitate? Are the anticipated funding levels for individual communities going to be sufficient to have a substantial impact?

What is the extent of Federal technical assistance that the Department anticipates will be needed to help communities design, implement, and evaluate programs?

Will there be any limits and/or controls established on the type and amount of rehabilitation assistance allowed on a given project to ensure that only substandard units are brought up to code at the minimum cost feasible?

Will project owners be required to pass on to the tenants any reduction in costs resulting from the rehabilitation assistance provided?

How will projects that are funded through the rental rehabilitation grants program be targeted to low-income families and what assurances are there that the rehabilitated units will remain available to low-income families for any reasonable period of time? Will low-income occupancy be a mandated requirement for a specific number of years?

Will project owners be prohibited from converting rehabilitated projects to condominium ownership? Is the Department considering establishing any requirements to recapture subsidies provided to units occupied by other than low-income households or for any other reason?

What specific program performance criteria and reporting requirements will the Department impose to ensure that program objectives are met and that the program is being administered effectively? Will project owners be required to provide verified income and demographic information to local administering agencies? Will these agencies be required to submit annual reports to the Department showing what they have accomplished?

Will the Department report to the Congress on a periodic basis as to the overall progress of the program, including consolidated verified information from all State and local governments and information on costs, services delivered, and program beneficiaries?

What sanctions or penalties does the Department anticipate imposing for non-compliance with specific performance criteria and reporting requirements?

Contact: William J. Gainer, 426-1780.

MESSAGES FROM THE HOUSE

At 12:33 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, in which it requests the concurrence of the Senate:

H.J. Res. 13. Joint resolution calling for a mutual and verifiable freeze on and reductions in nuclear weapons.

HOUSE JOINT RESOLUTION READ

The following joint resolution was read the first time:

H.J. Res. 13. Joint resolution calling for a mutual and verifiable freeze on and reductions in nuclear weapons.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1002. A communication from the Acting Under Secretary of Agriculture for International Affairs and Commodity Programs transmitting, pursuant to law, the third quarterly commodity and country allocation table for fiscal year 1983; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1003. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Federal Regulation of Meat and Poultry Products—Increased Consumer Protection and Efficiencies Needed"; to the Committee on Agriculture, Nutrition, and Forestry.

EC-1004. A communication from the Director of the Office of Management and Budget transmitting, pursuant to law, an amendment to his report of April 25, 1983, identifying funds in the jobs bill which cannot be rapidly and efficiently utilized; to the Committee on Appropriations.

EC-1005. A communication from the Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, a secret report on "Selected Acquisition Reports" and summary tables for the quarter ended March 31, 1983; to the Committee on Armed Services.

EC-1006. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision made to convert the shelf-stocking function at the Commissary Store, Pensacola, Fla., to performance under contract; to the Committee on Armed Services.

EC-1007. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision made to convert the shelf-stocking function at the Branch Commissary Store, New London, Conn., to performance under contract; to the Committee on Armed Services.

EC-1008. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, a report on a decision made to convert the base operations support function at the Naval Air Station, Memphis, Tenn., to performance under contract; to the Committee on Armed Services.

EC-1009. A communication from the Secretary of the Air Force transmitting, pursuant to law, a determination that the ground launched cruise missile system has exceeded its baseline unit cost by more than 25 percent; to the Committee on Armed Services.

EC-1010. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to freeze the rates of variable housing allowance payable in fiscal 1984 to the rates in effect in fiscal 1983; to the Committee on Armed Services.

EC-1011. A communication from the Deputy Assistant Secretary of the Navy for Reserve Affairs transmitting a copy of the brochure entitled "Naval Reserve Review"; to the Committee on Armed Services.

EC-1012. A communication from the Secretary of the Treasury transmitting, pursuant to law, his annual report on the activities of the depository institutions deregulation committee and the viability of depository institutions; to the Committee on Banking, Housing, and Urban Affairs.

EC-1013. A communication from the Chairman of the Securities and Exchange Commission transmitting, pursuant to law, the Commission's 48th annual report; to the Committee on Banking, Housing, and Urban Affairs.

EC-1014. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Examination of the Federal Home Loan Bank Board's and Related Agencies' Financial Statements for the Year Ended December 31, 1982"; to the Committee on Banking, Housing, and Urban Affairs,.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. WALLOP (for Mr. GOLDWATER), from the Select Committee on Intelligence; without amendment:

S. 1230. An original bill to authorize appropriations for the fiscal year 1984 for intelligence activities of the U.S. Government, the intelligence community staff, the Central Intelligence Agency retirement and disability system, and for other purposes (Rept. No. 98-77).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. STAFFORD, from the Committee on Environment and Public Works:

William D. Ruckelshaus, of Washington, to be Administrator of the Environmental Protection Agency.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. SPECTER:

S. 1228. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of rural enterprise zones, and for other purposes; to the Committee on Finance.

By Mr. COHEN:

S. 1229. A bill for the relief of Richard C. Rianhard of Bar Harbor, Maine; to the Committee on the Judiciary.

By Mr. WALLOP (for Mr. GOLDWATER):

S. 1230. An original bill to authorize appropriations for the fiscal year 1984 for intelligence activities of the U.S. Government, the intelligence community staff, the Central Intelligence Agency retirement and disability system, and for other purposes; from the Select Committee on Intelligence; placed on the calendar.

By Mr. BOREN (for himself, Mr. MATSUNAGA, Mr. MITCHELL, Mr. SYMMS, and Mr. BAUCUS):

S. 1231. A bill to amend the Internal Revenue Code of 1954 to exempt certain piggyback trailers and semitrailers from the tax on motor vehicles; to the Committee on Finance.

By Mr. HART (for himself, Mr. TSONGAS, Mr. CRANSTON, Mr. ROTH, and Mr. BAUCUS):

S. 1232. A bill to clarify the responsibilities of the Secretary of the Interior with respect to national wildlife refuges; to the Committee on Environment and Public Works.

By Mr. PRYOR (for himself, Mr. HEINZ, Mr. RIEGLE, and Mr. PELL):

S. 1233. A bill to prohibit the drugging or numbing of racehorses and related practices, and to amend title 18, United States Code, to prohibit certain activities conducted in interstate or foreign commerce relating to such practices; to the Committee on the Judiciary.

By Mr. BOSCHWITZ (for himself, Mr. SYMMS, Mr. LAXALT, Mr. DECONCINI, Mr. RANDOLPH, Mr. GORTON, Mr. NUNN, Mr. BOREN, Mr. DIXON, Mr. HELMS, Mr. SASSER, Mr. GLENN, Mr. DURENBERGER, Mr. FORD, Mr. RUDMAN, Mr. INOUYE, Mr. MITCHELL, Mr. PRYOR, Mr. EAST, Mr. CHILES, Mr. MATTINGLY, Mr. COCHRAN, Mr. MOYNIHAN, Mr. BUMPERS, and Mr. THURMOND):

S.J. Res. 97. A joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of members of the Armed Forces of the United States and the allied forces who served in the Korean war; to the Committee on Rules and Administration.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. COHEN:

S. Res. 134. A resolution to refer S. 1229 entitled "A bill for the relief of Richard C. Rianhard of Bar Harbor, Maine" to the chief judge of the U.S. Claims Court for a report thereon; to the Committee on the Judiciary.

By Mr. PERCY (for himself, Mr. DOMENICI, Mr. BRADLEY, Mr. HEINZ, Mr. DIXON, Mr. DANFORTH, Mr. DODD, Mr. CHAFEE, Mr. LEVIN, and Mr. MATTINGLY):

S. Res. 135. A resolution expressing the sense of the Senate with respect to the urgency of achieving and maintaining proper alinement of major international currencies essential to stem protectionism and aid early recovery of world trade expansion; to the Committee on Foreign Relations.

By Mr. BAKER (for himself and Mr. BYRD):

S. Res. 136. A resolution suspending paragraph 1 of rule IV of the Rules for Regulation of the Senate wing of the U.S. Capitol to permit a photograph of the Senate Chamber; considered and agreed to.

By Mr. SPECTER (for himself, Mr. BURDICK, Mr. PRYOR, Mr. DOLE, Mr. DANFORTH, and Mr. PACKWOOD):

S. Con. Res. 32. A concurrent resolution to express the sense of the Congress concerning the legal minimum age for drinking and purchasing alcohol; to the Committee on the Judiciary.

STATMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. SPECTER:

S. 1228. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of rural enterprise zones, and for other purposes; to the Committee on Finance.

RURAL ENTERPRISE ZONE ACT OF 1983

Mr. SPECTER. Mr. President, today, I am introducing the Rural Enterprise Zone Act of 1983. There has been much discussion over the past few years about the plight of urban America and the use of enterprise zones to stimulate economic development. While metropolitan areas are suffering from decay, it is essential that we not overlook the similar problems that rural America is facing. The problems of chronic unemployment, poverty and disinvestment, population loss, and physical deterioration are just as pervasive in rural areas as in urban areas. In Pennsylvania, for instance, one-third of the population resides in nonurban areas. The average State unemployment rate is 13.4 percent, but the rate in rural counties averages 14 percent, with some counties as high as 20 percent. The enterprise zone concept, originally geared toward rejuvenating the inner city, also can be applied to rural areas with equal success.

My bill would allow State and local governments and consortiums of government to apply for designation as a rural enterprise zone. The Secretary of Agriculture would be authorized to designate 25 areas each year for a period of 3 years. Eligibility would be based on unemployment, poverty, and population loss and the zone must be outside of a metropolitan area. Preference would be given to areas with demonstrated community support, management capability, and the ability to carry out commitments outlined in their enterprise zone plans. The Secretary also would look at minimizing the expenditure of State and Federal funds and the potential for significant job creation. Zones would then be eligible for various Federal tax incentives, including credits for labor force growth and job training.

By providing tax credits for labor growth, zones would be able to attract labor-intensive industries at least as

related to relatively smaller businesses. When coupled with the increased investment tax credits, existing industries will be encouraged to expand. New industry will need newly trained employees. The workers are there, but many lack the necessary skills. There is little doubt that America is in transition from heavy industry to high technology and labor will have to be retrained to adapt to these changes. I have included a 10-percent tax credit against contributions to job training programs. This credit is similar to that proposed in S. 481, the Tax Credit for Job Training Act, which I reintroduced on February 15. Zone sponsors could then establish training and retraining programs in coordination with the needs of businesses located in the zone. The Commonwealth of Pennsylvania currently offers a similar tax credit under the Neighborhood Assistance Act. This program has worked well in urban areas of Pennsylvania and could be a useful tool in rural areas, also.

Eligible areas would be required to demonstrate the marketing and administrative capabilities necessary to assure that the objectives of job creation and revitalization are achieved. Good management will be essential to coordinate the various local activities to best address the zone's economic deficiencies. In addition, zone sponsors must be adept at marketing their area to businesses and investors to maximize the benefits derived from tax incentives. Without these skills, success would be unlikely and revenues wasted.

The enterprise zone bill, reported by the Finance Committee in the previous Congress, did permit zone designation of small towns. However, I am concerned that rural areas will not receive designation when in competition with more densely populated areas which have a broader range of local contributions and commitments to draw from. If this experiment is to succeed, we must consider a mix of zones, including urban and rural areas. The intent of enterprise zones is to use targeted tax incentives to create jobs and spur investment in economically distressed areas. Rural communities are willing to do what they can to improve the environment for economic growth and should be given the opportunity to use these new tools to enhance the probability of recovery.

Mr. President, I ask unanimous consent that the bill be printed along with an explanation of its provisions.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1228

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE AMENDMENT OF 1954 CODE.

(a) This Act may be cited as the "Rural Enterprise Zone Act of 1983".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—DESIGNATION OF RURAL ENTERPRISE ZONES

SEC. 101. DESIGNATION OF ZONES.

(a) GENERAL RULE.—Chapter 80 (relating to general rules) is amended by adding at the end thereof the following new subchapter:

"Subchapter C—Designation of Rural Enterprise Zones

"Sec. 7871. Designation.

SEC. 7871. DESIGNATION.

"(a) DESIGNATION OF ZONES.—

"(1) RURAL ENTERPRISE ZONE DEFINED.—For purposes of this Act, the term 'rural enterprise zone' means any area—

"(A) which is nominated by—

"(i) the local government or governments with jurisdiction over such area,

"(ii) an intergovernmental organization which is designated by such local governments to manage a zone jointly with such governments (hereinafter in this section referred to as an 'intergovernmental organization'), or

"(iii) a State government or governments on behalf of—

"(I) such local government or governments, or

"(II) such intergovernmental organization,

(if such local governments approve the nomination),

for designation as a rural enterprise zone (hereinafter in this section referred to as a 'nominated area'), and

"(B) which the Secretary of Agriculture, after consultation with—

"(i) the Secretaries of Commerce, Labor, and the Treasury, the Director of the Office of Management and Budget, and the Administrator of the Small Business Administration, and

"(ii) in the case of an area on an Indian reservation, the Secretary of the Interior,

designates as a rural enterprise zone.

"(2) LIMITATIONS ON DESIGNATION.—

"(A) PUBLICATION OF REGULATIONS.—Before designating any area as a rural enterprise zone, the Secretary of Agriculture shall prescribe by regulation, after consultation with the officials described in paragraph (1)(B)—

"(i) the procedures for nominating an area under paragraph (1)(A),

"(ii) the parameters relating to the size of a rural enterprise zone, and

"(iii) the manner in which nominated areas will be compared based on the criteria specified in subsection (d) and the other factors specified in subsection (e).

"(B) TIME LIMITATIONS.—The Secretary of Agriculture may designate nominated areas as rural enterprise zones only during the 36-month period beginning on the later of—

"(i) the first day of the first month following the month in which the effective date of the regulations described in subparagraph (A) occurs, or

"(ii) July 1, 1984.

"(C) NUMBER OF DESIGNATIONS.—The Secretary of Agriculture may not designate more than 25 nominated areas as rural enterprise zones during—

"(i) the 12-month period beginning with the first day of the 36-month period described in subparagraph (B), and

"(ii) each of the two following 12-month periods.

"(D) PROCEDURAL RULES.—The Secretary of Agriculture shall not make any designation under paragraph (1) unless—

"(i) the government or governments with jurisdiction over such area have the authority—

"(I) to nominate such area for designation as a rural enterprise zone (or have delegated such authority to an intergovernmental organization described in paragraph (1)(A)(ii)),

"(II) to make the commitments described in subsection (e)(2)(A) with respect to such area, and

"(III) to provide assurances satisfactory to the Secretary of Agriculture that such commitments will be fulfilled,

"(ii) a nomination therefor is submitted in such manner and in such form, and contains such information, as the Secretary of Agriculture shall by regulations prescribe,

"(iii) the Secretary of Agriculture determines that information furnished with respect to such nomination is reasonably accurate, and

"(iv) the Secretary of Agriculture determines that no portion of the area nominated is already included in a rural enterprise zone or in an area otherwise nominated to be a rural enterprise zone.

"(b) MANAGEMENT OF RURAL ENTERPRISE ZONE.—

"(1) IN GENERAL.—Subject to the authority of the Secretary of Agriculture to revoke the designation of an area as a rural enterprise zone, if a nominated area is designated as a rural enterprise zone under subsection (a), the Secretary shall contract with the State government, local government, or intergovernmental organization nominating such area for the management of such zone, and such State government, local government, or intergovernmental organization (hereinafter in this section referred to as a 'managing entity') shall be responsible for such management and for compliance with the provisions of this title.

"(2) THIRD-PARTY MANAGEMENT.—Such managing entity may contract with another person to carry out its responsibilities under this section.

"(c) PERIOD FOR WHICH DESIGNATION IS IN EFFECT.—

"(1) IN GENERAL.—Any designation of an area as a rural enterprise zone shall remain in effect during the period beginning on the date of the designation and ending on the earliest of—

"(A) December 31 of the 15th calendar year following the calendar year in which such date occurs,

"(B) the date set forth in application nominating such area for designation as a rural enterprise zone, or

"(C) the date the Secretary of Agriculture revokes such designation under paragraph (3).

"(2) PERIODIC REVIEW.—The Secretary of Agriculture shall, from time to time, review the activities of the government or governments with jurisdiction over an area designated as a rural enterprise zone to insure that such government or governments are complying substantially with the commitments made with respect to such area pursuant to subsection (e)(2)(A).

"(3) REVOCATION OF DESIGNATION.—

"(A) IN GENERAL.—The Secretary of Agriculture, after consultation with the officials

described in subsection (a)(1)(B), may revoke the designation of an area if the Secretary of Agriculture determines that the governments with jurisdiction over such area are not complying substantially with the commitments made with respect to such area pursuant to subsection (e)(2)(A).

"(B) PERIOD FOR REMEDIAL ACTION.—Before revoking a designation, the Secretary of Agriculture may allow a period for remedial action to be taken.

"(C) ADDITIONAL DESIGNATION.—Notwithstanding the limitations imposed by subsections (a)(2)(B) and (a)(2)(C), the Secretary of Agriculture may designate one nominated area as a rural enterprise zone for each area with respect to which a designation is revoked pursuant to subparagraph (A).

"(d) AREA, ELIGIBILITY, ETC. REQUIREMENTS.—

"(1) IN GENERAL.—The Secretary of Agriculture may designate any nominated area under subsection (a)(1) only if it meets the requirements of paragraphs (2) and (3).

"(2) AREA REQUIREMENTS.—A nominated area meets the requirements of this paragraph if—

"(A) the area is within the jurisdiction of the government or governments nominating such area or jointly involved in managing such area,

"(B) the boundary of the area is continuous, and

"(C) the area is—

"(i) located outside a standard metropolitan statistical area (as defined in section 103A(l)(4)(B)),

"(ii) entirely within an Indian reservation (as determined by the Secretary of the Interior), or

"(iii) otherwise determined by the Secretary of Agriculture to be a rural area.

"(3) UNEMPLOYMENT, POVERTY, ETC. REQUIREMENTS.—A nominated area meets the requirements of this paragraph if—

"(A) the annual average unemployment rate (as determined by the most recent data available from the Bureau of Labor Statistics) was at least 125 percent of the national average for the period to which such data relates,

"(B) the poverty rate (as determined by the most recent census data available) for each census tract, minor civil division, or census county division within the area was at least 20 percent for the period to which such data relates,

"(C) at least 70 percent of the households living in the area have incomes below 80 percent of the median income of households of the local government or governments with jurisdiction over such area (determined in the same manner as under section 119(b)(2) of the Housing and Community Development Act of 1974), or

"(D) the population of the area decreased by 20 percent or more between 1970 and 1980 (as determined by the most recent census data available).

"(e) RURAL ENTERPRISE ZONE PLAN.—

"(1) IN GENERAL.—Each State government, local government, or intergovernmental organization nominating an area for designation as a rural enterprise zone shall submit a rural enterprise zone plan.

"(2) REQUIREMENTS OF PLAN.—Each rural enterprise zone plan submitted under paragraph (1) shall—

"(A) document the commitments to be made by the governments with jurisdiction over the area with respect to the reduction of the various burdens borne by employers or employees in such area;

"(B) analyze the probable costs and benefits of such plan;

"(C) describe the efforts or contributions which will be made in the area to increase employment and to encourage the formation and expansion of business enterprises and general economic development, including any local concessions to be made such as—

"(i) tax abatement,

"(ii) the providing of State, local, and private loans, loan guarantees, industrial revenue bonds, and other financing incentives for financing businesses in the area,

"(iii) the providing of local government services (such as infrastructure, transportation, sewage, utility, and zoning) to support business and economic development,

"(iv) the providing of education and training to residents of the area who are eligible for assistance under the Job Training Partnership Act,

"(v) making available to residents of the area public services which encourage their entry into the workplace,

"(vi) the commitment of land and buildings for economic development,

"(vii) the providing of technical and management assistance, and

"(viii) the creation of a loan fund for businesses within the area;

"(D) guarantee the ability of any government with jurisdiction over the area to manage the zone, including, but not limited to, the ability to certify residents eligible for tax or other assistance; and

"(E) describe the planned use of existing Federal resources for economic development and how such use will enhance any tax incentives provided by this section.

"(f) PREFERENCES IN DESIGNATION.—In choosing nominated areas to designate as rural enterprise zones, the Secretary of Agriculture shall give preference to nominated areas—

"(1) with respect to which there is a rural enterprise zone plan which—

"(A) demonstrates—

"(i) broad community support,

"(ii) the ability of the governments with jurisdiction over such area to—

"(I) meet the commitments made pursuant to subsection (e)(2)(A) with respect to such plan,

"(II) make available nonresidential property which is appropriately zoned for commercial use, and

"(III) reduce taxes on businesses located in such area;

"(iii) the most substantial commitments by private entities to establish or expand business activities (especially labor intensive activities) within such area,

"(B) minimizes—

"(i) the expenditure of Federal and State funds, and

"(ii) the unnecessary loss of tax revenues by the Federal Government

with respect to such plan; and

"(C) creates the greatest number of jobs at the lowest expenditure of government funds for each job created; and

"(2) with a high average annual rate of unemployment.

"(g) DEFINITIONS.—For purposes of this section—

"(1) GOVERNMENTS.—If more than one government seeks to nominate an area as an enterprise zone, any reference to, or requirement of, this section shall apply to all such governments.

"(2) STATE.—The term 'State' shall also include Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands and any other possession of the United States.

"(3) LOCAL GOVERNMENT.—The term 'local government' means—

"(A) any county, city, town, township, parish, village, or other general purpose political subdivision of a State,

"(B) any combination of political subdivisions described in subparagraph (A) recognized by the Secretary of Agriculture, and

"(C) the District of Columbia.".

(b) CONFORMING AMENDMENT.—The table of subchapters for chapter 80 is amended by adding at the end thereof the following new item:

"Subchapter C—Designation of Enterprise Zones".

SEC. 102. INTERACTION WITH OTHER FEDERAL PROGRAMS.

(a) TAX REDUCTIONS.—Any reduction of taxes under any required program of State and local commitment under section 7871(d) of the Internal Revenue Code of 1954 shall be disregarded in determining the eligibility of a State or local government for, or the amount or extent of, any assistance or benefits under any law of the United States.

(b) COORDINATION WITH RELOCATION ASSISTANCE.—The designation of an enterprise zone under section 7871 of the Internal Revenue Code of 1954 shall not—

(1) constitute approval of a Federal or federally assisted program or project (within the meaning of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601)), or

(2) entitle any person displaced from real property located in such zone to any rights or any benefits under such Act.

(c) PREFERENCES IN DISTRIBUTING FEDERAL FUNDS AND IN AWARDING FEDERAL CONTRACTS.—

(1) IN GENERAL.—Notwithstanding any other provision of law, the head of each Federal department, agency, or program which distributes Federal funds or awards Federal contracts to any programs, organizations, or local governments shall give the following preferences in distributing such funds and in awarding such contracts:

(A) A preference shall be given to any program, organization, or local government located in, or primarily serving, a rural enterprise zone (within the meaning of section 7871(a)(1) of the Internal Revenue Code of 1954) over all other programs, organizations, or local governments.

(B) A preference shall be given to those programs or organizations which are part of the rural enterprise zone plan of the rural enterprise zone submitted pursuant to section 7871(e) of such Code over all other programs or organizations located in, or primarily serving, such zone.

(C) A preference shall be given to community-based organizations located in, or primarily serving, a rural enterprise zone over all other organizations so located or so serving (but only if such preference does not undermine any portion of the rural enterprise zone plan of such zone submitted pursuant to section 7871 (e) of such Code).

(2) PREFERENCES IN AWARDING SUBCONTRACTIONS.—The head of each Federal department, agency, or program which distributes Federal funds or awards Federal contracts shall take such actions as are necessary to assure that any program, organization, or local government which is a recipient of such Federal funds or contracts will give special consideration to the preferences described in paragraph (1) in making any further distribution of such funds or in awarding any subcontract under such contract.

TITLE II—FEDERAL INCOME TAX INCENTIVES

SUBTITLE A—CREDIT FOR EMPLOYERS

SEC. 211. CREDIT FOR RURAL ENTERPRISE ZONE EMPLOYERS.

(a) CREDIT FOR INCREASED RURAL ENTERPRISE ZONE EMPLOYMENT AND EMPLOYMENT OF DISADVANTAGED.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. CREDIT FOR RURAL ENTERPRISE ZONE EMPLOYMENT.

"(a) IN GENERAL.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the sum of—

"(1) 10 percent of the qualified increased employment expenditures of the taxpayer for the taxable year, and

"(2) the economically disadvantaged credit amount of the taxpayer for such taxable year.

"(b) LIMITATION BASED ON AMOUNT OF TAX.—

"(1) IN GENERAL.—The credit allowed by subsection (a) for a taxable year shall not exceed the tax imposed by this chapter for such taxable year, reduced by the sum of the credits allowable under any section of this subpart having a lower number or letter designation than this section, other than the credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(2) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(A) ALLOWANCE OF CREDIT.—If the amount of the credit determined under this section for any taxable year exceeds the limitation provided by paragraph (1) for such taxable year (hereinafter in this paragraph referred to as the 'unused credit year'), such excess shall be—

"(i) a rural enterprise zone employment credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(ii) a rural enterprise zone employment credit carryover to each of the 15 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by this section for such years. If any portion of such excess is a carryback to a taxable year beginning before January 1, 1985, this section shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under this section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 18 taxable years to which (by reason of clauses (i) and (ii)) such credit may be carried, and then to each of the other 17 taxable years to the extent that, because of the limitation contained in subparagraph (B), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(B) LIMITATION.—The amount of the unused credit which may be added under subparagraph (A) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided by paragraph (1) for such taxable year exceeds the sum of—

"(i) the credit allowable under this section for such taxable year, and

"(ii) the amounts which, by reason of this paragraph, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year.

"(c) QUALIFIED INCREASED EMPLOYMENT EXPENDITURES DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified increased employment expenditures' means the excess of—

"(A) the qualified wages paid or incurred by the employer during the taxable year to qualified employees with respect to all rural enterprise zones, over

"(B) the base period wages of the employer with respect to all such zones.

"(2) LIMITATIONS AS TO QUALIFIED WAGES TAKEN INTO ACCOUNT.—

"(A) DOLLAR AMOUNT.—The amount of any qualified wages taken into account under paragraph (1) for any taxable year with respect to any qualified employee may not exceed 2.5 times the dollar limitation in effect under section 3306(b)(1) for the calendar year with or within which such taxable year ends.

"(B) APPLICATION WITH ECONOMICALLY DISADVANTAGED CREDIT AMOUNT.—Qualified wages shall not be taken into account under paragraph (1) if such wages are taken into account in determining the economically disadvantaged credit amount under subsection (d).

"(3) BASE PERIOD WAGES.—

"(A) IN GENERAL.—The term 'base period wages' means, with respect to any rural enterprise zone, the amount of wages paid to employees during the 12-month period preceding the date on which the rural enterprise zone was designated as such under section 7871 which would have been qualified wages paid to qualified employees if such designation had been in effect for such period.

"(B) RULES OF SPECIAL APPLICATION.—For purposes of subparagraph (A)—

"(i) subsection (f)(1) shall be applied by substituting '12-month period' for 'taxable year' each place it appears, and

"(ii) the dollar limitation taken into account under paragraph (2) in computing qualified wages shall be the amount in effect for the taxable year for which the amount of the credit under subsection (a) is being computed.

"(d) ECONOMICALLY DISADVANTAGED CREDIT AMOUNT.—For purposes of this section—

"(1) IN GENERAL.—The term 'economically disadvantaged credit amount' means the sum of the applicable percentage of qualified wages paid to each qualified economically disadvantaged individual.

"(2) APPLICABLE PERCENTAGE.—For purposes of paragraph (1), the term 'applicable percentage' means, with respect to any qualified economically disadvantaged individual, the percentage determined in accordance with the following table:

"If the qualified wages are paid for services performed:	The applicable percentage is:
Within 36 months of the starting date.	50
More than 36 months but less than 49 months after such date.	40
More than 48 months but less than 61 months after such date.	30
More than 60 months but less than 73 months after such date.	20
More than 72 months but less than 85 months after such date.	10
More than 84 months after such date.	0

"(3) STARTING DATE; BREAKS IN SERVICE.—For purposes of this subsection—

"(A) STARTING DATE.—The term 'starting date' means the day on which the qualified economically disadvantaged individual begins work for the employer within a rural enterprise zone.

"(B) BREAKS IN SERVICE.—The periods described in the table under paragraph (2) (other than the first such period) shall be extended by any period of time during which the individual is unemployed.

"(e) QUALIFIED WAGES DEFINED.—For purposes of this section—

"(1) IN GENERAL.—Except as otherwise provided in this subsection, the term 'qualified wages' has the meaning given to the term 'wages' by subsection (b) of section 3306 (determined without regard to any dollar limitation contained in such section).

"(2) REDUCTION FOR CERTAIN FEDERALLY FUNDED PAYMENTS.—For purposes of this section, the wages paid or incurred by an employer for any period shall not include the amount of any federally funded payments the employer receives or is entitled to receive for on-the-job training of such individual for such period.

"(3) SPECIAL RULES FOR AGRICULTURAL AND RAILWAY LABOR.—Under regulations prescribed by the Secretary, rules similar to the rules of section 51(h) shall apply with respect to services described in subparagraphs (A) and (B) of section 51(h)(1).

"(f) QUALIFIED EMPLOYEE DEFINED.—

"(1) IN GENERAL.—For purposes of this section, the term 'qualified employee' means an individual—

"(A) at least 90 percent of whose services for the employer during the taxable year are directly related to the conduct of the employer's trade or business located in a rural enterprise zone, and

"(B) who performs at least 50 percent of his services for the employer during the taxable year in a rural enterprise zone.

"(2) EXCEPTION FOR INDIVIDUALS WITH RESPECT TO WHOM CREDIT IS ALLOWED UNDER SECTION 44B.—The term 'qualified employee' shall not include an individual with respect to whom any credit is allowed the employer for the taxable year under section 44B (relating to credit for employment of certain new employees).

"(g) QUALIFIED ECONOMICALLY DISADVANTAGED INDIVIDUAL.—

"(1) IN GENERAL.—For purposes of this section, the term 'qualified economically disadvantaged individual' means an individual—

"(A) who is a qualified employee,

"(B) who is hired by the employer during the period a designation under section 7871 is in effect for the area in which the services which qualify such individual as a qualified employee are performed, and

"(C) who is certified as—

"(i) an economically disadvantaged individual,

"(ii) an eligible work incentive employee (within the meaning of section 51(d)(9)), or

"(iii) a general assistance recipient (within the meaning of section 51(d)(6)).

"(2) ECONOMICALLY DISADVANTAGED INDIVIDUAL.—For purposes of paragraph (1), the term 'economically disadvantaged individual' means any individual who is certified by the designated local agency as being a member of a family that had an income during the 6 months preceding the month in which such determination occurs that, on an annual basis, would be 70 percent or less of the Bureau of Labor Statistics lower living standard. Any such determination shall be valid for the 45-day period beginning on the date such determination is made.

"(3) CERTIFICATION.—Certification of an individual as an individual described in paragraph (1)(C) shall be made in the same manner as certification under section 51.

"(h) SPECIAL RULES.—For purposes of this section—

"(1) APPLICATION TO CERTAIN ENTITIES, ETC.—Under regulations prescribed by the Secretary, rules similar to the rules of section 52 (other than subsection (b) thereof) and section 44F(f)(3) shall apply.

"(2) PERIODS OF LESS THAN A YEAR.—If designation of an area as a rural enterprise zone under section 7871 occurs, expires, or is revoked on a date other than the first or last day of the taxable year of the taxpayer, or in the case of a short taxable year—

"(A) the limitation specified in subsection (c)(2)(A), and the base period wages determined under subsection (c)(3), shall be adjusted on a pro rata basis (based upon the number of days), and

"(B) the reduction specified in subsection (e)(2) and the 90 percent and 50 percent tests set forth in subsection (f)(1), shall be determined by reference to the portion of the taxable year during which the designation of the area as a rural enterprise zone is in effect.

"(i) PHASEOUT OF CREDIT.—In determining the amount of the credit for the taxable year under subsection (a) with respect to qualified wages paid or incurred for services performed in a rural enterprise zone—

"(1) the following percentages shall be substituted for '10 percent' in subsection (a)(1):

"(A) 7.5 percent in the earlier of—

"(i) the taxable year which includes the date which is 12 years after the date on which such rural enterprise zone was designated under section 7871, or

"(ii) the taxable year which includes the date which is 4 years before the date (if any) on which such rural enterprise zone ceases to be a zone under section 7871(c)(1)(B),

"(B) 5 percent in the next succeeding taxable year,

"(C) 2.5 percent in the second next succeeding taxable year, and

"(D) zero thereafter, and

"(2) the amount determined under subsection (a)(2) shall be reduced by—

"(A) 25 percent in the case of the taxable year described in paragraph (1)(A),

"(B) 50 percent in the next succeeding taxable year,

"(C) 75 percent in the second next succeeding taxable year, and

"(D) 100 percent thereafter.

"(j) EARLY TERMINATION OF EMPLOYMENT BY EMPLOYER IN CASE OF QUALIFIED ECONOMICALLY DISADVANTAGED INDIVIDUALS, ETC.—

"(1) GENERAL RULE.—Under regulations prescribed by the Secretary, if the employment of any qualified economically disadvantaged individual with respect to whom qualified wages are taken into account under subsection (a) is terminated by the taxpayer at any time during the 270-day period beginning on the date such individual begins work for the employer, the tax under this chapter for the taxable year in which such employment is terminated shall be increased by an amount (determined under such regulations) equal to the credit allowed under subsection (a) for such taxable year and all prior taxable years attributable to qualified wages paid or incurred with respect to such employee.

"(2) SUBSECTION NOT TO APPLY IN CERTAIN CASES.—

"(A) IN GENERAL.—Paragraph (1) shall not apply to—

"(i) a termination of employment of an employee who voluntarily leaves the employment of the employer,

"(ii) a termination of employment of an individual who, before the close of the period referred to in paragraph (1), becomes disabled to perform the services of such employment, unless such disability is removed before the close of such period and the employer fails to offer reemployment to such individual,

"(iii) a termination of employment of an individual, if it is determined under the applicable State unemployment compensation law that the termination was due to the misconduct of such individual, or

"(iv) a termination of employment of an individual due to a substantial reduction in the trade or business operations of the employer.

"(B) CHANGE IN FORM OF BUSINESS, ETC.—For purposes of paragraph (1), the employment relationship between the employer and an employee shall not be treated as terminated—

"(i) by a transaction to which section 381(a) applies, if the employee continues to be employed by the acquiring corporation, or

"(ii) by reason of a mere change in the form of conducting the trade or business of the taxpayer, if the employee continues to be employed in such trade or business and the employer retains a substantial interest in such trade or business.

"(3) SPECIAL RULE.—Any increase in tax under paragraph (1) shall not be treated as tax imposed by this chapter for purposes of determining the amount of any credit allowable under subpart A.".

(b) NO DEDUCTION ALLOWED.—

(1) IN GENERAL.—Section 280C (relating to disallowance of deductions for that portion of wages for which credit is claimed under section 40 or 44B) is amended—

(A) by adding at the end thereof the following new subsection:

"(c) RULE FOR SECTION 44H CREDITS.—No deduction shall be allowed for that portion of the wages or salaries paid or incurred for the taxable year which is equal to the amount of the credit allowable under section 44H (relating to the employment credit for rural enterprise zone businesses). This subsection shall be applied under a rule similar to the rule under the last sentence of subsection (b).''; and

(B) by striking out "or 44B" in the heading and inserting in lieu thereof ", 44B, or 44H".

(2) CONFORMING AMENDMENT.—The table of sections for part IX of subchapter B of chapter 1 is amended by striking out "or 44B" in the item relating to section 280C and inserting in lieu thereof ", 44B, or 44H".

(c) TECHNICAL AMENDMENTS RELATED TO CARRYOVER AND CARRYBACK OF CREDITS.—

(1) CARRYOVER OF CREDIT.—

(A) Subparagraph (B) of section 55(c)(3) (relating to carryover and carryback of certain credits) is amended—

(i) by striking out "or 44F" in clause (i) and inserting in lieu thereof "44F, or 44H", and

(ii) by inserting "44H(b)(1)," after "44F(g)(1)," in clause (ii).

(B) Subsection (c) of section 381 (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(30) CREDIT UNDER SECTION 44H.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44H, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44H in respect to the distributor or transferor corporation."

(C) Section 383 (relating to special limitations on unused credits and capital losses), as in effect for taxable years to which the amendments made by the Tax Reform Act of 1976 apply, is amended—

(i) by inserting "to any unused credit of the corporation under section 44H(b)(2)," after "44G(b)(2),", and

(ii) by inserting "**RURAL ENTERPRISE ZONE EMPLOYMENT CREDITS,**" after "**EMPLOYEE STOCK OWNERSHIP CREDITS,**" in the section heading.

(D) Section 383 (as in effect on the day before the amendments made by the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused credit of the corporation which could otherwise be carried forward under section 44H(b)(2)," after "44G(b)(2),", and

(ii) by inserting "**RURAL ENTERPRISE ZONE EMPLOYMENT CREDITS,**" after "**EMPLOYEE STOCK OWNERSHIP CREDITS,**" in the section heading.

(E) The table of sections for part V of subchapter C of chapter 1 is amended by inserting "rural enterprise zone employment credits," after "employee stock ownership credits," in the item relating to section 383.

(2) CARRYBACK OF CREDIT.—

(A) Subparagraph (C) of section 6511(d)(4) (defining credit carryback) is amended by striking out "and employee stock ownership credit carryback" and inserting in lieu thereof "employee stock ownership credit carryback, and rural enterprise zone employment credit carryback".

(B) Section 6411 (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(i) by striking out "or unused employee stock ownership credit" each place it appears and inserting in lieu thereof "unused employee stock ownership credit, or unused rural enterprise zone employment credit carryback";

(ii) by inserting ", by a rural enterprise zone employment credit carryback provided by section 44H(b)(2)," after "by an employee stock ownership credit carryback provided by section 44G(b)(2)" in the first sentence of subsection (a);

(iii) by striking out "or employee stock ownership credit carryback from" each place it appears and inserting in lieu thereof "employee stock ownership credit carryback, or rural enterprise zone employment credit carryback from"; and

(iv) by striking out "research and experimental credit carryback)" in the second sentence of subsection (a) and inserting in lieu thereof "research and experimental credit carryback, or in the case of a rural enterprise zone employment credit carryback, to an investment credit carryback, a new employee credit carryback, a research and experimental credit carryback, or an employee stock ownership credit carryback)".

(d) OTHER TECHNICAL AND CLERICAL AMENDMENTS.—

(1) Subsection (b) of section 6096 (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting in lieu thereof "44G and 44H".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 is

amended by inserting before the item relating to section 45 the following new item:

"Sec. 44H. Credit for rural enterprise zone employment.".

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after December 31, 1984.

SUBTITLE B—INCENTIVES FOR INVESTMENT IN TANGIBLE PROPERTY IN RURAL ENTERPRISE ZONES

SEC. 221. INVESTMENT TAX CREDIT FOR RURAL ENTERPRISE ZONE PROPERTY.

(a) SECTION 38 PROPERTY.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by striking out "or" at the end of subparagraph (F), by striking out the period at the end of subparagraph (G) and inserting in lieu thereof "; or", and by adding after subparagraph (G) the following new subparagraph:

"(H) rural enterprise zone property (within the meaning of subsection (r)) which is not otherwise section 38 property.".

(b) AMOUNT OF CREDIT.—

(1) IN GENERAL.—Subparagraph (A) of section 46(a)(2) (relating to amount of investment tax credit) is amended by striking out "and" at the end of clause (iii), by striking out the period at the end of clause (iv) and inserting in lieu thereof ", and", and by adding at the end thereof the following new clause:

"(v) in the case of qualified rural enterprise zone property, the rural enterprise zone percentage.".

(2) RURAL ENTERPRISE ZONE PERCENTAGE DEFINED.—Paragraph (2) of section 46(a) is amended by adding at the end thereof the following new subparagraph:

"(G) RURAL ENTERPRISE ZONE PERCENTAGE.—

"(i) IN GENERAL.—

For purposes of this paragraph—

"In the case of qualified rural enterprise zone expenditures with respect to:	The rural enterprise zone percentage is:
Zone personal property (within the meaning of section 48(r)(2))	5
New zone construction property (within the meaning of section 48(r)(3))	10.

"(ii) PHASEOUT OF CREDIT AS RURAL ENTERPRISE ZONE ENDS.—Clause (i) shall be applied by substituting the following percentages for 5 percent and 10 percent, respectively:

"(I) For the taxable year described in section 44H(i)(1)(A), 3.75 and 7.5.

"(II) For the next succeeding taxable year, 2.5 and 5.

"(III) For the second next succeeding taxable year, 1.25 and 2.5.

"(IV) For any subsequent taxable year, zero.".

(3) ORDERING RULES.—That portion of paragraph (7) of section 46(a) (relating to special rules in the case of energy property) which precedes subparagraph (B) is amended to read as follows:

"(7) SPECIAL RULES IN THE CASE OF ENERGY PROPERTY OR RURAL ENTERPRISE ZONE PROPERTY.—Under regulations prescribed by the Secretary—

"(A) IN GENERAL.—This subsection and subsection (b) shall be applied separately—

"(i) first with respect to so much of the credit allowed by section 38 as is not attributable to the energy percentage or the rural enterprise zone percentage,

"(ii) second with respect to so much of the credit allowed by section 38 as is attributable to the application of the energy percentage to energy property, and

"(iii) third with respect to so much of the credit allowed by section 38 as is attributable to the application of the rural enterprise zone percentage to enterprise zone property.".

(4) CONFORMING AMENDMENT.—Section 48(o) (defining certain credits) is amended by adding at the end thereof the following new paragraph:

"(9) RURAL ENTERPRISE ZONE CREDIT.—The term 'rural enterprise zone credit' means that portion of the credit allowable by section 38 which is attributable to the rural enterprise zone percentage.".

(c) DEFINITIONS AND TRANSITIONAL RULES.—Section 48 (relating to definitions and special rules) is amended by redesignating subsection (r) as subsection (s) and by inserting after subsection (q) the following new subsection:

"(r) RURAL ENTERPRISE ZONE PROPERTY.—

"(1) The term 'rural enterprise zone property' means property—

"(A) which is—

"(i) zone personal property, or

"(ii) new zone construction property,

"(B) not acquired (directly or indirectly) by the taxpayer from a person who is related to the taxpayer (within the meaning of section 168(e)(4)(D)), and

"(C) acquired and first placed in service by the taxpayer in a rural enterprise zone during the period the designation as a zone is in effect under section 7871.

"(2) ZONE PERSONAL PROPERTY DEFINED.—The term 'zone personal property' means property which is—

"(A) 3-year property;

"(B) 5-year property;

"(C) 10-year property; and

"(D) 15-year public utility property,

which is used by the taxpayer predominantly in the active conduct of a trade or business within a rural enterprise zone. Property shall not be treated as 'zone personal property' if it is used or located outside the enterprise zone on any regular basis.

"(3) NEW ZONE CONSTRUCTION PROPERTY DEFINED.—The term 'new zone construction property' means 15-year real property, which is—

"(A) located in a rural enterprise zone,

"(B) used by the taxpayer predominantly in the active conduct of a trade or business within a rural enterprise zone, and

"(C) either—

"(i) the construction, reconstruction, rehabilitation, renovation, expansion, or erection of which is completed by the taxpayer during the period the designation as a zone is in effect under section 7871, or

"(ii) acquired during such period if the original use of such property commences with the taxpayer and commences during such period.

In applying section 46(c)(1)(A) in the case of property described in clause (i), there shall be taken into account only that portion of the basis which is properly attributable to construction or erection during such period.

"(4) REAL ESTATE RENTAL.—For purposes of this section, ownership of residential, commercial or industrial real property within a rural enterprise zone for rental shall be treated as the active conduct of a trade or business in a rural enterprise zone.

"(5) DEFINITIONS.—For purposes of this subsection, the terms '3-year property', '5-year property', '10-year property', '15-year real property', and '15-year public utility property' have the meanings given such terms by section 168(c)(2).".

(d) LODGING TO QUALIFY.—Paragraph (3) of section 48(a) (relating to property used for lodging) is amended—

(1) by striking out "and" at the end of subparagraph (C),

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and", and

(3) by adding at the end thereof the following new subparagraph:

"(E) new zone construction property.".

(e) RECAPTURE.—Subsection (a) of section 47 (relating to certain dispositions, etc., of section 38 property) is amended by adding at the end thereof the following new paragraph:

"(9) SPECIAL RULES FOR RURAL ENTERPRISE ZONE PROPERTY.—

"(A) IN GENERAL.—If, during any taxable year, property with respect to which the taxpayer claimed a rural enterprise zone credit—

"(i) is disposed of, or

"(ii) in the case of zone personal property—

"(I) otherwise ceases to be section 38 property with respect to the taxpayer, or

"(II) is removed from the rural enterprise zone, converted or otherwise ceases to be rural enterprise zone property (other than by the expiration or revocation of the designation as a rural enterprise zone),

the tax under this chapter for such taxable year shall be increased by the amount described in subparagraph (B).

"(B) AMOUNT OF INCREASE.—The increase in tax under subparagraph (A) shall equal the aggregate decrease in the credits allowed under section 38 by reason of section 46(a)(2)(A)(v) for all prior taxable years which would have resulted solely from reducing the expenditures taken into account with respect to the property by an amount which bears the same ratio to such expenditures as the number of taxable years that the property was held by the taxpayer bears to the applicable recovery period for earnings and profits under section 312(k).".

(f) BASIS ADJUSTMENT TO REFLECT INVESTMENT CREDIT.—

(1) IN GENERAL.—Paragraph (3) of section 48(q) (relating to basis adjustment to section 38 property) is amended to read as follows:

"(3) SPECIAL RULE FOR QUALIFIED REHABILITATION AND RURAL ENTERPRISE ZONE EXPENDITURES.—In the case of any credit determined under section 46(a)(2) for—

"(A) any qualified rehabilitation expenditure in connection with a qualified rehabilitated building other than a certified historic structure, or

"(B) any expenditure in connection with new zone construction property (within the meaning of section 48(r)(3)),

paragraphs (1) and (2) shall be applied without regard to the phrase '50 percent of'.".

(2) CONFORMING AMENDMENT.—The heading for subsection (c) of section 196 (relating to deductions for certain unused investment credits) is amended by striking out "rehabilitated buildings" and inserting in lieu thereof "rehabilitation and rural enterprise zone expenditures".

(g) INVESTMENT CREDIT CARRYOVER PERIOD EXTENDED.—Paragraph (1) of section 46(b) (relating to carryover and carryback of unused credits) is amended by adding at the end thereof the following new sentence: "If the number of taxable years during the period beginning with the taxable year following the unused credit year and ending with the taxable year in which the designa-

tion of the rural enterprise zone to which the unused credit relates expires under section 7871 exceeds 15, then the preceding sentence shall be applied by substituting such number for '15', such number plus 3 for '18', and such number plus 2 for '17'.

(h) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1984, under rules similar to the rules of section 48(m) of the Internal Revenue Code of 1954.

SEC. 222. REMOVAL OF LIMITATION ON EXPENSING OF CERTAIN DEPRECIABLE BUSINESS ASSETS BY RURAL ENTERPRISE ZONE SMALL BUSINESSES.

(a) IN GENERAL.—Section 179(d) of the Internal Revenue Code of 1954 (relating to dollar limitation on treatment as expenses) is amended by adding at the end thereof the following new paragraph:

"(10) DOLLAR LIMITATION IN CASE OF RURAL ENTERPRISE ZONE SMALL BUSINESS.—The dollar limitation contained in subsection (b)(1) shall not apply to section 179 property used by a small business (as defined in section 3(a) of the Small Business Act) in a rural enterprise zone (as defined in section 7871(a)).".

(b) Effective Date.—The amendment made by this section shall apply to taxable years beginning after December 31, 1984.

SUBTITLE C—CREDIT FOR CHARITABLE CONTRIBUTIONS TO JOB-TRAINING ORGANIZATIONS IN ENTERPRISE ZONES

SEC. 231. CREDIT FOR CERTAIN CHARITABLE CONTRIBUTIONS.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable against tax) is amended by inserting immediately before section 45 the following new section:

"SEC. 44I. CHARITABLE CONTRIBUTIONS TO QUALIFIED JOB-TRAINING ORGANIZATIONS

"(a) GENERAL RULE.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 10 percent of the qualified job-training charitable contributions of the taxpayer for the taxable year.

"(b) LIMITATIONS.—

"(1) MAXIMUM DOLLAR AMOUNT.—The amount of the credit allowed under subsection (a) with respect to any taxpayer shall not exceed $250,000.

"(2) LIABILITY FOR TAX.—

"(A) IN GENERAL.—The credit allowed by subsection (a) for any taxable year shall not exceed an amount equal to the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowed under a section of this subpart having a lower number designation than this section, other than credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(B) CARRYBACK AND CARRYOVER OF UNUSED CREDIT.—

"(i) ALLOWANCE OF CREDIT.—If the amount of the credit determined under this section for any taxable year exceeds the limitation provided under subparagraph (A) for such taxable year (hereinafter in this paragraph referred to as the 'unused credit year'), such excess shall be—

"(I) a job-training credit carryback to each of the 3 taxable years preceding the unused credit year, and

"(II) a job-training credit carryover to each of the 15 taxable years following the unused credit year,

and shall be added to the amount allowable as a credit by this section for such years. If any portion of such excess is a carryback to a taxable year ending before January 1, 1984, this section shall be deemed to have been in effect for such taxable year for purposes of allowing such carryback as a credit under this section. The entire amount of the unused credit for an unused credit year shall be carried to the earliest of the 18 taxable years to which (by reason of subclauses (I) and (II)) such credit may be carried, and then to each of the other taxable years to the extent that, because of the limitation contained in clause (ii), such unused credit may not be added for a prior taxable year to which such unused credit may be carried.

"(ii) LIMITATION.—The amount of the unused credit which may be added under clause (i) for any preceding or succeeding taxable year shall not exceed the amount by which the limitation provided under subparagraph (A) for such taxable year exceeds the sum of—

"(I) the credit allowable under this section for such taxable year, and

"(II) the amounts which, by reason of this paragraph, are added to the amount allowable for such taxable year and which are attributable to taxable years preceding the unused credit year.

"(c) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED JOB-TRAINING CHARITABLE CONTRIBUTIONS.—The term 'qualified job-training charitable contributions' means an amount equal to the amount of charitable contributions to qualified job-training organizations.

"(2) CHARITABLE CONTRIBUTION.—The term 'charitable contribution' has the meaning given to such term by subsection (c) of section 170.

"(3) QUALIFIED JOB-TRAINING ORGANIZATION.—The term 'qualified job-training organization' means an organization which—

"(A) is described in section 501(c)(3);

"(B) is located within, and provides job training for the residents of, an area designated as a rural enterprise zone under section 7871; and

"(C) provides job training solely to individuals certified as handicapped individuals, economically disadvantaged individuals, displaced workers, or Vietnam-era veterans.

"(4) JOB TRAINING.—The term 'job training' means instruction in vocational and other skills necessary to obtain employment or a higher grade of employment.

"(5) HANDICAPPED INDIVIDUAL.—The term 'handicapped individual' means any individual who—

"(A) has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment; and

"(B) can reasonably be expected to obtain employment or a higher grade of employment as a result of job training.

"(6) ECONOMICALLY DISADVANTAGED INDIVIDUAL.—The term 'economically disadvantaged individual' means any individual who—

"(A) receives cash welfare payments under a Federal, State, or local welfare program;

"(B) has an income, for the 6-month period before applying for job training with a qualified job-training organization, which—

"(i) would have met the qualifications for such welfare payments, or

"(ii) if computed on an annual basis, would not exceed the poverty level established by the Director of the Office of Management and Budget pursuant to section 673(2) of the Ombinus Budget Reconciliation Act of 1981; or

"(C) is a member of a family which meets the requirements of subparagraph (A) or (B).

"(7) DISPLACED WORKER.—The term 'displaced worker' means any individual who—

"(A) was employed by an establishment—

"(i) on a full-time basis, and

"(ii) for at least 1 year;

"(B) was not employed by such establishment in an executive, administrative, or professional capacity (as such terms are defined by the Secretary of Labor under section 13(a)(1) of the Fair Labor Standards Act of 1938); and

"(C) is currently unemployed because of—

"(i) a change in the technology of such establishment, or

"(ii) a total or partial closing of such establishment by reason of competing technology.

"(8) The term 'Vietnam-era veteran' means any individual who is certified by the designated local agency as—

"(A) having served on active duty (other than active duty for training) in the Armed Forces of the United States for a period of more than 180 days, any part of which occurred after August 4, 1964, and before May 8, 1975, or

"(B) having been discharged or released from active duty in the Armed Forces of the United States for a service-connected disability if any part of such active duty was performed after August 4, 1964, and before May 8, 1975.

"(9) ESTABLISHMENT.—The term 'establishment' means any factory, plant, facility, or concern engaged in the production of goods or services, or both.

"(10) CERTIFICATION.—Certification of an individual as an individual described in paragraph (3)(C) shall be made in the same manner as certification under section 51.

"(d) SPECIAL RULES.—For purposes of this section—

"(1) AGGREGATION OF CONTRIBUTIONS.—

"(A) CONTROLLED GROUP OF CORPORATIONS.—In determining the amount of the credit under this section—

"(i) all members of the same controlled group of corporations shall be treated as a single taxpayer, and

"(ii) the credit (if any) allowable by this section to each such member shall be its proportionate share of the qualified job-training charitable contributions giving rise to the credit.

"(B) COMMON CONTROL.—Under regulations prescribed by the Secretary, in determining the amount of credit under this section—

"(i) all trades or businesses (whether or not incorporated) which are under common control shall be treated as a single taxpayer, and

"(ii) the credit (if any) allowable by this section to each such trade or business shall be its proportionate share of the qualified job-training charitable contributions giving rise to the credit.

The regulations prescribed under this subparagraph shall be based on principles similar to the principles which apply in the case of subparagraph (A).

"(2) ALLOCATIONS.—

"(A) PASSTHROUGH IN THE CASE OF SUBCHAPTER S CORPORATIONS, ETC.—Under regulations prescribed by the Secretary, rules similar to

the rules of subsections (d) and (e) of section 52 shall apply.

"(B) ALLOCATION IN THE CASE OF PARTNERSHIPS.—In the case of partnerships, the credit shall be allocated among partners under regulations prescribed by the Secretary.".

(b) TECHNICAL AND CLERICAL AMENDMENTS.—

(1) Subparagraph (B) of section 55(c)(3) (relating to carryover and carryback of certain credits) is amended—

(A) by striking out "or 44H" in clause (i) and inserting in lieu thereof "44H, or 44I", and

(B) by inserting "44I(b)(1)," after "44H(b)(1)," in clause (ii).

(2) Subsection (c) of section 381 of such Code (relating to items of the distributor or transferor corporation) is amended by adding at the end thereof the following new paragraph:

"(31) CREDIT UNDER SECTION 44I.—The acquiring corporation shall take into account (to the extent proper to carry out the purposes of this section and section 44I, and under such regulations as may be prescribed by the Secretary) the items required to be taken into account for purposes of section 44I in respect of the distributor or transferor corporation.".

(3)(A) Section 383 of such Code (relating to special limitations on unused investment credits, work incentive program credits, new employee credits, alcohol fuel credits, foreign taxes, and capital losses), as in effect for taxable years beginning with and after the first taxable year to which the amendments made by the Tax Reform Act of 1976 apply, is amended—

(i) by inserting "to any unused credit of the corporation under section 44I(b)(2)(B)," after 44H(b)(2),", and

(ii) by inserting "JOB-TRAINING CREDITS," after "RURAL ENTERPRISE ZONE EMPLOYMENT CREDITS," in the section heading.

(B) Section 383 of such Code (as in effect on the day before the date of the enactment of the Tax Reform Act of 1976) is amended—

(i) by inserting "to any unused credit of the corporation which could otherwise be carried forward under section 44I(b)(2)(B)," after "44H(b)(2),", and

(ii) by inserting "JOB-TRAINING CREDITS," after "RURAL ENTERPRISE ZONE EMPLOYMENT CREDITS," in the section heading.

(C) The table of sections for part V of subchapter C of chapter 1 is amended by inserting "job-training credits," after "rural enterprise zone employment credits," in the item relating to section 383.

(4) Subparagraph (C) of section 6511(d)(4) of such Code (defining credit carryback) is amended by striking out "and rural enterprise zone employment credit carryback" and inserting in lieu thereof "rural enterprise zone employment credit carryback, and job-training credit carryback".

(5) Section 6411 of such Code (relating to quick refunds in respect of tentative carryback adjustments) is amended—

(A) by striking out "or unused rural enterprise zone employment credit carryback" each place it appears and inserting in lieu thereof "unused rural enterprise zone employment credit, or unused job-training credit";

(B) by inserting ", by a job-training credit carryback provided by section 44I(b)(2)" after "by a rural enterprise zone employment credit carryback provided in section 44H(b)(2)," in the first sentence of subsection (a);

(C) by striking out "or rural enterprise zone employment credit carryback from" each place it appears and inserting in lieu thereof "a rural enterprise zone employment credit carryback, or a job-training credit carryback from"; and

(D) by inserting "or, in the case of a job-training credit carryback, to an investment credit carryback, a new employee credit carryback, a research and experimental credit carryback, or an employee stock ownership credit carryback" after "research and experimental credit carryback" in the second sentence of subsection (a).

(c)(1) Subsection (b) of section 6096 of such Code (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44H" and inserting in lieu thereof "44H and 44I".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44H the following new item:

"Sec. 44I. Charitable contributions to qualified job-training organizations.".

(d) The amendments made by this section shall apply to taxable years beginning after December 31, 1984.

SUBTITLE D—REDUCTION IN CAPITAL GAIN TAX RATES

SEC. 241. CORPORATIONS.

(a) GENERAL RULE.—Subsection (a) of section 1201 (relating to alternative tax for corporations) is amended by striking out paragraph (2) and inserting in lieu thereof the following:

"(2) a tax of 28 percent of the excess (if any) of—

"(A) the net capital gain for the taxable year, over

"(B) the qualified rural enterprise zone capital gain.".

(b) DEFINITION OF QUALIFIED RURAL ENTERPRISE ZONE CAPITAL GAIN.—Section 1201 is amended by redesignating subsections (b) and (c) as subsections (c) and (d) and by inserting after subsection (a) the following new subsection:

"(b) QUALIFIED RURAL ENTERPRISE ZONE CAPITAL GAIN.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified rural enterprise zone capital gain' means gain which is—

"(A) described in section 1222(3),

"(B) attributable to the sale or exchange of qualified property, and

"(C) properly allocable only to periods during which the property is qualified property.

"(2) LIMITATIONS.—The term 'qualified rural enterprise zone capital gain' does not include any gain attributable to the sale or exchange of an interest in a qualified business to the extent attributable to—

"(A) any property contributed to the qualified business within the previous 12 months,

"(B) any interest in any business which is not a qualified business, or

"(C) any other intangible property to the extent not properly allocable to the active conduct of a trade or business within a rural enterprise zone.

"(3) DEFINITIONS.—

"(A) The term 'qualified property' means—

"(i) any tangible personal property used by the taxpayer predominantly in a rural enterprise zone in the active conduct of a trade or business within such enterprise zone,

"(ii) any real property located in a rural enterprise zone used by the taxpayer predominantly in the active conduct of a trade or business within such enterprise zone, and

"(iii) any interest in a corporation, partnership, or other entity if, for the three most recent taxable years of such entity ending before the date of disposition of such interest, such entity was a qualified business.

"(B) QUALIFIED BUSINESS.—The term 'qualified business' means any person—

"(i) which is actively engaged in the conduct of a trade or business within a rural enterprise zone during the period described in subparagraph (A)(iii),

"(ii) with respect to which at least 80 percent of such person's gross receipts for the taxable year are attributable to the active conduct of a trade or business within a rural enterprise zone, and

"(iii) with substantially all of its tangible assets located within a rural enterprise zone.

"(C) REAL ESTATE RENTAL.—For purposes of this section, ownership of residential, commercial or industrial real property within a rural enterprise zone for rental shall be treated as the active conduct of a trade or business in a rural enterprise zone.

"(D) PROPERTY REMAINS QUALIFIED AFTER ZONE DESIGNATION CEASES TO APPLY.—

"(i) IN GENERAL.—The treatment of property as qualified property under subparagraph (A) shall not terminate when the designation of the rural enterprise zone in which the property is located or used expires or is revoked.

"(ii) EXCEPTIONS.—Clause (i) shall not apply after the first sale or exchange of property occurring after the designation expires or is revoked.".

SEC. 242. TAXPAYERS OTHER THAN CORPORATIONS.

Subsection (a) of section 1202 (relating to deduction for capital gains) is amended to read as follows:

"(a) DEDUCTION ALLOWED.—

"(1) IN GENERAL.—If for any taxable year a taxpayer other than a corporation has a net capital gain, there shall be allowed as a deduction from gross income an amount equal to the sum of—

"(A) 100 percent of the lesser of—

"(i) the net capital gain, or

"(ii) the qualified rural enterprise zone capital gain (as defined in section 1201(b)), plus

"(B) 60 percent of the excess (if any) of—

"(i) the net capital gain, over

"(ii) the amount of the net capital gain taken into account under subparagraph (A).".

SEC. 243. MINIMUM TAX.

Paragraph (9) of section 57(a) (relating to tax preference for capital gains) is amended by adding at the end thereof the following new subparagraph:

"(E) For purposes of this paragraph, gain attributable to qualified rural enterprise zone capital gain (within the meaning of section 1201(b)) shall not be taken into account.".

SEC. 244. EFFECTIVE DATE.

The amendments made by this subtitle shall apply to sales or exchanges after December 31, 1983.

SUBTITLE E—RULES RELATING TO INDUSTRIAL DEVELOPMENT BONDS

SEC. 251. INDUSTRIAL DEVELOPMENT BONDS.

(a) LIMITATION ON ACCELERATED COST RECOVERY DEDUCTION NOT TO APPLY TO RURAL ENTERPRISE ZONE PROPERTY.—Subparagraph (C) of section 168(f)(12) (relating to limitations on property financed with tax-exempt bonds) is amended—

(1) by striking out "or" at the end of clause (iii),

(2) by striking out the period at the end of clause (iv) and inserting in lieu thereof ", or", and

(3) by adding at the end thereof the following new clause:

"(v) as rural enterprise zone property (within the meaning of section 48(r)).".

(b) TERMINATION OF SMALL ISSUE EXEMPTION NOT TO APPLY.—Subparagraph (N) of section 103(b)(6) (relating to termination of small issue exemption after December 31, 1986) is amended by adding at the end thereof the following new sentence: "This subparagraph shall not apply to any obligation which is part of an issue substantially all of the proceeds of which are used to finance facilities within a rural enterprise zone if such facilities are placed in service while the designation as such a zone is in effect under section 7871.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to obligations issued after December 31, 1984, in taxable years ending after such date.

SUBTITLE F—SENSE OF THE CONGRESS WITH RESPECT TO TAX SIMPLIFICATION

SEC. 261. TAX SIMPLIFICATION.

It is the sense of the Congress that the Secretary of the Treasury should in every way possible simplify the administration and enforcement of any provision of the Internal Revenue Code of 1954 added to, or amended by, this Act.

RURAL ENTERPRISE ZONE ACT

GENERAL PROVISIONS

Establishes 10 zones per year for three years designated by the Secretary of Agriculture.

Zones can be nominated and managed by a local government, State government, or consortium of governments.

ELIGIBILITY

Nominated area must be within the jurisdiction of government or governments nominating the area.

Boundary must be continuous.

Area must be outside a standard metropolitan statistical area, entirely within an Indian reservation, or otherwise determined by the Secretary as "rural".

One of the following conditions must exist:

1. Unemployment rate must be at least 125 percent of national average.

2. Poverty rate must be at least 20 percent.

3. At least 70 percent of households in area must have incomes below 80 percent of median income of households within area.

4. Population of area must have decreased by 20 percent between 1970 and 1980.

RURAL ENTERPRISE ZONE PLAN

The government or governments nominating an area must submit an enterprise zone plan to the Secretary outlining commitments and contributions by private organizations, business, and state and local governments to encourage economic expansion including tax abatement, land and building donations, public services, training, and technical and management assistance.

The entity nominating must guarantee the ability to manage the zone, including the ability to certify residents for tax assistance.

The entity must describe the planned use of existing federal resources and how such use will enhance tax incentives provided by this bill.

PREFERENCES IN DESIGNATION

Preference will be given to areas with plans which demonstrate the following:

Broad community support; ability of entity nominating to meet commitments, make land available, and reduce taxes; minimizing federal and state expenditures; minimizes loss of revenue; and labor-intensive.

Preference will also be given to areas with high annual rates of unemployment.

TAX INCENTIVES

TAX CREDIT FOR EMPLOYERS

Provides credit of 10 percent of qualified increased employment and economically disadvantaged credit amount.

"qualified increased employment."—Excess of wages paid during a taxable year over the base period wages prior to designation as zone.

"economically disadvantaged credit."—Wages paid to certain individuals, i.e., those who receive or are qualified for general assistance, or are eligible work incentive employees.

INVESTMENT TAX CREDITS

Provides a 5 percent increase in the investment tax credit for personal property (for a maximum total of 15 percent) and a 10 percent increase for new construction (for a maximum total of 20 percent)

JOB TRAINING

Similar provisions to those contained in S. 418, the Tax Credit for Job Training Act, providing tax credits to corporations which contribute to community organizations for the purposes of job training. The credit would be 10 percent.

EXPENSING

Small businesses (as defined by the Small Business Administration, i.e., less than 500 employees and less than $9—12 million total annual sales) would be given the option of expensing rather than depreciating the costs of conducting business.

CAPITAL GAINS

Corporations.—For the purposes of capital gains tax, corporations will be taxed at a rate of 28% on the difference between the net capital gain for the taxable year and the qualified rural enterprise zone capital gain.

"Qualified rural enterprise zone capital gain"—gain attributable to sale or exchange of personal or real property or interest in a corporation which is predominantly in a zone and actively engaged in conducting trade in the zone.

Taxpayers other than Corporations—The section in the Internal Revenue Code relating to deduction for capital gains is amended to allow a deduction from gross income in any year such taxpayer has a capital gain in an amount equal to: 100 percent of the lesser of the net capital gain or the qualified rural enterprise zone capital gain (as defined previously), plus 60 percent of the difference (if any) between the net capital gain and the capital gain taken above.

Gain attributed to "qualified rural enterprise zone capital gain" is exempt from the minimum tax.

INDUSTRIAL DEVELOPMENT BONDS

Limitations on property financed with tax-exempt bonds will not apply to rural enterprise zones, nor shall the termination of the small issue exemption.

By Mr. BOREN:

S. 1231. A bill to amend the Internal Revenue Code of 1954 to exempt certain piggyback trailers and semitrailers from the tax on motor vehicles; to the Committee on Finance.

EXEMPTION FROM TAX ON CERTAIN TRAILERS

● Mr. BOREN. Mr. President, in December, during the closing hours of debate on the Surface Transportation Act of 1982, I became aware of a gross inequity which resulted from the exemption from the 12-percent Federal sales tax of a rail vehicle known as RoadRailer to the exclusion of a vehicle made and used for the same purpose, a piggyback trailer.

Today, I introduce legislation to correct this inequity and take this opportunity to briefly outline the background and facts.

Piggyback trailers pay the full 12-percent Federal sales tax even though they travel the same low mileage as a RoadRailer, and are designed and serve the same purpose as a RoadRailer. Both RoadRailer and piggyback trailer travel from the loading dock to the rail yard to be transferred for the long haul by rail. The basic difference between the RoadRailer and the piggyback trailer is that the RoadRailer has a set of train wheels to travel on the rail, while the piggyback trailer is lifted onto a flatcar to travel on the rail. Both types of trailers are specifically designed and manufactured to serve the same purpose. In addition, both types of trailers travel the same land mileage, which usually averages less than 3,000 miles a year. As a result of the difference in tax treatment for vehicles doing the same job, piggyback trailers are put at a competitive disadvantage to the RoadRailer.

The Department of Transportation states in its final report on Federal highway cost allocation:

Consideration should be given to relieving truck trailers that are manufacture for use as Piggyback trailers from the new truck excise tax.

Piggyback trailers cost more to build and weigh about 1,000 pounds more than an over-the-road trailer, and are certified to travel on the rail by the American Association of Railroads. They therefore would not represent an enforcement burden if exempted from the sales tax as is their competitor, the RoadRailer.

The $13 million a year loss of revenue for exempting piggyback trailers would be offset by savings in wear and tear to the national highways, and statistics show it is immeasurably safer than over the road trailer transportation.

I hope that the Senate will act to put fairness into our transportation

policy by correcting this oversight in the 1982 act.●

By Mr. HART (for himself, Mr. TSONGAS, Mr. CRANSTON, Mr. ROTH, and Mr. BAUCUS).

S. 1232. A bill to clarify the responsibilities of the Secretary of the Interior with respect to national wildlife refuges; to the Committee on Environment and Public Works.

NATIONAL WILDLIFE REFUGE SYSTEM ADMINISTRATION ACT AMENDMENTS OF 1983

● Mr. HART. Mr. President, I am introducing today, along with Senators TSONGAS, CRANSTON, ROTH, and BAUCUS, the National Wildlife Refuge System Administration Act amendments, to provide that before the Department of the Interior disposes of any lands in a national wildlife refuge the Secretary of the Interior must find that the lands are no longer needed for the purposes for which Congress created the national wildlife refuge system; to prohibit the disposal of any refuge lands that also are in the national wilderness, wild and scenic river, or trails systems; and to clarify that the Secretary cannot assign the Fish and Wildlife Service's statutory responsibility to manage refuges to any other Federal agency, to a State government, or to any other entity, without specific congressional approval.

It is a sad commentary that this legislation is needed. Under all previous administrations, of both parties, the national wildlife refuges have been properly managed by the Federal Government to fulfill the congressional mandate that these lands should be administered by the Secretary of the Interior, acting through the Fish and Wildlife Service, for the purpose of conserving wildlife.

But this administration has completely broken from this past record. This administration seems to be seeking any excuse, and any pretense of authority, to get rid of national wildlife refuges.

That is a harsh statement, but it is completely supported by the record of the past 2 years. I invite my colleagues, and all Americans, to review what this administration is doing to the national wildlife refuge system.

The Department of the Interior is in the final stages of entering into a land exchange with three Alaska native regional corporations for the express purpose of allowing the construction of an oil production staging base on St. Matthew Island, which is not only part of the Alaska Maritime National Wildlife Refuge but which is also part of the National Wilderness Preservation System. The land will first be given to the native corporation because the Department thinks it can find in an obscure provision of the Alaska Lands Act of 1980 authority to exchange any Federal land with native corporations. But everybody knows, even the Department admits, that the real purpose of the exchange is to let the native corporation turn around and give the lands on St. Matthew Island to ARCO, which wants to build a staging base for its exploration and development of oil on the Alaska coastline.

Let me repeat this: The Department of the Interior is preparing to give away land which the Congress has said should be a national wildlife refuge and a wilderness area so an oil company can build a base of operations.

St. Matthew Island was designated as a national wildlife refuge, in 1909, because of its unique wildlife values. It has been estimated that 1½ million sea birds breed on the island. It is one of the very few areas where the McKay's bunting nests. It also is important habitat for seals and other marine mammals. To insure proper protection of this island, Congress in 1970 added it to the national wilderness system, guaranteeing that the land remains for all time as wilderness, which Congress in 1964 defined in this way:

A wilderness, in contrast with those areas where man and his own works dominate the landscape, is hereby recognized as an area where the earth and its community of life are untrammeled by man, where man himself is a visitor who does not remain. An area of wilderness is further defined to mean in this chapter an area of undeveloped Federal land retaining its primeval character and influence, without permanent improvements or human habitation, which is protected and managed so as to preserve its natural conditions and which (1) generally appears to have been affected primarily by the forces of nature, with the imprint of man's work substantially unnoticeable; (2) has outstanding opportunities for solitude or a primitive and unconfined type of recreation; (3) has at least five thousand acres of land or is of sufficient size as to make practicable its preservation and use in an unimpaired condition; and (4) may also contain ecological, geological, or other features of scientific, educational, or historical value.

Now the administration thinks it has found a loophole in the Alaska Lands Act that lets it ignore the congressional declaration that St. Matthew Island is part of the national wilderness system. It is giving away the island so an oil development staging center can be built on it. This is being done without any congressional approval or even consultation. It is being done without a single public hearing. It is being done without any study of the environmental impacts. And, as I am sure the courts eventually will hold, it is being done in violation of the Wilderness Act and the other laws of the United States.

But we should not have to wait for the courts to rule this action illegal. This administration has tried to go too far before, and Congress has stopped it. Congress has prevented the administration from leasing Outer Continental Shelf lands off the coast of California, where the environmental values clearly outweigh the energy values. Congress has prevented the administration from opening up our wilderness areas to oil and gas drilling. Now Congress should act to stop the giveaway of St. Matthew Island, which may be the worst abuse yet by the Department of the Interior under this administration.

Although the giveaway of St. Matthew Island is the most egregious example of the Department of the Interior's efforts to get rid of national wildlife refuge lands, it is far from the only example.

The Department is similarly in the final stages of negotiating another land exchange to turn over to another Alaska native regional corporation all of Middleton Island, another unit of the Alaska Maritime National Wildlife Refuge. Middleton Island is the breeding ground for hundreds of thousands of sea birds and thousands of sea lions and other marine mammals.

The Department has proposed an exchange with the Commonwealth of Virginia—an exchange which the State does not even seem to want—to give the State government a corridor to build a road through the Back Bay National Wildlife Refuge, largely for the convenience of people driving to North Carolina's Outer Banks. But Congress has said this area should be managed for the primary purpose of protecting its wildlife—which include one of the few nesting pairs of bald eagles in the Eastern United States—not for the convenience of tourists.

The Department of the Interior offered to give to the State of Texas the Federal lands on Matagorda Island, which are part of the Aransas National Wildlife Refuge and include critical habitat for the endangered whooping crane. In the face of the public outcry over this proposed giveaway, the Department negotiated with the State government an agreement for combined Federal/State management of the island. Legislation to ratify this agreement is now proceeding through both Houses of Congress—but the Department says the legislation is not needed, claiming that it has the authority on its own to turn over to a State government the responsibility of managing a national wildlife refuge.

The Department has said it is considering using this claimed authority to similarly turn over to the Kansas State government the management of Flint Hills National Wildlife Refuge, simply to reduce the Department's expenses. But this 18,500 acre is part of the habitat area for the largest remaining population of greater prairie chickens and in recent years has experienced a spectacular increase in bald eagle numbers. Ten years ago the eagle was an occasional visitor to the

refuge, with 10 to 30 sightings reported every year. But this year a total of 133 bald eagles have been reported.

The Secretary of the Interior tried to assign to the U.S. Geological Survey, instead of the Fish and Wildlife Service, the authority to manage the Arctic National Wildlife Refuge in Alaska, the crown jewel of our national wildlife refuge system, despite the clear statutory mandate in the National Wildlife Refuge Administration Act that refuges "shall be administered by the Secretary through the U.S. Fish and Wildlife Service." That effort of the Secretary was blocked by the U.S. district court in Alaska, which held in Trustees for Alaska against Watt that the Secretary cannot ignore such a clear congressional directive.

The other things this administration has considered doing to our wildlife refuges include trading away part of the Havasu National Wildlife Refuge in Arizona for the construction of a country club and marina, and leasing part of the Hawaiian National Wildlife Refuge as a commercial fishing base.

Mr. President, it is time for this to stop. Our national wildlife refuges should remain just that: national wildlife refuges. That is the simple purpose of the bill we are introducing today, the National Wildlife Refuge System Administration Act Amendments of 1983. Our legislation would allow the Department of the Interior to dispose of lands in a national wildlife refuge only if the lands are not part of the National Wilderness System, the National Wild and Scenic Rivers System, or the National Trails Systems, and are not under study for possible inclusion in those systems; if the Secretary determines, after notice and an opportunity for a public hearing, that the lands are no longer needed for the purposes for which Congress created the national wildlife refuge system; and if the Secretary gives Congress 30 days notice of the proposed conveyance. Our bill also would clarify that the Secretary is to manage national wildlife refuges, through the Fish and Wildlife Service, unless Congress determines otherwise on a case-by-case basis—as, for example, has been proposed with respect to Matagorda Island in Texas.

I urge Congress to act on this legislation speedily—while we still have national wildlife refuges to retain.

I ask unanimous consent to have the text of our bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1232

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Wildlife Refuge System Administration Act Amendments of 1983".

SEC. 2. The National Wildlife Refuge System Administration Act (Public Law 89-669), as amended, is amended—

(a) in section 4(a)(1), as amended (16 U.S.C. 668dd(a)(1))—

(1) by inserting "and managed" after "administered"; and

(2) by striking the period at the end of the first sentence and "With" in the second sentence and inserting in lieu thereof a comma and the following: "unless otherwise specified by an Act of Congress enacted after May 6, 1983, except that with";

(b) in section 4(a)(2), as amended (16 U.S.C. 668dd(a)(2)), by striking "(except" and all that follows through the end of paragraph (A) and inserting in lieu thereof the following: "except as provided in subsection (b)(4) and unless—

"(A) the Migratory Bird Conservation Commission approves the determination of the Secretary under subsection (b)(4)(A)(ii) that the lands to be conveyed are no longer needed for the purposes for which the System was established; and";

(c) in section 4(a)(3), as amended (16 U.S.C. 668dd(a)(3)), by striking clauses (ii) and (iii) and inserting in lieu thereof the following:

"(ii) the disposal, pursuant to the terms of any cooperative agreement referred to in subparagraph (B) of this paragraph, of any lands within any such area which were included in the System pursuant to that cooperative agreement; or

"(iii) the sale, exchange, or interchange of any lands within any such area under subsection (b)(4).."; and

(d) in section 4(b), as amended (16 U.S.C. 668dd(b))—

(1) by striking "and" at the end of paragraph (2);

(2) in paragraph (3) by inserting "(including, but only as provided in paragraph (4), lands within the System)" after "jurisdiction";

(3) in paragraph (3) by striking the period at the end thereof and inserting in lieu thereof a semicolon and "and"; and

(4) by inserting at the end thereof a new paragraph as follows:

"(4) to sell, exchange, or interchange by quitclaim deed all right, title, and interest of the United States in and to lands or interests in lands included in the System, and to accept as consideration for the lands sold, exchanged, or interchanged other lands, interest in lands, or cash payment, or any combination of such forms of consideration, which, in the case of conveyance by sale or exchange, is at least equal in value or, in the case of conveyance by interchange, is of approximately equal value, to the lands being conveyed by the Secretary, but only if—

"(A)(i) the lands to be conveyed are not components of the National Wilderness Preservation System, the National Wild and Scenic Rivers System, or the National Trails System and are not under study for possible inclusion in any such System;

"(ii) the Secretary determines, after notice and an opportunity for a hearing, the lands to be conveyed are no longer needed for the purposes for which the System was established; and

"(iii) the Secretary has provided thirty days notice of the proposed sale, exchange, or interchange to the Congressional delegation of the State or States in which the lands to be conveyed are located and to the Senate Committee on Environment and Public Works and to the House of Representatives Committee on Merchant Marine and Fisheries; or

"(B) the sale, exchange, or interchange is authorized by an Act of Congress enacted after May 6, 1983.

The only lands and interests in lands in the System that may be exchanged under section 1302(h) of the Alaska National Interest Lands Conservation Act of 1980 (16 U.S.C. 3192(h)) are those lands and interests in lands described in this subsection. This subsection shall not be construed as authorizing the Secretary to convey, transfer, assign, or relinquish his authority and responsibility to administer and manage through the United States Fish and Wildlife Service lands within the System for which the United States retains title.".●

By Mr. PRYOR (for himself, Mr. HEINZ, Mr. RIEGLE, and Mr. PELL):

S. 1233. A bill to prohibit the drugging or numbing of racehorses and related practices, and to amend title 18, United States Code, to prohibit certain activities conducted in interstate or foreign commerce relating to such practices; to the Committee on the Judiciary.

PROHIBITION OF DRUGGING OR NUMBING OF RACEHORSES

● Mr. PRYOR. Mr. President, today I am reintroducing legislation to establish Federal minimum standards to prohibit the drugging or numbing of race horses.

This bill was the subject of hearings before the Criminal Justice Subcommittee of the Judiciary Committee during the last Congress. Based on the testimony presented at those hearings, I am convinced that the misuse of drugs in horse racing is a serious national problem in search of a solution. The use of potent, illegal drugs—often obtained in other countries—has harmed the integrity of racing. The misuse of legitimate drugs to keep lame horses on the track despite their infirmities risks the health and life of horses and jockeys.

Nearly all of the elements of the racing industry want to end abusive drugging practices. Many want a return to a regimen of nothing more than hay, oats, and water. Yet, despite this desire, the industry's efforts to unify the patchwork quilt of State regulation, and to improve State-level detection and enforcement capabilities, remain incomplete.

The legislation I introduce today provides a solution to this problem that nevertheless respects the strong interest each State has in the regulation of its racing industry. The bill would authorize the establishment of minimum Federal standards to regulate the use of drugs in race horses, and would create an effective detection and enforcement program. States whose drug-regulation laws and programs met or exceeded the Federal standards would be exempt from the bill's provisions. Enforcement of the bill would be delayed for 2 years so that the States would have an oppor-

tunity to bring their laws into conformance with the Federal standards. Only if a State failed to act would the Federal Government step in.

Horse racing is a huge interstate business. Horses and jockeys travel from State to State to compete. In fact, horses may be trained in one State and raced in as many as 30. As a result, there is a compelling need for drugging rules and enforcement to be uniform throughout the Nation.

The National Association of State Racing Commissioners has recognized that need, as have many other elements of the industry. Regrettably, their efforts have not been able to bring about uniformity. The modest purpose of this legislation is to achieve that goal by creating a Federal framework in which those States that are committed to ending drugging abuses can act.

The horse that runs on an injured limb; the jockey who risks his life riding an unsound mount; the racing fan whose sport is compromised by drug misuse; all deserve the protection that this legislation would help to provide.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1233

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

DEFINITIONS

SECTION 1. As used in this Act—

(1) the term "Administrator" means the Administrator of the Drug Enforcement Administration, Department of Justice;

(2) the term "drugging," when used with respect to a horse entered in a horserace, means administering to a racehorse of any substance, foreign to the natural horse, prior to the start of a horserace;

(3) the term "numbing," when used with respect to a horse entered in a horserace, means the applying of ice, dry ice, a cold pack, or a chemical or mechanical freezing device to the limbs of a racehorse within ten hours before the start of such horserace, or a surgical or other procedure, which was, at any time, performed in which the nerves of such horse were severed, destroyed, or removed;

(4) the term "horserace" means any race of equine animals in any State in which parimutuel betting on the outcome of such race is permitted in such State;

(5) the term "entered," when used with respect to a horserace, means that a horse has been registered with the racing secretary or other authorized racing official as a participant in a specified race, and not withdrawn prior to presentation of the horse for inspection and testing pursuant to section 6(a).

(6) the term "State" means any of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, and the Trust Territory of the Pacific Islands.

FINDINGS

SEC. 2. The Congress finds that—

(1) the practice of drugging or numbing a racehorse prior to a horserace—

(A) corrupts the integrity of the sport of horseracing and promotes criminal fraud in such sport,

(B) misleads the wagering public and those desiring to purchase such horse as to the condition of such horse,

(C) poses an unreasonable risk of serious injury or death to the rider of such horse and to the rider of other horses competing in the same race, and

(D) is cruel and inhumane to the horse so drugged or numbed;

(2) the practice of drugging or numbing a racehorse adversely affects and burdens interstate commerce; and

(3) criminal penalties and other sanctions are necessary in order to prevent and eliminate such practices.

PROHIBITED CONDUCT

SEC. 3. The following conduct is prohibited:

(1) the entering of a horse in a horserace by the trainer or owner of such horse if such trainer or owner knows or if by the exercise of reasonable care such trainer or owner should know that such horse is drugged or numbed;

(2) the drugging or numbing of a racehorse with knowledge or with reason to believe that such horse will compete in a horserace while so drugged or numbed: *Provided*, That the Administrator may by regulation establish permissible trace levels of substances foreign to the natural horse that he determines to be innocuous;

(3) the willful failure by the operator of a horseracing facility to disqualify a horse from competing in a horserace if such operator has, in accordance with section 6(a) of this Act, been notified that such horse is drugged or numbed, or was not properly made available for tests or inspections as required under such section; and

(4) the willful failure by the operator of a horseracing facility to prohibit a horse from racing if such operator has, in accordance with section 5(f) of this Act, been notified that such horse has been suspended from racing.

PENALTIES AND ENFORCEMENT POWERS

SEC. 4. (a) CRIMINAL PENALTIES.—(1)(A) Except as provided in subparagraph (B) of this paragraph, any person who violates any provision of section 4 of this Act shall, upon conviction thereof, be fined not more than $10,000, or imprisoned for not more than one year, or both.

(B) Any person who violates section 4 of this Act and who has been previously convicted for a violation of such section shall be fined not more than $25,000, or imprisoned for not more than three years, or both, upon conviction.

(2)(A) Whoever forcibly assaults, resists, opposes, impedes, intimidates, or interferes with a person while such person is engaged in or on account of the performance by such person of any official duties delegated to such person under this Act shall be fined not more than $25,000, or imprisoned not more than three years, or both.

(B) Whoever, in the commission of any of the acts referred to in subparagraph (A) of this paragraph, uses, or threatens to use a deadly or dangerous weapon shall be fined not more than $50,000, or imprisoned not more than ten years, or both.

(C) Whoever kills a person while such person is engaged in or on account of the performance by such person of any official duties of such person under this Act shall be punished as provided in sections 1111 and 1112 of title 18 of the United States Code.

(3) Whoever knowingly makes, or causes to be made, a false entry or statement in a report or account required to be made under this Act; knowingly fails to make full, true, and correct entries in such records; removes any such documentary evidence out of the jurisdiction of the United States; mutilates, alters, or by any other means falsifies any such documentary evidence; or refuses to submit any documentary evidence to the Administrator for inspection and copying shall be guilty of an offense against the United States, and upon conviction thereof shall be fined not more than $25,000, or imprisoned for not more than three years, or both.

(b) DISQUALIFICATIONS OF OFFENDERS.—(1) Except as provided in paragraph (2) of this subsection, any person who violates any provision of this Act shall, upon conviction thereof, by order of the Administrator, be disqualified from entering a horse in a horserace, operating a horseracing facility, or performing for gain any service rendered in connection with horseracing, for a period not to exceed one year.

(2) Any person who violates any provision of this Act and who has been previously convicted for a violation of such Act shall, by order of the Administrator, be disqualified from entering a horse in a horserace, operating a horseracing facility, or performing for gain any service rendered in connection with horseracing, for a period not to exceed five years.

(c) CIVIL PENALTIES; REVIEW AND ENFORCEMENT.—(1)(A) Any person who knowingly violates an order of disqualification issued under subsection (b) of this section shall be liable to the United States for a civil penalty of not more than $15,000 for each such violation.

(B) The operator of a horseracing facility which knowingly allows a person to enter a horse in a horserace or perform for gain any service rendered in connection with horseracing in violation of an order of disqualification entered under subsection (b) of this section shall be liable to the United States for a civil penalty of not more than $15,000 for each such violation.

(2) No civil penalty shall be assessed against any person under paragraph (1) of this subsection unless such person is given notice and an opportunity for a hearing before the Administrator with respect to such violation. The amount of any such civil penalty shall be assessed by the Administrator by written order. In determining the amount of such penalty, the Administrator shall take into account all factors relevant to such determination, including the nature, circumstances, extent, and gravity of the prohibited conduct, and, with respect to the person found to have engaged in such conduct, the degree of culpability, any history of prior offenses, ability to pay, effect on ability to continue to do business, and such other matters as justice may require.

(3) Any person as to whom a civil penalty is assessed under paragraph (1) of this subsection may obtain review in the court of appeals of the United States for the circuit in which such person resides or has his place of business or in the United States Court of Appeals for the District of Columbia by filing a notice of appeal in such court within thirty days after the date of such order and by simultaneously sending a copy of such notice by certified mail to the Ad-

ministrator. The Administrator shall promptly file in such court a certified copy of the record upon which such violation was found and such penalty assessed, as provided under section 2112 of title 28 of the United States Code. The findings of the Administrator shall be set aside if found to be unsupported by substantial evidence.

(4) If a person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, or, if an appeal is taken, after the appropriate court of appeals has entered final judgment in favor of the Administrator, the Administrator shall refer the matter to the Attorney General, who shall recover the amount assessed in any appropriate district court of the United States. In such recovery action, the validity and appropriateness of the final order imposing the civil penalty shall not be subject to review.

(d) SUSPENSION OF HORSE FROM RACING.—(1) Any racehorse found to have been drugged or numbed in violation of this Act shall, subject to paragraph (2) of this subsection, be suspended from competing in any horserace for a period of six months for the first infraction, and for a period of not less than twelve months for each subsequent infraction.

(2) No racehorse shall be suspended under paragraph (1) of this subsection unless the owner of such horse is given notice and an opportunity for a hearing before the Administrator within two weeks after the date on which the infraction referred to in such paragraph is discovered. The appeal procedure set forth in subsection (c)(3) of this section shall apply with respect to any suspension order made in a hearing conducted under this paragraph.

(e) NOTIFICATION OF SUSPENSIONS AND DISQUALIFICATIONS.—Notification of all suspensions and disqualifications under this section shall be transmitted to the operator of each horseracing facility in accordance with such procedures as the Administrator shall by regulation prescribe.

(f) MODIFICATION OF PENALTIES.—The Administrator may, in his discretion, compromise, modify, or remit, with or without conditions, any civil penalty, disqualification, or suspension assessed under this subsection.

(g) PRODUCTION OF WITNESSES, BOOKS, PAPERS, AND DOCUMENTS; DEPOSITIONS; FEES; JURISDICTION.—(1) The Administrator may require by subpena the attendance and testimony of witnesses or the production of books, papers, or other documentary evidence relating to any matter under investigation or the subject of a proceeding under this Act. Witnesses summoned before the Administrator shall be paid the same fees and mileage as are paid witnesses in the courts of the United States.

(2) The attendance of witnesses and the production of books, papers, and documents, may be required at any designated place from any place in the United States. In case of refusal to obey a subpena served upon a person under this Act, the Administrator, or any party to a proceeding held before the Administrator under this Act, may petition the district court of the United States for the district in which such person is found, resides, or transacts business, to issue an order requiring such person to comply with such subpena.

(3) The Administrator may order testimony to be taken by deposition under oath in any proceeding or investigation pending before him, at any stage or such proceeding or investigation. A deposition may be taken before any person designated by the Administrator who has power to administer oaths. The Administrator may require the production of relevant books, papers, or other documentary evidence at the taking of such a deposition.

(4) Witnesses whose depositions are taken and the persons taking them shall be entitled to the same fees as are paid for like services in the courts of the United States.

(5) The United States district courts, the District Court of Guam, the District Court of the Virgin Islands, the highest court of American Samoa, and the United States courts of the other territories are vested with jurisdiction specifically to enforce, and to prevent and restrain violations of this Act, and shall have jurisdiction in all other kinds of cases arising under this Act.

(h) DETENTION OF HORSES; SEIZURE AND CONDEMNATION OF EQUIPMENT.—(1) A person appointed under section 6 of this Act may detain (for a period not to exceed twenty-four hours) for examination, testing, or the taking of evidence, any horse at a horserace which is drugged or numbed, or which such veterinary doctor, based upon the results of an inspection, test, or other procedure conducted under such section, has probable cause to believe is drugged or numbed. Any horse which is detained subject to this paragraph shall not, during such detention, be moved from the place where such horse is so detained except as authorized by such veterinary doctor.

(2) Any equipment, device, paraphernalia, or substance used in violation of any provision of this Act or any regulation issued thereunder, or which contributed to the drugging or numbing of any horse at or prior to any horserace, shall be liable to be proceeded against by process of libel for the seizure and condemnation of such equipment, device, paraphernalia, or substance, in any United States district court within the jurisdiction in which such equipment, device, paraphernalia, or substance is found. Such proceedings shall conform as nearly as possible to proceedings in rem in admiralty.

INSPECTIONS, TESTS, AND RECORDS

SEC. 5. (a) APPOINTMENT OF PERSONNEL.—For purposes of detecting violations of this Act, the Administrator shall appoint qualified veterinary doctors, biochemists, and such other personnel as the Administrator considers necessary. Such veterinary doctors, biochemists, and other personnel shall, in accordance with such procedures as the Administrator shall by regulation prescribe—

(1) analyze the blood sample which shall be taken from each horse entered in a horserace no sooner than six hours and no later than four hours before the start of such horserace to determine if such horse has been drugged;

(2) examine each horse entered in a horserace within one hour before the start of such horserace to determine if such horse has been numbed;

(3) analyze samples of urine and blood which shall be taken immediately after a horserace from horses that competed in such race, to determine if such horses have been drugged;

(4) perform such other similar tests and inspections as the Administrator considers necessary to carry out this Act;

(5) store blood and urine samples in a frozen state or in any other appropriate manner so that they may be preserved for future analysis.

The identity of any racehorse determined under this subsection to be drugged or numbed shall, in accordance with such procedures as the Administrator shall by regulation prescribe, be reported to the operator of the horseracing facility, the Administrator, and the appropriate United States attorney. The identity of any racehorse not made available, in accordance with such regulations as the Administrator shall prescribe, for any test or inspection required under this subsection shall likewise be reported to such operator.

(b) TESTING FACILITIES.—(1) The operator of a horseracing facility shall, in accordance with such regulations as the Administrator shall prescribe, provide the Administrator with adequate space and facilities in order that the inspections, tests, and other procedures described in subsection (a) of this section may be performed. Access to such space and facilities shall be restricted in accordance with such regulations as the Administrator shall prescribe.

(2) Any horseracing facility which fails to comply with paragraph (1) of this subsection shall, by order of the Administrator, be disqualified from holding horseraces while such facility remains in noncompliance with such paragraph. The operator of a horseracing facility which violates such an order shall be liable to the United States for a civil penalty of not less than $10,000, and not more than $250,000 for each day of such noncompliance.

(3) The provisions of sections 5 (c) and (f) of this Act, relating to the assessment, review, collection, and compromise, modification, or remission of a civil penalty apply with respect to civil penalties under this subsection.

(c) RECORDKEEPING AND REPORTING REQUIREMENTS; AVAILABILITY OF RECORDS.—The operator of any horseracing facility shall establish and maintain such records, make such reports, and provide such information as the Administrator may by regulation reasonably require for the purpose of implementing this Act or to determine compliance with this Act. Upon request of an officer or employee duly designated by the Administrator, such operator shall permit entry at all reasonable times for the inspection and copying (on or off the premises) of records required to be maintained under this subsection.

APPROPRIATE USE OF EMPLOYEES OF DRUG ENFORCEMENT ADMINISTRATION AND OF CONSENTING STATES; RESEARCH STUDIES

SEC. 6. (a) The Administrator, in carrying out this Act, shall utilize, to the maximum extent practicable, the existing personnel and facilities of the Drug Enforcement Administration, Department of Justice. The Administrator is further authorized to utilize the officers and employees of any State, with its consent, and with or without reimbursement, to assist him in carrying out the provisions of this Act.

(b) The Administrator shall conduct research studies to develop methods and techniques to identify drugging and numbing practices. The Administrator may contract for such studies with universities, schools of veterinary medicine or other institutions or individuals having special expertise in the detection of drugging and numbing.

STATE EXEMPTIONS

SEC. 7. At the request of the chief executive of any State, the Administrator shall exempt that State from the operation of this Act if he finds that the State has enacted and put into operation a comparable program to prohibit the drugging and numbing of racehorses. In determining whether the State program is comparable,

the Administrator shall examine the practices prohibited by State law, the inspections and tests required, and the penalties imposed. The Administrator shall review the operations of each exempted State's program on an annual basis and shall revoke the exemption if the program fails to meet the objectives of this Act. The assessment provided for in section 11 of this Act shall not be levied in any exempted State.

REPORTS TO CONGRESS

SEC. 8. On or before the expiration of eighteen calendar months following July 1, 1980, and every twenty-four calendar months thereafter, the Administrator shall submit to Congress a report upon the matters covered by this Act, including enforcement and other actions taken thereunder, together with such recommendations for legislative and other action as the Administrator deems appropriate.

AUTHORIZATION OF APPROPRIATION AND FEES

SEC. 9. There are authorized to be appropriated for the first two fiscal years beginning after the date of enactment of this Act such sums as are necessary to carry out this Act not to exceed $5,000,000 for the development of a Federal enforcement program. For each fiscal year thereafter the Administrator may, in order to meet the costs necessary to carry out this Act, assess a daily fee for each racing day upon the operation of every horseracing facility subject to the provisions of this Act. Such fees may vary to take into account the size of the facility, and shall be assessed and collected in accordance with such procedures as the Administrator shall by regulation prescribe. No funds shall be collected nor shall any be spent to carry out the purposes of this Act for any fiscal year beginning more than ten years after the date of the enactment of this Act.

AMENDMENT TO TITLE 18 OF THE UNITED STATES CODE

SEC. 10. Section 1952(b) of title 18, United States Code, relating to interstate and foreign travel or transportation in aid of racketeering enterprise, is amended by inserting immediately before the period, "or any act committed in violation of section 3 of the Act entitled 'An Act to prohibit the drugging or numbing of racehorses and related practices, and to amend title 18, United States Code, to prohibit certain activities conducted in interstate or foreign commerce relating to such practices', effective on the first day of the first fiscal year beginning more than two fiscal years after the date of enactment of such Act".

EFFECTIVE DATE

SEC. 11. The prohibitions in this Act including section 10 shall become effective and enforceable on the first day of the first fiscal year beginning more than two fiscal years after the date of enactment of this Act in order to allow the States to develop programs qualifying for State exemptions under section 7 of this Act.

By Mr. BOSCHWITZ (for himself, Mr. SYMMS, Mr. LAXALT, Mr. DECONCINI, Mr. RANDOLPH, Mr. GORTON, Mr. NUNN, Mr. BOREN, Mr. DIXON, Mr. HELMS, Mr. SASSER, Mr. GLENN, Mr. DURENBERGER, Mr. FORD, Mr. RUDMAN, Mr. INOUYE, Mr. MITCHELL, Mr. PRYOR, Mr. EAST, Mr. CHILES, Mr. MATTINGLY, Mr. COCHRAN, Mr. MOYNIHAN, Mr. BUMPERS, and Mr. THURMOND):

S.J. Res. 97. Joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of members of the Armed Forces of the United States and the allied forces who served in the Korean war; to the Committee on Rules and Administration.

KOREAN WAR MEMORIAL

● Mr. BOSCHWITZ. Mr. President, today I am introducing a resolution to authorize the erection of a memorial to honor those brave men and women who served in the Armed Forces in the Korean war.

The United States joined with 16 Allied Nations 30 years ago to protect the freedom of South Korea from Communist aggression. Nearly 6 million Americans fought in Korea—fighting for the democratic freedoms this country cherishes. 100,000 Americans were wounded in the fighting and 54,000 were killed. Their sacrifice deserves recognition.

Today over 5.7 million Korean war veterans are living in the United States, but their dedication to protecting freedom has largely been ignored. If the television show M.A.S.H. had not been on the air—a favorate of mine I must admit—most people in the United States would probably have forgotten our successful efforts to preserve South Korea's sovereignty.

My legislation seeks to correct this lack of recognition by authorizing the erection of a Korean war memorial on public grounds in the District of Columbia or its environs.

A committee has already been formed to raise the funds necessary to construct such a memorial. Former President Gerald R. Ford, Mrs. Douglas MacArthur, Gen. Matthew Ridgeway, Senator PAUL LAXALT, Rev. Theodore Hesberg, and Speaker of the House TIP O'NEILL are, among others, members of the memorial's national sponsoring committee.

I wish to emphasize that the memorial will be built without the use of public funds. The Secretary of the Interior, the National Commission on Fine Arts, and the National Capitol Planning Commisison will select the site and approve the design. Maintenance will be provided by the Department of the Interior or the government of the District of Columbia, depending on the location of the memorial. But funds to build the memorial will come solely from private sources.

I hope the Senate takes this opportunity to honor those who served so well in the Korean war. I urge my colleagues to join with me in supporting this resolution in recognition of the Korean war veteran.●

ADDITIONAL COSPONSORS

S. 113

At the request of Mr. ABDNOR, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 113, a bill to amend the Internal Revenue Code of 1954 to repeal the highway-use tax on heavy trucks and to increase the tax on diesel fuel used in heavy trucks.

S. 790

At the request of Mr. STEVENS, the name of the Senator from Washington (Mr. GORTON) was added as a cosponsor of S. 790, a bill to amend the Commodity Credit Corporation Charter Act and section 32 of the act of August 24, 1935, to include fish and fish products within the meaning of agricultural commodities.

S. 869

At the request of Mr. HEINZ, the name of the Senator from Illinois (Mr. DIXON) was added as a cosponsor of S. 869, a bill to amend the the Export-Import Bank Act of 1945.

S. 911

At the request of Mr. CHILES, the name of the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 911, a bill to establish a Commission to make recommendations for changes in the role of nonparty multicandidate political action committees in the financing of campaigns of candidates for Federal office.

S. 1004

At the request of Mr. D'AMATO, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1004, a bill to amend the Federal employees health benefits plan provisions of chapter 89, title 5, United States Code to assure adequate mental health benefit levels and otherwise limit benefit reductions.

S. 1043

At the request of Mr. D'AMATO, the name of the Senator from North Dakota (Mr. ANDREWS) was added as a cosponsor of S. 1043, a bill to amend the Internal Revenue Code of 1954 to provide tax incentives for small business.

S. 1093

At the request of Mr. DODD, the name of the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1093, a bill to provide for research on the evaluation and assessment of education in mathematics and sciences.

S. 1113

At the request of Mr. D'AMATO, the name of the Senator from Kentucky (Mr. HUDDLESTON) was added as a cosponsor of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1159

At the request of Mr. HATFIELD, the names of the Senator from Ohio (Mr. METZENBAUM), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 1159, a bill to amend the Export Administration Act of 1979 to extend the provisions relating to the export of domestically produced crude oil.

SENATE JOINT RESOLUTION 77

At the request of Mr. DOLE, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of Senate Joint Resolution 77, a joint resolution designating "National Animal Agriculture Week."

SENATE JOINT RESOLUTION 83

At the request of Mr. HEINZ, the names of the Senator from North Carolina (Mr. HELMS), the Senator from Illinois (Mr. DIXON), the Senator from South Carolina (Mr. THURMOND), and the Senator from West Virginia (Mr. BYRD) were added as cosponsors of Senate Joint Resolution 83, a bill to recognize Senior Center Week during Senior Citizen Month as proclaimed by the President.

SENATE JOINT RESOLUTION 94

At the request of Mr. MATTINGLY, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of Senate Joint Resolution 94, a joint resolution to authorize and request the President to designate May 8, 1983 to June 19, 1983, as "Family Reunion Month."

SENATE CONCURRENT RESOLUTION 21

At the request of Mr. COHEN, the names of the Senator from Vermont (Mr. STAFFORD), the Senator from Ohio (Mr. METZENBAUM), the Senator from Michigan (Mr. RIEGLE), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Arizona (Mr. DECONCINI) were added as cosponsors of Senate Concurrent Resolution 21, a concurrent resolution expressing the sense of the Congress respecting the administration of title X of the Public Health Service Act.

SENATE RESOLUTION 72

At the request of Mr. HEINZ, the name of the Senator from Oklahoma (Mr. NICKLES) was added as a cosponsor of Senate Resolution 72, a resolution to assure Israel's security, to oppose advance arms sales to Jordan, and to further peace in the Middle East.

SENATE RESOLUTION 133

At the request of Mr. MOYNIHAN, the name of the Senator from Colorado (Mr. HART) was added as a cosponsor of Senate Resolution 133, a resolution to express the sense of the Senate in support of "Solidarity Sunday."

SENATE CONCURRENT RESOLUTION 32—RAISING THE AGE FOR DRINKING AND PURCHASING ALCOHOL

Mr. SPECTER (for himself, Mr. BURDICK, Mr. PRYOR, Mr. DOLE, and Mr. DANFORTH) submitted the following concurrent resolution; which was referred to the Committee on the Judiciary:

S. CON. RES. 32

Whereas of the 25,000 persons who die each year in drunk driving accidents, 5,000 are teenagers and almost 35 percent are between the ages of 16 and 24;

Whereas almost 60 percent of fatally injured teenage drivers had alcohol in their blood;

Whereas life expectancy in America has improved over the past 75 years for every age group, except 15-to 24-year-olds, and the leading single cause of death for this age group is drunk driving;

Whereas available data shows a direct correlation between minimum drinking age and alcohol-related accidents in the 18-to 21-year-old group;

Whereas numerous empirical investigations have shown significant increases in motor vehicle crash involvement among young drivers after reductions in the drinking age;

Whereas as a result of this emerging research, a number of States in recent years raised the drinking age; and

Whereas the National Transportation Safety Board has urged that the legal minimum age for drinking and purchasing alcohol be raised to 21 years nationwide in an effort to cut the highway death toll from drunken driving: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the age for drinking and purchasing all alcoholic beverages should be raised to 21 years in those 34 States and the District of Columbia where the drinking age is now less than 21 years.

Mr. SPECTER. Mr. President, I rise today to reintroduce a sense-of-the-Congress resolution concerning the legal minimum age for drinking and purchasing alcohol. This resolution was introduced at the end of the last Congress. The essence of this resolution expresses the sense of the Congress that the legal age for drinking should be raised to the age of 21 in those 34 States and the District of Columbia where the drinking age is now less than 21. This resolution follows the recommendation of the National Transportation Safety Board, which has urged that the minimum age for drinking and purchase of liquor be raised uniformly in the United States to 21 years.

The underlying facts are overwhelming. Of the 25,000 persons who die each year in drunk-driving accidents, some 5,000 are teenagers. Of the fatally injured teenagers in automobile accidents, some 60 percent of those have alcohol in their blood. In the course of the past 75 years, the life expectancy in the United States had increased for every group except one age bracket, and that is in the 15- to 24-year-old category. The leading single cause of death in this group was drunk driving.

The legal age for drinking had generally been 21 until a series of State laws were changed in the 1970's to reduce that age in accordance with general efforts to give full legal rights to those 18 and above. In light of the empirical evidence which we have, there is good reason at this time to reverse that trend and make the legal age 21, as it had been for so long in the past.

It is my view that it would be most appropriate for the U.S. Senate to enact this resolution to express our sense and join with the House of Representatives in urging that the States which have jurisdiction over this issue raise the legal age for drinking and purchase of alcohol to 21 years of age.

SENATE RESOLUTION 134—REFERRING THE BILL S. 1229 TO THE COURT OF CLAIMS

Mr. COHEN submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 134

Resolved, That S. 1229 entitled "A bill for the relief of Richard C. Rianhard of Bar Harbor, Maine" now pending in the Senate, together with all the accompanying papers, is referred to the chief judge of the United States Claims Court. The chief judge shall proceed according to the provisions of sections 1492 and 2509 of title 28, United States Code, and report back to the Senate, at the earliest practicable date, giving such findings of fact and conclusions that are sufficient to inform the Congress of the nature and character of the demand as a legal or equitable claim against the United States or a gratuity, and the amount, if any, legally or equitably due from the United States to the claimant.

SENATE RESOLUTION 135—RELATIVE TO THE WILLIAMSBURG SUMMIT

Mr. PERCY (for himself, Mr. DOMENICI, Mr. BRADLEY, Mr. HEINZ, Mr. DIXON, Mr. DANFORTH, Mr. DODD, Mr. CHAFEE, Mr. LEVIN, and Mr. MATTINGLY) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 135

Whereas the continuing misalinement of major currencies with the United States dollar is a principal factor in undermining United States trade competitiveness and in depressing the United States economy over the past 2 years; and

Whereas the consequence has been the loss of many hundreds of thousands of jobs, severe dislocation in many areas of the United States economy, and the generation of protectionist pressures; and

Whereas persisting disparities in interest rate levels between the United States and other key currency countries have contributed heavily to these ongoing exchange rate misalinements; and

Whereas both these maladjustments result in major part from inadequate coordi-

nation and harmonization of general economic policies among the United States and other key currency countries; and

Whereas European and Japanese officials have indicated a desire to discuss remedies for these problems; and

Whereas the forthcoming Williamsburg Summit conference at the end of May will bring together the leaders of key currency countries: Now, therefore, be it

Resolved, That it is the sense of the Senate that: First, the President should arrange to have included among the highest priority themes of the Williamsburg Summit to seek a consensus among the participants on the need to improve the coordination of economic policies among Summit countries, aimed at reducing disparities in economic policies, interest rates, and exchange rates between the major industrial nations; at stemming current dangerous protectionist pressures; and at hastening a healthy and sustained recovery of industrial economies and of international trade.

Second, such consensus should include announcement of a mechanism or procedure for such consultation on a close and continuing basis so long as important protectionist pressure and increased governmental intervention in international trade remains a danger to the world trade system; and

Third, such consensus should also include provision for an early meeting of Summit country Ministers of Finance and the United States Secretary of the Treasury to consider steps to achieve better alinement between the interest rates and major currencies and to make public the objectives of such steps; and

Fourth, the President should arrange, in conjunction with the Williamsburg Summit, bilateral discussions with the Prime Minister of Japan to initiate special efforts to bring about consensus and joint action to achieve the earliest possible further realinement of the yen and dollar exchange rates.

Mr. PERCY. Mr. President, I am submitting today a resolution on a matter of great importance for the United States and for our major trading partners among both industrial and developing nations.

At stake are hundreds of thousands of American jobs, billions of dollars of U.S. exports, and the rescue of the world economy from a perilous overhang of excessive indebtedness and protective trade measures. In effect, this resolution asks the President to seek agreement by the leading nations to coordinate economic policies so as to remedy misalinement of interest and exchange rates and to hasten a healthy recovery of the world economy. Otherwise we face a real danger that the international economic system may come crashing down in a tide of payment deficits, unpaid debts, and defensive trade measures.

At a hearing held by the Foreign Relations Committee last month, we heard compelling statements of the critical importance of this issue. C. Fred Bergsten, of the International Economic Institute, stated before the committee that, "The continuing substantial misalinement of the dollar exchange rate, particularly vis-a-vis the yen, remains the most critical trade and international economic problem currently facing the United States."

He pointed out that the decline in net U.S. exports resulting from dollar overvaluation in 1981–82 accounted for over two-thirds of the decline in U.S. gross national product during that period.

Lee Morgan, chairman of the Caterpillar Tractor Co., speaking on behalf of the Business Roundtable, emphasized that exchange rates are not properly reflecting trade competitiveness and that this is "influencing protectionist sentiments that are growing in the world."

The importance the business community ascribes to this issue is well illustrated by the letter I received from Alexander Trowbridge, president of the National Association of Manufacturers, which states:

As you know, NAM represents 80% to 85% of U.S. manufacturing output. The exchange rate misalinement with the yen is the number one issue on the minds of corporate leaders who must compete head-to-head with Japan in this market, third country markets, or for a share of the Japanese market.

NAM strongly supports you and the Foreign Relations Committee approach in addressing the exchange rate issue with Japan in the manner you propose.

Mr. President, I ask unanimous consent that the letter from NAM President Trowbridge be included in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF MANUFACTURERS,
Washington, D.C., May 4, 1983.

Hon. CHARLES H. PERCY,
Chairman, Senate Foreign Relations Committee, Senate Dirksen Office Building, Washington, D.C.

DEAR SENATOR PERCY: Your proposed sense-of-the-Congress resolution that the United States Government should raise the exchange rate issue in the context of the yen-dollar misalignment at the Williamsburg summit is a very constructive initiative. NAM has raised this issue with the Administration in pre-summit discussions but has found the Administration pre-occupied with "proving" that exchange intervention never works.

As you know, NAM represents about 80 percent to 85 percent of U.S. manufacturing output. The exchange rate misalignment with the yen is the number one issue on the minds of corporate leaders who must compete head-to-head with Japan in this market, third country markets, or for a share of the Japanese market.

We find the formulation of your resolution—relating macro-economic policies, interest rates policies and exchange rate policies among the summit countries—as a sound way of approaching the exchange rate issue. The specific follow-up approach with Japan thus becomes a logical step within an appropriate international framework, including a role for the International Monetary Fund.

NAM strongly supports you and the Foreign Relations Committee approach in addressing the exchange rate issue with Japan in the manner you propose. Your leadership is appreciated.

Sincerely,

A.B. TROWBRIDGE,
President.

Mr. PERCY. Mr. President, a Summit understanding, such as this resolution proposes, is not an empty gesture nor wishful thinking, because we see abundant signs that European and Japanese officials are deeply concerned and would like to explore such an understanding. For the United States to respond positively, or better still, to lead, will send the right signal to partners looking for cooperative solutions.

This resolution comes to the floor with an impressive array of support which has come forward in just 3 days since I first offered if for cosponsorship. Joining me in submitting it to the Senate are my distinguished colleagues from both sides of the isle, including Senators BRADLEY, CHAFEE, DANFORTH, DODD, DOMENICI, DIXON, HEINZ, LEVIN, and MATTINGLY. In addition, we have seen a rapid tide of support from the private sector in the same brief period, including the Business Roundtable, Emergency Committee for American Trade, President's Export Council, Motor Vehicle Manufacturers Association, the Machine Tool Builders' Association and the National Association of Manufacturers.

I call upon all of my colleagues to give this resolution your earliest and utmost attention so that we may signal clearly to all the leaders of the Summit countries the importance of resolving this critical world problem.

AMENDMENTS SUBMITTED

CONGRESSIONAL BUDGET RESOLUTION

DOMENICI AMENDMENT NO. 1239

Mr. DOMENICI (for himself, Mr. RUDMAN, Mr. DURENBERGER, and Mr. ABDNOR) proposed an amendment to the concurrent resolution (S. Con. Res. 27) revising and replacing the congressional budget for the U.S. Government for the fiscal year 1983, and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986; as follows:

In lieu of the language proposed to be inserted, insert the following:

On page 3, beginning with line 10, strike out through line 23 on page 16 and insert in lieu thereof the following:

(2) The appropriate levels of total new budget authority are as follows:

Fiscal year 1983: $875,925,000,000.

Fiscal year 1984: $910,100,000,000.

Fiscal year 1985: $982,575,000,000.

Fiscal year 1986: $1,048,900,000,000.

(3) The appropriate levels of total budget outlays are as follows:

Fiscal year 1983: $807,325,000,000.

Fiscal year 1984: $850,000,000,000.
Fiscal year 1985: $910,675,000,000.
Fiscal year 1986: $964,400,000,000.

(4) The amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1983: $204,000,000,000.
Fiscal year 1984: $163,500,000,000.
Fiscal year 1985: $147,400,000,000.
Fiscal year 1986: $133,600,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1983: $1,383,900,000,000.
Fiscal year 1984: $1,591,300,000,000.
Fiscal year 1985: $1,789,400,000,000.

Fiscal year 1986: $1,980,600,000,000, and the amounts by which the temporary statutory limits) on such debt should be accordingly increased are as follows:

Fiscal year 1983: $93,700,000,000.
Fiscal year 1984: $207,400,000,000.
Fiscal year 1985: $198,100,000,000.
Fiscal year 1986: $191,200,000,000.

(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:
(A) New direct loan obligations, $55,400,000,000.
(B) New loan guarantee commitments, $94,500,000,000.

Fiscal year 1984:
(A) New direct loan obligations, $48,200,000,000.
(B) New loan guarantee commitments, $94,500,000,000.

Fiscal year 1985:
(A) New direct loan obligations, $48,100,000,000.
(B) New loan guarantee commitments, $97,400,000,000.

Fiscal year 1986:
(A) New direct loan obligations, $40,700,000,000.
(B) New loan guarantee commitments, $101,000,000,000.

(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

(1) National Defense (050):

Fiscal year 1983:
(A) New budget authority, $244,100,000,000.
(B) Outlays, $214,300,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

Fiscal year 1984:
(A) New budget authority, $267,000,000,000.
(B) Outlays, $241,500,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

Fiscal year 1985:
(A) New budget authority, $299,500,000,000.
(B) Outlays, $270,700,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

Fiscal year 1986:
(A) New budget authority, $334,800,000,000.
(B) Outlays, $300,000,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1983:
(A) New budget authority, $24,900,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $11,700,000,000.
(D) New loan guarantee commitments, $9,200,000,000.

Fiscal year 1984:
(A) New budget authority, $18,200,000,000.
(B) Outlays, $12,700,000,000.
(C) New direct loan obligations, $11,200,000,000.
(D) New loan guarantee commitments, $10,300,000,000.

Fiscal year 1985:
(A) New budget authority, $16,500,000,000.
(B) Outlays, $12,800,000,000.
(C) New direct loan obligations, $11,500,000,000.
(D) New loan guarantee commitments, $10,300,000,000.

Fiscal year 1986:
(A) New budget authority, $15,900,000,000.
(B) Outlays, $12,800,000,000.
(C) New direct loan obligations, $11,600,000,000.
(D) New loan guarantee commitments, $10,300,000,000.

(3) General Science, Space, and Technology (250):

Fiscal year 1983:
(A) New budget authority, $7,900,000,000.
(B) Outlays, $7,700,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1984:
(A) New budget authority, $8,500,000,000.
(B) Outlays, $8,200,000,000.
(C) New direct loan obligations, $37,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1985:
(A) New budget authority, $8,500,000,000.
(B) Outlays, $8,500,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

Fiscal year 1986:
(A) New budget authority, $8,400,000,000.
(B) Outlays, $8,400,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1983:
(A) New budget authority, $4,000,000,000.
(B) Outlays, $4,600,000,000.
(C) New direct loan obligations, $13,100,000,000.
(D) New loan guarantee commitments, $200,000,000.

Fiscal year 1984:
(A) New budget authority, $3,900,000,000.
(B) Outlays, $4,100,000,000.
(C) New direct loan obligations, $13,900,000,000.
(D) New loan guarantee commitments, $200,000,000.

Fiscal year 1985:
(A) New budget authority, $3,600,000,000.
(B) Outlays, $2,900,000,000.
(C) New direct loan obligations, $14,300,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1986:
(A) New budget authority, $3,200,000,000.
(B) Outlays, $2,700,000,000.
(C) New direct loan obligations, $14,400,000,000.
(D) New loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):

Fiscal year 1983:
(A) New budget authority, $12,500,000,000.
(B) Outlays, $12,800,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1984:
(A) New budget authority, $12,000,000,000.
(B) Outlays, $12,500,000,000.
(C) New direct loan obligations, $27,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1985:
(A) New budget authority, $12,200,000,000.
(B) Outlays, $12,000,000,000.
(C) New direct loan obligations, $27,000,000.
(D) New loan guarantee commitments, $0.

Fiscal year 1986:
(A) New budget authority, $12,500,000,000.
(B) Outlays, $12,200,000,000.
(C) New direct loan obligations, $27,000,000.
(D) New loan guarantee commitments, $0.

(6) Agriculture (350):

Fiscal year 1983:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $24,000,000,000.
(C) New direct loan obligations, $18,600,000,000.
(D) New loan guarantee commitments, $5,500,000,000.

Fiscal year 1984:
(A) New budget authority, $11,600,000,000.
(B) Outlays, $11,400,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New loan guarantee commitments, $3,800,000,000.

Fiscal year 1985:
(A) New budget authority, $14,000,000,000.
(B) Outlays, $12,300,000,000.
(C) New direct loan obligations, $11,700,000,000.
(D) New loan guarantee commitments, $3,800,000,000.

Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $12,200,000,000.
(D) New loan guarantee commitments, $3,800,000,000.

(7) Commerce and Housing Credit (370):

Fiscal year 1983:
(A) New budget authority, $5,200,000,000.
(B) Outlays, $2,700,000,000.
(C) New direct loan obligations, $6,500,000,000.
(D) New loan guarantee commitments, $48,700,000,000.

Fiscal year 1984:
(A) New budget authority, $5,900,000,000.
(B) Outlays, $1,000,000,000.
(C) New direct loan obligations, $6,400,000,000.
(D) New loan guarantee commitments, $48,700,000,000.

Fiscal year 1985:
(A) New budget authority, $6,500,000,000.
(B) Outlays, $0.
(C) New direct loan obligations, $6,300,000,000.
(D) New loan guarantee commitments, $48,700,000,000.

Fiscal year 1986:
(A) New budget authority, $6,500,000,000.
(B) Outlays, −$300,000,000.
(C) New direct loan obligations, $6,300,000,000.
(D) New loan guarantee commitments, $48,700,000,000.

(8) Transportation (400):

Fiscal year 1983:
(A) New budget authority, $26,800,000,000.
(B) Outlays, $22,100,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New loan guarantee commitments, $1,100,000,000.

Fiscal year 1984:
(A) New budget authority, $27,700,000,000.
(B) Outlays, $25,900,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New loan guarantee commitments, $600,000,000.
Fiscal year 1985:
(A) New budget authority, $28,400,000,000.
(B) Outlays, $26,900,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New loan guarantee commitments, $400,000,000.
Fiscal year 1986:
(A) New budget authority, $29,200,000,000.
(B) Outlays, $27,800,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New loan guarantee commitments, $300,000,000.
(9) Community and Regional Development (450):
Fiscal year 1983:
(A) New budget authority, $8,300,000,000.
(B) Outlays, $7,900,000,000.
(C) New direct loan obligations, $2,100,000,000.
(D) New loan guarantee commitments, $500,000,000.
Fiscal year 1984:
(A) New budget authority, $6,600,000,000.
(B) Outlays, $8,100,000,000.
(C) New direct loan obligations, $1,700,000,000.
(D) New loan guarantee commitments, $300,000,000.
Fiscal year 1985:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $8,200,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New loan guarantee commitments, $300,000,000.
Fiscal year 1986:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $77,600,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New loan guarantee commitments, $400,000,000.
(10) Education, Training, Employment, and Social Services (500):
Fiscal year 1983:
(A) New budget authority, $28,000,000,000.
(B) Outlays, $26,800,000,000.
(C) New direct loan obligations, $600,000,000.
(D) New loan guarantee commitments, $6,500,000,000.
Fiscal year 1984:
(A) New budget authority, $31,200,000,000.
(B) Outlays, $27,200,000,000.
(C) New direct loan obligations, $700,000,000.
(D) New loan guarantee commitments, $6,600,000,000.
Fiscal year 1985:
(A) New budget authority, $27,900,000,000.
(B) Outlays, $27,800,000,000.
(C) New direct loan obligations, $700,000,000.
(D) New loan guarantee commitments, $6,600,000,000.
Fiscal year 1986:
(A) New budget authority, $27,900,000,000.
(B) Outlays, $27,800,000,000.
(C) New direct loan obligations, $800,000,000.
(D) New loan guarantee commitments, $6,600,000,000.

HOLLINGS AMENDMENT NO. 1240

Mr. HOLLINGS (for himself, Mr. BRADLEY, Mr. BOSCHWITZ, Mr. D'AMATO, Mr. PELL, Mr. BIDEN, Mr. BINGAMAN, Mr. MELCHER, Mr. EXON, Mr. FORD, Mr. RANDOLPH, Mr. BYRD, Mr. SARBANES, Mr. RIEGLE, Mr. HUDDLESTON, and Mr. STAFFORD) proposed an amendment to the concurrent resolution (S. Con. Res. 27), supra; as follows:

On page 3, line 13, strike the number and insert "$910,700,000,000".
On page 3, line 14, strike the number and insert "$983,175,000,000".
On page 3, line 15, strike the number and insert "$1,049,500,000".
On page 3, line 19, strike the number and insert "$850,050,000,000".
On page 3, line 20, strike the number and insert "$911,275,000,000".
On page 3, line 21, strike the number and insert "$965,000,000,000".
On page 4, line 1, strike the number and insert "$163,550,000,000".
On page 4, line 2, strike the number and insert "$148,000,000,000".
On page 4, line 3, strike the number and insert "$134,200,000,000".
On page 4, line 7, strike the number and insert "$1,591,350,000,000".
On page 4, line 8, strike the number and insert "$1,790,000,000,000".
On page 4, line 9, strike the number and insert "$1,980,200,000,000".
On page 4, line 14, strike the number and insert "$207,450,000,000".
On page 4, line 15, strike the number and insert "$198,700,000,000".
On page 4, line 16, strike the number and insert "$191,800,000,000".
On page 16, line 4, strike the number and insert "$31,800,000,000".
On page 16, line 5, strike the number and insert "$27,250,000".
On page 16, line 11, strike the number and insert "$28,500,000,000".
On page 16, line 12, strike the number and insert "$28,400,000,000".
On page 16, line 18, strike the number and insert "$28,500,000,000".
On page 16, line 19, strike the number and insert "$28,300,000,000".

BRADLEY AMENDMENT NO. 1241

Mr. BRADLEY (for himself, Mr. HOLLINGS, Mr. SARBANES, and Mr. MITCHELL) proposed an amendment to the concurrent resolution (S. Con. Res. 27), supra; as follows:

At the end of the concurrent resolution add the following:

SEC. 7. It is the sense of the Congress that—

(1) world economic recovery is being retarded by high United States interest rates and by inconsistent macroeconomomic policies among the major developed countries; and

(2) in order to restore economic growth and full employment at the earliest possible date, the President and the Secretary of Treasury, in consultation with their counterparts in the other major industrial countries at the Williamsburg Economic Summit and in followup deliberations, should pursue a coordinated economic expansion to ensure a worldwide economic recovery.

CHILES AMENDMENT NO. 1242

Mr. CHILES (for Mr. JACKSON and Mr. NUNN) proposed an amendment to the concurrent resolution (S. Con. Res. 27), supra; as follows:

On page 3, increase the figure on line 13 by $6,300,000,000.
On page 3, increase the figure on line 14 by $5,700,000,000.
On page 3, increase the figure on line 15 by $3,000,000,000.
On page 3, increase the figure on line 19 by $1,900,000,000.
On page 3, decrease the figure on line 20 by $200,000,000.
On page 3, decrease the figure on line 21 by $1,500,000,000.
On page 4, increase the figure on line 2 by $1,900,000,000.
On page 4, decrease the figure on line 3 by $200,000,000.
On page 4, decrease the figure on line 6 by $1,500,000,000.
On page 4, increase the figure on line 7 by $1,900,000,000.
On page 4, decrease the figure on line 8 by $1,700,000,000.
On page 4, increase the figure on line 9 by $200,000,000.
On page 4, increase the figure on line 14 by $1,900,000,000.
On page 4, decrease the figure on line 15 by $200,000,000.
On page 4, decrease the figure on line 16 by $1,500,000,000.
On page 6, increase the figure on line 5 by $6,200,000,000.

On page 6, decrease the figure on line 18 by $1,600,000,000.

DOMENICI AMENDMENT NO. 1243

Mr. DOMENICI (for himself and Mr. BAKER) proposed an amendment to the concurrent resolution (S. Con. Res. 27), supra; as follows:

On page 1, strike all after the resolving clause and insert the following:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal year 1985 are hereby set forth:

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, and October 1, 1984:

(1) The recommended levels of Federal revenues are as follows:
Fiscal year 1983: $603,100,000,000.
Fiscal year 1984: $658,000,000,000.
Fiscal year 1985: $729,200,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:
Fiscal year 1983: −$100,000,000.
Fiscal year 1984: +$2,600,000,000.
Fiscal year 1985: +$5,700,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital in-

surance within the recommended levels of Federal revenues are as follows:
Fiscal year 1983: $35,900,000,000.
Fiscal year 1984: $39,700,000,000.
Fiscal year 1985: $44,200,000,000.
and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:
Fiscal year 1983: $148,500,000,000.
Fiscal year 1984: $166,500,000,000.
Fiscal year 1985: $187,700,000,000.
(2) The appropriate levels of total new budget authority are as follows:
Fiscal year 1983: $876,200,000,000.
Fiscal year 1984: $918,000,000,000.
Fiscal year 1985: $990,300,000,000.
(3) The appropriate levels of total budget outlays are as follows:
Fiscal year 1983: $807,100,000,000.
Fiscal year 1984: $850,400,000,000.
Fiscal year 1985: $915,500,000,000.
(4) The amounts of the deficits in the budget which are appropriate in the light of econoic conditions and all other relevant factors are as follows:
Fiscal year 1983: $204,000,000,000.
Fiscal year 1984: $192,400,000,000.
Fiscal year 1985: $186,300,000,000.
(5) The appropriate levels of the public debt are as follows:
Fiscal year 1983: $1,383,900,000,000.
Fiscal year 1984: $1,620,200,000,000.
Fiscal year 1985: $1,857,200,000,000.
and the amounts by which the temporary statutory limits on such debt should be accordingly increased are as follows:
Fiscal year 1983: $93,700,000,000.
Fiscal year 1984: $236,300,000,000.
Fiscal year 1985: $237,000,000,000.
(6) The appropriate levels of total Federal credit activity for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:
Fiscal year 1983:
(A) New direct loan obligations, $55,400,000,000.
(B) New loan guarantee commitments, $94,500,000,000.
Fiscal year 1984:
(A) New direct loan obligations, $48,200,000,000.
(B) New loan guarantee commitments, $94,500,000,000.
Fiscal year 1985:
(A) New direct loan obligations, $48,100,000,000.
(B) New loan guarantee commitments, $97,400,000,000.
(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:
(1) National Defense (050):
Fiscal year 1983:
(A) New budget authority, $244,600,000,000.
(B) Outlays, $214,300,000,000.
(C) New direct loan obligations, $0.

Fiscal year 1984:
(A) New budget authority, $275,000,000,000.
(B) Outlays, $241,800,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $304,300,000,000.
(B) Outlays, $272,600,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.
(2) International Affairs (150):
Fiscal year 1983:
(A) New budget authority, $24,900,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $11,700,000,000.
(D) New loan guarantee commitments, $9,200,000,000.
Fiscal year 1984:
(A) New budget authority, $18,200,000,000.
(B) Outlays, $12,700,000,000.
(C) New direct loan obligations, $11,200,000,000.
(D) New loan guarantee commitments, $10,300,000,000.
Fiscal year 1985:
(A) New budget authority, $16,500,000,000.
(B) Outlays, $12,800,000,000.
(C) New direct loan obligations, $11,500,000,000.
(D) New loan guarantee commitments, $10,300,000,000.
(3) General Science, Space, and Technology (250):
Fiscal year 1983:
(A) New budget authority, $7,900,000,000.
(B) Outlays, $7,700,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $8,500,000,000.
(B) Outlays, $8,200,000,000.
(C) New direct loan obligations, $37,000,000.
(D) New loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $8,500,000,000.
(B) Outlays, $8,500,000,000.
(C) New direct loan obligations, $0.
(D) New loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1983:
(A) New budget authority, $4,000,000,000.
(B) Outlays, $4,600,000,000.
(C) New direct loan obligations, $13,100,000,000.
(D) New loan guarantee commitments, $200,000,000.
Fiscal year 1984:
(A) New budget authority, $3,900,000,000.
(B) Outlays, $4,100,000,000.
(C) New direct loan obligations, $13,900,000,000.
(D) New loan guarantee commitments, $200,000,000.
Fiscal year 1985:
(A) New budget authority, $3,600,000,000.
(B) Outlays, $2,900,000,000.
(C) New direct loan obligations, $14,300,000,000.
(D) New loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1983:
(A) New budget authority, $12,500,000,000.
(B) Outlays, $12,800,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $12,000,000,000.
(B) Outlays, $12,500,000,000.
(C) New direct loan obligations, $27,000,000.
(D) New loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $12,200,000,000.
(B) Outlays, $12,600,000,000.
(C) New direct loan obligations, $27,000,000.
(D) New loan guarantee commitments, $0.
(6) Agriculture (350):
Fiscal year 1983:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $24,000,000,000.
(C) New direct loan obligations, $18,600,000,000.
(D) New loan guarantee commitments, $5,500,000,000.
Fiscal year 1984:

RECONCILIATION

SEC. 2. (a) Not later than June 6, 1983, the Senate committees named in subsections (b) through (f) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than June 6, 1983, the House committees named in subsections (g) through (l) of this section shall submit their recommendations to the House Committee on the Budget. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or

resolution or both carrying out all such recommendations without any substantive revision.

SENATE COMMITTEES

(b) The Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; and $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985.

(c)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $856,000,000 in fiscal year 1984; and to reduce outlays by $2,024,000,000 in fiscal year 1985.

(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $2,600,000,000 in fiscal year 1984; and $5,700,000,000 in fiscal year 1985.

(d) The Senate Committee on Governmental Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; and to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985.

(e) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; and $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985.

(f) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; and to reduce budget authority by $177,000,000 and outlays by $115,000,000 in fiscal year 1988.

HOUSE COMMITTEES

(g) The House Committee on Agriculture shall report changes in laws within the jurisdiction of that committee, (A) to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays, or (B) which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority and outlays, or (C) any combination thereof, as follows: $1,243,000,000 in budget authority and $1,243,000,000 in outlays in fiscal year 1984; and $1,332,000,000 in budget authority and $1,332,000,000 in outlays in fiscal year 1985.

(h) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $816,000,000 in fiscal year 1984; and to reduce outlays by $1,538,000,000 in fiscal year 1985.

(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $258,000,000 and outlays by $534,000,000 in fiscal year 1984; and to reduce budget authority by $368,000,000 and outlays by $834,000,000 in fiscal year 1985.

(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee to require reductions in appropriations for programs authorized by that committee so as to achieve savings in budget authority and outlays as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; and $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985.

(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce budget authority by $202,000,000 and outlays by $201,000,000 in fiscal year 1984; and to reduce budget authority by $117,000,000 and outlays by $115,000,000 in fiscal year 1985.

(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of Public Law 93-344, sufficient to reduce outlays by $849,000,000 in fiscal year 1984; and to reduce outlays by $1,481,000,000 in fiscal year 1985.

(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $2,600,000,000 in fiscal year 1984; and $5,700,000,000 in fiscal year 1985.

DEFICIT REDUCTION PATH

SEC. 3. It is the sense of the Congress that further deficit reduction actions will be necessary in Fiscal Years 1986-88 in order to insure a long-lasting economic recovery. While one Congress cannot bind another, the Congress recognizes that the President has recommended Fiscal Year 1986-88 revenue increases and spending restraint that would yield a predictable path of declining deficits. The Congress endorses actions of this magnitude if the deficits exceed 2.5 percent of the Gross National Product of the Nation. The President estimates that such actions would yield deficits in the range of $144.6 billion in Fiscal Year 1986, $136.6 billion in Fiscal Year 1987, and $102.4 billion in Fiscal Year 1988. The Congess further recognizes that if the economic recovery approximates the typical post-World War II economic recovery, deficits will be more on the order of $110 billion in Fiscal Year 1986, $90 billion in Fiscal Year 1987, and $60 billion in Fiscal Year 1988. The Congress realizes the extreme uncertainty involved in any out-year forecasts of the economy and that deficit, unemployment, and inflation predictions three years hence may be wrong. In light of these uncertainties, the Congress believes it unwise to take actions now that may exacerbate economic problems in the future.

MISCELLANEOUS PROVISIONS

SEC. 4. It shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

(1) new budget authority for fiscal year 1984; or

(2) new spending authority described in section 401(c)(2)(C) of the Budget Act first effective in fiscal year 1984,

within the jurisdiction of any of its committees unless and until such committee makes the allocations or subdivisions required by section 302(b) of the Budget Act, in connection with the most recently agreed to concurrent resolution on the budget.

SEC. 5. It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $37,600,000,000 in fiscal year 1983 and $29,300,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $17,800,000,000 in fiscal year 1983 and $18,900,000,000 in fiscal year 1984; and new loan guarantee commitments to an amount not to exceed $94,500,000,000 in fiscal year 1983 and $94,500,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $16,200,000,000 in fiscal year 1983 and $17,300,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $11,500,000,000 in fiscal year 1983 and $13,200,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

SEC. 6. (a) The joint explanatory statement accompanying the conference report on this resolution shall include an estimated allocation, based upon the first section of this resolution as recommended in such conference report, of the appropriate levels of total new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, among each committee of the House of Representatives and the Senate which has jurisdiction over bills and resolutions providing such new obligations and commitments.

(b) As soon as practicable after this resolution is agreed to, every committee of each House, after consulting with the committee or committees of the other House to which all or part of the allocation has been made, shall subdivide among its subcommittees the allocation of new direct loan obligations and new loan guarantee commitments for fiscal year 1983 and fiscal year 1984, allocated to it in the joint explanatory statement accompanying the conference report on this resolution.

SEC. 7. It is the sense of the Congress that the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1978 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in

the budgets of the initiating agencies beginning with the fiscal year 1985 budget.

NOTICES OF HEARINGS

SUBCOMMITTEE ON SECURITIES

Mr. D'AMATO. Mr. President, the Subcommittee on Securities will hold hearings on May 25, 1983, at 9:30 a.m. and on May 26, 1983, at 9:30 a.m., in room SD-538 of the Dirksen Senate Office Building to discuss S. 1174, the Public Utility Holding Company Act amendments of 1983.

For further information, contact Neil Levin of the Senate Banking Committee at 224-1561.

ADDITIONAL STATEMENTS

MOTHER OF THE YEAR

● Mr. DENTON. Mr. President, I would like to call the attention of my colleagues to an article which appeared in Wednesday's Washington Post, entitled "Paying Tribute to Old Style Mothering." The article calls attention to the outstanding service that one particular "stay at home" mother of three sons, Mrs. Sadie Biggs of Northeast Washington, has contributed to her family and to her community. Mrs. Biggs will receive a Mother of the Year Award at the annual Mother's Day Prayer Breakfast that is sponsored by the D.C. Federation of Civic Associations.

Mrs. Biggs has performed more heroic service than most of us will ever perform—she has dedicated her life to rearing her sons and to lending a helping hand to those in her community who need her help. She does not ask for a salary; she gives out love and neighborly assistance without regard to cost or reward.

Mr. President, I believe the D.C. Federation of Civic Associations is performing an invaluable service. Its members are recognizing those ladies who are among the most unrecognized heroes in our land—mothers.

I ask that the Post article be printed in the RECORD.

The article follows:

[From the Washington Post, May 4, 1983]

PAYING TRIBUTE TO OLD STYLE MOTHERING

(By Anne Chase)

Not long ago, stay-at-home mothers like Sadie Biggs were more the rule than the exception. They volunteered at the neighborhood school, served punch to the Cub Scouts and cheered for the Little League teams. Today, such mothers are becoming a rarity.

Biggs, mother of three sons, who has lived for 24 years in the Riggs neighborhood of Northeast Washington, often finds herself alone in the old-fashioned mothering and civic activities that occupy much of her time. She and her husband, Norwood, sometimes are the only spectators at football games sponsored by the Lamond-Riggs Athletic Association, and she is one of the few citizen association members who makes time to hand out fliers for the Lamond-Riggs Citizens Association's monthly meeting.

On Sunday, Biggs, 46, will be honored for her devotion to her children and her community, along with more than 50 other women at the annual Mother's Day Prayer Breakfast, sponsored by the D.C. Federation of Civic Associations.

Over breakfast at the Capitol Hilton, each member organization of the federation will award a plaque to its chosen mother of the year. The federation itself will give an award to the citywide mother of the year. This year, the award will go to Carole Clarke, a D.C. Public School teacher and wife of City Council chairman David A. Clarke.

The prayer breakfast was organized 10 years ago by Benjamin Alexander, now president of the University of the District of Columbia, to honor traditional mothers, according to Gladys Scott Roberts, the chairman of this year's celebration.

"When we select a mother, we look at her work as a mother, as a wife and as a neighbor," Roberts said.

Biggs was chosen by the 17-member executive committee of the Lamond-Riggs Citizens Association, of which she is corresponding secretary. She and her husband, both natives of Durham, N.C., have been involved with the organization since they moved to the Riggs neighborhood, between Riggs Road and North Capitol Street NE, in 1959.

Sitting in her small living room among her plants and athletic trophies and diplomas awarded to her three sons, Biggs said she joined the association out of a desire to maintain the neighborhood "as a place where I wanted to live. I felt I should work with the community and try to get people involved."

And work she has. Her friends and fellow civic activists rattle off a long list of projects for which Biggs has stuffed envelopes, made telephone calls and written letters over the years, starting with the now legendary North Central Freeway fight in the 1960s.

"She and her husband are among the first people I call when I get ready to do a project," said community activist and one-time mayoral candidate Dorothy Maultsby. "Sadie is very supportive and diligent in working against anything that would be a detriment to the community."

During her long tenure in the association, Biggs has never turned down a request to help out, according to neighbors.

"We have trouble getting people to deliver fliers. Sadie never says no," said her friend, Catherine Castellano, a member of Advisory Neighborhood Commission 4B. "She's always ready to do the little, menial jobs. She's capable of being a professional, but it's not beneath her to to anything."

Biggs is equally willing to pitch in when it comes to athletics. All three Biggs sons played football with the Lamond-Riggs Athletic Association, and both parents have been fans and supporters since 1970 when Norwood Jr., their oldest son, joined the team.

"We thank the Lord for Mr. and Mrs. Biggs," said Oliver (Ollie) Thompson, a former coach with the athletic association. "Every ball game I have, I'll always see Mr. and Mrs. Biggs in their little chairs on the sidelines, bringing juice for the kids. Sometimes the only parents who come are Mr. and Mrs. Biggs.

The Biggses dig into their pockets to help team members pay their fees, and they drive the players to the games. And Sadie Biggs is always ready to bake pies or to organize a potluck dinner for the program, Thompson said.

Unlike some parents who wind down their involvement with children's sports and schools as their children grow older, they have remained enthusiastic. Sadie Biggs enjoys watching the Lamond-Riggs team members play football and then talking over the plays with them.

Until her youngest son, Derek, 15, graduated, Biggs was a daily volunteer at La-Salle Elementary School, where she worked in the office and was a teachers' aide. Her husband was president of the PTA, and she served on the executive committee for years.

The Biggs family puts a strong emphasis on education. Norwood Jr., 24, graduated two years ago from North Carolina A&T State University with a degree in business administration and now works for North Carolina Mutual Insurance Co. Kelwin, 21, is a sophomore at the same school studying for a degree in computer programming. Derek is a ninth grader at Rabaut Junior High School.

In 1959, when Norwood Jr., was born, most women stayed home with their children. But even then, Biggs said, quitting her job meant a financial sacrifice for her family. "When we bought the house, we'd only been married two years. Norwood was a little toddler and we had a house with nothing in it," she said.

Biggs said staying home was "an adjustment for me. But I just felt like it was too important. The kids only have one time, their formative years. But it's been rough. Now with college tuition, we're still sacrificing."

Biggs was forced to slow down by two operations that put her in the hospital for three weeks in February. Now, although she says she must relax, she is back passing out fliers. Her latest concern is a delay in the opening of the Lamond-Riggs library, for which she and her husband helped lobby for 12 years.

"I just feel that the children really need a library. We had a bookmobile, but they took that away from us," she said.

Occasionally, Biggs said, she becomes discouraged with the lack of results in community work and with the reluctance of younger men and women in the community to join in.

"I'll say, 'Oh, I'm just going to give up because I can't see any progress.' But then I say, 'It's the place where I live. It's my community'."●

THE FAIR HOUSING ACT OF 1983

● Mr. BOSCHWITZ. Mr. President, I express my support for the 1983 Fair Housing Act introduced yesterday by Senators KENNEDY and MATHIAS. I am proud to join more than 30 of my colleagues in cosponsoring this important legislation.

There is a pressing need to seek more effective remedies for victims of housing discrimination and, in particular, to expedite the time-consuming and expensive process of court action. The current law is clearly inadequate and ineffective if we are serious about protecting all Americans from discrimination in the purchase, rental, and fi-

nancing of housing. Legislation must be enacted to address this problem and insure protection of the rights guaranteed under the Civil Rights Act of 1968.

Although I believe that the current remedies available to victims of housing discrimination are not adequate, I have serious reservations about the administrative hearing process provision of the bill. Perhaps because of my business experience, I am very hesitant to create another bureaucratic arm of government.

Our present court system is certainly not without its flaws. However, I believe that our efforts could be directed at improving our current system.

In other agencies ALJ's are used because of the expertise necessary to understand the technical nature of the cases. However, that technical expertise is not required in discrimination cases. I am not sure what the best solution is, but I will work with my colleagues as this bill makes its way through the legislative process to see the best possible system is enacted; one that is both equitable and efficient.

As a refugee from a country where discrimination ultimately led to genocide, I strongly feel the Government must protect its citizens from discrimination.●

SOVIET SUPPRESSION OF HUMAN RIGHTS

● Mr. QUAYLE. Mr. President, it is an honor today to speak on behalf of the 1983 Congressional Call to Conscience Vigil to bring attention to the plight of Soviet Jewry. This effort is of great importance in making known the continuous repression the Soviet Government is perpetrating on its Jewish citizens.

In this day and age when the TV media and the newspapers are continuously bombarding the viewers and readers with oftentimes sensational stories about human rights violations that are occurring in our Southern Hemisphere and elsewhere, one does not often enough hear about the blatant suppression and violations of the most basic human rights of Soviet Jews.

Within these Halls there have been numerous actions undertaken to call attention to the plight of the Soviet Jews, which is just one of the festering sores which complicate relations between the United States and the Soviet Union.

Senate Concurrent Resolution 11, introduced by the junior Senator from Maine and of which I am a cosponsor, states it best when it calls on the Soviet Union to:

> Fulfill its obligations undertaken in the Helsinki Final Act, the Universal Declaration of Human Rights and other international agreements relating to human rights, by pursuing a more humane emigration policy and ceasing harassment of Jews and others seeking to leave.

Since 1970, about 260,000 Jews have been able to emigrate from the Soviet Union. But in February of this year, only 125 Jews were allowed to leave. This is less than left on an average day during the peak year of 1979. In 1982, 2,692 Soviet Jews were granted permission to emigrate as compared to 51,320 in 1979. Within the Soviet Union, to be Jewish means to be subject to constant abuse and harassment. One is not allowed to study Hebrew and practicing one's religion or cultural traditions oftentimes leads to threats, intimidation, or even jail.

Many of us in this country just do not know how fortunate we are. We take for granted the ability to congregate in houses of worship, to travel freely here or abroad, or even picking up the phone to call a family relative who happens to live elsewhere.

This Sunday is Mother's Day. Yet in Indianapolis, Ind., I know of at least one mother who will not be able to be reunited with, or even hear from, her son, Alexander, and his family who are in Russia. I am talking about Mrs. Lev Pevzner, who along with her husband were two of the fortunate ones to be allowed to emigrate from the Soviet Union.

They came to the United States in 1979 from Leningrad to join their daughter, Mrs. Liudmila Alexandrov, and her husband, who had been allowed to emigrate in 1978. The elder Pevzners had to leave Alexander and his family behind.

The younger Pevzner family first tried to emigrate in March 1979. At the time they applied they were told their application must be filed simultaneously with Mr. Pevzner's parents. They did this, but then only the older Pevzners were granted permission to come to the United States.

Since the first attempt in August 1979, Alexander and his family have attempted to emigrate six times. The Government continues to justify their denial on the grounds that he served in the military for 2 years. But, this was over 10 years ago.

The case of Alexander Pevzner and his family is similar to thousands of others in the Soviet Union. They, like others, just want to leave the confines of a country which discriminate against them and cause them nothing but pain and persecution.

Changes in the Soviet Union's emigratory policy may only come about if enough universal pressure is consistently kept on them to ease restrictions. Yet even then, changes may not occur. But, the possibility of failure cannot deter us.

Those of us in the public sector and in the private sector must continue to speak out on the issue of human rights violations within the Soviet Union. We must continue to draw attention to the infinitesimal numbers that are being allowed to leave, and we must never stop until their rights are restored to them.

I pledge today to continue my efforts to help the Pevzner family and those like them. I also urge my colleagues to do the same.●

DR. LEROY E. HAY—TEACHER OF THE YEAR

● Mr. DODD. Mr. President, I applaud Dr. Leroy E. Hay, of Vernon, Conn., for having been named the 1983 National Teacher of the Year during the organization's 32d annual program. Dr. Hay, a veteran teacher of 17 years, is currently teaching English and futuristics in Manchester High School.

Dr. Hay—"Lee" to his friends and "Doc" to his students—was selected from over 1 million American teachers. He was first selected as the Connecticut State Teacher of the Year. This annual award is presented to dedicated, professional individuals with an outstanding record in teaching and counseling. The National Teacher of the Year program is sponsored by the Council of State School Officers, the Encyclopedia Britannica, and Good Housekeeping magazine.

Although Dr. Hay is chairman of the English department of Manchester High, he has also traveled widely throughout Connecticut speaking on futurism, and more precisely, on the future of education.

According to Dr. Hay, society's increasing demands for new technologies will continue to make new and stringent demands on the Nation's education systems to keep in step with the technological changes.

In addition, the role of the computer will become so important to the average citizen that by 1990 virtually every home will be equipped with a private telecommunications system which is linked with schools.

There is danger, however, according to Dr. Hay, of overemphasizing technology, science, and mathematics in schools and dehumanizing public education. Nor suprisingly, he is a staunch advocate of promoting emphasis on the arts, humanities, and English.

Dr. Hay believes that students have a greater tendency to excel when they know parents and teachers have high expectations of them. For example, Dr. Hay has a reputation among students of Manchester for being a tough English teacher. Nevertheless, his classes are well attended and students are always quick to sing his praises for the excellent instruction received during classes.

Dr. Hay has a unique approach to teaching. He is a strong believer that students will be adequately prepared

to deal with the frustrations and challenges of life when they are taught how to think, learn, and make sound decisions. Education, according to Dr. Hay, should be question-oriented, not answer-oriented.

In addition to his scholastic activities, Dr. Hay is currently an editor of Forefacts, a secondary school publication on the future, a member of the World Future Society, is working to obtain a grant for the community for arts enrichment, and is an activist in collective bargaining for teachers.

Dr. Hay was presented with a Golden Apple—symbolic of excellence in teaching—by the First Lady during ceremonies at the White House. He will be the guest speaker at educational conferences, seminars, and conventions throughout the year as a representative of what is the very best in a vital national resource—America's teachers.●

SOLUTIONS TO THE INTERNATIONAL DILEMMA

● Mr. HUMPHREY. Mr. President, in discussions of an appropriate strategy for alleviating the indebtedness of the Third World, two schools of thought are clearly distinguishable. In today's edition of the Washington Times, columnist Steven K. Beckner presents the final installment of a three-part series on this issue, in which the divergent approaches are clearly outlined.

In essence, Mr. President, one school of thought holds that the burden will be eased only if multilateral institutions—particularly the International Monetary Fund—and private lenders will make new resources available to troubled borrowers. It is argued that additional levels of these so-called bridge loans are necessary to ease a temporary liquidity strain on the part of LDC's.

In the view of this Senator, such a solution will never in fact attain its objective. The circumstances leading up to the current situation have clearly demonstrated that every time we extend the bridge, the shore for which we are aiming recedes further and further. Providing additional resources to the LDC's simply for the purpose of meeting interest payments on their tremendous block of debt is an economically unsound approach, which serves only to postpone the day of reckoning which must be faced if this problem is ever truly to be solved.

It is the second school of thought to which I hope the majority of my colleagues will be compelled by reason to adhere. This approach rejects a policy which encourages further debt extension and recognizes that a genuine resolution of the problem will come only through the adoption of more rational economic policies on the part of the Third World and the promotion of a sustained recovery in the industrialized world. An $8.4 billion shoring up of the IMF—an institution which, as the Beckner article notes, already has vast resources at its disposal—runs contrary to this approach.

I ask that the article appear in the RECORD.

The article follows:

[From the Washington Times, May 6, 1983]

WEST PRESSES EFFORTS TO HALT "TIME BOMB" OF THIRD WORLD DEBT

(By Steven K. Beckner)

Convinced that a Third World debt bomb threatens to devastate the international banking system and the global economy, Western governments are trying to defuse it.

The industrial countries' current strategy relies primarily on resource transfers to the Less Developed Countries (LDCs)—an approach influenced heavily by the Brandt Commission, a group of present and former government officials led by Willy Brandt, ex-chancellor of West Germany and chairman of its Social Democratic Party.

In a February manifesto, the commission warned that Third World financial woes threaten to plunge the planet into "a depression comparable only to the crisis of half a century ago." It recommended a concerted reflation of the world economy, a massive transfusion of aid to developing countries and expansion of the International Monetary Fund.

Not only should the IMF's capital base be doubled, but it should act as the world's central bank with an expansionary global monetary policy, the commission contends. As a step in this direction, the report says, the IMF should allocate annually up to 12 billion Special Drawing Rights—its basket currency creation.

The commission also recommends expanded long-term, concessionary lending by the World Bank to supplement the IMF's short-term balance of payments loans. It encourages Western central banks, in cooperation with international agencies, to provide bridge loans and to coordinate continued commercial bank lending.

The Brandt Commission theme, which closely resembles the Third World's agenda, has been echoed repeatedly. Washington's Institute for International Economics has call on the IMF to lend on a substantial scale and to undertake a "resumption of SDR allocations." The institute, headed by former Assistant Treasury Secretary C. Fred Bergsten, suggests "a sharp increase in the structural adjustment lending of the World Bank" and urges commercial banks to "increase their net lending to developing countries by some 5-10 percent overall over the next 12 months." Much of this program already is being carried out. In February, the United States and other nations voted a 47.5 percent increase in their quota contributions to the IMF (to about $99 billion) and approved a tripling of a special fund, the General Agreements to Borrow.

An SDR allocation could be in the works. Unlike IMF quotas, which are pledges of currency that the 146 member nations make to the fund, SDRs are monetary units which the IMF creates and distributes to its members. To date, 21.4 billion SDRs, worth about $23.5 billion, have been created.

Third World leaders have long clammored for large new allocations of SDRs, which they could exchange for hard currencies or borrow against to pay their debts. In the past, this has been opposed as an inflationary increase in world liquidity. But in the present mood, some amount of SDR allocations is likely to be approved. An 85 percent majority on the IMF board of governors is required, so the United States with its 19.52 percent voting share can veto any allocation.

A knowledgeable IMF official said there is no plan for an SDR allocation, adding the question is under constant review and has considerable support from a lot of quarters. The source said the IMF's research department is preparing a study for presentation at the IMF's annual meeting in September.

Meanwhile, the capital of the World Bank is being doubled to an estimated $85 billion to $90 billion by 1986. Last week, bank President A. W. Clausen, former president of the Bank of America, endorsed a further $40 billion ordinary capital increase in 1986, and suggested a $20 billion selective capital boost to tide the agency over until then. Negotiations also are underway to raise the funding of the International Development Association, a soft loan affiliate of the World Bank.

The U.S. Treasury and Federal Reserve together with foreign central banks last fall provided more than $6 billion in short-term credits to Brazil and Mexico while they were negotiating loan packages with the IMF and commercial banks.

Finance ministers from the developing countries meeting in Washington last week asserted in a communique that these efforts are inadequate.

But another school of thought holds that the debt bomb doesn't have as much megatonnage as many fear and that, in any case, the best way of disarming it is not a barrage of aid dollars. This school maintains that the developing countries themselves are largely responsible for their economic predicament.

There is a growing recognition that the LDCs must adjust their economic policies. "The longer countries postpone adjustment, the greater the deterioriation in their economic situation becomes and, hence, the more difficult it is to turn their external payments position around," said IMF Managing Director Jacques de Larosiere in a March speech.

Central to the IMF's role are its loan conditions, which typically ask debtor countries to curtail excessive monetary expansion and budget deficits, set their currency exchange rates at realistic levels and avoid uneconomic price and interest rate policies. Proponents of heightened aid charge that the IMF is too restrictive and promote a shift toward more unconditional and concessionary financing by the World Bank and regional development banks.

Others assert that even the relatively conservative IMF is unworthy of increased suport. "The IMF already has substantial unused financial resources and the power to create and raise additional billions of dollars," writes Robert E. Weintraub, senior economist of the Joint Economic Committee in a newly published study. With 100 million ounces of gold, $8 billion in cash, as well as its power to borrow and create new SDRs, the IMF "has a formidable package of 'last-resort' financial resources and powers," he argues.

Looking at the other elements of a five-point program enunciated by Treasury Secretary Donald T. Regan, Weintraub observes that central banks already have ample powers to extend emergency credits and warns that "policies to promote economic growth" could promote inflation. And

he decries Regan's exhortation to banks to keep lending abroad. "Doubtless banks would feel more secure lending to LDCs if their governments see the IMF as an elastic conduit for helping debtor nations," he observes. "However, continued lending could lead to a magnification of the same imprudent lending practices that helped create the present debt crisis."

Weintraub's proposed solutions include "resumption of economic growth by the United States and other developed countries." But he emphasized they "must be careful to prevent new inflationary surges from accompanying or closely following their recoveries and the corollary growth of developing nations' exports."

Secondly, Weintraub says debtor nations must act to "increase their exports and the investment of foreigners in their plant and equipment, decrease their imports and constrain their consumption." To do this they must "allow their exchange rates to float downward or devalue them realistically." For their part, the United States and other industrialized countries must avoid protectionist measures.

The idea of encouraging investment is beginning to take root in the Third World camp, although those countries frequently have discouraged foreign capital. Mauricio Herman, chief of the Inter-American Development Bank's Development Division, recently suggested creation of development equity—securities that would reduce LDCs' interest costs and shift some of the risks to investors in the developed countries.

Noting that the relative importance of direct investment in Latin America has declined from 25 to 17 percent of total external financing, the Peruvian said, "This increased leveraging means that interest rates must be paid regard less of the return of the investment financed by these funds." By contrast, with investment, "Dividends paid—and remitted abroad—depend on the yield of the investment."

In town recently, Pakistan's minister for planning and development, Mahbubul Haq, said his country is dismantling administrative controls in an effort to unleash private enterprise. He said Pakistan is inviting American investors to help develop its energy and agricultural resources.

Under the auspices of the liberal Brookings Institution, a group of former government officials from the United States, France, Germany and Japan issued a statement observing, "Under most circumstances, the best way to transfer resources and skills to developing countries is through private investment. The developing countries can contribute to its continuation by policies which create a congenial climate."

The final element in solving the debt dilemma is a "willingness of bank creditors to reschedule maturing loans and extend additional credits," according to Weintraub, but he stresses that banks "cannot and should not be pushed or tempted" to do so.

Stretching out loan payments, extending new credits, renegotiating interest rates and stipulating economic policy changes "is the alternative to default," Weintraub says. "Rescheduling produces basic benefits for both banks and debtors. Banks do not have to write down problem loans. Debtor nations avoid the onus of default."

Massive, coordinated repudiation of the Third World's $265 billion in commercial bank debts is extremely unlikely, Weintraub concludes, but even if it happens, federal bank regulators can defuse the debt bomb by allowing the affected banks time to write down the defaulted loans to zero.●

CARGO PREFERENCE AND AGRICULTURE

● Mr. QUAYLE. Mr. President, American agriculture stands today at a crossroad. After 3 years of falling prices and farm income, the PIK program has given renewed hope to American farmers. We should recognize, however, that the PIK program offers only a temporary solution to a larger problem of balancing supply and demand for the bountiful products of American agriculture. In order to achieve long-term balance, we need to work very hard on stimulating demand for our abundant and vital farm products.

Mr. President, it has become increasingly clear that continuation of cargo preference requirements on agricultural exports that benefit from some Federal assistance or credit can only harm the prospects for increasing demand for American agricultural goods. In my home State of Indiana, almost 40 percent of our acreage is devoted to production for the export markets. In order to protect and expand existing markets, we need to allow our producers to be competitive with increasingly active and successful foreign producers. It is only by removing the impediments to a fully competitive position in foreign trade that we can kindle the kind of growth and price strength needed for a healthy farm economy.

I had hoped by this time that we would have taken a small step toward removing the cargo preference requirement for exports assisted under the new and commercially oriented blended credit and export PIK programs. Senators HELMS, BOSCHWITZ, and BOREN have shown foresight and leadership in addressing this issue in S. 822. While awaiting final Senate action on S. 822, I wanted to urge support for the cargo preference exemption contained in this bill.

I do not want to belabor this issue, because its merits seem relatively unambiguous to me. I would simply like to highlight a few of the more important reasons for pursuing quick action to relieve the burden posed by cargo preference requirements on the commercially oriented programs initiated by USDA.

First, I believe that those of us in Congress, and in the entire Federal Government, often tend to confuse issues when it seems convenient or self-serving to do so. Cargo preference on agricultural exports under the blending credit and export PIK programs offers a clear and compelling case against such confusion.

What we are trying to do with these relatively new export promotion programs is to stimulate sales of surplus U.S. commodities and develop or protect export markets traditionally served by U.S. exporters. We are trying to accomplish these modest goals at a time of crisis in the farm economy and, coincidentally, of severe Federal budget austerity.

The proponents of cargo preference argue that the secondary goal of protecting the U.S. merchant marine and promoting development of a U.S.-flag fleet with military cargo potential should also be included among the goals of these export stimulus programs.

This is all well and good as long as the diverse goals are compatible. Unfortunately, they are not. The costs of cargo preference significantly impair the success of the export stimulus program. Some have even contended that the benefits of blended credit are more than offset by the cargo preference differential. It is abundantly clear, in any case, that the total quantity of grain and other commodities sold under these programs will be substantially reduced by the costs of cargo preference.

Additionally, the benefits to the national defense of the cargo preference requirement on sales of bulk commodities are limited at best. The evidence available to me indicates:

One, that vessels carrying bulk agricultural commodities are of limited military use;

Two, that preference programs do not promote construction of a U.S. fleet that is modern, well-equipped, and capable of serving as a military auxiliary.

The larger question raised by these observations is simply: would it not be better to separate the conflicting purposes of the cargo preference and export stimulus programs. The admittedly scarce Federal dollar would be more efficiently spent to stimulate exports of agricultural commodities if it were not siphoned off to pay the high cost of shipping them on U.S.-flag vessels. On the other hand, we would do much better in realizing the goal of military readiness if we were to be more direct in promoting or even subsidizing the types of vessels truly needed to move military cargo in real-life situations. This is not the proper time to address this issue in more depth, but I would strongly suggest that our goals for both agricultural and national defense would be better met by separating these two issues.

I have an additional concern that is somewhat parochial, but altogether relevant. My concern about the impact of existing cargo preference laws on the agricultural community is concurrently bound to my interest in the shipping activity, or relative lack thereof, throughout the Great Lakes. The fact that only one U.S.-flag operator ships through in the Lakes greatly diminishes the efficiency benefits that the Lakes' ports might seek to gain from cargo preference restrictions. The Lakes can only compete for half of the Public Law 480 cargo that is ex-

ported from the United States, in spite of the fact that a substantial majority of those shipments originate in the Lakes region and are likely to find their lowest landed cost of shipment through the Lakes.

For example, in 1982, 56 percent of all the agricultural commodities transported by the U.S.-flag fleet were shipped under Public Law 480 cargo preference requirements. The Maritime Administration estimates that the total subsidy to the U.S. merchant marine for Public Law 480 shipments exceeded $150 million. Of that subsidy, USDA absorbed $97.7 million. A $150 million subsidy represents the value of roughly 900,000 metric tons of flour that are produced but not sold in the United States.

In summary, the Midwest loses in two respects from the cargo preference requirements. First, the total amount of cargo shipped abroad under the food for peace program is reduced by almost 15 percent. Second, since U.S.-flag ships cannot for the most part operate in the Great Lakes, shipping costs are increased and local revenues to Great Lakes ports are lost.

A final point I would like to emphasize is that the issue we are addressing today is not a frontal assault on the "maritime subsidy" as some would like us to believe. Rather it is a limited initiative designed to make recent agricultural export stimulus programs more efficient.

As many of my colleagues have already pointed out in great detail, we must find effective ways of reviving the farm economy in this country. We have seen 3 years of falling farm income, which has had a tremendous impact on the entire economy. We cannot have a full and vigorous economic recovery unless the farm economy turns around, and this can only be fully realized when demand, both domestic and foreign, picks up. The Federal Government and the American farmer simply cannot afford either to store or to "set-aside" its way to prosperity. Production control without demand-stimulus programs can only be of short-term value.

So, Mr. President, I urge all of my colleagues to support the Agriculture Committee in its effort to offer efficient and cost-effective programs to stimulate the demand side of the equation. I need not remind my colleagues either of the cost of supply-management programs or of the aggressive subsidy programs by other countries which have undercut our traditional markets. The Boschwitz amendment is a modest attempt to move in the right direction, but both U.S. farmers and the U.S. economy would receive a big lift from this modest but effective measure. I urge prompt passage of the Boschwitz amendment to S. 822, or to other appropriate vehicles.●

HIGH-TECH: LEAVING HOME

● Mr. COHEN. Mr. President, for the past week the Washington Post has run an indepth and thought-provoking series of articles entitled "High-Tech: Leaving home." These articles, written by Dan Morgan, examine the increasing pace of technology in the United States and in Japan, our chief technological rival.

The series raises many questions over the extent to which the United States should share, either directly or indirectly, technological innovations with Japan. It describes, for example, how the movement of technology by various means, such as through the formation of joint ventures with foreign firms, the publication of technological data—or even the theft of trade secrets through industrial espionage—can shift the delicate balance of economic power away from the United States.

In examining these issues, the series asks whether past policies of both American Government and business have helped the technological capacity of foreign countries while hurting our own, and whether "America is destined to relive the economic decline of Great Britain, another nation with a proud history of invention and technological innovation."

Recently, many bills which are aimed at improving America's technological expertise have been introduced in both the Senate and the House of Representatives. These proposals seek to encourage industrial innovation so that we can compete more effectively in the world market. This series adds another perspective to the problems facing the United States as it adjusts to the information age and serves the important function of making the Government, business, and the public more aware of the value of advanced technology—whether it takes the form of computer chips, genetic seed breeding research, or robotics in heavy industry—as a crucial asset to America's economy and future.

I submit the series of articles from the Washington Post for the RECORD.

The articles follow:

[From the Washington Post, May 1, 1983]

HIGH-TECH: LEAVING HOME—LOANED SCIENCE RETURNS AS COMPETITION

(By Dan Morgan)

In the 1950s and '60s, inventor George Devol took out several dozen patents for what he called his "programmed article handling device." He felt sure that American industry would be revolutionized by his ideas.

The patents were soon acquired by a struggling young company called Unimation, anxious to cash in on the new technology that seemed certain to sweep the country.

But U.S. companies showed little interest in Unimation's products, and in 1968 the company in desperation made a deal with Kawasaki Heavy Industries, allowing the Japanese firm to use its know-how.

Devol's "programmed article handling device" is known today as a robot. And today, Japan leads the world in the manufacture and use of industrial robots.

Now, Kawasaki and other Japanese companies sell robots to America's industrial giants, which are belatedly acknowledging the merit in Devol's ideas. Kawasaki robots, based on technology acquired from Unimation, will work on automobiles that will soon start rolling off Nissan Motors' first U.S. assembly plant in Tennessee.

"We're handing it to the Japanese on a platter," said Devol, now 71. "I just can't understand America."

Stories such as that, repeated across a wide spectrum of U.S. industry, raise deeply troubling questions about the nation's ability to compete in the demanding business conditions of the Information Age.

The United States developed the first computer-controlled robots, the transistor, the integrated circuit, the video cassette recorder, the communications laser, fiber-optic cable, gene splicing and the software that enables computers to design, test and manufacture products.

Yet good ideas percolating out of research laboratories and machine shops have not guaranteed the health of American industry. Japanese companies are ahead of or equal to the United States in several of the businesses that grew out of those innovations.

Is something fundamentally wrong with U.S. management? Are foreigners "ripping off" precious American technology? Has the country sold its ideas without giving enough thought to the impact on its future industrial competitiveness? Is America destined to relive the economic decline of Great Britain, another nation with a proud history of invention and technological innovation? Can an open, unplanned society that tolerates a high degree of economic confusion survive the challenge of societies operating on the principle of consensus and clear national objectives?

This series examines these questions in the light of the technology trade with Japan, America's principal economic rival. The ever increasing pace of technological advances and the way both nations use the new discoveries play a controlling role in the rise of some industries and demise of others.

Movement of technology from one country to another, through sale of a patent, purloining of a trade secret, the visit of a student, publication of a technical paper, establishment of a joint business venture or acquisition of a foreign company can influence the balance of economic power between countries in the 1980s as surely as the petroleum trade did in the 1970s.

It can sound the death knell of an industry, and cost American jobs, as it has in parts of the steel industry hit by imports of Japanese and South Korean steel manufactured with the newest continuous-casting processes.

For industrial countries, technology is a particularly precious asset, a trust for the future, that can help offset the competitive advantages that lower wages and less expensive social programs give some other nations.

As the United States shifts slowly from a manufacturing to an "information" economy, emerging high-technology industries offer one hope for generating new wealth and new jobs requiring skills greater than those available in overseas labor forces.

While high-technology industries in themselves will not generate enough jobs to solve the U.S. unemployment problems, application of a wide range of technologies to dozens of industries at least holds out the hope for a more productive, competitive and growing U.S. economy.

Ironically, American technology has played an enormous role in the emergence of the Japan now challenging the United States for economic supremacy.

Lacking natural resources and excess manpower, Japanese industry has prospered by a near-fanatical emphasis on maximum exploitation of advanced technology.

Between 1950 and 1980, Japanese companies acquired almost all of the world's available advanced technology by signing at least 30,000 licensing or technical agreements with western companies, mainly American. The price paid by Japan in royalties and fees has been about $10 billion, less than one-fifth of what is spent in the United States for research and developement in one year.

EXPORTS PROVIDE INDUSTRIAL BASE

U.S. licenses and advanced equipment have provided the base for numerous Japanese high-technology industries.

One example: U.S. computer graphics systems and electron-beam etching devices were used by Japan to produce 64,000-bit computer memory chips ahead of American chip makers.

Another example: The Pentagon-backed sale of dozens of sophisticated U.S. aerospace technologies to Japan under a joint weapons-production program is helping to create an advanced Japanese aircraft industry.

This massive transfer of technology, in the interest of strengthening a military ally, is upgrading the capability of Japan's expanding commercial aircraft industry to compete against Boeing and McDonnell Douglas by the year 2000.

"Japan is doing to us what we did in Europe after World War II," said Jacob Rabinow, consultant to the National Bureau of Standards and holder of 218 U.S. patents. "They are taking our science and making products out of it."

However, few who operate out of the "engine rooms" of advanced industries think that it would be desirable, or even possible, for America to put a sudden lock on its trade secrets.

"The horse is out of the barn," an aerospace executive said.

The web of transpacific business relationships that has grown over the years is much denser than most Americans probably realize. General Motors-Toyota, IBM-Matsushita, General Motors-Fanuc, General Electric-C. Itoh. These are just a few of the hundreds of joint ventures, partnerships or technical tie-ups now in place. Untangling this web would be almost unthinkable now.

Moreover, the United States no longer enjoys a technology monoploy in this relationship. Japanese steel companies, for example, are selling U.S. companies their processes for continuous casting and cold rolling, and Sumitomo Metals Industries is helping U.S. Steel build the first U.S. mill capable of turning out 48-inch, Arctic-grade pipe.

JAPAN SEEKS BREAKTHROUGHS

One of the most far-reaching comparisons of U.S. and Japanese technology, conducted last year by Japan's Society of Science, Technology and Economics, concluded that Japan was inferior to the United States in 56 key technologies but superior in 51. The survey examined 43 products in 37 industrial fields and compared the degree of automation, methods for testing product quality and design techniques.

Between 1970 and 1979, the five largest Japanese computer chip companies filed for almost as many U.S. patents (1,200) as the five largest U.S. firms (1,500).

If the United States is having trouble with Japanese competition when U.S. science and technology remain superior, some ask, what will the situation be later in the decade when Japan's concerted effort to create its own breakthroughs in the "knowledge intensive" industries begins to bear fruit?

Japan is not the world's only technologically advanced country. French aviation expertise, British computer software, Swedish robotics and Soviet missilery are impressive. But Japan is emerging as the strongest challenger in the 1980s.

Tokyo's Ministry of International Trade and Industry (MITI), the superagency that guided the successful export drive in automobiles and consumer electronics in the 1970s, has put together consortiums of Japanese companies and banks to develop computers that think like humans, "intelligent" robots, a supercomputer 1,000 times more powerful than anything sold by IBM, an electric car, fuel-efficient ceramic engines, carbon dioxide lasers and a new generation of computer software.

Few U.S. industrialists underestimate the seriousness of this effort.

Recent American visitors to Japan, for example have been impressed with efforts under way there to develop a new generation of powerful computers, capable of functioning at very high speed and emulating some of the flexibility and creativity inherent in human thinking.

"If these projects are successful, which appears likely, advanced economic and military research in the United States may become dependent on access to supercomputers of [Japanese] manufacture," concluded three computer scientists from Los Alamos National Laboratory in a report published in Science magazine last December.

For Americans who grew up in a postwar world in which the United States seemed to hold a virtual monopoly on technological advances, those statistics often seem bewildering. The United States has 124 Nobel Prizes in physics, chemistry and medicine to Japan's four, and American scientists are hard pressed to name a single Japanese innovation that has truly changed the world.

But Japan exports about $5 billion more in high-technology products to the United States than it imports. While the U.S. share of world trade in high-tech products and technical information declined from 31 percent in 1962 to 21 percent in 1979, the Japanese share rose from 5 percent to 14 percent.

To some extent, the government reaction to this has focused on a need to formulate policies that would safeguard U.S. technological advantages. James C. Abeggien and Thomas M. Hout of the Boston Consulting Group in Tokyo have called sale of civilian technology to Japan at bargain prices "a disaster" and "the biggest fire sale in history."

"With the benefit of hindsight, it is now apparent that many U.S. firms overestimated the permanence of their technological supremacy and underestimated the 'boomerang effect' of their technology licenses," Washington trade attorney Carl J. Green said.

Companies explain their licensing of technology to Japan by saying that Japan's protectionist policies have often barred them from selling U.S.-made products there. Moreover, they suggest, royalties are often pure profit and help recoup past research costs. The $517,000 received by Unimation in royalty payments from Kawasaki in 1980 amounted to half of the company's net earnings.

However, such royalty payments often seem small compared with the benefits to Japan. RCA, Industralists note ruefully, still is receiving royalties for licensing color-television processes to Japanese companies, which compete aggressively with RCA.

At the same time that the issue of technology safeguards is being raised, there is equal concern that the United States not overlook its own well-documented industrial shortcomings.

"The problem in this country isn't innovation. We innovate like hell. The problem is that our developed industries don't adapt and adjust rapidly enough," said Prof. Leslie Eric Cross, acting director of the materials research laboratory at Pennsylvania State University.

In a report on Japan written in 1981, Washington consultants Harald B. Malmgren and Jack Baranson criticized U.S. industry for being too quick to move factories abroad to take advantage of low wage rates, "rather than redesigning and reengineering production techniques to meet Japanese competition."

Robert B. Reich, of the Kennedy School of Government at Harvard University, criticized government research policies "subject to sudden changes in national security needs and prevailing policies."

Inventor Jacob Rabinow is critical of U.S. corporate managers, a breed that he said suffers from "technological illiteracy."

"They're bankers and lawyers. . . . They'd rather sell a company than straighten it out," he said.

For all the concern about the failures of U.S. business, U.S. policy-makers stress the need for a sense of perspective. "Japan is not yet a technological giant," Undersecretary of Commerce Lionel H. Olmer said.

The race between U.S. and Japanese robotics companies shows why it may be risky to jump to conclusions about the demise of U.S. industries.

THE UNITED STATES AS UNDERDOG

The United States is undoubtedly the underdog. Japan, with about 150 robotics companies, is on the verge of a major export push that will put new pressures on the United States. Although it now exports only about 5 percent of the robots it manufactures, Japan wants to increase that to 20 percent by the mid-1980s.

This strong Japanese position is in some respects a natural outgrowth of Japan's earlier concerns about manpower shortages, rather than a farsighted commitment to technological advances.

By 1972, these concerns had given rise to the Japan Industrial Robot Association (JIRA), formed with the backing of MITI. JIRA published papers, circulated technical information and raised the consciousness of Japanese businessmen about robots.

In 1980, an MITI-sponsored consortium comprised of 24 robot manufacturers and 10 insurance companies was set up to buy robots and lease them to Japanese manufacturing companies on a trial basis. This was a major boon because plant managers no

longer bore all of the risk of introducing an untried and relatively expensive technology.

By contrast, the U.S. automobile industry, the largest potential market for fledgling robot companies in the mid-1960s, faced no such problems. Fear of labor union opposition, rather than potential manpower shortages, was the auto makers' dominant concern. General Motors, Ford and Chrysler were then in the position of having almost no serious competition that might have whetted their interest in radical productivity gains.

The major asset of U.S. robot companies in the new competitive situation is quintessentially American: superior technology.

While Japan has excelled at the mechanical engineering required for mass production of high-quality robot arms, gears and sensors, U.S. companies maintain that they are ahead in the increasingly important field of producing software programs that "teach" robots to perform tasks.

Automatix, a three-year-old company located in Billerica, Mass., amid one of the nation's fastest growing high-tech clusters a few miles from Rte. 128, is an example of a company gambling on technology to beat back the Japanese challenge.

Tucked away in the Massachusetts woods, Automatix exudes the hustle and bustle typical of small "start-up" companies founded by entrepreneurs eager to ride the expected boom in lasers, microwave communications, microelectronics, home computers, robotics and other Information Age industries.

In a workshop where gangly robot arms hang limply, half a dozen young men stare intently into a tangle of wires protruding from the open back of a computer. A guide explains that the men are "smart guys from MIT" who might be up all night trying to improve a program that guides the path of a robot arm along the line where two pieces of metal come together to be welded.

In a nearby room, a visitor is invited to try his skill at "teaching" a robot. Using a hand-held controller to make the robot arm move up, down, sideways and forward, the visitor moves the device into position while a computer records the trajectory to within eight-thousandths of an inch and memorizes it for future use.

Automatix started with excellent credentials and technical assets.

Its chairman, Philip Villers, had proved his entrepreneurial abilities as cofounder of Computervision, an aggressive computer graphics firm that had experience in Japan in the 1970s. Vice President Victor Scheinman helped design the "Stanford Arm" while working at the Stanford Artificial Intelligence Laboratory.

And Automatix had acquired a valuable piece of software from the Stanford Research Institute: algorithms used to give robots a primitive sense of sight, a step toward more versatile machines.

Automatix' major problem at the outset was lack of a robot for arc welding, the "niche" where Automatix wanted to make its mark. Its solution was to turn to a Japanese company, Hitachi.

Hitachi had just the robot the new U.S. company wanted, while Automatix had something Hitachi needed: a foot inside the U.S. market.

The deal struck by Automatix was to import Hitachi robots and outfit them with Automatix controls and software. As Vice President Michael J. Cronin said, it was a sort of devil's pact with few illusions on either side.

The Japanese strategy was clear to Cronin.

"Everybody [in the United States] would get to know the Hitachi robots and they would then come in and cut the price by a factor of two," he said. "They fully expected to take the whole market away from us by the end of 1982. We knew we had a year or two before Hitachi steamrollered in here. It was a chess game."

Right on schedule, Cronin said, Hitachi began an export drive midway through last year, placing glossy advertisements in magazines and sending Hitachi salesmen to Automatix customers. But by then, Cronin said, Automatix was ready to spring a "bear trap" of its own.

"We couldn't produce cheaper robots than they could, but we could advance the state of the art and redefine the market," he said. By late last year, Automatix was offering many new features in connection with the Hitachi robots it was selling.

Most important, the Automatix robot could be "taught" quickly "off line," meaning that small companies could program the robots for new tasks without shutting down production lines for hours. Building on the SRI algorithms, Automatix also offered a "vision system"—television cameras that are the working robot's "eyes" and allow it to make minor adjustments of its movements.

Cronin believes the strategy has worked. Chevrolet is using this Autovision II system to inspect truck front ends as they come off assembly lines, and Seiko in Japan uses it to inspect digital watches. Automatix has sold about 60 arc-welding robots at about $75,000 each to U.S. customers such as General Motors. He estimated that Hitachi has sold fewer than 10.

In essence, Cronin said, Automatix is taking a leaf out of the Japanese book by obtaining a "base technology"—the Hitachi robot—and "running like hell with it."

Soon enough, he added, Automatix intends to attack Japan."

"I promised Hitachi I'd come back and try to sell 'em one of their own robots. We may not win over there, but we'll learn a lot. I'd rather get my bruises in Tokyo Bay than in Boston Harbor . . . ," he said.

"We're gambling that robotics is still in an revolutionary stage that will lead to robots developing eyes, ears and maybe even brains. We're looking way ahead and inviting companies to move with us down the technology road . . . .

"If we lose, it will be because we got fat and sloppy, because we worried about profit-to-equity ratios and mergers. . . . If we lose, it will be because we lost our stomach for battle."

(Contributing to this series were Tokyo bureau chief Tracy Dahlby, who conducted interviews in Japan, and Hobart Rowen, senior economics writer. Staff researcher Carin Pratt assisted with the reporting and research.)

WHAT U.S. PIONEERS, OTHER NATIONS PERFECT

When the U.S. Postal Service asked for bids several years ago on $500 million in optical character readers to sort mail, it received an enthusiastic response, from foreign companies.

Of six proposals, all came from overseas firms, including two from Nippon Electric and Toshiba of Japan. The companies offered the latest in high-technology postal equipment capable of reading the zip code on letters, checking it for accuracy and marking each envelope with a bar code for sorting and routing.

There was a "lack of interest" on the part of U.S. companies which "just didn't have any machines that we wanted," said Assistant Postmaster General James French.

What was surprising was that much of the early work on optical character readers had been done in the United States.

Such examples of foreign companies capitalizing on technologies pioneered in the United States are far from rare:

Although the transistor was invented at Bell Laboratories in 1947 by Nobel laureates William Shockley, John Bardeen and W. H. Brattain, Japan's Sony first sold transistor radios in this country in 1956.

A U.S. company, Ampex, introduced the first videotape recorder, the Quad, in 1956. But Sony engineers, working feverishly to improve on early U.S. designs, preempted the American consumer market in videocassette recorders with the Betamax in 1975.

RCA and Philips pioneered the technology for color television. But by 1969, Sony's Trinitron picture tube and Hitachi's solid-state color receiver had put the Japanese ahead.

In 1969, RCA invented complementary metal oxide silicon (CMOS), a process for making microchips that use very little power. Some microelectronics specialists say

Japan is now even with or ahead of the United States in such technology.

In the case of the foreign optical character reading equipment, the Postal Service resorted to "Buy America" tactics to make sure that U.S. companies got a piece of the new high-technology business. It agreed to buy the equipment, but only if it were made in the United States, and suggested that the foreigners acquire American "partners."

The contract was awarded to two U.S. companies, Burroughs and Pitney Bowes, which teamed with Nippon Electric and Italy's Elsag to make the character readers. The other companies dropped out.

"We went a little beyond 'Buy America'. . . . I suppose we did what Japan sometimes has done," French said. "But we're part of this country, and its economic health and well-being are important to us."

—DAN MORGAN

PROLOG—TRAVELS OF A COMPUTER CODE

The travels of Prolog, a computer language used in the esoteric field of artificial intelligence, suggest the speed with which ideas and new technologies are carried across international borders by the scientific community.

Prolog was born in the sunny Mediterranean city of Marseilles. It was moved to the colder climes of Scotland, carried across the Atlantic and settled for a while in California. Today, it has found a warm welcome, and probably a permanent home, in Japan.

The Prolog language was written in 1971 by Alain Colmerauer, a French computer scientist at the artificial intelligence unit of the University of Marseilles. He is said to have been inspired about Prolog in part by Robert Kowalski, an American then working at the University of Edinburgh. Kowalski had been looking into using new kinds of logic to program computers to perform some of the complex interpretive tasks that human beings are capable of. The ideas meshed with the work of Colmerauer, who had been testing ways of having machines parse sentences, a first step in havng computers translate languages.

In 1974, a Kowalski associate, David Warren, visited Colmerauer and took Prolog back to the University of Edinburgh. There he shared the concept with Harry Barrow, an American computer scientist.

In 1977, Barrow brought Prolog to the United States, introducing the language to colleagues at the artificial intelligence center at Stanford Research Institute in Menlo Park, Calif.

A year later, Prolog made a new convert in Japanese computer scientist Koichi Furukawa, who was spending a year at SRI.

"He played with Prolog at the end of his stay and like it," recalled Daniel Sagalowicz, the center's assistant director. When Furukawa returned to Japan's Electro Technical Laboratory, he explained it to his boss, Kazuhiro Fuchi.

At ETL, Prolog created an immediate stir. While another language, LISP, has won wider acceptance in the United States, Prolog seemed to be the language that Japanese computer scientists had been seeking.

When Fuchi was made technical director of Japan's prestigious Fifth Generation Computer project, which is leading Japanese efforts to equal or surpass the United States in high-speed and high-powered computers, he took Prolog with him.

HIGH-TECH: LEAVING HOME—BATTLING TO INNOVATE AND EMULATE: INTEL VS. NIPPON ELECTRIC

(By Dan Morgan)

Peering into a microscope at a greatly magnified computer chip one day last August, Peter Stoll of Intel Corp. saw something startlingly familiar. In one of the tiny cells, two transistors were disconnected from the rest of the chip, and dangled uselessly in their bed of silicon.

Stoll, 33, a chip designer, recognized the defect as a small, last-minute repair job he had performed on Intel's 8086 microprocessor several years earlier. It had worked, correcting the minor flaw in the chip's logic, and the 8086 went on to become ephenomenally successful as the "brain" in a wide range of business computers, robots and industrial machinery.

But what startled Stoll was that the chip under the microscope was not Intel's. It was a product of Nippon Electric Co. (NEC) of Tokyo. Stoll concluded that he was looking at a Japanese copy so perfect that it even repeated the small imperfection in the original chip.

Intrigue of that kind in the $13 billion-a-year global market for computer chips has led to U.S. accusations of unfair Japanese practices, ranging from copying to protectionism. Critics of Japan say that its efforts to gain supremacy in computer chips, perhaps the single most important technology of the Information Age, are typical of the methods employed by "Japan Inc."

"We're at war, no doubt about it," said a computer scientist from a large U.S. research laboratory. "If I had money in 'Silicon Valley,' I'd get it out . . . It's just like any other war zone."

U.S. politicians are in a mood to strike back.

Democratic Reps. Don Edwards and Norman Y. Mineta, from California's so-called Silicon Valley area, have introduced a bill to give copyright protection to chip designs. They say the measure is needed to stop "private firms" from "flooding markets with copied designs that undersell the innovating firms."

But some trade specialists caution that there is a Japanese side to this story. For one thing, U.S. companies are holding their own in the competition.

Japan, whose share of the U.S. chip market is well under 10 percent, has made inroads in some kinds of chips, such as memories, that store information. But the United States is dominant in microprocessors, the "computers on a chip" that serve as brains for computers and controls in dishwashers, jet aircraft, missiles, industrial robots, telephone systems, traffic lights and hundred of other products.

Many experts insist that Japan's progress is not attributable to copying.

"The basis for the Japanese taking an ever larger share of the [chip] market is not transfer of American technology," said a patent attorney for a large U.S. company. "It's Japanese management, equipment and a degree of cooperation between firms that's prohibited in this country."

Even the issues in the Intel-Nippon Electric dispute about alleged copying of the 8086 microprocessor become fuzzier on closer inspection. Intel contended that NEC wrongfully copied the chip's microcode, the set of internal instructions laid out as a pattern of transistors on the chip's memory. Intel counsel Roger Borovoy said the microcode was copyrighted and could not be used without Intel's permission.

Officials from NEC's U.S. sales company acknowledged that the microcode on their chip is identical to that on Intel's including the flaw engraved onto the original.

"If you're not 100 percent identical, you're dead. If you take the fatal flaw out, it wouldn't be compatible. We have chosen to be as close to the original as possible," said NEC's David Millet, who is in charge of nationwide marketing of microprocessors.

But NEC officials in Japan and the United States deny that the company did anything wrong, contending that they had a right to produce their own version of the chip under a 1976 agreement allowing both companies to use the other's patents.

NEC officials in this country say the question of whether the microcode can be copyrighted has never been decided in court, and Intel agrees. And they say that NEC even sent Intel a 1979 announcement of the NEC version of the 8086.

The story of the NEC-Intel dispute is representative of the suspicion, tension and, often, grudging admiration that characterize the competition between the two countries. It begins with the markedly different cultures and societies from which the two have emerged.

THE ROOTS OF COMPETITION

Compared with the 84-year-old NEC, Intel is an upstart company, an example of American boldness and nerve that began with a few dozen employes in Santa Clara, Calif., in 1968 and grew into a business with 19,000 employes worldwide.

Intel's stock in trade has been innovation. Since it was founded, the company has spewed out firsts, including the first microprocessor in 1973. A founder, Robert Noyce, is one of the inventors of the integrated circuit, which became a basic component of modern electronics.

Intel is also a sort of corporate melting pot that, like the nation itself, has drawn its brain power from all over the world. Its current president came to America as a refugee from Hungary in 1957; a senior vice president was born in Hungary, and an Israeli, an Italian and a Japanese are credited with helping to develop several new Intel products.

NEC has succeeded in typical Japanese fashion: through dogged determination, aggressive marketing and initial reliance on U.S. technology, including that of Intel.

From the outset, NEC had financial and structural advantages over Intel. While Intel makes more than 80 percent of its income from the sale of chips, NEC is a conglomerate that produces computers, electrical equipment and other products. Chips account for less than 20 percent of its revenue, so a temporary decline in that business can be offset by gains in other products.

As a member of the influential Sumitomo industrial group, NEC could draw on the financial resources of the Sumitomo Bank and on the marketing connections of the Sumitomo trading company. But Intel has depended for its financing on the vagaries of the U.S. stock market and bank loans. For most of the last 10 years, Intel has had to borrow money at much higher interest rates than NEC.

Until the early 1970s, NEC was no match for American chip makers. The U.S. computer chip industry was expanding rapidly, thanks in part to heavy government spending on chips for the Apollo man-on-the-

moon space program and the Minuteman intercontinental ballistic missile.

In 1973, computer scientists in Itel's laboratory scored a major breakthrough with invention of the first microprocessor. This was a watershed not only for Intel, but also in the history of the information industry.

Until then, chips generally had performed only a single task, such as adding, subtracting, multiplying or dividing. Combining those tasks required wiring together several chips on a bulky board. But a single microprocessor chip could perform all those functions. This meant, for example, that one computing chip could run a pocket calculator, shut off a microwave oven, analyze blood or control traffic signals.

It was possible for general-purpose microprocessing chips to replace more expensive, customized ones previously needed by industry. As microprocessors became more sophisticated, they increasingly began to do jobs that previously had required large, cumbersome computers.

NEC claims to have developed an early microprocessor on its own at about the same time as Intel. This chip, the uCom 4, could handle simple tasks such as operating a pocket calculator. But Japanese officials acknowledge that they have had trouble keeping up with U.S. advances in microprocessors. To do so, Japanese companies have repeatedly relied on U.S. patents and "reverse engineering."

Industry representatives make a distinction between reverse engineering, a generally legitimate practice in which one company's designs are used as a model by another company's engineers, and copying, in which imprints of circuitry are taken by using photographic and lithographic techniques.

In the late 1970s, for example, NEC produced a version of Intel's 8080 microprocessor, the first chip complex enough to handle word-processing programs. A new generation of microprocessors was making possible the era of small, compact personal computers, and Intel was again in the lead.

Tomihiro Matsumara, NEC's senior vice president for research, acknowledged in an interview that NEC attempted to make and sell its own comparable chip, "but we did not succeed." So, he said, NEC engineers analyzed the 8080, then laid out their own "completely different" version, using NEC manufacturing techniques.

Roger Borovoy, Intel's general counsel until he left the company last month, said Intel had no objection because NEC had used the 8080 only as a model and not "copied" it.

Japan, he acknowledged, was becoming an innovator in chips in its own right. Between 1974 and 1977, the government had poured at least $300 million into a research consortium that included NEC and five other companies. "They had come a long way with their own development. They'd attained a status of their own," Borovoy recalled.

Evidence of NEC's progress came in April, 1976, when Intel and NEC signed an agreement that enabled each company to use the other's patents. In the next several years, Intel was to utilize several NEC patents for specialized types of chips.

By the late 1970s, NEC, Hitachi, Fujitsu and Toshiba were grabbing significant shares of the world market in memory chips, devices that store information but do not perform the complex tasks of microprocessors. But these companies still had problems with the far more complex microprocessors.

In 1978, a year before NEC completed its version of the 8080, Intel introduced a much more advanced microprocessor, the 8086. It crammed 30,000 transistors onto a quarter-inch-square piece of silicon, producing as much computing power as some 1960s' computers that filled rooms. The 8086 could handle not only word processing but also complex mathematics, and it and comparable microprocessors are being used in most sophisticated personal and business computers, such as IMB's popular personal model.

NEC's representatives recognized that the 8086 gave the United States a decisive edge in silicon brain power. In 1978 they approached Intel about supplying technical aid to produce the 8086 in return for a percentage of the money NEC would get from selling the 8086 in Japan.

But this time, Intel turned NEC down. NEC, in the midst of a U.S. expansion program, was preparing to enter the international chip market in a big way. It had just purchased a California computer memory company called Electronic Arrays and was planning a second California facility for making memories and logic circuits.

"We weren't anxious to help our competitor," an Intel official said.

Instead, Intel made a deal with NEC's Japanese rival, Fujitsu. Thwarted, NEC decided to go ahead with a version of the 8086 without special help from Intel.

NEC's Matsumara acknowledged that the resulting chip is "interchangeable" with the Intel version, but he strongly denies that it was "copied." Similarly, Robert Hinckley, an attorney for NEC in San Francisco, contends that NEC had a right to reverse-engineer the chip because of the patent cross-licensing agreement of April, 1976.

NEC officials said it was no secret that they would produce the 8086. Electronic News reported it and, NEC officials said, they sent a copy of their announcement to Intel and received no protests.

NEC, however, had several problems.

For one thing, the Japanese company apparently had difficulties reproducing a version of the Intel device without American help. It was not until 1980, two years after Intel's 8086 appeared, that NEC's comparable chip was sold in the United States.

There was also the problem of Intel's copyright on the chip's microcode, a sort of brain within a brain. It is the part of the microprocessor that takes electronic commands from a keyboard and tells the rest of the chip's parts what to do with the commands and in what sequence.

Like a video-game cartridge, the microcode is a computer program that has been written by a programmer and then is built into the chip. In a Pac Man videogame, the microcode tells the Pac Man what to do. In a microprocessor, the microcode tells a computer what to do. Although the microcode appears in the 8086 as hardware—a pattern of 10,752 tiny transistors—Intel maintains that it is not a mere piece of electrical circuitry but is "intellectual property" covered by copyright law.

Copyrighting the microcode had seemed to Borovoy a way to protect the company's intellectual effort from infringement. Borovoy said his "knees wouldn't shake" at bringing a lawsuit against a company that copied Intel's microcode.

But Hinckley, NEC's San Francisco attorney, said no cases have been adjudicated establishing any company's copyright claim on such material.

"Copyright is designed to protect works of authorship—artistic works—and we don't think microcode qualifies," he maintained.

Whatever the merits of their respective cases, NEC and Intel reached a settlement on the 8086 in March after several months of negotiations and without litigation. Borovoy, who said he could not discuss details of the settlement, said the agreement would save hundreds of thousands of dollars in court costs.

THE BATTLE FOR MARKET SHARE

But the dispute over the 8086 is seen at Intel as only one chapter in what will undoubtedly be a continuing battle.

"The Japanese see themselves locked in a warlike struggle, determined singlemindedly to reach their objectives by any means, regardless of the impact on the U.S. . . . It's going to be a very, very bloody battle out there," Intel's Noyce said.

He argued that Japanese tactics have denied American companies the fruits of their innovation, profits that enable them to pour money into creating new technical breakthroughs needed to maintain the U.S. lead.

U.S. studies have accumulated a mass of evidence buttressing Noyce's contention that the Japanese government has shielded local chip companies from U.S. competition while they prepared for an onslaught on traditional U.S. markets. U.S. companies have never been able to capture more than 20 percent of the Japanese chip market even when their technological lead was overwhelming.

Before 1978, only Texas Instruments was permitted to establish a wholly owned manufacturing subsidiary in Japan, and even TI had to share some of its patents with Japanese companies to secure that concession.

Few deny that the Japanese challenge is serious. Japan is running a $250 million trade surplus with the United States in chips. And NEC and Hitachi ranked just behind Motorola and Texas Instruments as world leaders in sales last year.

A detailed study issued in February, 1982, by the congressional Joint Economic Committee warned that the main casualties of the relentless Japanese export drive could be small, innovative Silicon Valley companies. With them out of the running, it warned, Japan would be in a position to beat the United States in innovation.

Some industrial experts say the United States should keep its sense of perspective as it responds to Japan's challenge.

Robert B. Reich of the Kennedy School of Government at Harvard University said Japanese chip companies made headway after 1975 primarily because they plunged ahead while U.S. companies, hard hit by the recession, "stood still."

U.S. companies have recently regained some of their lost share of the world market in memory chips and still have an impressive lead in microprocessors. In typical U.S. fashion, Intel is on the verge of marketing an even more advanced microprocessor, the 80386, which the company claims will be far ahead of anything produced in Japan.

Intel has also announced that it will soon sell the first magnetic, bubble-type memory capable of storing 4 million bits of information, the equivalent of 240 typewritten pages.

"Despite trade barriers and protection and copying, we're still winning, although that's no guarantee for the future," said Bob Derby, who ran Intel's marketing operations in Japan.

That, free traders say, should be a warning to those in Congress who want to wield the big stick of government retaliation in the computer chip battles with Japan.

(Contributing to this series were Tokyo bureau chief Tracy Dahlby, who conducted interviews in Japan, and Hobart Rowen, senior economics writer. Staff researcher Carin Pratt assisted with the reporting and research.)

CHIPS: A GLOSSARY OF TERMS

Silicon: the hard, gray, lightweight material from which chips are made. Wafers of silicon are "doped" with impurities in selected places to change electrical properties and affect the path of the current. Lithography is used to imprint tiny wires, or circuits, on a chip's silicon layers.

Transistor: an electrical switch in a chip that can be turned on and off in a controlled way to store or process data.

Integrated circuit: a combination of transistors. The latest generation contains as many as 100,000.

Memory: a chip that stores information.

Microprocessor: a chip that performs some of the same tasks as a computer; the "brain," or control in hundreds of pieces of equipment, from car engines to computers.

Microcode: a software program that is the permanent set of instructions on a microprocessor chip.

Bit: A single "on" or "off" signal, a single piece of electronic code. It takes several bits together to represent one letter, punctuation mark or numeral.

HIGH-TECH LEAVING HOME—IN LASER ADVANCES, AN ORIENT EXPRESS

(By Dan Morgan)

In 1970, a team of scientists at Bell Laboratories successfully tested a tiny laser the size of a grain of sand that made possible a new era of "optical" communications.

Although the device was primitive by today's standards, it was the predecessor of lasers that can be turned on and off tens of millions of times a second to transmit telephone conversations, messages and other information in the form of light waves pulsing through extremely pure glass fiber cable.

"It was the first time I ever saw champagne brought into Bell Laboratories," recalled Bell physicist Morton Panish, one of two scientists credited with the invention.

Now, 13 years later, the U.S. companies that make lasers have less to celebrate.

When Bell Telephone began looking around in 1980 for lasers to go with the first light-wave cable under the Atlantic Ocean, to be installed later in this decade, it turned to Hitachi of Japan.

"Hitachi appeared to have potentially the most reliable laser in the world," Jack Sipress, director of Bell's undersea systems laboratory, said. "We have had no reason to doubt the wisdom of that."

The story of how a Japanese company got a beat on the Bell System's manufacturing subsidiary, Western Electric, and on RCA, Exxon, Hewlett-Packard and Xerox—all of which had access to Bell's patents and were working on lasers in the 1970s—raises questions about U.S. industry's ability to take advantage of technologies being developed in its own back yard.

"The United States is an underdeveloped country when it comes to getting useful, proven technologies transferred to business and industry," said John A. Alic, who has specialized in studying U.S. industrial policy at Congress' Office of Technology Assessment.

The reasons for this vary from industry to industry. Computerchip companies slowed product development in the mid-1970s due to sliding demand during recession, and some of the country's innovative genetic engineering companies are having trouble raising capital. But a more general problem appears to be the shortsightedness of large, established U.S. companies.

"The fact is the U.S. has tire marks all over its back when it comes to getting the products out," a Bell scientist said. "When you come right down to it, nobody sat down as early as [Hitachi] did and said, 'We're going to do this.'"

Japanese officials said there is nothing magical about their success.

"American industry has the frontier spirit, and big Japanese enterprises don't, so we think we should guide [Japanese firms] to develop the technology," said a representative of the Ministry of International Trade and Industry (MITI) in Tokyo.

In the early 1970s, MITI joined Japan's public phone company, Nippon Telephone and Telegraph, and several private companies to begin experimental research on fibers, lasers, video cameras and other optical devices. Most of the money was supplied by private industry, with an eye to winning at least half of a worldwide market in optical communications equipment projected at $8 billion by 1990.

The effort was aided by Japanese scientists strategically placed in U.S. research laboratories where work on lasers and optical fibers was proceeding and by U.S. patents and processes for which Japan has paid little.

The economic stakes in the optical communications race are staggering in size, although other high-technology communications systems such as microwave and satellite also hold promise.

But microwave use congests air-wave frequencies and telephone communications by satellite can suffer from distortion because of the distances involved.

These restrictions do not apply to optical communications. Thus, the world is on the verge of a major change that will continue well past the year 2000 as optical systems carry increasingly larger amounts of information over smaller, cheaper lines than the current electromechanical systems. The first such line has just been installed between Washington and New York.

A half-inch-thick glass fiber cable can carry 46,368 simultaneous conversations, the same amount as a four-inch copper coaxial cable. Installation of optical cables should be considerably easier in overcrowded urban systems.

In addition to long-distance communications, lasers and optical recorders capable of storing tens of millions of bits of information will become standard in offices, computers, video-disc equipment and broadcasting.

BELL LABS, SOVIET INSTITUTE PIONEER LASERS

Optical communications also will be useful to the military services because there are no effective methods of intercepting signals transmitted as light waves.

In a light-wave system, a voice is converted into an electrical impulse, as it is in a standard telephone system. This signal is scanned by a digital encoder at a central office and converted into a stream of "ons" and "offs."

The laser light source is then activated and transmits "ons" as a pulse of light and "offs" as the absence of one. Booster stations amplify the light signal every few miles.

Undisputed pioneers in developing laser-light sources for such systems were Bell Laboratories and the Ioffe Institute in Leningrad. But until 1970, researchers were plagued by several problems.

In one, lasers became overheated as beam-generating current passed through them and could only function continuously in super-cold liquid nitrogen, which made them unsuitable for commercial telephone systems. In another, the intense light could not be confined and tended to leak.

Bell's solution brought together the worlds of telecommunications and microelectronics. It involved using gallium aluminum arsenide to make a laser similar to a computer chip. This laser required very little power and could run at room temperature without overheating.

Details of the experiment were published in mid-1970 in the Applied Physics Letter of the American Physical Society. Bell officials recalled that the article, by Bell tradition, revealed somewhat more than other companies tend to publish about their technical achievements.

Because of its position as research arm of American Telephone & Telegraph (AT&T), a government-approved monopoly, Bell in 1956 signed a consent decree agreeing to make its patents available to other companies. Partly because of that agreement, openness became something of a tradition at Bell Laboratories.

The publication, which appeared at almost the same time that Soviet physicist Zhores Alferov of the Ioffe Institute was publishing his results, triggered widespread interest in the future of lasers as a communications medium. It also tied in with efforts under way at Bell and Corning Glass Works to develop a process for making glass fibers to carry the laser light signals.

"Once we and the Soviets had published, everybody filed in to do research," inventor Morton Panish recalled.

In retrospect, however, representatives of Bell and other companies acknowledged that the record of American companies in following up on this breakthrough was less than scintillating.

IN LASER ADVANCES, AN ORIENT EXPRESS

One U.S. company that saw early commercial promise in the new technolgy was Hewlett-Packard. In the mid-1970's it hired several people from Bell Laboratory's laser division and put them to work with a laboratory staff at Palo Alto, Calif.

One of them, C. J. Hwang, has mixed memories of the Hewlett-Packard work. The company, he said, "developed a whole laser program from scratch. But when the time came to go into production, they went back and forth and finally decided not to make the product because they couldn't generate positive cash flow within a year."

Hwang left soon after that to start his own company, General Optronics, which sells lasers to International Telephone & Telegraph (ITT), General Telephone & Electronics Corp. (GTE), Siemens in West Germany and SAT in France. General Optronics lasers are being used in France's Biarritz project, which involves use of fiber-optics communications to transmit television, telephone and picture-phone services to 1,500 houses.

Hewlett-Packard spokesman Robert Bouzon said holding off production was a "market decision." At the time, he said, it did not appear that there would be a profitable market for the lasers until 1985 to 1987.

"Why produce a product without a market? If you can get the state-of-the-art product from Japan, you get it," he said. Hewlett-Packard, he said, is continuing research on laser products.

To some, Hewlett-Packard's hesitation is reminiscent of developments in the U.S. consumer electronics industry in the 1960s and 1970s. An analysis of that period by William J. Abenathy and Richard S. Rosenbloom of the Harvard University Business School concluded that U.S. and Japanese managements took a very different approach to marketing, which had much to do with the final, disappointing outcome for the United States.

"American managers tend to rely on market research and 'objective' analysis to identify latent market opportunities, whereas [Japanese] firms like Sony took risks on novel products and set out to develop the market," they wrote.

In 1977, Exxon attempted an ill-fated foray into the laser world.

Through its venture capital arm, Exxon Enterprises, it bought a small Elmsford, N.Y., firm called Optical Information Systems (OIS) and began attracting a wide range of talent. Physicists were hired from Bell and RCA, and even a Soviet emigre physicist joined the project.

But within 24 months, Exxon was trying to sell the company, and many of the top scientists drawn to it were drifting away.

Exxon Enterprises spokesman Darcie Bundy said that although OIS was promising Exxon Enterprises was "sharpening its focus on certain other major companies, and OIS did not have the degree of necessary interdependency" with those companies.

Bundy did not say, however, why reaching that conclusion took Exxon almost two years, during which a substantial research effort had been launched.

Critics of Exxon's role have said privately that such in-and-out plunges by industrial giants is a waste of resources that hardly strengthens American economic competitiveness.

In December, 1981, Exxon finally found a buyer for its unwanted acquisition: the U.S. subsidiary of Japan's Mitsubishi Chemical Corp., which took a very different view of OIS's potential.

According to James M. Campanozzi, the reconstituted OIS's vice president for marketing, the Japanese company believes that lasers will have widely varied applications in office information systems, recording and broadcasting, as well as communications.

While Exxon had stressed research, he said, Mitsubishi "takes a more commercial view. We want to move into the systems area . . . into product lines for video, voice and data communication."

At RCA, early work on lasers focused on military rather than commercial applications. RCA's scientists were busy developing lasers that could pick out military targets and function as fuses in missiles.

Such work has given RCA a potential niche in President Reagan's planned new "Star Wars" system of electronic and lasser anti-ballistic missile shields.

This emphasis is defended by Michael Ettenberg, head of RCA's optoelectronic devices and systems. "Military contracts kept us alive," he said. "There was not a significant commercial market for 15 years, and most business until the last couple of years was military in nature."

Asked why the Japanese had not been hindered by the same lack of a commercial market, Ettenberg put part of the blame on the U.S. recession in the late 1970s, and added: "The U.S. doesn't invest in the future as much as the Japanese."

RCA's history at least raises questions about the heavy military emphasis in much U.S. research and development. Robert Reich of Harvard University's Kennedy School of Government acknowledges that the Pentagon has stimulated research activities but "not always in the direction of commercial success."

U.S. experts also acknowledge that U.S. companies had reason to be skittish. For one thing, producing lasers proved to be extremely complex and costly. Even today, one of the tiny light sources costs $2,000 or more.

Also, rapid advances in processes for producing pure glass fiber cables to transmit the laser light kept changing requirements for the lasers late in the 1970s. While lasers producing light-wave lengths of 0.8 microns were in favor in the early stages of fiber-optical cable development, wave lengths of 1.3 microns appeared to work better with the purer fibers developed in the late 1970s. A micron is 1 millionth of a meter in length.

Yet those obstacles did not keep Hitachi, again with help from Japanese scientists who had worked at Bell, from having a 1.3-micron laser ready by 1980.

Within a year after the initial Bell paper was published, according to Bell physicist Panish, "the Japanese were reproducing our results and in several years were doing their own research."

One asset was the network of Japanese scientists with first-hand experience in the U.S. research effort. Izuo Hayashi, who heads a government-industry effort in optical communications in Japan, was working at Bell when the first successful laser was assembled in 1970 and is credited, along with Panish, as one of its co-inventors.

One of Hayashi's mentors in Japan was another Bell alumnus, Michiyuki Uenohara, now a managing director of Nippon Electric. The roster of light-wave specialists at Japanese companies is studded with scientists who studied or worked at U.S. research facilities.

However, a Hitachi official, who asked not to be identified, credited the company's success primarily to the "free flow of information" among the 2,000 engineers at the firm's research laboratory on the outskirts of Tokyo.

"Anyone who wants to consult colleagues or form a discussion group on a new idea can immediately pinpoint people and exchange information. This contrasts with the United States where engineers tend to feel technologies they've developed are their own personal property and are likely to keep [blueprints] locked away . . . ," he said.

HITACHI GETS CREDIT FOR LASER INITIATIVE

"At Hitachi, these things are not the assets of each individual or each team but of the whole company. . . . The researchers who were working on this [communications laser] field felt keenly that the product was something that had to be developed," he said.

Laser experts give Hitachi full credit for initiative.

"The Japanese have taken the open technology from the United States and have done a rapid, government-funded development to the point where they are in production and we are having a hell of a time keeping up," said Kenneth Nill, vice president of Lasertron, a small Massachusetts laser company founded in 1981 by three scientists from Lincoln Laboratories. "They are fine-tuning, producing faster and more reliable stuff."

In the United States "there is always a missing connection between the laboratory and production," General Optronics President Hwang said. "It's basically an organizational problem, not that we can't compete with the Japanese."

Bell officials respond that the United States is still far from being out of the laser race. Western Electric produces the 0.8-micron lasers used in the first light-wave telephone link between Washington and New York City and it is gearing up to turn out 1.3-micron devices at a plant in Reading, Pa.

Several weeks ago, Bell also announced the successful test of a "secret weapon" in the communications laser battle. Called a "cleved coupled cavity (C-cubed) laser," it has transmitted 420 million bits of information over an 80-mile-long fiber-optic line without error.

"It's an extremely significant development," Bell patent attorney George Indig said. "We may have made the breakthrough. It appears to be the most practical way to transmit light waves error-free."

The "C-cubed" machine is a pair of tiny lasers that operate in tandem on a chip to emit a light wave on a single frequency. The advantage of the single frequency is that receivers do not have to unscramble various lightwave signals emitted by different parts of the light spectrum, as they do in the case of light from other existing lasers.

"We're very excited," Indig said.

However, Bell officials note that the development essentially is a conceptual one that others can follow. The manufacturing technology is not radically different from the one in which Hitachi now seems to lead.

"It doesn't mean that the Japanese won't exploit this idea and turn out these lasers before we do," Indig said.

(Staff writers Tracy Dahlby in Tokyo and Hobart Rowen in Washington conducted interviews for this series. Staff researcher Carin Pratt contributed to the report.)

THE GLASS MAKERS' STANDOFF

Turning glass into gold is a trick that Corning Glass Works has been performing for 131 years, but now there is another group of corporate alchemists on the block by the name of Furukawa, Sumitomo and Fujikura.

Those three companies are determined to gain a major share of the biggest new glass market since the invention of the light bulb: superpure Fiberglas communications cable, annual sales of which are projected to reach billions of dollars by 1990.

This has given rise to a battle of tactics pitting Corning against its Japanese rivals. Technology is at the root of the conflict.

Although Corning developed the first process for making the ultrapure glass fiber needed to transmit laser light waves, it has been thwarted in efforts to sell the fiber to Japan. At the same time, Corning has refused to license them to use Corning's patents to make fiber for sale here and has made known that any company selling fiber in this country must obtain a license or face a patent infringement suit.

The Corning process, called chemical vapor deposition (CVD), was invented in 1970. Heated gases were put into a chemical reaction with a revolving cylinder of quartz. This produced sooty deposits that were heated and drawn out from an extruder like

strands of warm taffy. The hair-thin strands of glass then were coated, cooled and wound on reels.

In 1974, Bell Laboratories announced a modified version of the Corning process. "There's no question that Bell publishing the details helped everybody all over the world," a Corning executive was to say later. While Corning was carefully guarding its invention, Bell licensed its patents widely.

This appears to have undercut Corning's efforts to preserve its technical lead. Furukawa and Fujikura, which are among the companies that have broad patent licenses from Bell, soon began using the Bell process. Bell officials estimate that half of the fiber being produced in Japan is made with it.

Meanwhile, Corning's efforts to sell its own glass fiber in Japan were thwarted.

When Corning attempted in the mid-1970s to sell its fiber to Nippon Telephone and Telegraph, Japan's public phone company, NTT advised Corning that it purchased communications equipment only from Japanese firms. NTT also refused to buy from a Japanese-American joint venture proposed by Corning.

Finally, in December, 1977, Corning licensed Furukawa to use its patents but only to make fiber for sale in Japan.

By this time, however, Sumitomo was ready with a process of its own. This development, industry sources said, was aimed at "getting Japan out from under the Corning patents."

Sumitomo was subsequently granted a U.S. patent for its invention, and Corning patent specialists acknowleged that it uses different manufacturing procedures than does Corning. However, Corning officials maintained that the Sumitomo process relies on knowhow developed by Corning in the 1970s in that it also uses the same materials and lays down a sooty deposit on the outside of a quartz rod.

Corning recently filed suit against Canada Wire and Cable, which bought fiber from Sumitomo, claiming that the imported fiber infringed on Corning's patents.

Japanese companies are also fighting Corning at home.

Corning's license agreements in Japan call for Japanese companies that use the invention to pay royalties to Corning. But one Corning official said, "I'm not aware of any royalties being paid." Although one Japanese patent has been issued to Corning, Japanese companies are challenging Corning's applications for several other patents.

Bell has had problems, too. Seven Japanese companies, including Furukawa and Fujikura, are opposing Bell's 8-year-old application for a Japanese patent.

In 1981, American Telephone & Telegraph was jolted when four of seven bids to install optical-transmission systems between New York City and Cambridge, Mass., came from Japanese companies. The low bidder was Fujitsu, but it was rejected in favor of Western Electric, the manufacturing arm of the Bell System and an AT&T subsidiary.

Corning executives plainly are in a mood to fight for what they view as their rightful share of a potentially huge worldwide market.

"The Japanese will target and protect until they no longer need to," Corning chairman James R. Houghton said. "Once they've driven out the competitors, they raise prices like everybody else. But we're fighting them on the patents. We're going to go down the cost curve with them and come out on top."—Dan Morgan

HIGH-TECH: LEAVING HOME—IS IT SHARING KNOW-HOW OR SELLING THE STORE?

(By Dan Morgan)

Some of the U.S. aircraft industry's most precious technologies are processes for using a new generation of strong, lightweight plastics to replace metal in airplane bodies.

But in 1980, the Defense Department turned aside Air Force concerns and decided to let Mitsubishi Heavy Industries learn some of the secrets for using materials in the speed brakes of F15 fighter-bombers being built by Mitsubishi in Japan.

The Navy and Air Force also have argued that computer software for the AIM9L Sidewinder missile carried by the F15 is too sensitive to share even with allies, because of the impact on U.S. security if Soviet spies obtained it.

But Defense authorized Raytheon to transfer AIM9L production data to Mitsubishi and a German-led consortium in Europe.

In the mid-1970s, NASA spent tens of millions of dollars developing the Quiet Short Haul Research Aircraft, an experimental plane that cycled its jet exhaust back across its wings for extra lift.

According to the White House Office of Science and Technology Policy, Japanese companies acquired NASA's public papers on the plane, including a Boeing report that was to be restricted to U.S. agencies. They used the papers to produce their own experimental, short-take-off plane.

Those incidents, all of which have enhanced the technical capability of an already expanding Japanese aircraft industry, are at the heart of a spreading controversy in Washington about whether the United States has given away information vital to its security and commercial competitiveness.

Under fire are liberal policies on sharing technology, during the Carter administration, which justified them by citing a need to help Japan attain its defense commitments.

In a study published in March 1982, the General Accounting Office said that the Carter administration's agreement of June 20, 1978, to allow Japan to build 100 U.S.-designed F15s for its Air Self Defense Force "supported Japan's strategy to develop a world-class aircraft industry."

A preliminary draft of a report by the president's Cabinet Council on Commerce and Trade contended that "[military] coproduction has had an adverse commercial effect for the United States in a number of cases."

One U.S. official put it far more bluntly:

"We've been using the crown jewels of technology to get a country, Japan, to defend itself even though that should be in its interest, and in the process we've undermined our own industrial base and taken work away from our own defense contractors. We've taken the view that turning the spigot of technology on to accommodate our allies was a price worth paying. It's been a dangerous and irrational policy."

GENEROSITY BEGETS COMPETITION

Japanese government officials and businessmen readily acknowledge using U.S. military co-production deals to help thrust Japan into the big leagues of the global commercial-aircraft industry, which has "significant technical influence on other industries," as one Japanese government report noted.

In the F15 case, the Air Self Defense Force is paying civilian defense contractors $1.8 billion more to acquire manufacturing processes and components needed to build 100 of the planes than it would have cost the Japenese military to buy them "off the shelf" in the United States.

Conflicting presures and views inside and outside the U.S. government are propelled by concerns beyond the monetary costs of a weapons system.

Diverse interests in the F15 case include the foreign policy and strategic goals of the State and Defense departments, defense contractors' desires to sell aircraft in Japan, the armed services' fears that critical technology could leak to the Soviet Union, Commerce Department fears about strengthening foreign commercial competitors and the U.S. special trade representative's doubts that this country is receiving enough technology in return.

"It gets very tricky," said Roger Winblade, manager of NASA's subsonic aircraft office. "Other countries have extensive research activities. If we were to be too heavy-handed in limiting what others could have, we could hurt ourselves. Technology is so international today that trying to compartmentalize it is very difficult. It's a very delicate balance."

In a sense, the conflicts inherent in controlling the flow of U.S. technology abroad are built into the confusing maze of scattered and often seemingly contradictory regulations and laws.

NASA's charter, for example, requires the agency "to provide for the widest practicable and appropriate dissemination of information concerning its activities," including large amounts of aerospace research and development useful to other countries.

The Commerce Department's National Technical Information Service annually distributes about 80,000 papers containing results of federally financed research. The service is available to foreign countries, including those in eastern Europe, and was available to the Soviet Union until February, 1980, when President Carter canceled the subscription in retaliation for the invasion of Afghanistan.

Commerce maintains a lengthy "commodity control list," composed of sensitive products and processes that could be used for either military or civilian purposes.

Under the law, companies exporting these products to some non-communist nations need a validated license in which they stipulate that equipment or production data will not be diverted to the Soviet Union.

The requirement excludes goods shipped to Canada, whch has at least 13 communist-owned but Canadian-chartered companies, some of which may be acquiring U.S. defense-related technology, according to a report of the White House science adviser.

U.S. LISTS "CRITICAL" TECHNOLOGIES

The Export Administration Act of 1978 tried to clarify this issue by requiring the executive branch to draft a list of "military critical" technologies. This exercise has proved far more complex than was foreseen, because it affects hundreds of companies.

The Pentagon's first attempt to draw up such a list in 1980 became a 700-page document that was highly classified on grounds that the list could provide a mountain of useful information to the Soviets. A National Academy of Science panel said it needed "drastic streamlining."

However, one of the most glaring technology "leaks" is acknowledged by Reagan administration officials to be the Pentagon's previous desire to provide large amounts of

technology to allies as an inducement to purchase U.S. weapons.

In return for buying a U.S. weapons system, foreign countries have been authorized by the Pentagon to build part of the system. That often involved acquiring from U.S. defense contractors the technical knowledge to produce very sophisticated equipment, including missiles and aircraft.

In 1975, the Ford administration signed an agreement with Great Britain waiving traditional "buy-national" requirements. Under the Carter program, such agreements were signed with other NATO allies to create "rationalization, standardization and interoperability" (RSI) of NATO equipment.

On June 29, 1978, Jean A. Caffiaux of the Electronic Institute Association warned a House Armed Services subcommittee that military co-production understandings being "secretly negotiated" by the Pentagon "may have the effect of committing U.S. industry to deals that are unwise, unfair and could require the surrender of technology to foreign competitors without adequate compensation or safeguards."

Former associates decribe William J. Perry, then Undersecretary of Defense for research and engineering, as a fervent advocate of sharing technology to promote the "inter-operability" of allied military equipment. On Nov. 10, 1978, for example, he wrote a memo complaining that the program lacked "full effectiveness" because of the "inability of [foreign] countries to gain access to . . . technical data relating to acquisition programs."

On March 5, 1980, a Defense Department directive advised that Pentagon agencies "shall encourage the transfer of technology" to allies and should "foster an early mutual exchange of technological and other information with NATO allies to promote the development and adoption of standardized or inter-operable weapons systems."

"The Defense Department was put in a position of fearing to defend critical technology," a Pentagon source said.

One side effect of these Carter administration policies toward NATO was to encourage an aggressive Japanese push for some of the same access that Europeans were getting.

Perry, now with the San Francisco venture capital investment company of Hambrecht & Quist, declined to be interviewed for this series. The Pentagon has denied, on national security grounds, repeated requests by The Washington Post over a four-month period to examine the Japan-U.S. F15 agreement, the report of the Military Information Disclosure Policy Committee that evaluated Japan's ability to keep top technology secrets, or any other documents connected with the deal.

Privately, however, The Post was told that a major reason for the denial was concern that such information could embarrass the Japanese government, which is facing domestic criticism for its planned arms buildup.

F15 PROGRAM CAUSED TENSION

From the beginning, the F15 program aroused sensitivities on both sides of the Pacific.

Soon after the June, 1978, "memorandum of understanding," Air Force specialists at the Pentagon and Wright-Patterson Field in Dayton, Ohio, drew up an extremely detailed list of technologies considered too sensitive to be transferred to Japan because of the danger to U.S. security if they fell into Soviet hands.

Nicknamed the "negative list," it was obtained somehow by officials at Japan's Ministry of Defense, according to V Garber, who worked for Perry as director of international programs.

Garber said the list apparently was passed to the Japanese by someone at the Defense Security Assistance Agency. In any case, he said, when he and Perry traveled to Japan in late 1978 they were greeted with "indignant demands" that restricted F15 technologies be released. Japanese officials argued forcefully that without these technologies it would be difficult for them to make repairs, Garber said.

Garber, now at NATO headquarters in Brussels, said in a telephone interview that it was "most unfortunate" that the Japanese obtained the detailed list. But once they acquired it, it was deemed necessary to soothe ruffled feelings.

"I told the Air Force what the Japanese demands were and asked them to review the list now that we had a more unhappy situation vis a vis Japan," he said.

Garber denies that "Perry or I overrode the Air Force," but Air Force sources remember this as a time of extreme pressure from Perry, Garber and the Japanese.

"The RSI banner was waving, and the bugles were blowing," one Air Force officer said later.

FIRMS CLEARED FOR LICENSING

Air Force sources are also critical of the failure by Perry and Garber to establish a ceiling on what amount of the plane could be built by Japanese companies, thus departing from procedure followed in the European F-16 co-production program. According to McDonnell Douglas work done in Japan accounts for more than half of the value of the Japanese F15s.

The absence of a ceiling cleared the way for a massive flow of military technology to Japan.

Virtually every big name in U.S defense contracting was cleared after 1977 to license designs and manufacturing processes to Japanese companies in connection with military co-production. They included United Technologies, Honeywell, TRW, Rockwell, Texas Instruments, Goodyear Aerospace, Litten, Teledyne, General Electric, Itek, Motorola, Raytheon and Sperry.

Although the Air Force prevailed in opposing release of such highly sensitive technologies as design criteria for the gyroaccelerometer in the inertial navigation system—adaptable, the Air Force said, to ballistic missiles—it failed in trying to keep some of McDonnell Douglas's composite materials know-how out of the hands of Mitsubishi, the F15 program's prime contractor.

"Composite materials," a family of strong plastics that includes Fiberglas, kevlar and carbon-graphite fibers, have begun to revolutionize the aircraft industry.

Although aircraft designers still are learning how to exploit these materials, they soon are expected to extend the range of planes and missiles, add thousands of hours to the flying life of jet fighter-bombers, make possible exotic new airplanes and helicopter designs, save fuel and resist radar detection.

Although only about 3 percent of the weight of Boeing's new jetliners is made of composites, the company estimates that this could rise to a "minimum" of 65 percent by the year 2000.

Japanese companies are considered the leading producers of these materials, but U.S. aircraft companies are ahead in the critical technology: knowledge of the properties, bonding techniques and applications.

"The materials are common to the industry," a Boeing executive said. "It's how you use them that makes the difference."

According to military sources, the Japanese military was adamant about obtaining McDonnell Douglas' designs and procedures for building the F15 speed brake out of carbon composites. The Air Force, citing the company's "highly perishable" lead, was opposed. So strong was the Air Force's opposition that it was not until early 1981, more than two years after the F15 deal was approved, that the government finaliy authorized release of the technology.

Japanese executives acknowledge that this technology has been valuable to Japan's commercial aircraft industry. In an interview with The Wall Street Journal published last Nov. 26, Mitsubishi Heavy's chief engineer, Akira Ikeda, said his company's F15 work was teaching it "many things" about composites useful in future airliners.

Ikeda also noted that wing-bolting techniques and rubber fuel tanks on his company's Diamond One business jet, now being sold in the United States, were developed as a result of previous military coproduction projects.

SECURITY RAISED CONCERNS

The Air Force's concern about the security implications of the F15 deal increased in late 1978, when Koku Journal, a Japanese aviation magazine, published a 200-page special edition on the F15 that included dozens of color photographs, charts and diagrams. The publication sparked a brief investigation by the Air Force's Office of Special Investigations, which concluded that the information had come from "technical orders" furnished by McDonnell Douglas and the Commerce Department.

The difficulty of separating military and civilian programs is evident at Japan's main aircraft works in Nagoya, where civilian and military programs proceed side by side. A Nagoya-based aircraft consortium that includes the F15 prime contractor, Mitsubishi, is at work on a major commercial project, building fuselage parts for Boeing's new 767 jetliner.

Public and private officials involved in the F15 program nevertheless question whether any unduly sensitive technologies were in fact transferred to Japan in the pressure of the moment.

Garber, who recalls the differences of view with the Air Force over releasing composites, says that in retrospect he does not believe the decision to share the know-how was "really regrettable—it wasn't the latest technology."

McDonnell Douglas spokesman Timothy J. Beecher said the company was on the sidelines for the decision on composites.

"It was between the two governments," he said. "But we think it's valid to ask the people who made the decisions whether countries involved could not have obtained those technologies elsewhere."

By the time the carbon fiber technology was released to Mitsubishi, be noted, the commercial aircraft consortium in Nagoya was making landing gear and wing edges for the Boeing 767 out of composites and using procedures supplied by Boeing.

A Boeing official acknowledged that, under the commercial program, the Japanese are using Boeing specifications and design information for the plastic composite

kevlar but not for carbon fibers, considered more advanced.

"The Japanese would have loved to have had all our fancy computer programs on how we put wings together," said H. O. Withington, Boeing's vice president for engineering. "But we guarded that pretty carefully. As far as giving away the store, I don't think we've ever given anything that wasn't available to anybody who wants to take the trouble to do it."

IMPACT OF CO-PRODUCTION STUDIED

Under the Reagan administration, concern about U.S. technology losses has increased dramatically. The impact of co-production programs is being studied by NASA, the Treasury Department, the Defense Science Board, the president's Cabinet Council on Commerce and Trade and the White House Office of Science and Technology.

Some aircraft specialists suggest that the debate over U.S. technical aid to Japan's airframe industry may be overtaken by developments that have made more technology sharing inevitable in the global aircraft business. It now seems likely that a Japanese consortium will become a full partner later in this decade with either Boeing, McDonnell Douglas or Europe's Airbus in building the next-generation jetliner, a fuel-efficient 150-seater.

Despite the massive flow of military technology to Japan, the U.S. government has not gained assurances from the Japanese government that specific technologies will be released to U.S. defense contractors in return.

Japanese officials have pointed out that Japanese law prohibits export of defense equipment—a broad category that could include many processes and materials if the Japanese wanted it to.

But Stephen Piper of the special trade representative's office says Japan "should not hide behind a weapons export ban . . . If we tried, we could identify basic Japanese technologies which are basic to us."

(Staff writers Tracy Dahlby in Tokyo and Hobart Rowen in Washington conducted interviews for this series. Staff researcher Carin Pratt contributed to the report.)

[From the Washington Post, May 5, 1983]

HIGH-TECH: LEAVING HOME—U.S. SELLS "CROWN JEWELS" OF KNOWLEDGE

(By Dan Morgan)

During the last decade, dozens of Japanese companies have bought some of the most powerful tools created by American technology: software programs revolutionizing the way industry uses computers.

Companies such as Yokogawa Electric, Fujitsu, Fuji Heavy Industries and Mitsubishi have U.S.-developed "source codes" for new computer systems used to design, test and manufacture computer chips, automobiles and aircraft.

Source codes are programs that tell computers what to do. Written in languages that humans can understand, they reveal the logic and mathematics underlying the systems. One computer company executive calls them "the crown jewels of American technology."

Some Americans say they see nothing amiss in the fact that U.S. companies have sold this knowledge to Japan. A world in which the flow of ideas and knowledge is restricted would be one of slow growth and costlier products, they say.

"You can talk about limiting the flow of technology, the flow of knowledge. But it's hard to dam up knowledge in a society like the United States," Assistant Secretary of Commerce Clyde Prestowitz said.

The United States has won its standing in the world by throwing open its research laboratories, universities and corporations to foreigners. About 300,000 foreign students, eight times as many as in 1954, are enrolled in U.S. colleges and universities. Ninety-one Japanese were graduate students at the Massachusetts Institute of Technology last fall, and more than 100 are working at the National Institutes of Health.

This openness has contributed enormously to U.S. prosperity. But Japan's acquisition of such crucial technologies as U.S. software data still makes some people uneasy. Computer software is one of America's main technological assets, and one of the few technological domains in which the United States still enjoys a commanding lead over Japan.

"When push comes to shove, America had better keep its software capabilities," said William O. Baker, retired president of Bell Laboratories, America's largest private research facility. "Software is going to be the principal means of technology transfer in the '80s. It's our ace in the hole. Software can give competitors the ability to leapfrog us."

Software programs written for the latest generation of computer-aided design and manufacturing (CAD/CAM) systems have revolutionized the role of computers in industry, moving them from the financial and accounting departments into the front line of design, engineering and production.

With the present line of computer graphics systems, a draftsman can display his drawings in three dimensions on a television screen, reshape them in a fraction of a second, insert additional pieces from a "menu" stored in the computer's memory, measure the length of lines, turn the product to inspect it from every angle and test it for strength and durability—all before a single blueprint has been drawn on paper.

Computer companies are working on ways to link the draftsman's electronic work board with the factory floor, by having the same computer control the path of cutting tools or the movement of assembly-line robots.

"It's the highest industry, I think, because it's seminal," a computer executive said. "There isn't a Fortune 1000 company that hasn't made a major commitment to this technology. There are more damn people doing designs and engineering on computers now than there are accountants cracking numbers."

Today, engineers are cutting thousands of man hours off the time required to design or redesign airplanes, integrated circuits, nuclear weapons and toys, among other products. Boeing, for example, designed 30 percent of its 747 aircraft and 40 percent of its new 757 on computers.

Underlying new CAD/CAM systems are millions of lines of programs, often requiring teams of people working thousands of hours. Some inside the growing CAD industry are concerned that Japanese companies, skillfully exploiting stiff competition among the growing number of U.S. CAD companies, have gained threshold knowledge of this technology, as well as ready access to the tool itself.

"I am concerned about how much they're learning from us," said William D. Beeby, who recently retired as Boeing's director of engineering computer systems.

Japanese computer-chip companies used U.S. CAD systems to design memory chips that put them ahead of their U.S. competitors in the late 1970s, and a consortium of Japanese aircraft companies is using U.S. CAD systems to help them become major players in the commercial airliner business.

TRANSFER TAKES PLACE GRADUALLY

Transfer of this technology to Japan has occurred over several years. For instance:

In 1974, a Bedford, Mass., company called Computervision began distributing its Computer Automated Design Drafting System-3, or CADDS-3, through a Tokyo distributor with access to the CADDS-3 source code. CADDS-3 displayed three-dimensional pictures and was considered by some the most advanced system of the time.

It was subsequently purchased by dozens of Japanese companies, including Mitsubishi, Toyota, Nissan Motors and Sanyo. According to a Computervision executive, customers could obtain the CADDS-3 source code by signing a written pledge not to divulge it.

In December, 1978, Lockheed licensed Fuji Heavy Industries, one of the major Japanese aircraft companies, to use Lockheed's "Cadam" computer design system. The license agreement gave Fuji access to the Cadam source code.

In 1979, Gerber Scientific Systems Technology of Hartford, Conn., signed an agreement with Yokogawa Electric Co., giving the Japanese company all of the source codes and technical data for its CAD system, as well as exclusive manufacturing rights in Japan, Singapore and South Korea.

The path of CAD from the minds of American computer scientists to Japanese companies is an example of how knowledge spreads in today's international economy.

Some of the initial work on computer graphics was done in the early 1960s by Ivan Sutherland, who, as an MIT graduate student, developed concepts for programming computers to portray a draftsman's lines, circles and shapes.

His program, called "Sketch Pad," was ahead of its time. Computers functioned too slowly and lacked storage capacity to handle complex programs required in such graphic display.

By the late 1960s, however, hardware developments that gave the industry better disc drives and display terminals created new opportunities for using computers in the production end of business.

Many credit a maverick genius, Patrick J. Hanratty, with developing the first true commercial CAD software programs.

Hanratty got his first taste of computers at a two-week training program in 1955. After three days, he recalled, "I felt I had learned all I could and had ideas my instructor didn't seem to have about how to talk to computers."

Over the next 17 years, he left his mark as a writer of software at General Motors Research Laboratory, McDonnell Douglas and finally at his own company, MCS, often putting in 80- to 100-hour work weeks.

Bits and pieces of his work can be found in the software programs of most CAD companies.

In 1971, soon after starting MCS, Hanratty and his associates produced "Adam," a software program that was to have widespread influence. "Adam really opened some eyes," Boeing's Beeby recalled.

Adam could create three-dimensional pictures, print out blueprints and drawings of what was displayed on the computer screen and create a tape that controlled tools to

cut and fabricate shapes on the screen. In the next several years, MCS licensed Adam to companies developing and selling their own CAD/CAM systems: Gerber Systems, Computervision and United Computing.

Hanratty's easygoing licensing procedure involved in litigation with clients who complained that they alone had exclusive rights to Adam. The litigation eventually was dropped, but the licensing resulted in rapid spread of ideas underlying Hanratty's conceptual breakthroughs. Ultimately, Computervision, Gerber and McDonnell Douglas (which acquired United Computing) licensed CAD/CAM systems to Japanese firms. [See accompanying chart]

Today, Hanratty sells his newest creation, the ANVIL 4000 CAD/CAM system, to about 20 Japanese companies, and has adapted its control console to the Japanese Kanji alphabet. Japanese computer scientists troop to MCS headquarters in Irvine, Calif., to be trained.

Hanratty said he provides customers with source codes but is not concerned that Japan will use this information to narrow the American lead in software. All of his clients, he said, "enter into a stringent legal contract not to divulge it without MCS' permission."

In any case, he said, "our code is so mammoth that you couldn't duplicate it . . . . It takes two or three years for our own people to develop an understanding of it, and they are the cream of the electronics industry. I think it would be close to impossible for anybody to understand the full span of Anvil 4000 today."

Others are more uneasy.

Japan is trying to overcome its software shortcomings by educating more computer scientists, encouraging small, American-style "software factories" and emphasizing the need to do better.

Some U.S. companies are concerned enough about transfer of proprietary knowledge that they refuse to provide Japanese firms with source codes. Calma, Applicon and Intergraph, three leading U.S. CAD/CAM companies, provide only "object code," a computer program virtually indecipherable by humans.

Object code is created when source code comprehensible to computer programmers is translated into a stream of "ons" and "offs" stored on a tape or disc and sensible only to a machine.

Some in the industry have questioned Gerber's sale of its entire "IDS" CAD/CAM system to Yokogawa Electric in 1979. The sale included not only source codes but also other technical information. Gerber received a $1 million initial payment, a promise of a percentage of net sales and pretax profits and a guarantee of a second $1 million within five years. But some in the industry say Gerber gave up to much for too little.

Computervision turned down Yokogawa's request for a similar deal.

"It opened up a whole bunch of technology to them and gave them freedom to use it that nobody else had," said John Hurd, Computervision's vice president for industrial marketing. "We didn't want to give up the family jewels."

Of the Gerber deal, another former Computervision executive, Michael J. Cronin, said: "They were giving away the keys to the kingdom."

Some in the computer industry also questioned Lockheed's licensing Dec. 14, 1978, of source code for its Cadam graphics systems to Fuji Heavy Industry.

Cadam had been developed by Lockheed over several years to increase its aircraft productivity. But when Lockheed's air-production problems mounted in the 1970s, special high-technology divisions were counted on to generate profits.

Lockheed eventually sold the Cadam system throughout the world, including to competitors such as Dassault in France, one of the leading companies in the European Airbus consortium. Japanese customers eventually included Fuji, Hitachi, Kawasaki, Mitsubishi and Nippon Steel.

Although Mitsubishi and Kawasaki did not receive the Cadam source code, Fuji had it from late 1978, Fuji was a member, with Mitsubishi and Kawasaki, in a consortium that forms the nucleus of Japan's budding aircraft industry.

Explaining the 1978 decision, a spokesman for Lockheed's computer graphics subsidiary said: "Lockheed is not one company. [This subsidiary] sells software. What we did was not tied to the strategic position of the [Lockheed] corporation. We were just doing our thing."

LOCKHEED REVERSES POLICY

The spokesman said that, if the Japanese had not obtained Cadam, they could have obtained other non-American systems, such as Britain's Medusa or France's Catia. "It was just a matter of time before they would have gotten it from somebody else," the spokesman said.

Nevertheless, on Jan. 1, 1982, Lockheed announced that it would no longer provide source code with the systems it sold or licensed.

Cadam, meanwhile, has proved useful to Japan's commercial aircraft effort. It was used, for example, in Japanese work on parts of Boeing's 767 commercial airliner built under a co-production arrangement.

"We turned over the drawings to the Japanese, they digitized the geometry and put it on their Cadam system," said Marvin Wehrman, director of Boeing's computer programs. The Japanese completed their part of the design work using Cadam, Wehrman said, and the results dovetailed perfectly with Boeing's.

The cooperation worked well but raised several questions.

As required by Boeing's contract with the Japanese consortium, Wehrman said, the Japanese returned the drawings after completing the work. But, he said, they retained the electronic tapes that activated CAD pictures of parts of the Boeing plane.

Beeby, now retired from Boeing, said Japanese engineers expressed keen interest in Boeing's CAD programs.

"After the engineers left, their top management came back and looked at the system," Beeby recalled. "They were a major subcontractor. We couldn't very well shut them off."

Some, including Computervision's Hurd, even question whether the United States is very far ahead. "I find tough competition in Japan," he said.

In typical Japanese fashion, Japanese companies have begun to penetrate a few, selected parts of the market.

Typical of the new breed of entrepeneurial, American-style CAD companies making their debut in Japan is Zuken, founded by Makoto Kaneko, 38, a computer expert. Sales increased from $450,000 in 1978 to $10 million in 1982, mainly on CAD systems for designing electronics systems and computers.

Marketing director Akihiko Mizukami sees a bright future. Computers soon will be required to design computers, and Zuken is preparing for that day, he said.

(Staff writers Tracy Dahlby in Tokyo and Hobart Rowen in Washington conducted interviews for this series. Staff researcher Carin Pratt contributed to the report.)

MADE IN AMERICA, SOLD IN JAPAN

Even before he had seen a recent article about himself in Venture Capital Journal, John B. Henry, president of Crop Genetics International in Dorsey, Md., began receiving telephone calls from Japanese businessmen interested in a possible joint venture in Southeast Asia.

Such offers are extremely tempting for small, innovative U.S. genetic engineering companies working on new products and medicines ranging from the laboratory-produced sugar cane seed of Crop Genetics to the interferons of Biogen and Genentech.

With many of these products still several years from the marketplace, pioneering U.S. genetic engineering firms need money to continue research and testing. Japanese companies are providing plenty of it in return for technology, exclusive marketing rights for future products and other concessions.

Why Japanese companies, rather than U.S. financial centers or pharmaceutical firms, are putting up the money and positioning themselves for the profits is a riddle that provides insights into pressures driving the technology trade between the two countries.

In the late 1970s, adventurous U.S. and foreign investors poured money into new companies formed by scientists who had been working on the recombinant DNA (gene splicing) technology at such centers as Harvard, Massachusetts Institute of Technology, Stanford, the National Institutes of Health and the University of California at Berkeley and San Francisco.

There was great excitement about new laboratory-produced microbes that might increase crop yields, provide inexpensive new sources of energy and, most important, form a new family of drugs against hitherto resistant viruses and other diseases.

Now, however, investors have grown more cautious.

"A couple of years ago, any university professor with credentials could generate a seven-figure investment," said Thomas D. Kiley, vice president and general counsel of Genentech in South San Francisco. "Now investors are becoming more sophisticated."

In the U.S. system, Kiley said, running up too much debt by borrowing from banks is considered bad business. Even if banks agree to loan money, he said, rising debt drives down the price of stock, creates financial worries and makes it difficult to attract investors or qualified executives.

The way out, he said, is to do research for other companies for a fee or sell them technology in return for commissions from sale of products made with those technologies. "The trick is to do that without selling your birthright," Kiley said.

Making deals with larger U.S. pharmaceutical companies is extremely risky because it often can mean relinquishing the U.S. market to those companies when products are ready for the marketplace. Many biotechnology companies are cutting deals with Japanese firms instead.

For example, Genentech signed agreements with Toray Industries and Daiichi Seiyaku giving them exclusive rights to buy one type of interferon, gamma, for sale in

Japan. The Japanese companies pay Genentech while the U.S. firm continues its research, but Genentech retains control of technical processes for making the interferon, which scientists hope will be used to fight cancer and viruses.

However, Genentech could be forced to give Toray and Daiichi the technology if the Food and Drug Administration does not approve gamma for use in the United States. In that case, the product could not be exported, and Genentech has agreed to provide the gene splicing and process technology to the Japanese companies.

Other U.S. companies have made even broader concessions to the Japanese.

In 1981, for example, Genex of Rockville agreed with Green Cross Corp. of Osaka to perform research aimed at developing a microbe strain that can produce human serum albumin (HSA) in a laboratory.

Hospitals now use HSA to treat shock and a condition called hypoproteinemia, a protein deficiency in the blood. Because HSA is prepared from human donors' blood, it is expensive and sometimes scarce. Laboratory development of HSA using recombinant DNA technology could enable Genex to tap into a market worth $600 million a year.

However, Genex agreed to give Green Cross an exclusive worldwide license to "make, use and sell" all of the HSA eventually produced under the contract.

That Japan's efforts to acquire U.S. molecular biology technology are anything but haphazard is evident from the fact that Tokyo's Ministry of International Trade and Industry has picked 14 companies to lead a research effort. More than 100 Japanese companies and research institutes are spending about $217 million a year on research in biotechnology.

"America has unequaled capacity to develop and apply science, but our companies are competing with well-financed [foreign] corporations acting in partnership with their governments. . . . U.S. government, business and labor are running uphill," Genentech President Robert A. Swanson said.—Dan Morgan

[From the Washington Post, May 6, 1983]

HIGH-TECH: LEAVING HOME—FOR INDUSTRIAL HEALTH, FIRST, A SELF-EXAMINATION

(By Dan Morgan)

In laboratory at Genentech, the south San Francisco genetic engineering company, bearded biologists in white gowns hover over trays of purple-colored cultures of interferon that someday may fight human viruses from colds to herpes.

Across the country, in Short Hills, N.J., Martin Lepselter of Bell Laboratory's advanced micro-electronics division proudly displays a snapshot of something that looks like a row of fences across a sandy desert. Actually, the picture shows parts of an electronic circuit narrower than a human hair, etched by an X-ray machine on a tiny silicon chip.

Reassuring as those glimpses of the nation's high-technology resources may be, they are not an automatic guarantee of America's economic future. As examples used in this series show, innovations produced in U.S. laboratories frequently have resulted in products made in Japan.

This phenomenon has evoked an angry reaction from U.S. politicians and the public.

Protectionist sentiment is running high on Capitol Hill, and Congress has taken up one of the most restrictive pieces of legislation since World War II: the "domestic content bill," which would require that foreign automobiles sold here include an arbitrarily established percentage of U.S. components.

The Reagan administration opposes the measure but has taken a tough approach in negotiations with Japan aimed at breaking down Japanese barriers to U.S. trade and investment.

"The time has come to act . . . We're already 10 years too late," said William C. Norris, the outspoken chairman of Control Data Corp., who has suggested "kicking out" all Japanese working in U.S. research facilities as a warning shot across Tokyo's bow.

Such suggestions are indicative of a mood of rising anger at Japan. Whether the steps contemplated so far will change the Japanese-American technological equation is moot.

Trade restrictions certainly would invite retaliation not only from Japan but also perhaps from countries such as France, where U.S. companies fare well. Moreover, in today's interconnected global economy, technology has become increasingly internationalized. Ideas travel with jet speed across borders, not only from America to Japan but also in return. Science is universal.

What distinguishes economies today often is not who is first with the technology but who first uses it effectively.

This is more than a technical problem. It involves organization, availability of capital and such subtle factors as motivation, determination and national will. These are not easily quantified or readily fitted into theories of "scientific management" that have prevailed in the United States since the 1950s.

Japanese companies already are shifting their strategies in anticipation of more antagonistic U.S. policies, forming joint ventures with U.S. companies and investing in U.S. industry.

But for the United States to think in terms of retaliation alone, warned Robert B. Reich of Harvard University's Kennedy School of Government, would be to miss an unprecedented opportunity for national self-examination. This is a process that he and other experts say must take place before American industry can return to full health.

The problem, as Reich sees it, is that politicians and their policies are lagging far behind changes reshaping the world economy.

As this series has suggested, the fragmented U.S. business community has often sold technology to Japan too cheaply and with too little consideration of its long-range impact on U.S. competitiveness. Washington has contributed to the problem by aggressively promoting sale of U.S. technology abroad as part of weapons co-production programs.

By contrast, Japan controls export of technologies developed with government support and is tightening copyright laws on computer software as Japanese industry improves its skills in this area.

But in talks with more than 150 businessmen, government officials, scientists, researchers and economists, many other explanations for flagging U.S. competitiveness were given. Prominent among them:

The U.S. research and development effort, the world's second largest after that of the Soviet Union, has suffered from its emphasis on defense. Half of all research and development dollars spent in America are from the federal government, and more than half of those are defense-related.

While much of the Defense Department's support for research on computers, microelectronics, lasers and aerospace has potential commerical spinoffs, the U.S. government lacks effective procedures for getting it quickly into commercial channels.

By contrast, Japan's New Technology Development Agency provides financial assistance to private firms to help them convert work done at government laboratories into products.

Big corporations and government alike tend to overemphasize research on basic science and underemphasize research on less exotic but important technologies. One example cited was robotics.

U.S. research stresses vision systems but, according to one senior executive, American robots are in urgent need of improved ability to grip objects, a mundane but crucial part of a robot's work. Although the payoff presumably would be enormous, no company has found a way to reduce drastically the time required to wash and dry clothing by machine.

In Japan, government-supported research and development often goes to less exotic "medium-tech" projects with immediate commercial potential. In the United States, "nobody wants to do the routine stuff," said Rustom Roy, a fellow at the Brookings Institution.

JAPAN HELPS WITH TRADITION OF COOPERATION

The federal government is "spending more but getting less" for its research dollars, according to S. J. Buchsbaum, Bell Labs' executive vice president for research. The more than 700 government research laboratories are "diffused" and lack well-defined goals. Materials research, which "underlies everything," is especially splintered, he said.

The United States does not pay enough attention to foreign technological developments. Only 20 percent of Japanese technical publications are translated into English, according to John A. Alic of Congress' Office of Technology Assessment.

"The [cooperative] Japanese system stands in stark contrast to the adversary relationship that typically prevails between U.S. industry and government," according to Washington consultants Harald B. Malmgren and Jack Baranson.

Robert M. Price, president of Control Data, said the most important difference between the two countries is "development of a Japanese tradition of cooperation in developing and exploiting base technolgies."

U.S. antitrust laws are ambiguous and outdated. Japan helps establish research cartels while seeing to it that companies compete vigorously in marketing products resulting from the research. But U.S. industrialists said U.S. antitrust laws make forming such research consortiums here risky.

Unlike Tokyo, Washington lacks "anti-cyclical" policies to keep emerging industries growing and developing during recessions. As a result, Japanese companies have been able to exploit periods of slack business activity to catch up with U.S. competitors squeezed for capital and customers during these periods.

With some notable exceptions, such as IBM, Texas Instruments and American Telephone & Telegraph, managements of large U.S. corporations pose major stumbling blocks to the exploitation of new technologies.

Prof. Leslie Eric Cross, acting director of the materials research laboratory at Pennsylvania State University, noted that large U.S. corporations often leave development of new technologies to smaller companies

"to which they can dictate terms." Large Japanese companies, however, are "technology driven," and take the lead in new areas.

"Takeover fever" and "paper entrepreneurialism" distract U.S. management from production problems, RCA announced in 1979 that it lacked the $200 million needed to develop an American video recorder, the fastest selling appliance of the decade. But in the same year it spent $1.2 billion to acquire a finance company.

Large U.S. corporations, which depend on the stock market to raise much of their capital, are much more concerned with impressing potential investors with short-term profits than are Japanese firms, which tend to borrow from banks with which they have close and longstanding associations.

The net result is that Japanese companies feel freer to spend capital on long-range goals, including development of new products.

U.S. corporate managements are more removed from the production process than are their Japanese counterparts. Until recently, Ford Motor Co. had five more layers of management between the factory floor and chairman of the board than Toyota had.

U.S. management has devoted fewer of its research and development efforts to quality control than has Japan, and Japanese quality has consistently been superior to that of America.

The U.S. public education system has fallen far behind Japan, West Germany and the Soviet Union in math and science preparation. Half of the engineering graduate students in the United States are foreigners because Americans either are not applying or are not qualified.

The American Association for the Advancement of Science has said that "far too many students . . . lack motivation to study science and mathematics" because of "boring" teaching and a school climate "unfavorable to the pursuit of excellence."

Whether all or some of these reasons can explain Japan's successes in its technology race with the United States, they suggest the myriad factors that influence it.

Much has been made of the government-industry cooperation that foreigners nickname "Japan Inc.," and there is no doubt that the Japanese government has made a difference.

Current government-backed efforts involving tax breaks, research funding and pooling of research information and other subsidies are underway in genetic engineering, automated manufacturing, superspeed computers, optical communication and measurement, manganese nodule exploitation and subsea oil exploration.

An example of how the Japanese government nudges an emerging industry forward was its establishment of Nihon Aeroplane Manufacturing Co., a special corporation. Government and private firms invested in NAMCO, but the government bore the main financial risk. NAMCO developed the 64-seat YS11 civilian plane, not a great success, but the work helped companies acquire experience.

Subsequently, Japan set up the Civil Transport Development Corp., a consortium of three large aircraft companies established to coordinate Japan's work in building part of Boeing's new 767 jetliner. However, at that point direct government financial support was reduced because the companies were deemed strong enough to shoulder more of the financial risk.

Meanwhile, Japan's Ministry of International Trade and Industry (MITI) has sponsored another consortium to enable the nation to be a 50-50 partner with Britain's Rolls-Royce in construction of a new turbo engine for the next generation of international airliner, the 150-seater.

Several experts warn against placing too much importance on the government role in Japan's success. The U.S. government pumps far more money into the American scientific and industrial community for research and development than does Japan. The Tokyo government supplies only 30 percent of the total of such funds in Japan, while Washington supplies more than 50 percent in this country.

Japan's success also clearly owes much to the ingenuity, determination and flexibility of private industry.

William J. Abernathy and Richard S. Rosenbloom of the Harvard Business School, who studied the way Japan captured the U.S. video recorder market, cited "the element of persistence" in Japanese companies.

Betamax, they noted, was the fourth generation of video recorder developed by Sony and the first that succeeded with U.S. consumers. With no assurance of success, Matsushita established an entire department of 1,200 employees to develop a video recorder for the commercial marketplace.

Little things, rather than big, often make a crucial difference, according to Americans who have studied Japanese industry.

Toyota and other auto makers save warehouse space and cash by using a "just-in-time" delivery system for components. Parts arrive only when they are ready to be installed, sometimes with less than an hour to spare. Working with tiny inventories, the auto makers can adjust quickly to ups and downs of demand.

In at least one key technological area, auto design methods, the United States is superior to Japan, according to a detailed comparison published last August by Japan's Society of Science, Technology and Economics.

While Congress' Office of Technology Assessment does not discount the importance of Japan's lower wage rates in the auto makers' success, it said recently that another key element was the Japanese refusal "to quit the American market when their first offerings proved unappealing; they persisted and steadily improved their sales."

U.S. businessmen speak almost with awe of the speed with which Japanese companies master new technologies and make high-quality products.

"Every time they do something, they do it better [than the last time]," said former Boeing vice president William Beeby, who worked on development of the Boeing 767, parts of which are manufactured in Japan. "The quality coming back [from Japan] is better. We saw that."

"The Japanese have been organized to tap the pool of science in this country," said Dan Burg of Carnegie-Mellon university. "They send teams hear, and it's done in an organized fashion. They'll send post-doctoral students to spend time at our locations, but its rare for U.S. students to go to a Japanese university."

Whether the United States should, or could, respond to the Japanese challenge by adopting some of Japan's methods is an open question among politicians, industrialists and economic experts.

The Office of Technology Assessment has described the fragmented U.S. industrial policy as a "potential strength."

"Our pluralistic system, which is responsible for so much of the ad hoc character of U.S. policies toward industry, creates an environment where flexible and innovative responses are sometimes possible," the OTA said.

Nevertheless, there is a growing sense in industry and academia that government needs to provide more consistent direction.

WASHINGTON HINDERS WITH STOP-AND-GO POLICIES

An example of Washington's stop-and-go tendencies are Reagan administration proposals to curtail energy research just as it has made progress after the 1973-74 oil-price scare.

"Science isn't run on a six-month basis," Brookings' Roy said. "You have to wait 10 years for results."

While the Japanese ministry has announced a seven-year, $140 million research effort involving 10 private companies to develop "intelligent" robots capable of assembling dozens of different products, including an entire automobile, the U.S. government's main robotics research program, at Wright-Patterson Air Force Base in Dayton, is geared primarily to making defense contractors more efficient.

"U.S. industrial policy is a mess," a congressional aide said. "It doesn't add up. It's little bits and pieces. The political element is always dominant here. The kind of political system we have just isn't conducive to coherent policies."

There are, however, some signs of change. The Reagan administration has given other indications of its readiness to consider new approaches.

In a highly significant move, the Justice Department's Antitrust Division has allowed 10 competing U.S. computer companies to establish a joint research company, Microelectronics and Computer Technology Corp. No Japanese companies are members, and Japanese firms seeking access to MCC's technologies must deal with the consortium, not a single company.

Some have described this project as "America Inc."

In 1981, Congress passed the research and development tax credit, enabling companies to accelerate their depreciation on R&D equipment. It is credited with spurring a dramatic increase in the amount invested in new, "high-tech" ventures, from $58 million in 1978 to $1.7 billion in 1982. And California, under then-Gov. Edmund G. (Jerry) Brown Jr., established the first Commission on Industrial Innovation to recommend state policies that would help "high-tech" industries.

These steps have the advantage of not requiring a political confrontation with Japan. For, in the heat of the present, it is easy to forget that Japan is actually a great American success story.

It has reached its position of near technological parity through American aid, open market and technical prowess. Now, Japan is forcing the United States to take stock of its own economic performance and is becoming a teacher to its own postwar teacher.

But, as Undersecretary of Commerce Lionel H. Olmer has said, "Japan is not yet a technological giant."

The United States is still bigger and richer. Japan's labor productivity, the measure of the man-hours required to turn out products of a certain value and indirectly a measure of technological prowess, still lags behind that of the United States, although the difference is narrowing and Japan is an equal or ahead in some key industries such as automobiles.

The $15 billion spent by Japan annually on civilian research and development is only half the amount spent by the United States. The Japanese government's annual spending for research on supercomputers is less than that of IBM.

Japan's vaunted system of national planning is not infallible. It has made serious miscalculations, such as promoting growth of an aluminum industry now on the brink of bankruptcy.

Some even think that Japan's success in international trade may be exposing its companies to forces that will weaken its society's traditional discipline and unity of purpose that has characterized Japanese industry.

"The rapid evolution of Japan's economy toward the creation of a 'knowledge intensive' society carries with it enormous potential opportunities," Olmer said, ". . . The technological race does not need to be a zero sum game. Both sides can win, and the results will be of enormous benefit to all."

(Staff writers Tracy Dahlby in Tokyo and Hobart Rowen in Washington conducted interviews for this series. Staff researcher Carin Pratt contributed to the report.)●

PROGRAM

Mr. BAKER. Mr. President, on Monday next, the Senate will convene at noon. After the recognition of the two leaders under the standing order, there will be a period for the transaction of routine morning business as previously ordered. At the expiration of the time provided for the transaction of routine morning business, the Senate will resume consideration of the budget resolution, which is Senate Concurrent Resolution 27. At that time, Mr. President, I assume that the Nunn amendment will be the pending question before the Senate, although at the time we left this measure this afternoon the Domenici substitute was pending.

I say that because it is my understanding that the two managers of the bill want to dispose of the Nunn amendment before they proceed with the debate and disposition of the Domenici substitute. In any event, no provision has yet been made for that.

I make these remarks only to forewarn Senators of the problem and configuration of events when we resume consideration of this measure on Monday.

Mr. BYRD. Mr. President, if the majority leader will yield, his statement is in accordance with my understanding. It would be my hope that we could proceed with the Nunn amendment.

Mr. BAKER. I thank the Senator.

Mr. President, under the order previously entered, any votes that are ordered on Monday will be stacked to occur on Tuesday at a time certain.

Mr. President, on Monday, depending on the progress we make in the disposition of amendments and depending on how many votes we have scheduled, the leadership on this side will make a further announcement about the schedule of the Senate next week. I do expect, however, that next week will be a busy week. We have to complete the budget resolution and then proceed with the immigration bill in sequence, which has already been ordered, and perhaps then go to the Ruckelshaus nomination, if there is time. That will indeed give us a full schedule.

ADJOURNMENT UNTIL MONDAY, MAY 9, 1983

Mr. BAKER. Mr. President, I have nothing further to ask the Senate to consider today. I inquire of the minority leader if he has anything further.

Mr. BYRD. I thank the distinguished majority leader. There is nothing on this side of the aisle that I know about that needs to be done today.

Mr. BAKER. I thank the Senator.

In view of that, Mr. President, I move, in accordance with the order previously entered, that the Senate stand in adjournment until 12 noon on Monday next.

The motion was agreed to, and the Senate, at 3:06 p.m., adjourned until Monday, May 9, 1983, at 12 noon.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 6, 1983:

DEPARTMENT OF ENERGY

Theodore J. Garrish, of Virginia, to be General Counsel of the Department of Energy.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

U.S. POSTAL SERVICE

John Lathrop Ryan, of Indiana, to be a Governor of the U.S. Postal Service for the remainder of the term expiring December 8, 1989.

SMALL BUSINESS ADMINISTRATION

Mary F. Wieseman, of Maryland, to be Inspector General, Small Business Administration.

MERIT SYSTEMS PROTECTION BOARD

Maria Lucia Johnson, of Alaska, to be a member of the Merit Systems Protection Board for the term of 7 years expiring March 1, 1990.

HOUSE OF REPRESENTATIVES—*Monday, May 9, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God of Justice and God of Peace, look with favor upon Your creation and the people who turn to You in prayer. May not the turmoil of the world lead to catastrophe nor the pain of individuals lead to despair, but may Your mighty power transcend our problems and may Your gracious love heal our wounds. Help us to realize that no problem is too great for You, O God, but through the nurture of Your spirit, our lives may know Your peace that passes all understanding. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 219. Joint resolution declaring the support of the U.S. Government for efforts of the U.S. Soccer Federation to bring the World Cup to the United States in 1986, designating the Secretary of Commerce as the official representative of the U.S. Government to the Federation Internationale de Football Association, and for other purposes.

The message also announced that the Senate had passed a bill and joint resolutions of the following titles, in which the concurrence of the House is requested:

S. 287. An act to establish the Harry S Truman National Historic Site in the State of Missouri, and for other purposes;

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week"; and

S.J. Res. 94. Joint resolution to authorize and request the President to designate May 8, 1983, to June 19, 1983, as "Family Reunion Month."

The message also announced that the Vice President, pursuant to the provisions of sections 1928(a)-1928(d) of title 22 of the United States Code, as amended, appointed Mr. ROTH, Mr. DENTON, Mr. MATTINGLY, Mr. MURKOWSKI, Mr. RUDMAN, Mr. SPECTER, Mr. EAGLETON, Mr. BENTSEN, Mr. MELCHER, Mr. DECONCINI, and Mr. DIXON, as members of the Senate Delegation to the North Atlantic Assembly Spring Meeting to be held in Copenhagen, Denmark, June 9-13, 1983.

The message also announced that the Vice President, pursuant to the provisions of Executive Order 12131, signed by the President on May 4, 1979, appointed Mr. BOSCHWITZ to the President's Export Council.

THE SAN DIEGO LIGHT RAIL TROLLEY PROJECT

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, the San Diego Light Rail Trolley project has now been in operation for 20 months. Fare box recovery for trolley operations during the last quarter of 1982 was about 90 percent, resulting in an average fare box figure of 82 percent over the life of the system. This is remarkable. No other transit system in our Nation comes this close to self-sufficiency. In fact, the national trend is that fare box recovery rates are now declining below 50 percent almost everywhere.

In 1981, the San Diego Metropolitan Transit Development Board (MTDB) began its light rail transit service on time and under its construction budget. The cost of the south corridor project was about $5 million per mile. Ridership on the trolley line was about 10,300 passengers per day last year, except during the peak months of July and August when 14,000 passengers rode the system each day. These are not passengers who were robbed from the bus system. The trolley was established to ease overcrowding on buses and highways along the corridor. There is no doubt that the San Diego system is the best example of light rail technology in our Nation. It is practical, low cost, and efficient.

The MTDB is now ready to begin construction along its east corridor to serve the communities of El Cajon, La Mesa, and Lemon Grove. Present travel along this corridor is on heavily congested highways which carry approximately 270,000 vehicle trips per day. A light rail transit extension along this corridor is badly needed and can be constructed for less than $100 million, again at approximately $5 million per mile. There is enthusiastic community support for the development of this project. Local matching support funds for Federal financing are available and the MTDB already owns the entire right-of-way for this project.

I would hope that the Appropriations Committee and my colleagues would seriously consider the record of proven experience for extremely cost-efficient projects such as this when decisions are made for funding transit projects as authorized by the gas tax revenues in Public Law 97-424. In these days of scarce resources, we must be constantly alert to the highest potential for success in investing our country's tax dollars.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken after debate has been concluded on all motions to suspend the rules.

CONGRESSIONAL AWARD ACT

Mr. MURPHY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2357) to provide for an increase in the number of members of the Congressional Award Board, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2357

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (a) of section 4 of the Congressional Award Act (Public Law 96-114; 2 U.S.C. 803(a)) is amended—

(1) by striking out "seventeen" in the matter preceding the colon in paragraph (1) and inserting in lieu thereof "thirty-three";

(2) by striking out "Four" in clauses (A), (B), (C), and (D) of paragraph (1) and inserting in lieu thereof "Eight"; and

(3) by striking out "or the Committee for the Establishment and Promotion of the Congressional Award" in paragraph (2).

(b) Subsection (b) of section 4 of such Act (2 U.S.C. 803(b)) is amended—

(1) by striking out "Appointed" at the beginning of such subsection and inserting in lieu thereof "Except as provided in paragraph (2), appointed";

(2) by inserting at the end thereof the following new paragraph:

"(2) Individuals appointed to the Board after March 31, 1983, shall serve for terms of two years."; and

(3) by inserting "(1)" after "(b)", and by redesignating paragraphs (1), (2), and (3) as

subparagraphs (A), (B), and (C), respectively.

SEC. 2. Notwithstanding the provisions of section 4 of the Congressional Award Act (2 U.S.C. 803), relating to the terms of individuals appointed to the Congressional Award Board, the sixteen additional members to be appointed to the Board pursuant to the amendments made by the first section of this Act shall be appointed for terms as follows:

(1) Six members shall be appointed for terms of two years.

(2) Five members shall be appointed for terms of four years.

(3) Five members shall be appointed for terms of six years.

Thereafter such members shall be appointed for terms of two years.

The SPEAKER. Is a second demanded?

Mr. ERLENBORN. Mr. Speaker, I demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. MURPHY) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. ERLENBORN) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. MURPHY).

Mr. MURPHY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2357, introduced by Congressman BOB MICHEL on March 24, provides for an increase in the number of members of the Congressional Award Board. An identical bill, S. 957, introduced by Senator BYRD of West Virginia, passed the full Senate unanimously by voice vote on March 24.

The Congressional Award Act, Public Law 96-114, developed by my distinguished colleague, PAUL SIMON, was enacted on November 16, 1979. Mr. SIMON's work on this bipartisan legislation has made it possible for young adults throughout our country to be recognized for their initiative and achievement in the areas of public service, personal development, and physical fitness.

The act establishes a Congressional Award Board to administer a congressional award program where young adults between the ages of 14 and 23 may receive a Congressional Medal for participation in voluntary activities by satisfying the standards of achievement established by the Board. H.R. 2357, the legislation before us today, would increase the number of members serving on the Board from 17 to 33. Board members, who are selected from the majority and minority leadership of the U.S. House of Representatives and the U.S. Senate, are leaders in business and community affairs throughout the country. The Board is privately funded and may seek funds only from sources other than the Federal Government. An increase in the size of the Board would further promote the program by encouraging more highly visible national recognition for youth who contribute to the betterment of their community through voluntarism and public service.

I strongly urge my colleagues to support this amendment before us today.

Mr. ERLENBORN. Mr. Speaker, I yield 3 minutes to the distinguished Republican leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, let me first of all express appreciation to the committee for expediting action on this bill.

It is a noncontroversial measure which simply increases the size of the Congressional Award Board from 17 to 33 members. An identical bill passed the Senate on March 24.

The Congressional Award Act was passed in the 96th Congress. It seeks to establish an award system which recognizes young people for meritorious service and outstanding achievement. One might compare it in some respects to the YMCA and scouting programs.

To date, we have had only one program in operation under the act, a pilot program in Minnesota. The Minnesota delegation has been very supportive of the pilot program, and I understand it was worked out quite well.

The Congressional Award Board feels that the program is now ready to be extended on a nationwide basis, and the purpose of expanding the size of the board is thus to generate a broader spectrum of support, both geographically, programmatically, and with respect to funding.

I understand that the Board hopes to have congressional award programs in 20 congressional districts by the end of the year. A Congressional Award Council would be established in each district, with the Member of Congress serving as honorary chairman.

The council will set up the program in its district, establishing procedures by which young people can apply to participate in the program and be nominated for outstanding achievement. Both gold and bronze awards will be granted, with the ultimate goal being some 300 awards per district.

I believe this will prove to be a worthy program, and expanding the size of the Board will help us to broaden support and get it off the ground. There will be no cost to the Government. I urge support for the bill.

Mr. ERLENBORN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, you will recall we established the Congressional Award in the 96th Congress to recognize the initiative, achievement, and voluntary public service of young Americans through the awarding of special medals. Paying tribute to these young men and women in this way encourages them to use their time in a positive and productive way and should inspire other young people to follow the splendid example they set. The medal is earned after successful completion, within certain time limits, of an individualized, noncompetitive program in such areas as public service, physical and expedition fitness, or approved personal interest. The goals are to provide voluntary service to others and to the community, to develop personal interests, social, and employment skills—through apprenticeship programs, for example—and to improve personal health, fitness, and leadership skills.

The program is conducted under the auspices of a national board of directors appointed by the joint congressional leadership. By law, no Federal subsidies are permitted. This is a registered, tax-exempt charitable organization funded solely by private and corporate donations.

Mr. Speaker, what we seek to do here today by passage of H.R. 2357 is increase the size of the Congressional Awards Board from 17 to 34 members and change the term of service to 2 years. The bill was introduced by my esteemed colleague from Illinois, Mr. MICHEL, and has bipartisan support. An identical measure was approved by the other body in March.

At the present time, Board members are serving staggered 2-, 4-, and 6-year terms. The 16 additional, newly appointed members would serve staggered terms, but subsequent appointments would be for a term of 2 years. The Board members are appointed by the joint leadership of the Congress, as I have already said.

To date, the program has operated only in Minnesota. That State was selected to develop a 2-year pilot program prior to its expansion on a national basis. A number of our colleagues from Minnesota have been involved in the congressional award program and have praised its success.

The hope now is to interest other parts of the country in the program. The increase in Board membership is considered necessary to broaden representation for fundraising purposes, as well as to reach out to persons already working with young people to assist in development of this program. Passage of H.R. 2357 should help in obtaining broad private sector funding and support for the congressional awards.

I favor the bill and believe it provides for young people a good means of demonstrating and furthering the basic values of work, self-discipline, and voluntary services.

● Mr. WEBER. Mr. Speaker, it is a pleasure to speak on behalf of this bill and also the congressional awards program associated with it. I was privileged to be the first Member of Congress to present a congressional award.

That presentation took place at the Minnesota State Capitol in St. Paul on September 25, 1982. I was fortunate enough to be able to present 5 bronze and 7 silver awards to 12 young constituents from Willmar, Minn.

I strongly believe that awards such as these are needed to recognize the commitment of our youth to personal excellence and outstanding citizenship. The congressional award offers young men and women, and those who work with them, an opportunity to have their accomplishments property recognized here in Washington and in their own local communities.

The congressional awards program is especially significant because it offers this recognition, and highlights these accomplishments, at a time when young people are at a crossroads in their lives. The road they choose to travel can shape their futures, and our Nation's.

That we are considering this legislation shortly after the publication of the report of the National Commission on Excellence in Education is, I think, signficant. The congressional awards program offers young people a tangible reward for working both to help others, and to help themselves.

The congressional awards program seeks to impress upon our young men and women the importance of self-discipline, initiative, character, voluntarism and public service. At this time when many Americans have questioned the quality of today's youth, I believe these are important qualities to instill in the leaders of tomorrow, for their own good and for the good of our country.

I want to share with you an experience I had some time ago in conjunction with this program, an experience that filled me with enthusiasm for the awards program and for what program can do for America's youth.

I spoke at the Willmar Junior High School about this program. Normally, a junior high school age group is not noted for its attentiveness. But to my surprise, this group of young men and women was attentive, enthusiastic and respectful. They were genuinely interested in this program. There was not a hint of cynicism or apathy to be found in that room that day, and I was proud to be among those young people.

Today, we hear it said that there are no suitable role models for our young people, and that somehow today's youth lacks the dedication and drive and determination that typified earlier generations.

I do not buy that for a minute.

Today's youth is as capable and concerned and committed as any generation that preceded them. And where are the role models for today's young people? Right at the next desk in school, or in the same Boy Scout troop, or in the choir at church.

The congressional awards program reaffirms our confidence in the youth of today, but is also challenges them to do better, to give more of themselves, and to urge their friends to do the same.

As Members of Congress, we often hear about matters we do not deal with to the satisfaction of voters. Today, you will have an opportunity to support a program that will affect many lives in the years ahead. Each person touched by this awards program will be enriched as a result, be they the young people recognized for their community activities, the recipients of the services provided by those young people, or the adults who supervise the program.

Give our youth the tools they need to excel.

Support this program which operates strictly without Federal funds.

Let us truly be leaders in expanding this partnership between Congress, the private sector, and the American people.

Above all, allow our young people—and our Nation—to develop and grow to the full potential that we know they both have.

Thank you, Mr. Speaker.●

● Mr. STANGELAND. Mr. Speaker, today we are discussing the expansion of the congressional award program, which is just completing its first year in the pilot State of Minnesota. The congressional award program was sanctioned by Congress last year.

It is a program which challenges our young people to test their own limits. Young men and women who accept this challenge set their own goals in: Community service, physical fitness, exploration and expedition, and personal interests.

At the end of their self-test period, their accomplishments are measured against their original goals. By testing and improving themselves, these young people are improving America.

The program also involves the rest of the community. Teachers, ministers, business leaders, adult sponsors—the entire community gets wrapped up in this program.

However, the congressional award program does not involve Federal dollars. The entire program is run on the volunteer efforts of the community and the contributions of sponsors.

I have seen the congressional award at work. Bemidji, Minn., volunteered to be the first pilot community in my district to sponsor the program.

Fifty-four students applied for the program last year. They set personal goals, so that they could compete against themselves, instead of each other.

The adults in Bemidji have also been enthusiastic, actively supporting the participants.

During the past year, the young people have learned what it takes to set and meet high personal goals. Because the standards are rigorous, not everyone can complete the program. Only 40 of the original 54 students are still on this tough schedule. But other students are signing up for next year.

In March, I met the first two winners of the bronze medal, which represents the first level of achievement. Bryan Vold and Amy Crompton have both said that they will continue their efforts for higher personal achievement and the silver medal.

The volunteer efforts of the adults in Bemidji have also been positive. A renewed sense of community has been created by supporting the young people who are meeting their own goals.

Bemidji State University has recognized the contributions that the congressional award is making in shaping and improving our students. The university is considering making the congressional award part of its internship program to earn credits.

I cannot speak highly enough of the positive effects of the congressional award on a participating community. Everyone benefits.

As we consider the expansion of the congressional award today, I can speak in the warmest words about the people who make this possible. Political and economic differences are bridged when we see how good it is to help young men and women to structure their efforts and meet goals which serve the community and strengthen their bodies and their interests.

I urge my colleagues to support the congressional award program and to encourage the communities in their own districts to volunteer for the program.

Thank you.●

GENERAL LEAVE

Mr. ERLENBORN. Mr. Speaker, I ask unanimous consent that all Members may have 3 legislative days in which to extend their remarks on the bill under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ERLENBORN. Mr. Speaker, having no further requests for time, I yield back the balance of my time.

Mr. MURPHY. Mr. Speaker, I have no further requests for time. I yield back the balance of my time.

The SPEAKER. The question is on the motion offered by the gentleman from Pennsylvania (Mr. MURPHY) that the House suspend the rules and pass the bill, H.R. 2357, as amended.

The question was taken.

Mr. McDONALD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER. Pursuant to clause 5 of rule I, and the Chair's prior an-

nouncement, further proceedings on this motion will be postponed.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS AUTHORIZATION ACT OF 1983

Mr. HUGHES. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2173) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to authorize additional appropriations to carry out such act.

The Clerk read as follows:

H.R. 2173

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Contract Services for Drug Dependent Federal Offenders Authorization Act of 1983".

SEC. 2. Section 4(a) of the Contract Services for Drug Dependent Federal Offenders Act of 1978 (18 U.S.C. 4255 note) is amended—

(1) by striking out "1981; and" and inserting in lieu thereof "1981;", and

(2) by inserting before the period at the end thereof the following: "; $5,000,000 for the fiscal year ending September 30, 1984; $5,500,000 for the fiscal year ending September 30, 1985; and $6,000,000 for the fiscal year ending September 30, 1986.".

The SPEAKER. Pursuant to the rule, a second is not required on this motion.

The gentleman from New Jersey (Mr. HUGHES) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. SAWYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 2173 has been reported by the Committee on the Judiciary to reauthorize for a period of 3 years, the program that provides drug abuse treatment and monitoring for drug abusing Federal offenders.

The bill reauthorizes the program at a level of $5 million for fiscal year 1984, $5.5 million for fiscal year 1985, $6 million for 1986.

This program is administered by the Probation Division of the Administrative Office of the U.S. Courts. First, it provides for a mechanism to examine all convicted Federal offenders who are released on parole, or sentenced to probation, to determine if they are drug users. Then it provides for the drug abuse treatment that is appropriate for their particular problem. Finally, it insures that all persons in treatment are monitored to guarantee that they stay off drugs during the drug treatment. If the defendant slips and returns to the use of drugs, the court is notified and the person is either charged as a parole or probation violator and returned to prison, or the judge or parole commission might modify the terms and conditions of the release and treatment.

Currently, there are about 4,600 persons under the supervision of the division of probation who are being treated for drug abuse. Each person in the program, which usually lasts a year, is given a urinalysis test for drug use about 54 times during the year they are in treatment.

This type of program has a very positive effect in reducing crime. Dr. John Ball of Temple University Medical School testified before the Crime Subcommittee about the careers of drug addicts and the tremendous amount of crime they commit. Most significant was his conclusion that an addict, when treated, commits 84 percent fewer crimes.

Drug treatment should be seen as a method for deterring crime. The addict who is no longer dependent on drugs is much less likely to prey on society. This is one program of the Federal Government that is directly reducing the amount of crime committed.

The proposed authorization is sound. It is based on an estimate, by the Administrative Office of the U.S. Courts of the impact of the revised prosecutorial policies of the Department of Justice focusing on violent crime and offenses that are frequently committed by drug dependent offenders. The Administrative Office estimates that they will be treating 5,300 persons in 1984, 5,600 in 1985, and 5,800 in 1986.

This is a modest and noncontroversial program. It has a direct, positive impact on one of the major causes of crime in the streets, that of drug abuse. I urge the House to pass this bill to continue this valuable anticrime program.

□ 1215

Mr. Speaker, I reserve the balance of my time.

Mr. SAWYER. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, contract services for drug-dependent offenders were first authorized by Congress in 1966 for drug-dependent Federal offenders after their release to the community either upon parole or after conviction. In 1972, this drug aftercare program was extended to all offenders with drug dependence problems. The authority for the supervisory care for persons treated under the act and authority to make treatment contracts now rests with the Administrative Office of the U.S. Courts.

Under this program, every person being treated for drug dependency under the supervision of the Division of Probation is monitored by urinalysis surveillance. If a person is discovered to be using drugs, the court is notified and the treatment and conditions of release can be quickly modified. An offender remains in the treatment program until four conditions are met:

First. Twelve months of abstinence from drugs demonstrated by urine surveillance.

Second. No criminal violations for 12 months.

Third. Assumption of social and economic responsibilities to the best of his or her ability.

Fourth. No association with persons involved in trafficking or use of drugs.

The Administrative Office of the U.S. Courts used the projected number of persons in the treatment program for each year and estimated the cost of the urinalysis and provision of treatment to arrive at the sums used in this authorization. The fiscal year 1982 authorization was $3.75 million. The authorization for 1983 was $4 million. The proposed authorization for 1984 is $5 million, for 1985 is $5.5 million and for 1986 is $6 million.

This is a cost savings program. Drug users commit 86 percent less crime when not associated with drugs. In addition, those in the program participate at an annual cost of $1,300, which is highly cost efficient when compared to incarceration at an annual rate of $25,000.

Join us in support of H.R. 2173.

The administration has no objection to the enactment of this bill. May I just state that historically this bill passed in the last Congress during the lameduck session and passed the other body also, but became the involuntary carrier of an omnibus crime bill when it was sent back because of one of those other attached bills, and it became the subject of a pocket veto which was in no way aimed at this bill, but by its association with some of the Senate amendments.

I reserve the balance of my time.

● Mr. RODINO. Mr. Speaker, H.R. 2173, the Contract Services for Drug Dependent Federal Offenders Authorization Act of 1983 reauthorizes for fiscal years 1984, 1985, and 1986 the existing program, which provides drug treatment for Federal convicts who are on probation or parole. The program monitors all of the participants by frequent and regular urinalysis to assure that they are not using drugs. The program plays a significant role in reducing crime because a major study of the criminal patterns of drug addicts found that when they are in treatment, they commit 84 percent fewer crimes.

This program addresses one of the major problems of our correctional system. After a person has served a prison sentence where there are extensive programs, including drug-abuse detection and treatment, when the defendant returns home there is often inadequate support and supervision. The need for such supervision is espe-

cially acute for those addicted to drugs. If they return to the same neighborhoods where they got into trouble in the first place, the probability is high that without close supervision and assistance, they will go back to using drugs again. The extensive counseling and frequent urinalysis testing of this program provides the support that helps keep a lot of these former addicts from returning to drugs and the life of crime.

This bill is modeled on H.R. 3963, which passed the House and Senate overwhelmingly in the last Congress but was vetoed for unrelated reasons. The bill authorizes $5 million for 1984, $5.5 million for 1985, and $6 million for 1986.

The bill has the support of the administration; it is part of the administration's budget, and has the support of the judicial branch which administers the program.

I urge the passage of this bill.●

Mr. HUGHES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. SAWYER. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, at first blush, it may appear inappropriate for the Federal Government to be authorizing upwards of $6 million a year for a special drug-addicts program. The contract services for drug dependents, which are provided for in H.R. 2173, however, comprise an extremely cost-effective program.

Drug addicts, and those criminals with a record of drug dependency are released on probation with the special probation conditions of the aftercare program. This program enables the probation officer to track the participant's drug use while on parole.

The cost savings are impressive. It costs approximately $1,300 per participant in this program. This is a substantial cost savings when compared to the average $25,000 cost of incarcerating an individual for 1 year. There are societal savings as well. It is estimated that drug dependents commit seven times as many crimes as nondrug users. By keeping parolees off drugs, the aftercare program helps reduce crime.

Mr. SAWYER. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. FISH).

Mr. FISH. Mr. Speaker, the Drug Dependent Federal Offenders Authorization Act before us today is a small, noncontroversial, and highly beneficial bill. The bill will provide funding for the drug aftercare program, which is now administered by the Administrative Office of the U.S. Courts. The Administrative Office has done such a fine job of carrying out the requirements of the program that they have stayed consistently within the program budget. The Administrative Office is to be commended for their excellent work in the drug-aftercare program.

This program places parolees, with a history of drug abuse in a special program. Drug aftercare, which is contracted to private organizations, is incorporated into the regular probation program for these persons.

Counseling and urinalysis are used to help the drug abuser on probation to avoid reuse of drugs on release from prison.

The program benefits society in two ways. First, when an addict is treated, his criminality is reduced by an average of 34 percent. Thus, H.R. 2173 will help reduce drug-related crime. Second, the alternative to the aftercare program is incarceration, with an annual cost of $25,000. The aftercare program, costing an average of $1,300 per participant, provides a substantial cost savings to the State and Federal prison system.

I urge your support for H.R. 2173, the aftercare program.

Mr. SAWYER. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. SHAW).

Mr. SHAW. Mr. Speaker, I urge your support for the aftercare program, through which the administrative office of the U.S. courts contracts for certain services for drug-dependent offenders. This program generated no controversy at the subcommittee, full committee, or full House level during the 97th Congress. Unfortunately, it became the vehicle for more controversial matters and became the subject of a Presidential veto. Hopefully, we can move this bill quickly in the 98th Congress, and achieve less flamboyant, but more successful, results.

Current Federal law establishes special sentencing procedures and supervisory aftercare treatment for drug-dependent offenders. In addition, narcotics addicts released on probation are eligible for such supervision. The primary services provided are counseling and periodic urinalysis to determine if offenders are using narcotics.

Since October 1982, this program has been funded through a continuing appropriation with an expired authorization. I commend the gentleman from New Jersey for moving swiftly in the 98th Congress to remedy this situation. In the absence of the treatment and supervision this bill would provide, the alternative is costly incarceration. I believe H.R. 2173 is the preferable route, and I am pleased to join Chairman HUGHES in urging the adoption of the aftercare reauthorization legislation.

Mr. SAWYER. Mr. Speaker, I, too, want to congratulate the chairman of the subcommittee, the gentleman from New Jersey (Mr. HUGHES).

This is just one of the number of bills he has moved out of that subcommittee and onto the floor, even at his early stage of Congress. I congratulate him.

I join the chairman in urging all of my colleagues to support H.R. 2173, which as far as I know has no opposition and did not in the last Congress.

The SPEAKER pro tempore (Mr. MOAKLEY). The question is on the motion offered by the gentleman from New Jersey (Mr. HUGHES) that the House suspend the rules and pass the bill, H.R. 2173.

The question was taken.

Mr. McDONALD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

FEDERAL ANTI-TAMPERING ACT

Mr. HUGHES. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2174) to amend title 18 of the United States Code to prohibit certain tampering with consumer products, as amended.

The Clerk read as follows:

H.R. 2174

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Anti-Tampering Act".

SEC. 2. Chapter 65 of title 18 of the United States Code is amended by adding at the end the following new section: "§ 1365. Tampering with consumer products

"(a) Whoever, with reckless disregard for the risk that another person will be placed in danger of death or bodily injury and under circumstances manifesting extreme indifference to such risk, knowingly tampers or attempts to tamper with a covered product or the labeling or container of such covered product, if that product affects interstate or foreign commerce, shall be punished as is provided in subsection (b) of this section.

"(b) The punishment for an offense under subsection (a) of this section is—

"(1) in the case of an attempt, a fine of not more than $25,000, or imprisonment for not more than ten years, or both;

"(2) in the case that the death of any individual is caused, a fine of not more than $100,000, or imprisonment for any term of years or for life, or both;

"(3) in the case that serious bodily injury to any individual is caused, a fine of not more than $100,000, or imprisonment for not more than twenty years, or both; and

"(4) in any other case, a fine of not more than $50,000, or imprisonment for not more than ten years, or both.

"(c)(1) Whoever knowingly communicates false information about conduct that, if it occurred, would violate subsection (a) of this section, shall be fined not more than $25,000 or imprisoned for not more than five years, or both.

"(2) As used in paragraph (1) of this subsection, the term 'communicates false information' means communicates information that is false and that the communicator knows is false, under circumstances in which the information may reasonably be expected to be believed.

"(d) Whoever knowingly threatens, under circumstances in which the threat may reasonably be expected to be believed, that conduct that, if it occurred, would violate subsection (a) of this section will occur, shall be fined not more than $25,000 or imprisoned for not more than five years, or both.

"(e) Whoever is a party to a conspiracy of two or more persons to commit an offense under subsection (a) of this section, if any of the parties intentionally engages in any conduct in furtherance of such offense, shall be punished by a fine of not more than $25,000, or imprisonment for not more than ten years, or both.

"(f) In addition to any other agency which has authority to investigate violations of this section, the Food and Drug Administration and the Department of Agriculture, respectively, have authority to investigate violations of this section involving a covered product that is regulated by a provision of law such Administration or Department, as the case may be, administers.

"(g) As used in this section—

"(1) the term 'covered product' means any article, product, or commodity which is customarily produced or distributed for household or personal care consumption by individuals and which is designed to be consumed or expended in the course of such consumption, and such term includes any 'food', 'drug', 'device', or 'cosmetic', as those terms are respectively defined in section 201 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321);

"(2) the term 'labeling' has the meaning given such term in section 201(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(m));

"(3) the term 'serious bodily injury' means bodily injury which involves—

"(A) a substantial risk of death;

"(B) extreme physical pain;

"(C) protracted and obvious disfigurement; or

"(D) protracted loss or impairment of the function of a bodily member, organ, or mental faculty; and

"(4) the term 'bodily injury' means—

"(A) a cut, abrasion, bruise, burn, or disfigurement;

"(B) physical pain;

"(C) illness;

"(D) impairment of the function of a bodily member, organ, or mental faculty; or

"(E) any other injury to the body, no matter how temporary."

SEC. 3. The table of sections at the beginning of chapter 65 of title 18 of the United States Code is amended by adding at the end the following new item:

"1365. Tampering with consumer products.".

The SPEAKER pro tempore. Is a second demanded?

Mr. SAWYER. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey (Mr. HUGHES) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. SAWYER) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to be able to bring this important bill to the floor today. H.R. 2174 is a response to the tragic deaths of seven people in the Chicago area last fall, when a nationally known and used painkiller was laced with cyanide and sold to unsuspecting consumers. Those deaths were followed by a wave of copycat tamperings, and false claims of tamperings, across the country. The incidents had a marked effect on consumer confidence in all over-the-counter drugs and food products sold on the open shelves. They also caused the manufacturers and distributors of those products enormous financial losses from recalls, repackaging, and loss of business.

The industries affected by these incidents responded quickly, candidly, and in the public interest. In particular, Johnson & Johnson, the manufacturer of the painkiller involved in the Chicago area deaths, should be singled out for its forthright and effective actions following those deaths.

It is now time for Congress to act. The Federal interest in this area is clear: The effect on consumer confidence is nationwide, and a tampering at the manufacturing stage in one State can cause injuries in another State, where the products are ultimately sold.

It is also clear that Federal jurisdiction should be limited to those cases where there is such a nationwide effect. H.R. 2174 does just that. It makes the tampering with certain consumer products a Federal crime, but only in those cases where there is an effect on interstate or foreign commerce. When that effect on commerce ends, so should Federal intervention. At that point, such matters are more appropriately handled by State and local authorities.

H.R. 2174 also covers only consumer products—those most likely to be tampered with, and those where the risk to human safety is the greatest. It covers only those tamperings where there is a risk to human safety. Lesser penalties are provided elsewhere in the United States Code for a tampering that does not pose a risk to human safety.

H.R. 2174 covers not only the actual tampering, but also threats and conspiracies to tamper with consumer products, and it punishes such conduct in a manner commensurate with the harm caused. If, for example, the tampering causes death, it is punishable by a maximum of life in prison and a $100,000 fine. Where no injury at all is caused, the maximum penalty is 10 years in prison and a $50,000 fine.

H.R. 2174 also punishes defendants whose primary intent is to damage the business reputation of, for instance, the manufacturer or distributor of a particular product—but only where the defendant's conduct poses a risk of harm to another. As I have already stated, where there is no such risk, there are appropriate penalties for such conduct elsewhere in the laws of the United States.

This legislation has been carefully crafted to provide for Federal intervention in only the most clearly appropriate situations. The need for such intervention in these situations is especially urgent in light of the tragic deaths in Chicago last year, and the continuing risk to consumer safety and confidence as a result of such incidents.

I do not believe that there is any controversy about the substance of H.R. 2174. I think we can all agree that it is a necessary piece of legislation—one that should be acted on without delay.

I urge you to vote to suspend the rules and pass H.R. 2174.

□ 1230

I think we can all agree it is a necessary piece of legislation, one that should be acted on without undue delay.

I want to at this time commend the ranking minority member, the gentleman from Michigan, HAROLD S. SAWYER for his great work on this particular bill.

We in fact worked on it in the closing days of the lameduck session of the Congress. It found its way in part into the omnibus crime bill which ultimately was vetoed by the President for reasons other than this particular bill, I might say any bill that came out of the Subcommittee on Crime. I urge my colleagues to support this bill, H.R. 2174, it is a good piece of legislation.

Mr. SAWYER. Mr. Speaker, again I call attention that this is yet another useful and necessary bill coming from the Subcommittee on Crime of the Committee on the Judiciary. This subcommittee is chaired by the gentleman from New Jersey and has been operating at full speed during the few months of this Congress as it did during the last Congress, when it turned out some 12 very essential bills.

Mr. Speaker, our Nation needs legislation to protect innocent and unsuspecting consumers from the malicious, coldblooded acts of individuals who

tamper with products prior to consumer purchase. I am proud to present H.R. 2174 to this body for consideration. This legislation is necessitated by the recognition that the Federal Antitampering Act is necessary to the protection of our constituents.

The individual or group of individuals who placed cyanide-filled Tylenol capsules on store shelves with total disregard for human life caused several random deaths in the Chicago area. In the wake of this tragedy, manufacturers were forced to recall products at great expense, and copycats have been inspired to continue the tampering trend in a variety of gruesome ways. A new angle, the "false scare," has developed. For example, in my own State of Michigan, the Hygrade Food Co. initiated a financially burdensome recall of thousands of hot dogs after it was falsely and maliciously claimed that razor blades and tacks had been inserted into the meat.

In the aftermath of the tampering scare, consumers now play "Russian roulette" with their own safety every time they purchase the very products necessary to their own well-being. This might be expected in a good horror movie, but it cannot be tolerated in American society.

The criminal act of tampering with consumer products dictates the swift and forceful involvement of the Federal Government. The Food and Drug Administration has reacted quickly to protect consumers by setting antitampering packaging standards. The Johnson & Johnson Co., itself a victim of the Tylenol tampering, has done a swift and outstanding job of packaging its Tylenol capsules in containers with three separate antitampering protection. This private sector compliance is only just beginning.

Nationwide investigation and the swift enforcement of strict Federal penalties must also be used to deter the act of tampering. This is the purpose of the Federal Antitampering Act, which creates a new offense in title 38 of the United States Code. Under this proposal, it would be illegal to tamper or attempt to adulterate a broad range of consumer products affecting interstate commerce. This proposal also would make it illegal to disseminate false information concerning the tampering of a product, and to threaten, or conspire, to tamper. The penalties for these offenses include a maximum prison sentence of 20 years and a fine of $100,000. Where personal injury or death results, a maximum penalty of life imprisonment is provided.

I commend the gentleman from New Jersey for addressing the need for antitampering legislation in such a prompt manner, and I look forward to working in support of H.R. 2174 as the House and Senate develop the Federal Antitampering Act. Your support for H.R. 2174 is important to the Federal response to this awful crime.

While I am one of the first to recognize that the basic type of violent crime involved is properly within the jurisdiction of States, when we are dealing with an interstate product, with national dissemination as was the case in Tylenol and is the case in most interstate products that are moving, one State cannot adequately cope with this problem. The States need the facilities and help of the Federal Government and this act will provide that. I reserve the balance of my time.

● Mr. RODINO. Mr. Speaker, I am pleased to speak in support of H.R. 2174, the Federal Antitampering Act. H.R. 2174 is a bill that protects the consumers of this country. It prohibits the tampering with consumer products and provides stiff penalties for those who commit such acts. Ever since the tragic deaths of seven people in Chicago last fall from a painkiller laced with cyanide, consumers in this country have had legitimate concerns about buying over-the-counter drugs and food products sold on open shelves. This concern has had nationwide effects on consumer confidence and on sales of these products. Because of these nationwide effects, Federal intervention is appropriate and necessary. We recognize that Federal intervention must always be carefully limited to those situations that are of particular Federal concern, and where the State and local authorities are in need of Federal assistance. The hearings held by the Subcommittee on Crime proved that this is one of those situations where Federal intervention is appropriate.

H.R. 2174 is similar to the antitampering bill that was passed overwhelmingly by the House in the 97th Congress but, along with several other anticrime provisions, was unfortunately vetoed by the President in January. Since that time, the bill has been modified and improved. I believe it is the best possible legislation and will serve its purpose well; to protect the consumers of this country, and to punish those who would tamper with the products on which all of us, as consumers, rely in our everyday lives.

I strongly urge your support of H.R. 2174.●

Mr. SAWYER. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. FISH), the ranking Republican on the full Committee on the Judiciary.

Mr. FISH. I thank the gentleman.

Again my compliments to the gentleman from Michigan (Mr. SAWYER) and the gentleman from New Jersey (Mr. HUGHES) for bringing these measures to us early in this session.

Mr. Speaker, how anyone could imagine the mind that poisons pain relievers, thereby killing unknown victims at random, is beyond me. This criminal mind is deserving of our swiftest criminal enforcement. All consumers are harmed by tamperings, threats to tamper, and false claims that tamperings have occurred. News of such an event has little to offer in addressing consumer fears. Businesses are severely harmed when loss of consumer confidence undermines years of successful marketing and consumer orientation.

Our society cannot expect consumers to know when a purchased product has been the subject of a tampering. Indeed, locating the tampered product prior to injury seems virtually impossible. A Federal criminal penalty and swift enforcement is designed to deter this horrible activity.

I introduced an antitampering bill in the 98th Congress which, along with other proposals, has been perfected by the Subcommittee on Crime. This legislation, H.R. 2174, is complete in its attempt to address the act of tampering. As an original cosponsor of H.R. 2174, I urge your support for this all important Federal Antitampering Act.

Mr. SAWYER. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. SHAW), a valuable and very active member of the subcommittee.

Mr. SHAW. Mr. Speaker, I thank the gentleman from Michigan for yielding.

Mr. Speaker, the Federal Antitampering Act will close a serious loophole in our Federal Criminal Code. Until recently, such a law would have seemed unnecessary, for whom of us could have foreseen the horrible Chicago area deaths caused by the random poisoning of a common pain reliever. The act of poisoning products to appear on store shelves, without regard to the identity of the victim, demonstrates a grotesque criminal mind.

As if this one incident was not enough, all consumers were suddenly the victims of copycat tamperings, threats to tamper, and false claims that tamperings have occurred. These types of crimes must not go unpunished. Swift and effective Federal law enforcement is necessary. Federal investigation is required to adequately address the national scope of the problem. Often, the product will be made and shipped through several different States before purchased by the consumer. One lone State cannot be expected to trace the tampering through the chain of distribution. With Federal investigation, Federal enforcement follows, and this bill contains stiff penalties.

Tampering is unacceptable in our society and should be swiftly punished. When a threat, a false scare, or a tampering victim appears on the evening news, the entire Nation is held hostage. Businesses lose millions in revenue and consumer confidence. Consumers lose confidence in any store

purchase. H.R. 2174 will punish the inexcusable acts which lead to these costly results.

I urge passage of the bill.

Mr. SAWYER. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin (Mr. SENSENBRENNER), a very important member of the subcommittee.

Mr. SENSENBRENNER. Mr. Speaker, I thank the gentleman from Michigan (Mr. SAWYER) for yielding and I would like to commend him and the gentleman from New Jersey (Mr. HUGHES) and the gentleman from Florida (Mr. SHAW) for very succinct and accurate statements on why we must move to plug this loophole that currently exists in the Federal Criminal Code.

However, there is one additional reason that has not been stated why this bill ought to pass and pass promptly.

Under the current law, the FBI can only get involved in investigating drug tampering or adulteration cases if an extortion threat has been posed, because extortion is a violation of the Federal Criminal Code. The sick mind who poisons or adulterates foods or drugs but does not accompany that with an extortion threat to try and get money into his own pocket, under the present law has not committed a Federal crime and, consequently, the FBI is not able to get involved in tracking down this very despicable and criminal activity. So, by plugging this loophole and creating a Federal crime in this respect, we will get Federal law enforcement in the investigative end sooner on, hopefully to get people indicted and prosecuted and sent to jail later on in the criminal procedure.

So, I hope this bill passes.

Mr. SAWYER. Mr. Speaker, I have no further requests for time. I yield back the balance of my time, and I urge support of the bill, H.R. 2174.

● Mr. LONG of Louisiana. Mr. Speaker, I rise in support of H.R. 2174, the Federal Antitampering Act. This legislation is essential to restore public confidence in the safety of products sold in the Nation's markets.

It represents the response of Congress to the sense of outrage and revulsion that swept the Nation after the "Tylenol murders" which claimed seven lives in Chicago last year. The poisonings inaugurated a new and coldblooded type of crime, one that struck its victims in an appallingly random way. The Tylenol killings were, in effect, an act of terrorism aimed at society as a whole, rather than at specific persons, groups, or institutions.

The bill before the House of Representatives today would make tampering with over-the-counter drugs, food, cosmetics, and other consumer items a Federal offense. It would also elevate tampering from its present status as a misdemeanor to that of a felony, with appropriately harsher penalties.

Thus, Mr. Speaker, this legislation creates a powerful deterrent against product tampering and brings the full weight and power of the National Government down on perpetrators of this terrible crime.

It imposes severe criminal penalties, ranging from 10 years to life in prison and large fines, on anyone convicted of tampering with any item intended for household or personal use. Moreover, the bill provides stiff penalties for the "copycat" crimes that popped up around the country in the wake of the Chicago murders.

In several States, false claims of tampering created the unsettling illusion of an epidemic of poisonings. The hoaxes took several forms, including making claims for damages for a fake injury, attempting to extort money from product manufacturers and efforts to injure a business by forcing the Government to issue product recalls. In any event, the rash of poisoning scares, scattered throughout the country, underscored the national scope of the problem and brought public demand for Government action.

Mr. Speaker, this antitampering legislation fits perfectly within the larger framework of an anticrime program developed under the auspices of the House Democratic Caucus. As caucus chairman, I can tell you that we worked hard to build a consensus among Members around a legislative program to strengthen law enforcement at the local, State, and Federal levels. I believe it is important that we take a hardnosed and pragmatic approach toward combating crime and protecting our citizens.

This is the first of several bills which will be considered throughout the year in the area of crime prevention. It is imperative, in my view, that we enact some of the more important procedural changes in the Federal criminal justice system, including bail reform, alleviating prison congestion, sentencing reform, higher fines for white-collar crime, and clearer guidelines for Federal prosecutors.

We must also escalate the war on crime by a vigorous program of assistance to States and localities, particularly in the areas of white-collar and organized crime, sting operations against burglary and fencing, arson investigation, career criminal identification, and prosecution and witness and juror protection.

And just as the Federal Government provides emergency help in times of natural disaster, I believe we should establish ways of helping localities cope with local crime calamities such as the child murders in Atlanta and the drug-related crimes in Florida.

Mr. Speaker, passage of the antitampering legislation before us today will signal the beginning of a renewed Federal commitment to a broad-scale assault on serious crime. I urge my colleagues to join me in supporting this important bill. I would also hope that the House of Representatives will act favorably upon the anticrime initiatives which come to the floor in the next few months.

The American people are rightly outraged by the extent to which the fear of crime has invaded their lives. They demand action to control crime, and we must use all the resources at our command—Federal, State, and local—to combat the current wave of lawlessness. At stake is the fundamental question of our ability to govern ourselves effectively within the constraints properly imposed by our democratic institutions.●

● Mr. GLICKMAN. Mr. Speaker, I rise in support of H.R. 2174, the Federal Antitampering Act. This legislation deals with a problem which has faded from the headlines, but which clearly needs to be addressed. The Tylenol murders created not only a terrible trauma for the families of the victims, but also raised concerns that "copycat" crimes, as they were dubbed, might lead to contamination of a whole range of consumer products. Consumers were understandably afraid that they might be victimized.

Then we encountered the problem of allegations that products had been contaminated when they in fact had not been. Here, in the Washington area, that happened with an eyewash product. The result was that unfounded concerns were raised about a safe product, and the manufacturer had to bear a loss that should never have occurred.

Clearly, these are problems of interstate commerce that can only adequately be addressed at the Federal level. The legislation drafted by the Judiciary Subcommittee on Crime and approved by the full Judiciary Committee seeks to deal with this problem. It has strong bipartisan support, and I encourage all of my colleagues to give it their favorable vote.●

● Mrs. COLLINS. Mr. Speaker, as the author of antitampering legislation, H.R. 778, which states my commitment to consumers as well as manufacturers, I support the need to make it a Federal crime to knowingly tamper with consumer products which result in injury or death to the purchaser of such products.

In all honesty, however, I strongly feel two vital provisions are missing from H.R. 2174, a measure which has been brought to the House floor today under suspension of the rules and not subject to amendment. Those pieces are: Language which addresses the damage done to the reputation of manufacturers, wholesalers, retailers, and so forth, as the result of malicious tampering, and the imposition of

stronger sentences in order to deter product tampering.

Who in these hallowed Halls of Congress can forget picking up the newspaper last year and reading about the deaths of several people in Chicago who died from cyanide poisoning after taking extra-strength Tylenol capsules? Who can forget about the copycat tamperings which followed days after the tragic events of September 30, 1982? Products were adulterated in an effort to harm people, to damage a business reputation and, in some cases, simply for the perverse pleasure of wreaking havoc with a nation of consumers and manufacturers. Those crimes, inspired by the Chicago incidents, succeeded in gripping the American people with the fear that their over-the-counter drugs might be poisonous.

My colleagues would certainly agree that consumers have the right to purchase products without apprehension or fear that they may be playing a very deadly game of Russian roulette. Similarly, members of the business community have the right to do business without fear that their products or reputations will be damaged. Some manufacturers have had to recall massive numbers of items which had been tampered with. Others are absorbing the cost of recalling their products at the drop of a hoax.

So, while I am pleased with the speed with which the House is considering Federal legislation to outlaw product tampering and the fact that the legislation before us is stronger than what we passed in the 97th Congress, I am sorry that during the subcommittee deliberation, language was not approved which would deter anyone from damaging a business reputation. It should be noted, however, that after presenting testimony before the Judiciary Subcommittee on Crime in support of my legislation, the subcommittee ultimately marked up this bill which, first, provides three different types of punishment focusing on people conveying false information, second, broadens the scope of products and third, makes it a crime to tamper with the labels or containers of covered products.

Inasmuch as this bill is the closest we could come to addressing concerns echoed by the business community, I urge my colleagues to support it and to thereby provide a mechanism to deter such madness in the future.●

The SPEAKER pro tempore. The question is on the motion of the gentleman from New Jersey (Mr. HUGHES) that the House suspend the rules and pass the bill, H.R. 2174, as amended.

The question was taken.

Mr. McDONALD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

FOUNDATION FOR THE ADVANCEMENT OF MILITARY MEDICINE ACT OF 1983

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the Senate bill (S. 653) to amend title 10, United States Code, to establish a Foundation for the Advancement of Military Medicine, and for other purposes, as amended.

The Clerk read as follows:

S. 653

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Foundation for the Advancement of Military Medicine Act of 1983".

SEC. 2. (a) Chapter 7 of title 10, United States Code, is amended by adding at the end thereof the following new section:

"§ 178. Foundation for the Advancement of Military Medicine

"(a) There is authorized to be established a nonprofit corporation to be known as the Foundation for the Advancement of Military Medicine (hereinafter in this section referred to as the 'Foundation') which shall not for any purpose be an agency or instrumentality of the United States Government. The Foundation shall be subject to the provisions of this section and, to the extent not inconsistent with this section, the Corporations and Associations Articles of the State of Maryland.

"(b) It shall be the purpose of the Foundation (1) to carry out medical research and education projects under cooperative arrangements with the Uniformed Services University of the Health Sciences, (2) to serve as a focus for the interchange between military and civilian medical personnel, and (3) to encourage the participation of the medical, dental, nursing, veterinary, and other biomedical sciences in the work of the Foundation for the mutual benefit of military and civilian medicine.

"(c)(1) The Foundation shall have a Council of Directors (hereinafter in this section referred to as the 'Council') composed of—

"(A) the Chairmen and ranking minority members of the Committees on Armed Services of the Senate and the House of Representatives (or their designees from the membership of such committees), who shall be ex officio members,

"(B) the Dean of the Uniformed Services University of the Health Sciences, who shall be an ex officio member, and

"(C) four members appointed by the ex officio members of the Council designated in classes (A) and (B).

"(2) The term of office of each member of the Council appointed under clause (C) of paragraph (1) shall be four years, except that—

"(A) Any person appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(B) the terms of office of members first taking office shall expire, as designated by the ex officio members of the Council at the time of the appointment, two at the end of two years and two at the end of four years.

"(3) The Council shall elect a chairman from among its members.

"(d)(1) The Foundation shall have an Executive Director who shall be appointed by the Council and shall serve at the pleasure of the Council. The Executive Director shall be responsible for the day-to-day operations of the Foundation and shall have such specific duties and responsibilities as the Council shall prescribe.

"(2) The rate of compensation of the Executive Director shall be fixed by the Council.

"(e) The initial members of the Council shall serve as incorporators and take whatever actions as are necessary to establish under the Corporations and Associations Articles of the State of Maryland the corporation authorized by subsection (a).

"(f) Any vacancy in the Council shall not affect its powers, but shall be filled in the same manner in which the original designation or appointment was made.

"(g) In order to carry out the purposes of this section, the Foundation is authorized to—

"(1) enter into contracts with the Uniformed Services University of the Health Sciences for the purpose of carrying out cooperative enterprises in medical research, medical consultation, and medical education, including contracts for provision of such personnel and services as may be necessary to carry out such cooperative enterprises;

"(2) enter into contracts with public and private organizations for the writing, editing, printing, and publishing of books and other material;

"(3) take such action as may be necessary to obtain patents and licenses for devices and procedures developed by the Foundation and its employees;

"(4) accept, hold, administer, invest, and spend any gift, devise, or bequest of real or personal property made to the Foundation;

"(5) enter into contracts with individuals, public or private organizations, professional societies, and government agencies for the purpose of carrying out the functions of the Foundation;

"(6) enter into such other contracts, leases, cooperative agreements, and other transactions as the Executive Director considers appropriate to conduct the activities of the Foundation; and

"(7) charge such fees for professional services furnished by the Foundation as the Executive Director determines reasonable and appropriate.

"(h) A person who is a full-time or part-time employee of the Foundation may not be an employee (full-time or part-time) of the Federal Government.

"(i) The Council shall transmit to the President annually, and at such other times as the Council considers desirable, a report on the operations, activities, and accomplishments of the Foundation.".

(b) The table of sections at the beginning of chapter 7 of such title is amended by adding at the end thereof the following new item:

"178. Foundation for the Advancement of Military Medicine.".

SEC. 3. Section 2113 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(j)(1) The Board also is authorized—

"(A) to enter into contracts with the Foundation for the Advancement of Military Medicine established under section 178 of this title, or with any other nonprofit entity, for the purpose of carrying out cooperative enterprises in medical research, medical consultation, and medical education;

"(B) subject to paragraph (2), to make available to the Foundation for the Advancement of Military Medicine, on such terms and conditions as the Board determines appropriate, such space, facilities, equipment, and support services within the University as the Board considers necessary to accomplish cooperative enterprises undertaken by such foundation and the University;

"(C) subject to paragraph (2), to enter into contracts with the Foundation for the Advancement of Military Medicine under which the Board may furnish the services of such professional, technical, or clerical personnel as may be necessary to fulfill cooperative enterprises undertaken by such foundation and the University;

"(D) to accept, hold, administer, invest, and spend any gift, devise, or bequest of personal property made to the University, including any gift, devise, or bequest for the support of an academic chair, teaching, research, or demonstration project;

"(E) subject to paragraph (2), to enter into agreements with the Foundation for the Advancement of Military Medicine, or with any other nonprofit entity, under which scientists or other personnel of the Foundation or other entity may be utilized by the University for the purpose of enhancing the activities of the University in education, research, and technological applications of knowledge; and

"(F) to accept the voluntary services of guest scholars and other persons.

"(2) The authority of the Board under clauses (B), (C), and (E) of paragraph (1) may be exercised only if—

"(A) before the Board enters into any arrangement under which any space, facility, equipment, or support service is made available under clause (B) of such paragraph, before the Board enters into any contract under clause (C) of such paragraph, or before the Board enters into any agreement under clause (E) of such paragraph, it notifies the Committees on Armed Services of the Senate and the House of Representatives in writing of the proposed arrangement, contract, or agreement, as the case may be, the terms and conditions thereof, and, in the case of a proposed agreement under clause (E) of paragraph (1), any appointments proposed to be made under the authority of paragraph (4) in connection with the agreement, and

"(B) a period of fifteen days has elapsed following the date on which the notice is received by such committees.

"(3) The Board may not enter into any contract with the Foundation for the Advancement of Military Medicine, or with any other entity, if the contract would obligate the University to make outlays in advance of the enactment of budget authority for such outlays.

"(4) Scientists or other medical personnel utilized by the University under an agreement described in clause (E) of paragraph (1) may be appointed to any position within the University and may be permitted to perform such duties within the University as the Board may approve.

"(5) A person who provides voluntary services under the authority of clause (F) of paragraph (1) shall be considered to be an employee of the Federal Government for the purposes of chapter 81 of title 5, relating to compensation for work-related injuries, and to be an employee of the Federal Government for the purposes of chapter 171 of title 28, relating to tort claims. Such a person who is not otherwise employed by the Federal Government shall not be considered to be a Federal employee for any other purpose by reason of the provision of such services.".

The SPEAKER pro tempore. Is a second demanded?

Mr. HILLIS. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Indiana (Mr. HILLIS) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring before the House S. 653, to establish the Foundation for the Advancement of Military Medicine, which would support the activities of the Uniformed Services University of the Health Sciences. This measure, recently approved by the Senate, has received unanimous, bipartisan support in the Senate and in the House Armed Services Committee. I have sponsored an identical bill, as has our colleague, the gentleman from New York (Mr. STRATTON).

The Foundation would be a nonprofit, charitable corporation that would receive gifts, grants, and legacies on behalf of the University. Under present law, there is only limited authority for the University to accept private donations.

The Uniformed Services University of the Health Sciences was established by Congress in 1972 to train medical officers for the uniformed services and to provide programs in continuing medical education for military members of the health professions.

Graduates must fulfill an active duty service obligation of at least 7 years following intership and residency. The University's primary objective is to provide comprehensive, high quality education for students motivated to medical careers with uniformed services.

With the grants and bequests received, the Foundation for the Advancement of Military Medicine would provide support to the University for academic chairs, teaching, and research projects. This would enhance the University's capability to attract top quality faculty.

The Foundation is patterned after the American Registry of Pathology established by Congress in 1976 to support the Armed Forces Institute of Pathology.

I am calling this bill before the House in amended form. The two amendments are technical in nature and do not alter the thrust of the Senate-passed bill. To insure continued congressional oversight of the Foundation's activities, the Senate bill provides for a Council of Directors to be composed of the chairman and ranking minority member of the House and Senate Armed Services Committees, the dean of the University, and four additional members.

The first amendment to the bill would permit the chairman and ranking minority member of each committee, if they so desired, to designate another member of their committee to serve on the Council in their stead. This designation would be made at the discretion of the designator.

The second amendment would simply clarify the intent of the bill. S. 653 provides that a person who is a full-time or part-time employee of the Foundation may not be an employee of the Federal Government. Further, S. 653 states that no part of the compensation paid to an employee of the Foundation may be paid from Federal funds.

This second restriction could present a problem should the Foundation receive a Federal research grant, from the National Institutes of Health, for example. Therefore, the second restriction has been eliminated from the bill. The bar on a Foundation employee also being an employee of the Federal Government remains intact.

Mr. Speaker, S. 653 is a very worthwhile piece of legislation that will assist the Uniformed Services University of the Health Sciences in turning out the highest quality military doctors. This bill involves no expense to the Government, and I urge my colleagues' wholehearted support.

□ 1245

Mr. HILLIS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to join with the gentleman from Mississippi (Mr. MONTGOMERY), with whom I serve on the Subcommittee on Military Personnel and Compensation, in urging House approval of S. 653, to establish the Foundation for the Advancement of Military Medicine.

The Uniformed Services University of the Health Sciences was established by Congress to provide a reliable source of physicians for the Nation's

Armed Forces—physicians who would have a substantial military service commitment in return for their medical education. The Congress can take pride in the outstanding job the University is doing in turning out first-rate doctors who are also first-rate military officers.

The Foundation will assist the University by receiving donations, grants, and bequests that can in turn be used to enrich the university teaching and research programs. It is my understanding that there are already several potential donors, one of whom wants to endow an academic chair at the university.

Several members of the Senate Armed Services Committee have asked that we make every effort to expedite action on S. 653; in view of the noncontroversial nature of the legislation, we are bringing it to the floor under suspension of rules today.

I urge my colleagues to support the passage of S. 653.

Mr. Speaker, I have no further requests for time.

Mr. MONTGOMERY. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. STRATTON), who is a coauthor of the House bill.

Mr. STRATTON. Mr. Speaker, I want to express my strong support for this legislation which passed unanimously, as I understand it, in the Senate.

Essentially what it is designed to do is to provide for the Uniformed Services University of the Health Sciences, popularly known as the military medical school out at Bethesda, the same opportunities that are provided to other major medical institutions, namely, the opportunity to have teaching chairs endowed in honor of particular individuals, and to provide for special research grants that can be carried on in connection with the current research undertakings of the university without having that financing coming from the Federal Government.

This is what is done in the outstanding medical schools of the country, and I think it would be most appropriate and therefore strongly support the legislation of the gentleman from Mississippi and urge its adoption.

Mr. MONTGOMERY. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the Senate bill, S. 653, as amended.

The question was taken.

Mr. McDONALD. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill, S. 653, just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained.

Votes will be taken in the following order: H.R. 2357, H.R. 2173, H.R. 2174, and S. 653, all by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

CONGRESSIONAL AWARD ACT

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 2357, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. MURPHY) that the House suspend the rules and pass the bill, H.R. 2357, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 275, nays 2, not voting 155, as follows:

□ 1300

Mr. LAGOMARSINO changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. MURPHY. Mr. Speaker, I ask unanimous consent that the Committee on Education and Labor be discharged from further consideration of the Senate bill (S. 957) to provide for an increase in the number of members of the Congressional Award Board, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 957

Be in enacted by the Senate and House of Representatives of United States of America in Congress assembled, That (a) subsection (a) of section 4 of the Congressional Award Act (Public Law 96-114; 2 U.S.C. 803 (a)) is amended—

(1) by striking out "seventeen" in the matter preceding the colon in paragraph (1) and inserting in lieu thereof "thirty-three";

(2) by striking out "Four" in clauses (A), (B), (C), and (D) of paragraph (1) and inserting in lieu thereof "Eight"; and

(3) by striking out "or the Committee for the Establishment and Promotion of the Congressional Award" in paragraph (2).

(b) Subsection (b) of section 4 of such Act (2 U.S.C. 803 (b)) is amended—

(1) by striking out "appointed" at the beginning of such subsection and inserting in lieu thereof "Except as provided in paragraph (2), appointed"; and

(2) by inserting at the end therof the following new paragraph:

"(2) Individuals appointed to the Board after March 31, 1983, shall serve for terms of two years.".

SEC. 2. Notwithstanding the provisions of section 4 of the Congressional Award Act (2 U.S.C. 803), relating to the terms of individuals appointed to the Congressional Award Board, the sixteen additional members to be appointed to the Board pursuant to the amendments made by the first section of this Act shall be appointed for terms as follows:

(1) Six members shall be appointed for terms of two years.

(2) Five members shall be appointed for terms of four years.

(3) Five members shall be appointed for terms of six years.

Thereafter such members shall be appointed for terms of two years.

MOTION OFFERED BY MR. MURPHY

Mr. MURPHY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. MURPHY moves to strike out all after the enacting clause of the Senate bill, S. 957, and to insert in lieu thereof the provisions of the bill, H.R. 2357, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 2357) was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device will be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS AUTHORIZATION ACT OF 1983

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 2173.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. HUGHES) that the House suspend the rules and pass the bill, H.R. 2173, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 275, nays 8, not voting 149, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Addabbo and Mr. Pepper for, with Mr. Conyers against.

Mr. Erdreich and Mr. Feighan for, with Mr. Crockett against.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to amend title 18 of the United States Code to prohibit certain tampering with consumer products, and for other purposes."

A motion to reconsider was laid on the table.

FOUNDATION FOR THE ADVANCEMENT OF MILITARY MEDICINE ACT OF 1983

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the Senate bill, S. 653, as amended.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the Senate bill, S. 653, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 295, nays 0, not voting 137, as follows:

So (two-thirds having voted in favor thereof) the rules were suspended and the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON FOREIGN AFFAIRS TO SIT TODAY AND FOR THE REMAINDER OF THE WEEK DURING 5-MINUTE RULE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on Foreign Affairs be permitted to sit and mark up authorizing legislation this afternoon and during the remainder of this week when the House will be in session under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 2175, JUSTICE ASSISTANCE ACT OF 1983

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 184 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 184

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on the Judiciary, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, said substitute shall be considered for amendment by titles instead of by sections, and each title shall be considered as having been read, and all points of order against said substitute for failure to comply with the provisions of clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, I yield the usual 30 minutes, for purposes of debate only, to the distinguished gentleman from Mississippi (Mr. LOTT), and pending that, I yield myself such time as I may consume.

Mr. LONG of Louisiana. Mr. Speaker, House Resolution 184 is a simple open rule providing for the consideration of H.R. 2175, the Justice Assistance Act of 1983. This bill restructures Federal programs of financial assistance aimed at combating crime and provides new authority for appropriations for these programs.

The bill provides new authority in the amount of $170 million annually for the Office of Justice Assistance for fiscal years 1983 through 1986; $25 million annually for the National Institute of Justice for fiscal year 1983 through 1986; $25 million annually for Bureau of Justice Statistics for fiscal years 1983 through 1986; such sums as may be necessary for the public safety officers' death benefits program, and $20 million for fiscal years 1984 through 1986 for emergency financial assistance to State and local governments experiencing critical crime situations.

The rule provides waivers of points of order permitting consideration of H.R. 2175. The first reading of the bill will be dispensed with. The rule makes in order the amendment in the nature of a substitute reported by the Committee on the Judiciary as an original bill for the purposes of amendment. The legislation will be read for amendment by title, with each title considered as read.

The rule waives clause 5, rule XXI, prohibiting appropriations in a legislative bill. The waiver is necessary because, on pages 15 and 19, the bill allows funds allocated for the new Office of Justice Assistance to be made available for any fiscal year. Conceivably since funds are already appropriated for fiscal year 1983, and the bill could be enacted prior to the end of the fiscal year, funds already appropriated could be used for this purpose. Thus technically, they would become appropriations.

The rule also provides that at the conclusion of the consideration of the bill for amendment, the committee shall rise and report the bill with amendments to the House with such amendments as may have been adopted, and that any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. At the conclusion of all consideration, one motion to recommit with or without instructions will be in order.

Mr. Speaker, the bill which this resolution would bring forward for debate is a most important one. It renews the effort to reauthorize Federal justice assistance to the States and localities. The legislation will create a new Office of Justice Assistance within the Department of Justice to replace the former Law Enforcement Assistance Administration.

While we are all aware that there were some questionable uses of LEAA funds in the past, the legislation before us today is carefully crafted to preserve the best programs LEAA had to offer while insuring that past abuses will not recur. Under the program, grants will be made to qualifying State and local agencies in order to fund certain criminal justice programs of proven success. In order to insure that the State or local agency is committed to the program, a 50-percent match is required. In addition, the legislation provides funds for States or localities facing criminal justice emergencies such as that faced by the city of Atlanta last year.

Last year, after a 2-year hiatus in the Federal effort, a bipartisan consensus emerged that there may have to be some modest Federal role in criminal justice research and assistance. It became clear that State and local resources often are inadequate to fund experimental anticrime programs. And in these times of budget austerity, many States and localities are not only eliminating innovative programs that may reduce crime, but are cutting back on the basic protections afforded our citizens as well.

This cannot continue. Our people are becoming increasingly concerned with the alarming growth in the crime rate in recent years and we must respond immediately with new and reasoned solutions. H.R. 2175, by providing Federal funds to States and localities that want to begin innovative anticrime programs, is an important beginning to that effort.

It is in this context that I would like to express my particular pleasure in seeing the House of Representatives again take the lead on this important piece of legislation. The House has passed similar legislation twice before. Although we hear so much about the crime initiative being developed in the other body, my experience in the last Congress and again today with the consideration of two crime bills—the antitampering bill and the drug dependent offender program—as well as debate on this one, is that the House has truly provided leadership on the crime issue. Much of the credit is due to the devoted work of my friend and colleague from New Jersey, with whom I have had the pleasure of working on a crime task force over the past few years. I look forward to our consideration of other important measures developed by Mr. HUGHES and his subcommittee in the coming months.

Mr. Speaker, I know of no controversy on this rule. I urge my colleagues to approve the rule so that we may proceed to the consideration of this more important legislation.

□ 1340

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides for consideration of H.R. 2175, the Justice Assistance Act of 1983. The resolution provides for an open rule with 1 hour of general debate, which should give all Members the opportunity to work their will on this legislation.

After general debate, the bill is open to amendment under the 5-minute rule. One amendment has been made in order. It is an amendment in the nature of a substitute recommended by the Judiciary Committee, which shall be considered as an original bill for the purpose of amendment. The substitute will be considered for amendment by titles instead of by sections. The rule also waives clause 5 of rule 21 for the substitute. This is necessary because the substitute would be subject to a point of order as a legislative bill containing an appropriation. The rule provides for no other motion except for one motion to recommit with or without instructions.

Mr. Speaker, I have no objections to this rule, but I do have questions about the bill itself. I am quite concerned about the level of funding. Are we not, as usual, throwing money at a problem and hoping it will go away? This bill authorizes $100 million more for the justice assistance program than the administration requested. The first budget resolution passed by this body has severely limited funds to be used for the adminstration of justice. The first budget resolution also anticipates funding for the Legal Services Corporation. I am concerned that funding for some of these programs will necessitate a decrease in funding for Federal law enforcement. Now is not the time to cut funding to these agencies and weaken their effectiveness.

Mr. Speaker, I have no further requests for time.

Mr. LONG of Louisiana. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MURTHA). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 267, nays 32, not voting 133, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

TRIBUTE TO THE LATE HONORABLE E. ROSS ADAIR

(Mr. MYERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MYERS. Mr. Speaker, it is with sadness that I announce the passing of a former Member, E. Ross Adair last Saturday in Fort Wayne.

Ross was elected to Congress in 1951 and served until 1971; during that period of time he served as the ranking minority Member of the House Committee on Foreign Affairs. After leaving the House, E. Ross Adair served as our Ambassador to Ethiopia. His funeral will be tomorrow afternoon in Fort Wayne. He leaves his wife, Marian, whom many of you remember and two children. We all will miss Ross.

JUSTICE ASSISTANCE ACT OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 184 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2175.

The Chair designates the gentleman from Louisiana, Mr. ROEMER, as Chairman of the Committee of the Whole, and requests the gentleman from Illinois, Mr. DURBIN, to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, with Mr. DURBIN (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

The CHAIRMAN pro tempore. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from New Jersey (Mr. HUGHES) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. SAWYER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, recently, much has been said about our need for a "war against crime." Unfortunately for all of us, there can be no "total victory" in this "war" and indeed very few battles have been won recently. In these battles, the Federal Government's direct role is very limited both by custom and the Constitution.

It only investigates and prosecutes about 5 percent of the total criminal justice workload, despite a dramatic increase in activity involving drugs, interstate and organized crime in the last 30 years. The Federal Government can, however, assist the State and local law enforcement communities in providing leadership by funding model programs and in this way give them added tools in their difficult task.

It is in this latter aspect which we bring the Justice Assistance Act of 1983 (H.R. 2175) before the House today. This bill is the product of extensive consideration by the Subcommittee on Crime, including 10 hearings in the 96th Congress, 5 in the 97th, and 3 this year. In this thorough endeavor, I would like, at this time, to single out in particular and to give special credit to my colleague, HAL SAWYER, the ranking minority republican member of the subcommittee, a prosecutor himself who has been instrumental in the fashioning of this bill in a manner which indeed is indicative of the bipartisan approach that has produced H.R. 2175. As a result, H.R. 2175, as amended, was approved by a voice vote by the Committee on the Judiciary on April 6, 1983.

The substance of this bill is essentially the same as H.R. 4481 which passed the House by a large bipartisan vote (287-73) in the 97th Congress. Unfortunately, it, among a number of other fine bills, fell victim to the "pocket veto" by the President in the "anti-crime" package (H.R. 3963) early this year, for reasons unrelated to this bill.

Thus, we are forced to again consider this much needed legislation which has the virtual unanimous support of State and local law enforcement agencies. We are, I am happy to say, a step ahead of last Congress in that the President has proposed funds for this

program in his 1984 budget (the fiscal year 1983 budget did not) and so I am optimistic regarding the signing of this bill this year.

The major feature of the Justice Assistance Act of 1983 is a formula grant program for aid to State and local criminal justice agencies. Unlike the old LEAA program which it replaces, this bill does not authorize massive amounts of Federal funding. Under this bill, a very modest formula grant pool of about $130 million (80 percent of the total) will be distributed to the States on the basis of population and crime rate. The bill would abolish the redtape and excessive bureaucracy built into LEAA and replace LEAA with a lean and scaled-down operation that would not impose excessive requirements on State and local recipients. State planning agencies and councils are no longer required, and a much narrower range for the grants is provided.

Unlike LEAA, the Federal money is not "free" money so to speak requiring no real commitment from the recipient. The legislation includes a requirement that the States provide a 50-percent cash match before they receive any Federal funds under the block grant program.

The proposed Office of Justice Assistance (OJA) which would administer the program would have limited discretion under the bill, with each State getting a minimum amount of $250,000 if the authorized level is appropriated, the remainder to be distributed one-half on the basis of population and one-half based on the number of index crimes in the State.

The Justice Assistance Act of 1983 provides specified categories of criminal justice programs which can be funded under this block grant program. The programmatic areas generally reflect those projects that have a proven record of effectiveness. The permissible categories include community and police anticrime programs; sting operations; arson programs; white-collar crime, and organized crime programs; career criminal programs; victim/witness programs; alternatives to pretrial detention; prison industry projects; programs to alleviate jail overcrowding; training for criminal justice personnel; treatment alternatives to street crime; operational information systems; programs for serious offenses committed by juveniles; and demonstration programs.

These program categories were chosen because they have been positively evaluated and have the support of the law enforcement community as documented in our hearings.

□ 1410

In addition to the formula grant programs, 20 percent of the funds are reserved for discretionary grants at the Federal level. Under this bill, we recognize that in order to supplement the block grant approach, it is necessary to allocate money for these others needs. First, education or training for criminal justice personnel. Second, for technical assistance. Third, programs of the type which are fundable at the State level, but which are national or multistate in scope. And fourth, demonstration programs.

H.R. 2175 also provides for the first time the availability of emergency grants to States and units of local government experiencing criminal justice crisis conditions.

A recent example of the need for such law enforcement assistance similar to Federal assistance in natural disasters, such as hurricanes and mud slides, and tornado damage, such as we have seen recently, is the 1980–81 investigation of the Atlanta child murders. When President Reagan determined that Federal funds should be made available to help Atlanta in the cost of the investigations where they requested it, he had to order the use of HUD money for this criminal investigation since there were no law enforcement assistance funds available and the request bounced around for about 2 months before there was a response.

This bill provides for a formalized method to respond to crime emergencies or epidemics. The Attorney General must respond to a jurisdiction within 10 days of the request.

The bill, as I have indicated, represents a very modest but a bipartisan effort to define a strong but limited Federal role in the fight against crime and I believe it is a very worthwhile bill.

One of the things it does in addition in reference to the discretionary grants is it does provide some 20 percent for discretionary money. We now have research coming out of the National Institute of Justice and other nonprofit organizations, but we really have no way to test the ideas and the new research in the marketplace.

This legislation will provide a vehicle for us to actually test the research coming out of NIJ and other agencies so that we will in fact be able to add to the success stories of this bill.

I urge my colleagues to support what I think is a very important step for the Federal Government to take in providing leadership in this most important area.

Mr. SAM B. HALL, JR. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. I thank the gentleman for yielding.

I would like also to congratulate the gentleman from New Jersey and the gentleman from Michigan for the tremendous work they have done on this bill. I think it is a good bill. I think it certainly should be passed.

I would like to ask the gentleman from New Jersey a question. Existing passthrough language provides no specific guidelines to the States on how the block grant funds should be distributed at the substate level. What considerations does the gentleman envision a State taking into account in distributing a local passthrough of funds at the local level?

Mr. HUGHES. I thank the gentleman for raising the question because it is an important question.

During the hearing process a lot of concerns were directed to us from rural areas in particular. We find that in many areas of the country sometimes the urban areas dominate in the State legislatures and it is our intent by requiring an automatic passthrough that every jurisdiction have equal opportunity, rural jurisdictions, urban areas, suburban areas, have equal opportunities to participate in this block grant program.

In fact, one of the things that is permissible under this bill is for smaller communities to ban together and apply in combination for one of the fundable categories. It is our intent that local jurisdictions have an equal opportunity to participate, whether they be rural in nature, urban in nature, or suburban in nature.

Mr. SAM B. HALL, JR. I thank the gentleman.

Mr. HUGHES. Mr. Chairman, I reserve the balance of my time.

Mr. SAWYER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am very pleased to be able to support H.R. 2175 and without being overly repetitious on it I again call attention to the fact that this is yet another essential crime bill brought out by the subcommittee chaired by the gentleman from New Jersey (Mr. HUGHES) and has full bipartisan support.

I may say that in the last Congress the administration had included nothing in the budget for AJA and at the request of the gentleman from New Jersey (Mr. HUGHES), I accompanied him down to the west wing of the White House and with his eloquency we persuaded the staff of the President to reconsider the matter and agree to support such a bill and I notice this year there has been a carryover and they have included some $90 million in the budget for it.

I cannot overestimate the importance of Federal help to the local authorities. We talked on the Federal level about fighting crime and in particular violent crime.

Well, I suppose not many people realize that the Federal Government and the whole Federal law enforcement has less than a 10-percent jurisdiction over crime in general and probably as little as 2 or 3 percent over the

amount of violent crime. Ninety percent of all crime in law enforcement jurisdiction rests with the States and the localities and probably 97 percent of that over violent crime, which is the thing that probably concerns us all most.

And as the gentleman from New Jersey has been kind of wont to say in some of our hearings that his area in New Jersey has yet to lose their first citizen to the Soviets, although we are devoting great funds to protect them against the Soviets and yet in his district virtually every day or every week, people are being lost to criminals.

While I have some feeling about the restriction of size of government and have come to the conclusion over the years that the government, particularly the Federal Government, has involved itself in many things that if left to the dictum of Lincoln are things that people should and are able to do for themselves the government should let them do for themselves. Crime and law enforcement, just like national defense, is not one of those things. We cannot have forces of self-enforcers running around the country and we need government to do it. And the only way the Federal Government can participate really meaningfully in the fight against street crime and violent crime is by adding some assistance financially and some leadership and backup facilities to the local authorities who are really in the front line and in the trenches on that battle.

We had a program called LEAA or Law Enforcement Assistance Administration, which fell into disrepute. What happened is what happens to many well-intentioned programs, it got too big, too far fetched, too widespread, too out of focus, to where it was spending as much as a billion dollars a year, was riddled with committees, ended up buying a lot of hardware for local police agencies that did not have to put up any local money and buying new hotdog radio systems, as they are known in the prosecutorial trade, and ultimately met the fate of all those kinds of programs and was disbanded, dismantled, and cut out.

Now we are starting reassessing the good things that came out of that program. And some good things did. The Members have all heard of the Sting operations where people with stolen goods were apprehended. That was a product of LEAA. They started it and it has been carried out very successfully.

The career criminal program where we identified career criminals. And those of my colleagues familiar with law enforcement will know that something like 80 or 90 percent of the crime is committed by a handful of repeater recidivistic individuals who repeat their criminal conduct and are what is known in the trade as career criminals. And it developed a program where those were identified and prioritized in their treatment prosecutorially and given special attention on sentencing and other treatment by judges to take them off the street and keep them off the street for the protection of the other individuals.

Then the promise program which is a program where prosecutorial offices were brought up into the modern age, the local ones were, where they can use computers and computer control of their dockets to expedite and handle burgeoning dockets beyond what would have been the capacity of their personnel, and the same thing with courtrooms and witnesses.

Now that is what this bill intends to reenact and puts back in a much more modest way. We are talking maybe $170 million as opposed to the billion dollar program. We are abolishing a lot of these committees. We are getting down to not this hocus-pocus kind of program where some more machinery and equipment and better pistols or something of that type, we are singling out those programs that were proven good and proven effective and cost-effective in LEAA and thereby encouraging other communities to try those programs that we know will work and have been proven to work in the field and to say, "Look, this is not going to be free money. If you feel you need this program you are going to have to with local money go 50–50 on the cost. And if you will do that, we will make it attractive by going 50 percent."

□ 1420

We have left some room for some innovative programs, for those programs which, with good counseling and advice, the Federal Bureau of Justice Assistance and the statistical branch, research branches, which are within this and the Department of Justice, have decided, after research, are good programs, we provided some money to try them out in the field, to see if they are as good as they look, and on a modest basis.

So this program, I would say, really deserves very much the support. And, as the gentleman from New Jersey had stated, when we were confronted with a national emergency, really, in a locality, but national in scope, Atlanta, the Atlanta murders, where this thing became totally beyond the ability of the local forces to cope with it, the Federal forces were finally, at the direction of the President, injected into it, but really with no funds, and they had to use housing and urban development funds, HUD money, to pay for it, because they had nothing in the Federal budget from which they could draw.

And this, among other things, creates a modest reserve of $20 million that can be held in reserve. And when we are confronted with a crime emergency, just as we do when we are confronted with a weather emergency or a landslide emergency or a flood emergency, we do have a fund that can be used for that purpose when we need to inject the Federal authorities.

Now, I am very pleased to note that this is a 3-year authorization we are requesting. And, interestingly, it is only at $187 million a year—we do not go up—which sort of indicates that the majority party or the other side of the aisle recognizes that we have brought inflation to heel and that we do not need any more now to hedge inflation in our bills. So I am just delighted to get that concession from the majority and to join very enthusiastically with really the great leadership in this field provided by Chairman HUGHES and I support this bill wholeheartedly and feel that it will really do some good in getting out on the front lines on this fight against violent crime.

Mr. HUGHES. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. SMITH), a distinguished member of the Subcommittee on Crime.

Mr. SMITH of Florida. I thank the gentleman for yielding.

Mr. Chairman, I am very much in favor of this bill. the subcommittee unanimously adopted it with the provisions that it has in it. As the former chairman of the Criminal Justice Committee of the Legislature of the State of Florida, I was very, very much involved in the way the provisions that the old LEAA bill was structured and the way that Florida benefited tremendously from the introduction of dollars that the Federal Government to the State level, to the local communities, from the Law Enforcement Assistance Administration. Those programs were invaluable in helping to fight crime at the State and local level. The programs that were developed under the old LEAA were invaluable and even today continue to remain invaluable as tools that are effective in fighting crime and in fighting organized crime and fighting street crime and making inroads on all of those areas that are weak and deficient in the whole spectrum of the criminal justice system.

This bill picks up the torch that was dropped when the LEAA went to the point where there was no longer any money in the funding system. This bill starts again that cooperation, that partnership, between the State, the local, and the Federal Governments in fighting crime, which is probably today one of the most major issues. It was in the past and it continues to be the focal point where local communities gather. And when they gather, they protest the rise of crime in the streets, the rise of crime in their homes, the rise of crime in their communities. The lawlessness that they

perceive around the United States can only be effectively fought by a forging of cooperation at all levels of government, from the Federal Government on down.

The new Justice Assistance Act of 1983 and for the 3 years thereafter is an important tool in combating what many people in the United States wish to see combated, and that is the incidence of crime. Criminality, the court system, the various types of jail programs are all involved in this bill, and I for one would like very much to see this passed, to go on line and to help the States go back to where they were when the LEAA was funded.

Mr. Chairman, I commend not only the committee, but certainly the gentleman from New Jersey (Mr. HUGHES), the capable chairman of the subcommittee, for having the foresight not only to file this bill but to see it through the House and, ultimately, to victory.

● Mr. RODINO. Mr. Chairman, we all know that the people of this country are fed up with crime and the fear of crime. Approximately 30 percent of all American households have been touched by crime. Many of us in this House have been the victims of crime. This is why I can speak out and strongly support H.R. 2175, a bill that does something about crime, that is aimed at stopping crime in its tracks, and I hope, reducing its stranglehold on this country.

H.R. 2175 recognizes that the Federal Government has a role to play in reducing and controlling crime. It recognizes that this role is necessarily limited, because the States and localities have the primary responsibility for fighting crime. But the Federal Government cannot abdicate its responsibility to help fight crime, even when it might not have jurisdiction to prosecute such conduct. The Federal Government must recognize that crime is a national problem and that national solutions are in order. The Federal Government can contribute to finding these solutions by helping to train State and local law enforcement officers, by conducting research into the causes of crime and how it can be stopped, and by providing funds to those on the front lines—the States and localities who fight crime.

The Law Enforcement Assistance Administration was intended to fulfill these functions—and more. We know now that that program was perhaps too ambitious, and occasionally infringed too much on the discretion of the States and localities. The Federal Government should provide support, but it should not arbitrarily dictate a single crime fighting plan to the States and localities.

H.R. 2175 has taken heed of the failures of LEAA. The Subcommittee on Crime studied carefully LEAA's successes and failures. Through this process we have culled certain programs that accomplished what they were supposed to—they were successful in reducing crime. H.R. 2175 has taken these programs, that have been proven successfull by independent observers, and has provided limited Federal funding for them on a matching basis. That funding level is necessarily limited by the realities of our economic situation, and by the realization that the States and localities must bear a major responsibility in this area.

H.R. 2175 also recognizes that the Federal Government cannot dictate terms to the States and localities. They must have greater discretion to decide what areas should be pursued in the search for solutions to the crime problem. They must have full authority to administer and run crime fighting programs. H.R. 2175, therefore, provides the States and localities with funds, but requires the States to match these funds, and eventually to shoulder the entire responsibility for programs that are worthy of continuing.

The programs that the Federal Government should fund, because they have been proven successful, are outlined in this carefully fashioned bill. It would be hard to argue that any of them is not worthwhile. How can we say "no" to programs to assist victims of and witnesses to crimes?

While H.R. 2175 lists specific programs which the Federal Government will fund, it does not close the door to other projects that the States and localities might in the future deem worthwhile or that have been proven by research to be worthy of implementation. The bill provides for funding for new and innovative projects that address critical crime issues.

H.R. 2175 also recognizes that situations may arise that States or localities are simply unable to handle by themselves. Federal assistance and expertise may be imperative. The two most salient examples of such unfortunate situations are the series of child murders in Atlanta, and the continuing plague of drugs and drug-related crime in south Florida. State and local law enforcement capacity in those places has been taxed beyond belief. The Federal Government must recognize its responsibility where State and local authorities have exhausted their resources to deal with the problem. Especially when Federal policies or the lack thereof may have caused the crisis. H.R. 2175, therefore, authorizes the Attorney General of the United States to coordinate Federal, State, and local response to a crime emergency, and provides the necessary funds to carry out the fight to counter that emergency.

H.R. 2175 recognizes that outmoded and overwhelming bureaucracy is not the answer to the crime problem. It streamlines the funding process, and funds only those programs that have been proven successful.

This bill is endorsed by major law enforcement and prosecutorial organizations, by citizens groups, by State and local government officials, and by criminal justice professionals. The subcommittee received favorable comments on the bill from elected officials at every level of government. They each recognize that it is imperative that governments on all levels join together to fight crime—that the crime problem is a problem that confronts us on a State, and local, and national level.

I urge you to support the fight against crime by casting your vote in favor of H.R. 2175.●

● Mr. SISISKY. Mr. Chairman, local crime fighting efforts are the first line of defense in protecting our people and our communities from the crimes which are most frequently committed. It may surprise some that Federal law enforcement officials only have jurisdiction over only 5 percent of all criminal activity. The burden then falls on State and local resources to control crime and make our towns and cities safe.

The Federal Government, in response to escalating crime rates, first provided assistance for local crime fighting efforts in 1965. It was then that the Law Enforcement Assistance Administration was created to meet this urgent need. LEAA produced many impressive programs and innovations, although the program did suffer from administrative problems.

The bill which we consider now does not attempt to revive the LEAA. Rather, it does what the Congress ought to be doing more often. It takes what we learned about the successes and the failures of a Federal program and uses it effectively. This bill sets goals which are managing and achievable. It trims and streamlines the administrative requirements which strangle many good, well-intentioned programs.

Law enforcement block grants created by this bill will provide direct financial assistance to States so that the States can decide for themselves where help is most needed. However, to insure that only proven local activities will be funded, States will be required to provide up to 50 percent in matching funds for particular programs.

Only anticrime programs in specific areas are eligible under this program. Again, relying on what we have learned from past LEAA efforts, the sponsors of this bill have selected only those programs which work and work well. Premier among these are these programs; community police anticrime programs, victim witness and juror assistance; career criminal identification

and prosecution; and antiburglary operations. I support an amendment which also added programs which help prevent crimes against elderly people, who are so often victimized.

Another portion of this bill provides for emergency assistance to localities which are experiencing an unusual crime situation. An example which comes to mind is the tragic series of murders of young children in Atlanta 2 years ago. Crime emergencies can create the same kind of crisis and strain on local resources that a natural emergency such as a hurricane or flood can. Federal resources will now be available to assist in those crisis situations.

Finally, and importantly, this legislation will authorize funding to provide a stipend to families of State and local police and firefighting personnel who are killed in the line of duty. Often when tragedy claims the life of an officer or firefighter in the line of duty, that person's family often suffers severe financial consequences in addition to the more obvious loss to the family. This financial assistance will help those families and I am proud to support this provision in the bill.

No one is arguing that this legislation will win the war on crime for us. But no one can deny that it will provide help wher it is most needed. Our State and local law enforcement officials do a tremendous job with a limited amount of resources. This bill will help them do an even better job in making the homes and businesses and streets of our country safer and more secure.

It is for all of those reasons that I have joined my colleagues in supporting this valuable piece of legislation.●

Mr. HUGHES. Mr. Chairman, I yield 2 minutes to the gentleman from Tennessee (Mr. BONER).

Mr. BONER of Tennessee. I thank the gentleman for yielding.

Mr. Chairman, I wish to take the floor for the purpose of having a colloquy between myself and the gentleman from New Jersey (Mr. HUGHES).

First of all, I rise in support of this bill, as I believe this legislation is meritorious.

I would like to ask the following questions, if I may:

First of all, does the bill include for the first time "fireman" in the definition of "public safety officer"?

Mr. HUGHES. If the gentleman will yield, first of all, I want to thank the gentleman for his support of the legislation and respond by saying that "fireman" has been included, and this is not the first time that "fireman" has been included by definition.

Mr. BONER of Tennessee. Emergency medical technicians, individuals who are employed by municipal governments, oftentimes are not classified as a "fireman," but would be hired under the fire department in many cases. Would they fall under the bill's definition of "public safety officer"?

Mr. HUGHES. If in fact they are not a fireman or classified as a fireman, they would not be covered under the terms of the bill.

Mr. BONER of Tennessee. Rescue squad employees, these would many times be volunteers. Are they included in the bill's definition of "public safety officer"?

Mr. HUGHES. By definition, rescue squad employees would not be included in the definition of a "fireman," although they do provide a vital public service, particularly volunteers, but volunteers and nonvolunteers. As the gentleman may know, a provision to include rescue squad employees was dropped in conference in a previous Congress, so they would not be included within the definition of "fireman."

Mr. BONER of Tennessee. I thank the gentleman.

Mr. SAWYER. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin (Mr. SENSENBRENNER), a member of the Subcommittee.

Mr. SENSENBRENNER. Mr. Chairman, as you and my other colleagues may recall, I have not been a strong supporter of the LEAA program. The LEAA experience should have taught us that throwing money at the problem of crime will not solve the problem. In 12 years, the Law Enforcement Assistance Administration expended over $7 billion, yet it had no appreciable impact on the crime rate. It would be unreasonable to expect better performance of the Office of Justice Assistance created by this bill.

The Justice Assistance Act before us today authorizes approximately $100 million more than the Justice Assistance funding in the President's budget proposal, but this is not my greatest concern. The Democratic budget recently adopted by the House, funds the Legal Services Corporation for fiscal year 1984 at $296 million out of existing law enforcement funding. We cannot afford the Legal Services Corporation, let alone the increase for the Office of Justice Assistance under this budget plan. As it currently stands, the Office of Justice Assistance must be funded out of the already scaled down DEA, FBI, and prison system. It seems clear to me that this is exactly the type of anticrime legislation that the criminal element prays for.

If this body is really serious about reducing crime, then it should engage in two types of legislation. First, it should amend the Federal law to make it a more effective weapon against the criminal element. Second, it should work to streamline Federal law enforcement resources. Stripping existing law enforcement agencies, like the DEA and FBI, to fund block grants for so-called innovative local programs is not the solution.

Late in the 97th Congress, the Reagan administration reversed its stance in opposition to the LEAA program. The President now endorses the Justice Assistance Act, but this support is conditioned on the adoption of a highly improved Federal structure, which replaces the current bureaucratic maze with a streamlined program under the direction of a new Assistant Attorney General. If this structure became part of the Justice Assistance Act, I would find the program streamlined, more cost effective, and much more palatable. But it is not, and this bill as it stands should be defeated.

□ 1430

Mr. SAWYER. Mr. Chairman, having no further requests for time, I yield back the balance of my time.

Mr. HUGHES. Mr. Chairman, how much time do I have remaining on this side?

The CHAIRMAN pro tempore. The gentleman from New Jersey (Mr. HUGHES) has 18 minutes remaining.

Mr. HUGHES. Mr. Chairman, I yield 4 minutes to the gentleman from Arizona (Mr. MCNULTY).

Mr. MCNULTY. Mr. Chairman, the Justice Assistance Act of 1983 is one that I fully support as a timely and appropriate step by the Federal Government to play a proper role in national efforts to suppress crime.

In the past, Federal efforts to assist State and local governments were unwisely oversold to the public, and all of this contributed to a widespread disappointment in the performance of the LEAA. Under our Constitution, though, local and State law enforcement officials have got to play the leading role in reducing crime, and the fact is that for the vast majority of this crime, the sheriffs and chiefs of police are the guys on the firing line.

Still, the Federal Government has a unique responsibility and power to play a meaningful role. Through legislation, we can direct the encouragement of creative programs that are solidly based on research findings, and we can insist that that research be carried forward. We can encourage the demonstration of workable programs across jurisdictional boundaries, and prove through these means that programs that work well in one location may, in fact, work well in another as well.

This, the Justice Assistance Act of 1983, would do. Certain programs are recognized in this legislation for block grant support and they have proven to be sufficiently fertile grounds for us to place Federal seed dollars in them.

Let me start with the community and neighborhood programs which are based on the good premise that active community participation can be coupled with intelligent police practices to

reduce crime. Examples where that has been proven true are Hartford, Conn., and Tucson, Ariz.

A program of intensive and integrated services for juveniles who commit serious offenses will be helped by this legislation.

Disrupting illegal commerce in stolen property and goods, the so-called sting operations, are an effective means of combating illicit commerce and their soaring profits. Southeastern Arizona has a special crime control problem stemming from the fact that the area is defined by its international boundary with Mexico. Smuggling is a chronic problem. Federal and State officials do maintain surveillance to the best of their ability, but it is inescapable that tempted by the lucrative profit margins in international smuggling, criminals will be attracted to that activity. Sting operations are an effective law enforcement tool.

These are but 3 of the 15 program areas for block grant funds under this law.

The people of America rightly expect lawmakers to respond to their concerns with the ever present and often rising crime problem. I am sorry the administration allowed a similar bill to die through a pocket veto last year, but by its prompt action now, this Congress can limit the damage to a 6-month delay, provided we act promptly.

It is time for the body to pass this legislation, and I am encouraged in my belief that it will do so.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. McNULTY. I will, indeed, yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, I just want to commend the gentleman from Arizona for making a very fine statement. I think he really has caught the tenor of what this committee endeavored to do in committee in crafting a bill that would be targeted to borrow the success stories from LEAA that would, however, provide the Federal leadership that the gentleman envisions that we should be providing for local law enforcement agencies.

I just want to thank the gentleman for making a very fine statement.

Mr. McNULTY. It was my pleasure.

Mr. HUGHES. Mr. Chairman, I yield 3 minutes to the gentleman from Puerto Rico (Mr. CORRADA).

(Mr. CORRADA asked and was given permission to revise and extend his remarks.)

Mr. SAWYER. Mr. Chairman, I wonder if, at this time, I could just for the moment recapture the time that I yielded back until I see how this debate proceeds? May I do that?

The CHAIRMAN pro tempore. The gentleman from Michigan (Mr. SAWYER) may recapture his time. Does the gentleman prefer to do so before the statement by the gentleman from Puerto Rico (Mr. CORRADA)?

Mr. SAWYER. No, Mr. Chairman, I do not want to use it right now. I just would like to recapture the time.

Mr. CORRADA. I thank the chairman of the subcommittee for yielding this time to me.

Mr. Chairman, I rise in strong support of H.R. 2175, a bill devised to help States and localities in their war against the increasing menace of crime in our Nation.

The bill calls for the creation of an Office of Justice Assistance (OJA), based in the Justice Department, to substitute the now defunct Law Enforcement Assistance Administration. The OJA would administer a grant program with an authorization of $170 million per year for 4 years providing 50 percent matching funds for some kinds of State and local anticrime efforts and a 75- to 25-percent match for innovative programs. Eighty percent of the grant funds woud be distributed based on population and index crimes. The balance would fund a discretionary program with no match requirement for training and technical assistance, for national and regional initiatives and for emergency law enforcement assistance.

Mr. Chairman, we can do no less than support this crime fighting bill. Notwithstanding my personal view that this bill does not go far enough to aid State and local governments in a meaningful way, I believe it is a positive step toward forging a new sorely needed partnership between the States and the Federal Government in the area of criminal justice.

The alarming increase in all types of crime which is sweeping our Nation demands our careful consideration of new initiatives and forceful commitments. This plague threatens to destory our peace. It is ironic that criminals freely roam the streets of our Nation while honest and decent people fear for their lives and personal property even while staying at home. Crime will continue to be on the increase until we decide to face efficiently the challenge and put more resources at the disposal of the States.

Puerto Rico, for instance, started a crusade against crime a few years ago. With the help of LEAA's funding and increased layouts for crime prevention, Puerto Rico which in 1973 was ranked 8th in the Nation in violent crime, dropped to 11th place in 1975 and to 22d in 1979. Nevertheless, we are far from safeguarding our streets. Criminal elements frighten our citizens on a day-to-day basis to an unbearable degree.

The administration has recently embarked in its own initiative against organized crime and drug trafficking by establishing 12 new task forces across the Nation similar to the one in Florida. Time is ripe to place additional resources at the disposal of the States to overwhelm these vicious acts.

The Justice Assistance Act unfortunately failed to become law during the last Congress notwithstanding the modest sum of moneys requested. We cannot sacrifice another year of bloodshed and unjustified suffering by our people in exchange of a few dollars savings.

The time to act on behalf of our past and future victims of crimes is long overdue. Let us not eternize this agony: Let us free our Nation from crime so that our children can enjoy the America and Puerto Rico our ancestors enjoyed.

Mr. SAWYER. Mr. Chairman, I yield myself 1 minute just for the purpose of correcting in part, or in a sense, an observation made by the gentleman from Arizona (Mr. McNULTY).

Mr. Chairman, I would not want the record to carry the implication that the administration, after having in the last Congress substantially agreed to a Justice Assistance Act, deliberately subjected it to a pocket veto. The way that worked out was that one of the relatively uncontroversial bills that we passed today; namely, the aftercare bill, was sent over the Senate where it was easily passed also, as was justice assistance, and then the Senate, under their rules of procedure, which are much different than ours, in effect tacked onto that little bill what amounted to a whole omnibus crime bill, including many acts, some of which we had never seen here in the House, and one of which the administration had very strong objection to, a Drug Coordinator Act, which we began calling a drug czar bill, which was just 1 of maybe 8 or 10 bills all put together in one.

Unfortunately, justice assistance was one part of that major bill. Of course, under the Presidential veto powers, there are no line-item vetoes; one must veto an entire bill or not at all. The Justice Department apparently found that one so-called crime czar bill that was part of that big package sufficiently objectionable that it lost the entire package. So there was no real reneging on justice assistance. It was merely an innocent victim of another veto.

□ 1440

Mr. HUGHES. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, I just wish to express my support for what the distinguished gentleman from Michigan (Mr. SAWYER) has indicated. The reason that this bill went down the drain is that it was tacked on with the fairly controversial drug czar provision, and it had nothing to do with the substance of this legislation.

I also want to respond just briefly to a couple of suggestions made by our colleague, the gentleman from Wisconsin (Mr. SENSENBRENNER) who suggested that he would find the bill much more palatable if in fact the structure of the National Institute of Justice and the Bureau of Justice Statistics were different than what he finds in the bill. I might say that my colleague, the gentleman from Wisconsin, opposed the bill in concept in the last Congress when it did not have those provisions in it. My colleague has opposed the concept, and I suspect that he would not support the bill even if it did not carry NIJ and BJS authorizations in this Congress. I understand that, and I respect it. We just have a difference of opinion.

It just seems to me, however, that it is an important initiative. If Members believe that there is a role for the Federal Government in providing new techniques and demonstration programs, then they would support this bill.

It is interesting that there is no initiative of which I am aware anywhere in the country that would provide for this type of an innovative approach to solving our prime problems throughout the country. Most local jurisdictions are up to their eyeballs in the crime problem, and they are unwilling to try new things. A lot of folks have heard about career criminals and sting operations. They have seen sting operations in the movies and on television. However, surprisingly, these programs are still not institutionalized. There are still many jurisdictions around the country that do not use these old LEAA programs, and the beauty of this program is that we are trying to encourage law enforcement agencies throughout the country to try programs that have been successful.

The second part of it, which does not exist anywhere else in this country, is to provide moneys for demonstration programs to try to take the research coming out of the National Institute of Justice and try those new ideas in the marketplace. We have got to stay abreast of the changes that are taking place in this country in the crime area as well as any other area, and without this type of program there is no such initiative.

If we would ask any law enforcement agency in the country what the No. 1 program that the Federal Government has would be that they are supporting, I would venture to say that they would say it is the Justice Assistance Act. They are solidly behind this bill. the National District Attorneys Association, the National Association of Attorneys General, the International Chiefs of Police, and any other law enforcement agency that we talk to supports this initiative because they view this as really the only hope they have of putting in place crime-fighting initiatives that will help them at the local level.

Mr. Chairman, I urge my colleagues, for that reason, to support this bill. As my distinguished colleague, the gentleman from Michigan (Mr. SAWYER), has indicated, it has the support of the administration. It is bipartisan in nature, and it is a tightly written bill.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I am happy to yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Chairman, I might just say, consistent with the observation that the gentleman has made, that when we get State and local prosecutorial and law enforcement authorities strongly supporting this bill, we have to recognize that those are the front-line soldiers. It is not the Federal law enforcement agencies which handle more of the crimes of a white collar nature—and that is only maybe 10 percent of all crime—but these are 97 percent of the crime-fighting agencies, where the crime fighting is going on, and it is exactly these State and local people who are strongly supporting this bill and urging its passage.

Sitting here on the Federal level, I think we have got to pay double attention to the foot soldiers who are out there facing these violent criminals everyday, and they need all the help they can get.

Mr. HUGHES. I thank the gentleman, and I quite agree with him.

I do not know who in the world would be opposed to doing for the law enforcement what we do for communities that suffer the effects of mudslides and tornadoes. We already have a mechanism to respond at the Federal level to an area of the country that has a problem with a tornado that does a lot of damage. Who would oppose a piece of legislation that says, "Let's do the same thing in a crime emergency"?

That is what this bill does in title II. It provides a mechanism for the Federal Government to respond to epidemics like the Atlanta child murders where the Federal Government does have a role to play. President Reagan scrounged around for about 2 months before he finally found enough money so we could respond. It is disgraceful that we do not have that kind of a program.

Mr. SAWYER. Mr. Chairman, will the gentleman yield further?

Mr. HUGHES. I yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Chairman, the gentleman mentioned the Atlanta situation, but there was another interesting thing that developed in our subcommittee hearings. When the Mount St. Helens eruption or explosion occurred, it disabled local and State law enforcement vehicles over an area of many hundred square miles. It totally disabled them so they were unable to respond to law enforcement efforts. Fire engines and everything else were tied up, and it created as much a law enforcement emergency as mudslides or volcanoes or other things we could mention.

Those are the kinds of things, too, where we would now have a fund from which to come in and provide some emergency Federal assistance to the law enforcement aspects of some of those problems.

Mr. HUGHES. Mr. Chairman, the gentleman from Michigan (Mr. SAWYER) is absolutely correct, and I thank him for his contribution.

Mr. SAWYER. Mr. Chairman, I yield back the balance of my time, having no further requests for time.

Mr. HUGHES. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN pro tempore. Pursuant to the rule, the committee amendment in the nature of a substitute recommended by the Committee on the Judiciary now printed in the reported bill shall be considered as an original bill for the purpose of amendment, and each title shall be considered as having been read.

The Clerk will designate title I.

The text of title I of the bill is as follows:

H.R. 2175

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—AMENDMENTS TO OMNIBUS CRIME CONTROL AND SAFE STREETS ACT OF 1968

SHORT TITLE

SEC. 101. This Act may be cited as the "Justice Assistance Act of 1983".

DECLARATION AND PURPOSE

SEC. 102. (a) Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-2799) is amended in the matter preceding part A by striking out the declaration and purpose.

(b) The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 is amended by striking out "Declaration and purpose.".

OFFICE OF JUSTICE ASSISTANCE

SEC. 103. (a) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended in the heading to such part by striking out "LAW ENFORCEMENT ASSISTANCE ADMINISTRATION" and inserting in lieu thereof "OFFICE OF JUSTICE ASSISTANCE".

(b) Section 101 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711) is amended to read as follows:

"ESTABLISHMENT OF OFFICE OF JUSTICE ASSISTANCE

"SEC. 101. There is hereby established within the Department of Justice under the general authority of the Attorney General an Office of Justice Assistance (hereinafter referred to as the "Office"). The Office shall be under the direction of a Director, who shall be appointed by the President, by

and with the advice and consent of the Senate, and such other Deputy Directors as may be designated by the Director. The Director shall have final authority over all grants, cooperative agreements, and contracts awarded by the Office.".

(c) Section 102 of part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3712) is amended to read as follows:

"DUTIES AND FUNCTIONS OF DIRECTOR

"SEC. 102. The Director shall—

"(1) provide funds to eligible States pursuant to part D;

"(2) establish national priorities for programs in accordance with part E, inform States, units of local government, and private nonprofit organizations of such priorities, and award and allocate funds and technical assistance to such organizations according to the criteria and on the terms and conditions determined by the Director to be consistent with part E;

"(3) publish and disseminate information on the condition and progress of the criminal justice system;

"(4) establish and carry on a specific and continuing program of cooperation with the States and units of local government designed to encourage and promote consultation and coordination concerning decisions made by the Office affecting State and local criminal justice priorities;

"(5) cooperate with and render technical assistance to States, units of local government, and other public and private organizations or international agencies involved in criminal justice activities;

"(6) cooperate with and render technical assistance to States, units of local government, and other public and private organizations or agencies involved in victim-witness assistance activities and the postarrest identification and prosecution of career criminals;

"(7) provide funds and technical assistance to eligible jurisdictions under this title for the development of operational information and telecommunications systems;

"(8) exercise the powers and functions set out in part G; and

"(9) exercise such other powers and functions as may be vested in the Director pursuant to this title.".

(d) Part A of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3711-3713) is amended by striking out section 103.

NATIONAL INSTITUTE OF JUSTICE

SEC. 104. (a) Section 202 of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3722) is amended—

(1) in subsection (c)—

(A) in paragraph (2)(A) by striking out ", including programs authorized by section 103 of this title", and

(B) in paragraph (10)—

(i) by striking out "national priority grants under part E and", and

(ii) by striking out "part F" and inserting in lieu thereof "part E", and

(2) in subsection (d)(5) by striking out "part H" and inserting in lieu thereof "part G".

(b) Section 204(a) of part B of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3724(a)) is amended by striking out "The Administrator of the Law Enforcement Assistance Administration, the Administrator of the Office of Juvenile Justice and Delinquency Prevention," and inserting in lieu thereof "The Director of the Office of Justice Assistance,".

BUREAU OF JUSTICE STATISTICS

SEC. 105. Section 304(a) of part C of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3734(a)) is amended by striking out "The Administrator of the Law Enforcement Assistance Administration, the Administrator of the Office of Juvenile Justice and Delinquency Prevention," and inserting in lieu thereof "The Director of the Office of Justice Assistance,".

FORMULA GRANTS

SEC. 106. (a) Sections 401, 402, 403, 404, and 405 of part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741-3745) are amended to read as follows:

"DESCRIPTION OF PROGRAM

"SEC. 401. (a) It is the purpose of this part to assist States and units of local government in carrying out specific programs which offer a high probability of improving the functioning of the criminal justice system. The Office is authorized to make grants under this part to States for the purpose of—

"(1) providing community and neighborhood programs that enable citizens and police to undertake initiatives to prevent and control neighborhood crime;

"(2) disrupting illicit commerce in stolen goods and property;

"(3) combating arson;

"(4) effectively investigating and bringing to trial white-collar crime, organized crime, public corruption crimes, and fraud against the Government;

"(5) identifying and processing within the criminal justice system persons (including juvenile offenders) with a history of serious criminal conduct;

"(6) developing and implementing programs which provide assistance to jurors and witnesses, and assistance (other than compensation) to victims of crimes;

"(7) providing alternatives to pretrial detention, jail, and prison for persons who pose no danger to the community;

"(8) providing programs which identify and meet the needs of drug-dependent offenders;

"(9) providing programs which alleviate prison and jail overcrowding and programs which identify existing State and Federal buildings suitable for prison use;

"(10) providing training, management, and technical assistance to criminal justice personnel and determining appropriate prosecutorial and judicial personnel needs;

"(11) providing prison industry projects designed to place inmates in a realistic working and training environment in which they will be enabled to acquire marketable skills and to make financial payments for restitution to their victims, for support of their own families, and for support of themselves in the institution;

"(12) providing for operational information systems which improve the effectiveness of criminal justice agencies;

"(13) providing programs of the same types as programs described in section 501(4) which the Director establishes, under section 503(a), as discretionary programs for financial assistance under part E and which have not been certified under paragraph (14);

"(14) providing programs of the same types as programs for which financial assistance was provided under paragraph (13) or section 501(4) and which were certified by the Director, primarily on the basis of any available objective, empirical, or statistical information or evaluation, as having proved a success; and

"(15) providing programs which address the problem of serious offenses committed by juveniles.

"(b)(1) For any fiscal year ending September 30, 1983, the Federal portion of any grant made under this part shall be 50 per centum of the cost of programs and projects specified in the application for such grant, except that—

"(A) in the case of funds distributed for a program or project described in subsection (a)(13), of the Federal portion shall be 75 per centum of such cost; and

"(B) in the case of funds distributed to an Indian tribe which performs law enforcement functions (as determined by the Secretary of the Interior) for any program or project described in subsection (a), the Federal portion shall be 100 per centum of such cost.

"(2) The non-Federal portion of the cost of such program or project shall be in cash.

"(c) No funds may be given under this title to a grant recipient for a program or project for which funds have been given under this title for 4 years (in the aggregate), including any period occurring before the effective date of this subsection.

"ELIGIBILITY

"SEC. 402. The Office is authorized to make financial assistance under this part available to a State to enable it to carry out all or a substantial part of a program or project submitted and approved in accordance with the provisions of this part.

"APPLICATIONS

"SEC. 403. (a) No grant may be made by the Office to a State, or by a State to an eligible recipient pursuant to part D, unless the application for such grant sets forth criminal justice programs covering a two-year period which meet the objectives of section 401 of this title, designates which objective specified in section 401(a) each such program is intended to achieve, and identifies the State agency or unit of local government which will implement each such program. This application must be amended annually if new programs are to be added to the application or if the programs contained in the original application are not implemented. The application must include—

"(1) an assurance that following the first fiscal year covered by an application and each fiscal year thereafter, the application shall submit to the Office or to the State, as the case may be—

"(A) a performance report concerning the activities carried out pursuant to this title; and

"(B) an assessment by the applicant of the impact of those activities on the objectives of this title and the needs and objectives identified in the applicant's statement;

"(2) a certification that Federal funds made available under this title will not be used to supplant State or local funds, but will be used to increase the amounts of such funds that would, in the absence of Federal funds, be made available for criminal justice activities;

"(3) an assurance that fund accounting, auditing, monitoring, and such evaluation procedures as may be necessary to keep such records as the Office shall prescribe shall be provided to assure fiscal control, proper management, and efficient disbursement of funds received under this title;

"(4) an assurance that the applicant shall maintain such data and information and submit such reports in such form, at such times, and containing such data and information as the Office may reasonably require to administer other provisions of this title;

"(5) a certification that its programs meet all the requirements of this section, that all the information contained in the application is correct, that there has been appropriate coordination with affected agencies, and that the applicant will comply with all provisions of this title and all other applicable Federal laws (such certification shall be made in a form acceptable to the Office and shall be executed by the chief executive or other officer of the applicant qualified under regulations promulgated by the Office); and

"(6) if the applicant is a State, an assurance that not more than 10 per centum of the aggregate amount of funds received by a State under this part for a fiscal year will be distributed for programs and projects designated as intended to achieve the objective specified in section 401(a)(13).

"(b) The chief executive officer of a State shall submit the State application described in subsection (a), and any amendment to such application, to the State legislature while in session, or to a body designated to act in behalf of the State legislature if the State legislature is not then in session, for review. For purposes of section 404, such application or amendment shall be deemed to be reviewed if the State legislature or such body does not review such application or amendment within the ninety-day period beginning on the day it is so submitted.

"REVIEW OF APPLICATIONS

"SEC. 404. (a) The Office shall provide financial assistance to each State applicant under this part to carry out the programs or projects submitted by such applicant upon determining that—

"(1) the application or amendment thereof is consistent with the requirements of this title;

"(2) the application or amendment thereof was made public prior to submission to the Office and an opportunity to comment thereon was provided to citizens and neighborhood and community groups;

"(3) prior to the approval of the application or amendment thereof the Office has made an affirmative finding in writing that the program or project is likely to contribute effectively to the achievement of the objectives of section 401 of this title; and

"(4) prior to the approval of the application or amendment thereof the Office has made an affirmative finding in writing that the program or project has been reviewed in accordance with section 403(b).

Each application or amendment made and submitted for approval to the Office pursuant to section 403 of this title shall be deemed approved, in whole or in part, by the Office within ninety days after first received unless the Office informs the applicant of specific reasons for disapproval or the application or amendment has not been reviewed in accordance with section 403(b).

"(b) The Office shall suspend funding for an approved application in whole or in part if such application contains a program or project which has failed to conform to the requirements or statutory objectives of this Act as evidenced by—

"(1) the annual performance reports submitted to the Office by the applicant pursuant to section 701(b) of this title;

"(2) failure of the applicant to submit annual performance reports pursuant to section 403 of this title;

"(3) evaluations conducted pursuant to section 701(b); and

"(4) evaluations and other information provided by the National Institute of Justice.

The Office may make appropriate adjustments in the amounts of grants in accordance with its findings pursuant to this subsection.

"(c) Grant funds awarded under part D shall not be used for—

"(1) the purchase of equipment or hardware, or the payment of personnel costs, unless the cost of such purchases and payments is incurred as an incidental and necessary part of a program under section 401(a);

"(2) programs which have as their primary purpose general salary payments for employees or classes of employees within an eligible jurisdiction, except for the compensation of personnel for time engaged in conducting or undergoing training programs or the compensation of personnel engaged in research, development, demonstration, or short-term programs;

"(3) construction projects; or

"(4) programs or projects which, based upon evaluations by the National Institute of Justice, Office of Justice Assistance, Bureau of Justice Statistics, State or local agencies, and other public or private organizations, have been demonstrated to offer a low probability of improving the functioning of the criminal justice system. Such programs must be formally identified by a notice in the Federal Register after opportunity for comment.

"(d) The Office shall not finally disapprove any application submitted to the Director under this part, or any amendments thereof, without first affording the applicant reasonable notice and opportunity for a hearing and appeal pursuant to section 702 of this title.

"ALLOCATION AND DISTRIBUTION OF FUNDS

"SEC. 405. (a) Of the total amount appropriated for this part and part E in any fiscal year, 80 per centum shall be set aside for this part and allocated to States as follows:

"(1) One-fourth of 1 per centum of the amount set aside for this part, but not to exceed $250,000, shall be allocated to each of the participating States.

"(2)(A) Of 50 per centum of any funds remaining after the allocation under paragraph (1) is made, there shall be allocated to each State an amount which bears the same ratio to the amount of remaining funds described in this subparagraph as the population of such State bears to the population of all the States.

"(B) Of 50 per centum of any funds remaining after the allocation under paragraph (1) is made, there shall be allocated to each State an amount which bears the same ratio to the amount of remaining funds described in this subparagraph as the number of part I offenses, in the uniform crime reports, reported to the Federal Bureau of Investigation by such State in the preceding fiscal year bears to the aggregate number of part I offenses, in the uniform crime reports, reported to the Federal Bureau of Investigation in such preceding fiscal year by all the States.

"(b)(1) Each State which receives funds under subsection (a) in a fiscal year shall distribute among units of local government, or combinations of units of local government, in such State for the purposes specified in section 401(a) that portion of such funds which bears the same ratio to the aggregate amount of such funds as the amount of funds expended by all units of local government for law enforcement in the preceding fiscal year bears to the aggregate amount of funds expended by the State and all units of local government in such State for law enforcement in such preceding fiscal year.

"(2) Any funds not distributed to units of local government under paragraph (1) shall be available for expenditure by the State involved.

"(3) For purposes of determining the distribution of funds under paragraph (1), the most accurate and complete data available for the fiscal year involved shall be used. If data for such fiscal year are not available, then the most accurate and complete data available for the most recent fiscal year preceding such fiscal year shall be used.

"(c) No funds allocated to a State under subsection (a) or received by a State for distribution under subsection (b) may be distributed by the Director or by the State involved for any program other than a program contained in an approved application.

"(d) If the Office determines, on the basis of information available to it during any fiscal year, that a portion of the funds allocated to a State for that fiscal year will not be required or that a State will be unable to qualify or receive funds under this part, then such portion shall be reallocated to the other participating States.".

(b) Part D of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741-3745) is amended by adding at the end thereof the following new section:

"STATE OFFICE

"SEC. 406. (a) Each participating State shall establish or designate by statute a State office for purposes of—

"(1) preparing an application to obtain funds under this part; and

"(2) administering funds received from the Office of Justice Assistance and its predecessor agency, including receipt, review, processing, monitoring, progress and financial report review, technical assistance, grant adjustments, accounting, auditing, and fund disbursements.

"(b) An office or agency performing other functions within the executive branch of a State may be designated to carry out the functions specified in subsection (a).".

NATIONAL PRIORITY GRANTS

SEC. 107. Title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701 et seq.) is amended by striking out part E.

DISCRETIONARY GRANTS

SEC. 108. (a) Sections 601, 602, and 603 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3762) are amended to read as follows:

"PURPOSE

"SEC. 501. The purpose of this part is to provide additional Federal financial assistance to States, units of local government, combinations of such units, and private nonprofit organizations for purposes of—

"(1) undertaking educational and training programs for criminal justice personnel;

"(2) providing technical assistance to States and local units of governments;

"(3) undertaking projects which are national or multi-State in scope and which address the purposes specified in section 401; and

"(4) providing financial assistance to States and units of local government for demonstration programs which, in view of previous research or experience, are likely to be a success in more than one jurisdiction and are not likely to be funded with moneys from other sources.

"PERCENTAGE OF APPROPRIATION FOR DISCRETIONARY GRANT PROGRAM

"SEC. 502. Of the total amount appropriated for part D and this part in any fiscal year, 20 per centum shall be reserved and set aside for this part in a special discretionary fund for use by the Office in carrying out the purposes specified in section 501. Grants under this part may be made for amounts up to 100 per centum of the costs of the programs or projects contained in the approved application.

"PROCEDURE FOR ESTABLISHING DISCRETIONARY PROGRAMS

"SEC. 503. (a) The Director of the Office of Justice Assistance shall periodically establish discretionary programs and projects for financial assistance under this part. Such programs and projects shall be considered priorities for a period of time not to exceed three years from the time of such determination.

"(b) Such Director shall annually request the National Institute of Justice, the Bureau of Justice Statistics, the Office of Justice Assistance, State and local governments, and other appropriate public and private agencies to suggest discretionary programs and projects. Such Director shall then, pursuant to regulations, annually publish the proposed priorities pursuant to this part and invite and encourage public comment concerning such priorities. Priorities shall not be established or modified until such Director has provided at least sixty-days advance notice for such public comment and such Director shall encourage and invite recommendations and opinion concerning such priorities from appropriate agencies and officials of State and units of local government. After considering any comments submitted during such period of time and after consultation with appropriate agencies and officials of State and units of local government, such Director shall determine whether existing established priorities should be modified. Such Director shall publish in the Federal Register the priorities established pursuant to this part, as amended by the Justice Assistance Act of 1983, prior to the beginning of fiscal year 1984 and each fiscal year thereafter for which appropriations will be available to carry out the program".

(b) Section 604 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3764) is amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(c) Section 605 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C 3765) is amended to read as follows:

"CRITERIA FOR AWARD

"SEC. 505. The Office shall, in its discretion and according to the criteria and on the terms and conditions it determines consistent with this part, provide financial assistance to those programs or projects which most clearly satisfy the priorities established under section 503. In providing such assistance pursuant to this part, the Office shall consider whether certain segments and components of the criminal justice system have received a disproportionate allocation of financial aid and assistance pursuant to other parts of this title, and, if such a finding is made, shall assure the funding of such other segments and components of the criminal justice system as to correct inequities resulting from such disproportionate allocations. In distributing funds under this part among the States, the Office shall assure that the problems and needs of all of the States are taken into account and shall fund some programs and projects responsive to each State.".

(d) Section 606 of part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C 3766) is amended to read as follows:

"PERIOD FOR AWARD

"SEC. 506. The Office may provide financial aid and assistance to programs or projects under this part for a period not to exceed three years. Grants made pursuant to this part may be extended or renewed by the Office for an additional period of up to two years if—

"(1) an evaluation of the program or project indicates that it has been effective in achieving the stated goals or offers the potential for improving the functioning of the criminal justice system; and

"(2) the State, unit of local government, or combination thereof and private nonprofit organizations within which the program or project has been conducted agree to provide at least one-half of the total cost of such program or project from any source of funds, including Federal grants, available to the eligible jurisdiction.".

(e) The heading for part F of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3766) is amended by striking out "Part F" and inserting in lieu thereof "Part E".

(f) Part E of title I, as so redesignated, of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3761-3766) is amended by redesignating section 604 as section 504.

TRAINING AND MANPOWER DEVELOPMENT

SEC. 109. (a) Part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3771-3775) is amended—

(1) by striking out sections 701, 702, and 703,

(2) in section 705 by striking out "Administration" each place it appears and inserting in lieu thereof "Office", and

(3) by redesignating sections 704 and 705 as sections 601 and 602, respectively.

(b) The heading for part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3771-3775) is amended by striking out "PART G" and inserting in lieu thereof "PART F".

ADMINISTRATIVE PROVISIONS

SEC. 110. (a) Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781 et seq.) is amended by striking out section 801.

(b) Sections 802 and 803 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3782) are amended to read as follows:

"CONSULTATION; ESTABLISHMENT OF RULES AND REGULATIONS

"SEC. 701. (a) The Office of Justice Assistance, the Office of Juvenile Justice and Delinquency Prevention, the Bureau of Justice Statistics, and the National Institute of Justice are authorized, after appropriate consultation with representatives of States and units of local government, to establish such rules, regulations, and procedures as are necessary to the exercise of their functions, and as are consistent with the stated purpose of this title.

"(b) The Office of Justice Assistance shall, after consultation with the National Institute of Justice, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, State and local governments, and the appropriate public and private agencies, establish such rules and regulations as are necessary to assure the continuing evaluation of selected programs or projects conducted pursuant to parts D and E, in order to determine—

"(1) whether such programs or projects have achieved the performance goals stated in the original application, are of proven effectiveness, have a record of proven success, or offer a high probability of improving the criminal justice system;

"(2) whether such programs or projects have contributed or are likely to contribute to the improvement of the criminal justice system and the reduction and prevention of crime;

"(3) their cost in relation to their effectiveness in achieving stated goals;

"(4) their impact on communities and participants; and

"(5) their implication for related programs.

In conducting evaluations described in this subsection, the Office of Justice Assistance shall, when practical, compare the effectiveness of programs conducted by similar applicants and different applicants. The Office of Justice Assistance shall also require applicants under part D to submit an annual performance report concerning activities carried out pursuant to part D together with an assessment by the applicant of the effectiveness of those activities in achieving the objectives of section 401 of this title and the relationships of those activities to the needs and objectives specified by the applicant in the application submitted pursuant to section 403 of this title. The Office shall suspend funding for an approved application under part D if an applicant fails to submit such an annual performance report.

"(c) The procedures established to implement the provisions of this title shall minimize paperwork and prevent needless duplication and unnecessary delays in award and expenditure of funds at all levels of government.

"NOTICE AND HEARING ON DENIAL OR TERMINATION OF GRANT

"SEC 702. (a) Whenever, after reasonable notice and opportunity for a hearing on the record in accordance with section 554 of title 5, United States Code, the National Institute of Justice, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, or the Office of Justice Assistance finds that a recipient of their respective assistance under this title has failed to comply substantially with any provision of this title, any regulations or guidelines promulgated under this title, or any application submitted in accordance with the provisions of this title, or the provisions of any other applicable Federal Act, they, until satisfied that there is not longer any such failure to comply, shall—

"(1) terminate payments to the recipient under this title;

"(2) reduce payments to the recipient under this title by an amount equal to the amount of such payments which were not expended in accordance with this title; or

"(3) limit the availability of payments under this title to programs, projects, or ac-

tivities not affected by such failure to comply.

"(b) If a State grant application filed under part D or any grant application filed under any other part of this title has been rejected or a State applicant under part D or an applicant under any other part of this title has been denied a grant or has had a grant, or any portion of a grant, discontinued, terminated, or has been given a grant in a lesser amount that such applicant believes appropriate under the provisions of this title, the National Institute of Justice, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, or the Office of Justice Assistance, as appropriate, shall notify the applicant or grantee of its action and set forth the reason for the action taken. Whenever such an applicant or grantee requests a hearing, the National Institute of Justice, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, the Office of Justice Assistance, or any authorized officer thereof, is authorized and directed to hold such hearings or investigations, including hearings on the record in accordance with section 554 of title 5, United States Code, at such times and places as necessary, following appropriate and adequate notice to such applicant. The findings of fact and determinations made with respect thereto shall be final and conclusive, except as otherwise provided herein.

"(c) If such recipient is dissatisfied with the findings and determinations of the Office of Justice Assistance, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, or the National Institute of Justice, following notice and hearing provided for in subsection (a), a request may be made for rehearing, under such regulations and procedures as such Office, Bureau, or Institute, as the case may be, may establish, and such recipient shall be afforded an opportunity to present such additional information as may be deemed appropriate and pertinent to the matter involved.".

(c) Section 804 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3784) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(d) Section 805 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3785) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics, the Law Enforcement Assistance Administration," each place it appears and inserting in lieu thereof "Office of Justice Assistance,",

(2) by inserting "the Office of Juvenile Justice and Delinquency Prevention," before "or the National Institute of Justice" each place it appears,

(3) in subsection (a) by striking out "section 803, 804, or 815(c)(2)(G)" and inserting in lieu thereof "section 702, 703, or 712(c)(2)(G)", and

(4) in subsection (b) by inserting "the Office of Juvenile Justice and Delinquency Prevention" before "or the Bureau of Justice Statistics".

(e) Section 806 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3786) is amended to read as follows:

"DELEGATION OF FUNCTIONS

"SEC. 705. The Attorney General, the National Institute of Justice, the Bureau of Justice Statistics, the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance may delegate to any of their respective officers or employees such functions under this title as they deem appropriate.".

(f) Section 807 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3787) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics,", and

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(g) Sections 810 and 811 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3788-3789) are each amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics," each place it appears,

(2) by striking out ", and the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, and the Office of Justice Assistance".

(h) Section 812 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789a) is amended by striking out "Director of the Office of Justice Assistance, Research, and Statistics, the Administrator of the Law Enforcement Assistance Administration," and inserting in lieu thereof "Director of the Office of Justice Assistance, the Administrator of the Office of Juvenile Justice and Delinquency Prevention,".

(i) Section 813 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789b) is amended in subsections (a) and (b)—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(j) Section 814 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789c) is amended—

(1) in subsections (a) and (b)—

(A) by striking out "Office of Justice Assistance, Research, and Statistics," each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(B) by striking out "Law Enforcement Assistance Administration" each place it appears and inserting in lieu thereof "Office of Juvenile Assistance", and

(2) by amending subsection (c) to read as follows:

"(c) The limitation specified in the joint resolution entitled 'Joint resolution to prohibit expenditure of any moneys for housing, feeding, or transporting conventions or meetings', approved February 2, 1935 (31 U.S.C. 551), shall not apply with respect to the use of funds appropriated to carry out this title.".

(k) Section 815 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789d) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance", and

(2) in subsection (b) by striking out "or the Law Enforcement Assistance Administration" and inserting in lieu thereof "the Office of Juvenile Justice and Delinquency Prevention, or the Office of Justice Assistance".

(l) Section 816 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789e) is amended to read as follows:

"REPORT TO PRESIDENT AND CONGRESS

"SEC. 816. Not later than April 1 of each year, the Director of the Office of Justice Assistance, the Director of the Bureau of Justice Statistics, and the Director of the National Institute of Justice shall each submit a report to the President and to the Speaker of the House of Representatives and the President of the Senate, on their activities under this title during the fiscal year next preceding such date.".

(m) Section 817 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789f) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance",

(2) in subsection (d) by striking out "section 815(c)" each place it appears and inserting in lieu thereof "section 712(c)", and

(3) in subsection (f)—

(A) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(B) by striking out "Administrator" each place it appears and inserting in lieu thereof "Director".

(n) Section 818 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789g) is amended by striking out "Office of Justice Assistance, Research, and Statistics" each place it appears and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance together".

(o) Section 819 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789h) is amended—

(1) by striking out "Office of Justice Assistance, Research, and Statistics," and inserting in lieu thereof "Office of Juvenile Justice and Delinquency Prevention,", and

(2) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(p) Section 820 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789i) is amended—

(1) by striking out subsection (a), and

(2) in subsection (b) by striking out "(b)".

(q) Section 823 of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3789l) is amended by striking out "Administration" and inserting in lieu thereof "Office".

(r) Part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by striking out section 826.

(s) The heading for part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by striking out "Part H" and inserting in lieu thereof "Part G".

(t) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by redesignating sections 804, 805,

807, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, and 827 as sections 703, 704, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, and 723, respectively.

(u) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by striking out sections 808 and 809.

(v) Part G, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3781-3789o) is amended by adding at the end thereof the following new section.

"STAFF SUPPORT; COORDINATION OF ACTIVITIES

"SEC. 724. The Office of Justice Assistance may directly provide staff support to, and assist in coordinating the activities of, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Juvenile Justice and Delinquency Prevention.".

DEFINITIONS

SEC. 111. (a) Section 901 of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(b) Section 901(a) of part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791(a)) is amended—

(1) in paragraph (4)—

(A) by inserting "renovation, repairs, remodeling," after "acquisition,", and

(B) by striking out ", but does not include renovation, repairs, or remodeling",

(2) by striking out paragraphs (7), (8), and (13), and

(3) by redesignating paragraphs (9), (10), (11), (12), (14), (15), (16), (17), (18), (19), (20), and (21) as paragraphs (7), (8), (9), (10), (11), (12), (13), (14), (15), (16), (17), and (18), respectively.

(c) The heading for part I of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by striking out "PART I" and inserting in lieu thereof "PART H".

(d) Part H, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3791) is amended by redesignating section 901 as section 801.

FUNDING

SEC. 112. (a) Section 1001 of part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 901. (a) There are authorized to be appropriated to carry out the functions of the Bureau of Justice Statistics $25,000,000 for the fiscal year 1983; $25,000,000 for the fiscal year 1984; $25,000,000 for the fiscal year 1985; and $25,000,000 for the fiscal year 1986. There are authorized to be appropriated to carry out the functions of the National Institute of Justice $25,000,000 for the fiscal year 1983; $25,000,000 for the fiscal year 1984; $25,000,000 for the fiscal year 1985; and $25,000,000 for the fiscal year 1986. There are authorized to be appropriated for parts D, E, and G, and for the purposes of carrying out the remaining functions of the Office of Justice Assistance, other than parts F and K, $170,000,000 for the fiscal year ending 1983; $170,000,000 for the fiscal year 1984; $170,000,000 for the fiscal year 1985; and $170,000,000 for the fiscal year 1986. Funds appropriated for any fiscal year may remain available for obligation until expended. There is authorized to be appropriated in each fiscal year such sums as may be necessary to carry out the purposes of part K.

"(b) Notwithstanding any other provision of law, no funds appropriated under this section for parts D and E of this title may be transferred or reprogramed for carrying out any activity which is not authorized under such parts.".

(b) Part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out sections 1002 and 1003.

(c) The heading for part J of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by striking out "PART J" and inserting in lieu thereof "PART I".

(d) Part I, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3793-3793b) is amended by redesignating section 1001 as section 901.

CRIMINAL PENALTIES

SEC. 113. (a) Section 1101 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(b) Section 1103 of part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance".

(c) The heading for part K of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by striking out "PART K" and inserting in lieu thereof "PART J".

(d) Part J, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3795-3795b) is amended by redesignating sections 1101, 1102, and 1103 as sections 1001, 1002, and 1003, respectively.

PUBLIC SAFETY OFFICERS' DEATH BENEFITS

SEC. 114. (a) Sections 1201 and 1204 of part L of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) are amended by striking out "Administration" each place it appears and inserting in lieu thereof "Office".

(b) The heading for part L of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) is amended by striking out "PART L" and inserting in lieu thereof "PART K".

(c) Part K, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3797-3797c) is amended by redesignating sections 1201, 1202, 1203, and 1204 as sections 1101, 1102, 1103, and 1104, respectively.

TRANSITION

SEC. 115. (a) Section 1301 of part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended—

(1) in subsection (a)—

(A) by inserting "(1)" after "(a)", and

(B) by adding at the end thereof the following new paragraph:

"(2) All orders, determinations, rules, regulations, and instructions issued under this title which are in effect on the date of the enactment of the Justice Assistance Act of 1983 shall continue in effect according to their terms until modified, terminated, superseded, set aside, or revoked by the President, the Attorney General, the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, the Administrator of the Office of Juvenile Justice and Delinquency Prevention, or the Director of the Office of Justice Assistance with respect to their functions under this title or by operation of law.",

(2) by striking out subsection (j), and

(3) by redesignating subsection (k) as subsection (j).

(b) The heading for part M of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by striking out "PART M" and inserting in lieu thereof "PART L".

(c) Part L, as so redesignated, of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3799) is amended by redesignating section 1301 as section 1201.

TABLE OF CONTENTS

SEC. 116. The table of contents of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3701-3799) is amended—

(1) by amending the item relating to part A to read as follows:

"PART A—OFFICE OF JUSTICE ASSISTANCE".

(2) by striking out the item relating to section 103,

(3) by adding at the end of the items relating to part D the following new item:

"Sec. 406. State office.".

and

(4) by amending the items relating to parts E, F, G, H, I, J, K, L, and M, to read as follows:

"PART E—DISCRETIONARY GRANTS

"Sec. 501. Purpose.
"Sec. 502. Percentage of appropriation for discretionary grant program.
"Sec. 503. Procedure for establishing discretionary programs.
"Sec. 504. Application requirements.
"Sec. 505. Criteria for award.
"Sec. 506. Period for award.

"PART F—TRAINING AND MANPOWER DEVELOPMENT

"Sec. 601. Federal Bureau of Investigation training of State and local criminal justice personnel.
"Sec. 602. Criminal justice education program.

"PART G—ADMINISTRATION PROVISIONS

"Sec. 701. Consultation; establishment of rules and regulations.
"Sec. 702. Notice and hearing on denial or termination of grant.
"Sec. 703. Finality of determinations.
"Sec. 704. Appellate court review.
"Sec. 705. Delegation of functions.
"Sec. 706. Subpena power; authority to hold hearings.
"Sec. 707. Employment of hearing officers.
"Sec. 708. Authority to use available services.
"Sec. 709. Consultation with other Federal, State, and local officials.
"Sec. 710. Reimbursement authority.
"Sec. 711. Services of experts and consultants; advisory committees.
"Sec. 712. Prohibition of Federal control over State and local criminal justice agencies.
"Sec. 713. Report to President and Congress.
"Sec. 714. Recordkeeping requirement.
"Sec. 715. Confidentiality of information.
"Sec. 716. Authority to accept voluntary services.

"Sec. 717. Administration of juvenile delinquency programs.
"Sec. 718. Prohibition of land acquisition.
"Sec. 719. Prohibition on use of CIA services.
"Sec. 720. Indian liability waiver.
"Sec. 721. District of Columbia matching fund source.
"Sec. 722. Limitation on civil justice matters.
"Sec. 723. Prison industry enhancement.
"Sec. 724. Staff support; coordination of activities.
"PART H—DEFINITIONS
"Sec. 801. Definitions.
"PART I—FUNDING
"Sec. 901. Authorization of appropriations.
"PART J—CRIMINAL PENALTIES
"Sec. 1001. Misuse of Federal assistance.
"Sec. 1002. Falsification or concealment of facts.
"Sec. 1003. Conspiracy to commit offense against United States.
"PART K—PUBLIC SAFETY OFFICERS' DEATH BENEFITS
"Sec. 1101. Payments.
"Sec. 1102. Limitations.
"Sec. 1103. Definitions.
"Sec. 1104. Administrative provisions.
"PART L—TRANSITION—EFFECTIVE DATE—REPEALER
"Sec. 1201. Continuation of rules, authorities, and proceedings.".

FUNDING OF PROGRAMS RECENTLY COMMENCED

SEC. 117. During the period beginning on April 1, 1983, and ending 1 year after the date of the enactment of this Act, funds expended by a State or local government to carry out a new program or project of a type described in section 401(a) of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3741(a)) for which assistance is requested under part D of such Act may be included, for purposes of determining such assistance, as part of the non-Federal portion of the cost of such program or project.

REFERENCES IN OTHER LAWS

SEC. 118. (a) Any reference to the Law Enforcement Assistance Administration, or to the Administrator of the Law Enforcement Assistance Administration, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment of this Act are carried out by the Office of Justice Assistance shall be deemed to be a reference to the Office of Justice Assistance, or to the Director of the Office of Justice Assistance, as the case may be.

(b) Any reference to the Office of Justice Assistance, Research, and Statistics, or to the Director of the Office of Justice Assistance, Research, and Statistics, in any law other than this Act and the Omnibus Crime Control and Safe Streets Act of 1968, applicable to activities, functions, powers, and duties that after the date of the enactment of this Act are carried out by the Office of Justice Assistance, the Bureau of Justice Statistics, the National Institute of Justice, or the Office of Juvenile Justice Delinquency Prevention shall be deemed to be a reference to the Office of Justice Assistance, the Bureau of Justice Statistics, National Institute of Justice, or Office of Juvenile Justice Delinquency Prevention, or to the Director of the Office of Justice Assistance, the Director of the Bureau of Justice Statistics, the Director of the National Institute of Justice, or the Administrator of the Office of Juvenile Justice and Delinquency Prevention, as the case may be.

TECHNICAL AMENDMENTS TO OTHER LAWS

SEC. 119. (a) Section 5314 of title 5, United States Code is amended by striking out "Director, Office of Justice Assistance, Research, and Statistics.".

(b) Section 5315 of title 5, United States Code, is amended—

(1) by striking out "Administrator of Law Enforcement Assistance.", and

(2) by adding at the end thereof the following new item:

"Director, Office of Justice Assistance.".

(c) Section 305 of the Department of Education Organization Act (20 U.S.C. 3445) is amended—

(1) by striking out "Law Enforcement Assistance Administration" and inserting in lieu thereof "Office of Justice Assistance", and

(2) by striking out "section 406" and inserting in lieu thereof "section 602".

OFFENSES INVOLVING PRISON-MADE GOODS

SEC. 120. Section 1761(c) of title 18, United States Code, is amended—

(1) by striking out "seven" and inserting in lieu thereof "twenty", and

(2) by striking out "Administrator of the Law Enforcement Assistance Administration" and inserting in lieu thereof "Director of the Office of Justice Assistance".

Mr. HUGHES. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker, having resumed the chair, Mr. DURBIN, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, had come to no resolution thereon.

THAT CRUMBLING INFRASTRUCTURE

(Mr. CLINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CLINGER. Mr. Speaker, even though a recent study by the Congressional Budget Office shows that government on all levels should spend $11 billion more each year to repair our roads and water and sewer systems, Congress has refused to bring pork barrel practices under control.

Mr. Speaker, what Congress needs is a systematic approach for allocating our limited resources for public works investments. This week, the House Public Works and Transportation Committee will mark up legislation which will make it possible to rank the cost effectiveness of our capital investments by creating a capital budget.

The legislation, called the Federal Capital Investment Act of 1983, requires an inventory of all public works facilities to determine their condition and the cost of maintaining them. The idea is that Congress would then use the information to set capital investment priorities as part of budget deliberations.

Mr. Speaker, with your permission, I request that an editorial in today's issue of the Washington Post entitled "That Crumbling Infrastructure" be reprinted in the RECORD for the benefit of our colleagues. And I urge my colleagues to support the legislation when it comes before the full House.

[From the Washington Post, May 9, 1983]

THAT CRUMBLING INFRASTRUCTURE

Ever since policy experts drew attention a couple of years ago to the dilapidated state of many public facilities, proposals for repairing what came to be called the nation's infrastructure have abounded. So extreme was the deterioration said to be that trillions of dollars would be needed to put highways, sewers, transit systems and other public works in decent condition. Two recent studies, however, suggest that the situation is more manageable than had been supposed. That's the good news. The bad news is that dealing with it will probably require a far more disciplined approach to public works financing than Congress is likely to accept.

A survey of 809 cities by the National League of Cities and the Conference of Mayors found that almost all face sizable repair jobs, but that the cost of urgent repairs was relatively modest and that local resources could cover much of it. The Congressional Budget Office similarly found that—despite the $5.5 billion added last year to annual highway spending and the $4 billion voted in the recent public works "jobs" bill—all levels of government needed to step up capital spending by about $11 billion a year. But, the study observed, most of the spending shortfall could be met by better allocation of current federal dollars.

The CBO criticized current federal public works policy for overemphasizing construction of new facilities, for channeling dollars to projects of local interest but low national priority, and for encouraging states and localities to neglect needed repair and replacement of existing facilities. Most essential public works systems are already in place, and emphasis in federal spending should now shift from new construction to repair. The federal government also needs to find a better way to expend its resources on truly national concerns while giving states and localities more flexibility in addressing their widely varying public works needs.

To get Congress to plan public works expenditures more sensibly, Reps. Bill Clinger and Bob Edgar have been pushing the idea of requiring the administration to prepare an inventory of the nation's capital assets and to make annual assessments of the most-needed improvements and repairs. The administration wisely opposes the idea of a separate "capital budget," on the ground that this would be an invitation to run up still larger federal deficits. But it has warmed somewhat to the idea of compelling Congress to consider the long-term implications of its public works spending decisions.

All this sensible advice, however, is likely to fall on deaf ears in Congress. As long as congressmen judge their worth to their constituents by the imposing public works they cause to be constructed in their districts—never mind the future cost of maintaining them—the poor old infrastructure is likely

to keep crumbling while the repair bills steadily mount.

AID TO GREECE AND TURKEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BADHAM) is recognized for 15 minutes.

● Mr. BADHAM. Mr. Speaker, recently I and other members of the Armed Services Committee returned from a trip to the Mideast, where we had the opportunity to visit Turkey and Greece as well as Beirut, Crete, and the Naples headquarters of NATO. Since returning to the United States I have noted that both the newspapers and the CONGRESSIONAL RECORD have included a number of articles and statements against the administration's request for military and economic assistance to Turkey. We have here a vivid test of the ability of the United States above parochial concerns, ethnic passions, and the penny-wise and pound-foolish attitudes frequently brought to the subject of foreign aid.

There is no place, across the entire range of foreign aid recipients, where the United States will receive more cost-effective returns than from the investment of our foreign aid dollars in Turkey. In this case, moreover, dollars devoted—lent, not given, for the most part—to the modernization of Turkey's Armed Forces are in some ways more effectively spent than dollars for the modernization of America's own Armed Forces. This is simply because Turkey is there, where the threat is, with a large pool of trained military manpower, and we are not.

Surely the importance of a militarily strong and politically stable Turkey and Greece cannot be misunderstood by any Member here. The briefest glance at a map makes the case immediately. Turkey is a country located at the threshold of a most critical region, at the juncture of NATO's southern flank and the turbulent Middle East. From time immemorial this region has been a prime target for sustained pressure and penetration by those who have ruled in Moscow. Current events remind us that Soviet objectives for the region are, if anything, more ambitious than those of the tsars before them: From Afghanistan to the Soviet fleet in the Mediterranean we see evidence of a constant Soviet effort to expand power and influence in the region at the expense of the West and of the independence of the people who live there. Sometimes the Soviets make headway; sometimes they have lost ground. They have never had a free ride and easy access to the region. One of the reasons for this is the obstacle presented by a Turkey firmly allied with the West in NATO and oriented toward the West in her attitudes.

This whole region, including Turkey and Greece, need protection by the United States and the rest of the NATO alliance. Do not be misled by the temporary drop in oil prices. The oil is still there and vital to the future of the industrial world. Israel is still there and the delicate processes of building peace between Israel and her neighbors require insulation from unrestricted Soviet meddling. The southern flank of NATO, the Turkish straits, the vital links of the eastern Mediterranean Sea are still there and the United States remains committed by treaty and law to send American forces to defend them if need be. Elsewhere in the foreign aid budget and in our defense budget we are spending billions of dollars to back these interests and commitments. It is no exaggeration to say that we stand to waste all this other spending if we do not do at least the bare minimum to help Turkey modernize her military establishment on a sustained basis. This is all the administration is asking for. Turkey's Armed Forces are in dangerously poor shape, despite the best efforts of good soldiers to do the most with what they have been able to get. As a result of decades-long hand-me-down status and the U.S. arms embargo of the mid-1970's, Turkey still has a military establishment with Korean war vintage equipment. The size and quality of Soviet forces for operating against Turkey—Soviet air, land, and naval forces—have been steadily increasing. When the East-West balance of forces worldwide is far from satisfactory to us it is simply an intolerable risk to leave Turkey in a seriously deficient military state. It is like leaving an open gasoline can next to your furnace in the basement. Who would run such a risk?

Throughout hearings and debate on aid to Turkey and to its neighbor Greece, heated statements have been made as to how deserving one country is and how undeserving of American support the other supposedly is. Many of these statements arise from passions and resentments that have their causes way back in history and have migrated to our shores. This case is not unique in our foreign affairs. This body wrestles constantly with the effects of such feelings among its constituents. The Congress cannot allow itself to be just a sounding board for regional and ethnic feelings, especially when it considers foreign and national security policy issues. In any case, the record shows very clearly that, notwithstanding energetic claims to the contrary, our Turkish ally in NATO is a deserving recipient of American support. Turkey is a loyal ally who has supported us and fought with us in the postwar era. We have never questioned her NATO commitment. In proportion to her national wealth, she shoulders the largest defense burden in the alliance. She has struggled effectively to overcome the results of economic destabilization, and of political destabilization through terrorism, fomented by her northern neighbors, that threatened to destroy any prospects for democracy in that country. Hard though it may be for some people to accept this, Turkey's military leaders are genuinely committed to the cause of developing a modern, civilized, democratic, and Western-oriented society in Turkey; they are not the power-hungry defenders of rich oligarchies we find elsewhere. Moreover, Turkey's leaders have shown themselves willing to negotiate fair and reasonable solutions to local problems that arouse hot tempers on the other side of Aegean Sea. We do not have many Turkish constituents in our districts; but we ought not forget that Turkey's political leaders do. We would be very fortunate indeed if our allies behaved with the good sense and patience that Turkey shows toward us.

But the bottom line remains as I stated at the beginning: Support for the Turkish aid appropriation is support for our national interest, for the security of the United States, for the strengthening of our vital role as the leader of an alliance of free nations, and for the enhancement of stability in a dangerous part of a dangerous world.

Robert W. Komer, U.S. Ambassador to Turkey during 1968-69, published an article in the April 5, 1983, Wall Street Journal that addressed this issue, and even recommended a solution to some of the problems we must face in this area. I recommend that all Members take the time to read it.

[From the Wall Street Journal, Apr. 5, 1983]

AID TO GREECE AND TURKEY: THE 70-PERCENT SOLUTION

(By Robert W. Komer)

Since the end of World War II, American policy has recognized the strategic importance of Turkey as the southeast flank of NATO and a barrier to Soviet naval egress from the Black Sea. Americans have also been impressed with Turkey's steadiness in standing up to the U.S.S.R. and its willingness to maintain strong defensive forces. Hence Turkey was one of the first recipients of postwar U.S. military aid, even before the founding of NATO. More recently, eastern Turkey's strategic position on the flank of any Soviet attempt to capitalize on the chaos in Iran to threaten Western access to vital Persian Gulf oil has further enhanced its strategic value.

Increasingly, however, our strategic interest in helping Turkey has become mortgaged to the deteriorating relations between Turkey and its Western neighbor, Greece. Though Greece and Turkey are NATO allies, and share a common concern over the only visible threat to their external security, their relationship has increasingly been marred by bilateral disputes, especially over Cyprus, which in turn has affected congressional willingness to meet Turkish aid needs. Indeed, Congress imposed a four-year

embargo on any military aid to Turkey (1974–78), which led to a serious weakening of Turkey's already obsolescent forces, highly dependent on the U.S. (and Germany) for modern equipment. In short, at the very time when U.S. interest in keeping Turkey strong had grown as a result of the chaos in Iran and the Soviet invasion of Afghanistan, Greece's success in highlighting its own fears of Turkey has had a damping effect on U.S. willingness to aid Turkey.

The irony is that Athen's current paranoia over the "threat" of Turkish attack finds no echo in Ankara. While I will no doubt be accused of being pro-Turkish for saying so, Ankara sees absolutely no percentage in hostility toward Greece. Nor have I ever found a professional in the State Department, Pentagon or CIA who took this threat seriously. Turkey needs Greece's nearby Aegean Islands like it needs a hole in the head. Just look at the deployment pattern of Turkish forces—the vast bulk of them facing Bulgaria to the north and the U.S.S.R. to the east. Very few are aligned against Greece.

Instead Ankara worries primarily about the Soviet satellite military buildup on its borders, the Iranian revolution on its vulnerable eastern flank, the Iran-Iraq war and Syria's increasing dependence on Soviet arms. All this suggests that Ankara means it when it claims that it wants a return to the Ataturk-Venizelos era of good relations with its Greek ally. Otherwise Turkey would be practically surrounded by hostile or unstable states.

But Greece has shrewdly managed to make the level of U.S. military aid to Turkey hostage to maintenance of a 7-to-10 aid ratio between the two countries, arguing that this method of keeping aid to Greece at nearly comparable levels is essential to prevent a Turkish attack. Neither the Pentagon nor State Department has ever seen any strategic sense in this ratio, which operates in fact to reduce aid to Turkey, while Greece's stronger economy permits more arms purchases elsewhere. But successive administrations have been compelled to accept it as Congress's price for providing Turkey even modest military aid.

Almost unnoticed by the press, the latest act in this long-lived drama is taking place on Capitol Hill. The current debate between the administration and Congress is ostensibly over whether telling Greece in advance how much military aid it will get will enhance the prospects of the new base agreement under negotiation or whether holding up our final offer until *after* we get a satisfactory agreement will give us greater leverage. Underlying this, however, is another attempt on the Hill to get more aid for Greece by tying it via the 7-to-10 ratio to the Turkish aid level.

Strengthening Greece militarily is just as much in the U.S. interest as strengthening Turkey. Both are essential to credible deterrence/defense of NATO's vulnerable southeast flank. But Turkey's needs are much greater than Greece's, especially now that Ankara and Washington want to strengthen deterrence on Turkey's distant Caucasus frontier (1,000 miles from Greece) to help protect Persian Gulf oil.

The 7-to-10 ratio is absurd, and a waste of the U.S. taxpayers' money. It is a classic example of special interest politics cutting across U.S. strategic interests. Contrary to the synthetic issue of a Turkish threat to Greece whipped up by some Greek politicians, military air to Turkey in fact helps defend Greece (and vice versa.)

But another confrontation between Congress and the executive would serve nobody, least of all Turkey, which would almost surely end up getting less than otherwise. Therefore let me suggest a one-time compromise. Why doesn't Congress approve seven-tenths as much in fiscal 1984 military-sales credits for Greece as for Turkey, provided that a satisfactory base agreement is reached, but simultaneously repudiate allegiance to a 7-to-10 ratio and direct the Pentagon to base further aid requests solely on respective needs? Turkey should also get such aid on distinctly easier terms, given its lesser ability to pay. U.S. aid policy should promote Greek-Turkish rapprochement, not serve as a device for rehashing divisive bilateral issues at the expense of our clear strategic interest in helping meet the needs of both countries.●

WHY IS THERE A HOUSING EMERGENCY?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

● Mr. GONZALEZ. Mr. Speaker, tomorrow the House will consider the Emergency Housing Assistance Act, H.R. 1983. There may be some who will ask what the emergency is and others who will claim that there is no problem. But there is a housing emergency, and I will explain why.

Two years ago, long-term unemployment in this country affected perhaps 2 million people. Today, there are 4½ million people who have been out of work for at least 15 weeks. Two years ago, maybe one out of every eight unemployed people had been looking for work for as long as 6 months. Today one out of four—a full 25 percent—of the unemployed have been looking for work 6 months or better. Almost none of the unemployed are people who quit work; in fact, the quit rate has decreased enormously in these last 2 years—and there could be no surer sign than that of how difficult the times are.

Translated into the ability to pay mortgages, these statistics tell us that there is a housing emergency. But long-term unemployment is not the only reason there is an emergency; the rate of foreclosures has increased by leaps and bounds. Last year there were as many home foreclosures as there were in the worst year of the Great Depression. The indicators this year are even worse. Why? because with the consistent and persistent long-term unemployment we have had in these last 2 years, more and more people have run out of savings, run out of ways to keep the wolf from the door, run out of ways to ask the bankers to show forbearance.

Despite this overwhelming evidence, there may be some who still claim that there is no problem. They may say that the long-term unemployed are just teenagers who do not own homes. That is not the case. Since 1981 the unemployment rate for male workers over age 20 has increased by 50 percent, and it has increased by 100 percent over the experience of 1979. Traditionally it is adult males who have the lowest rate of unemployment in this country, but today more than 10 percent of all such workers are out of work.

But nationwide statistics are only a mask that covers the real hardship. Nationwide unemployment may be at 10 percent, but in town after town, city after city, one-fourth or one-fifth of the people may be out of work. In a town like Pueblo, Colo., there are 3,000 steelworkers laid off. In the copper mines, in the iron mines, in the auto towns—everywhere that you look, the people who have worked in this Nation's most basic and vital industries are suffering monstrous levels of unemployment. These are people who by and large have never been laid off, never quit, never expected to be laid off, and certainly never expected to see their whole towns shut down, but it has happened; sometimes by slow degrees and sometimes with devastating speed, but it has happened.

Less than 70 percent of this Nation's industrial capacity is in use today. Farmers have seen a parity loss of 20 percent in the past 2 years. Bankruptcy is on the rise. Long-term unemployment is not shrinking—it is growing. Forty percent of the people who are looking for work today have been out of work for at least 3½ months; a quarter of the unemployed have been looking for work better than 6 months. And I emphasize, long-term unemployment is growing, not going down.

There is only so long that a family can go with curtailed or totally lost income. There is only so far that people can stretch, and that is why we are now seeing a rise in mortgage foreclosures, an increase in business bankruptcies. No one, not even the most adamant opponent of H.R. 1983, denies that there is a problem. No one, not even the most hardened ideologue, claims that we are about to see an end to massive unemployment, let alone the monstrous growth of long-term unemployment. What are we to do?

Should we sit idly by and watch people lose their homes, their savings, and their hopes? I say no. Not when we know that 50 years ago the Nation faced similar problems and came up with a workable solution. Not when today we have a workable solution in the form of H.R. 1983.

The debate on H.R. 1983 will perhaps sound complex, but the issue boils down to one simple conflict: The claim that mortgage foreclosures can be prevented without any action except an exhortation to bankers, a request that they be merciful. That is the central issue: Does it take real fi-

nancial help to solve a real financial problem? I say that it does, and that is what H.R. 1983 provides: Real financial assistance to people who face real financial problems through no fault of their own. Real help to people who need real help to keep their homes.

The Emergency Housing Assistance Act is a loan program. If a homeowner is facing foreclosure, and if that homeowner has gotten into a financial bind because of an involuntary loss of income, that person may be eligible for assistance. To qualify for a loan, under the terms of the bill and a substitute that I will offer tomorrow, the applicant must demonstrate real need; there will be a stringent limitation on the assets a person can have and still qualify for a loan. Further, the applicant must show that every effort has been made to work out an arrangement with the lender, and no loan can be made available for any property that is extravagant or luxurious—the mortgage must be within FHA limits, and cannot include luxurious amenities.

Once the borrower has demonstrated his real need, and once it is clear that there is no other recourse but an emergency loan, then an applicant can qualify for help.

The Secretary of Housing and Urban Development receives the application and decides the case within 45 days. If the Secretary approves an emergency loan, the applicant gets enough money to bring the mortgage current. In addition to that, enough is provided to keep that mortgage current until there has been reasonable time for the homeowner to get back on his financial feet. During that period of assistance, the borrower must commit no less than 38 percent of his adjusted income to mortgage payments.

The loan that is advanced by the Secretary is secured by a lien on the property. In addition, the loan carries interest of 10 percent or the current Treasury rate, whichever is least. Finally, the person aided by this program must begin a prompt repayment program, as soon as this is financially feasible.

This is a tough program. It is designed for people who have done all that they can, and people who continue to do all that they can, to keep up mortgage payments. It is for people who have done everything except seek the shelter of bankruptcy, and it is an alternative to bankruptcy. It is a program that recognizes the economic realities of today: Massive long-term unemployment that creates wholly unexpected, overwhelming burdens for people who are and have been, and who will continue to be, dependable, responsible, and hard-working citizens. Emergency housing assistance will not be available for deadbeats or for the well-off; it will be for those who need it and must have it.

Opponents of this bill will claim that there does not have to be any loan program at all. They are saying that all we need do is enact an exhortation requesting forbearance by lenders. But real financial problems can only be solved with real financial help.

The tragic fact is that if interest rates decline and make it easier to sell housing, forclosure rates will increase, because bankers will find it much easier to recover their money through foreclosure. This is a true, gigantic irony—that if homes become easier to sell, they will also be more likely to suffer foreclosure. In a market where homes are hard to sell, bankers have little to gain from foreclosure. Those who argue against this bill ignore the fact that every sign—from unemployment rates to interest trends—shows that foreclosure is not only a problem today, but it is likely to become a greater problem tomorrow.

There are those who claim that banks are anxious to avoid foreclosure action, and perhaps they are. But in the areas where the bank are in the worst shape, and in the worst position to forbear, exhortations to be nice will not be enough; the lenders have financial problems. It is not just borrowers who need real money for real problems; it is lenders who need real money for their real problems.

The Emergency Housing Assistance Act offers realistic help to a burgeoning national need. From one end of this great land to the other, there are people anxiously wondering if this is the day the sheriff will knock on the door, if this is the day the end arrives, if this is the day all hope finally comes to an end. Tomorrow the House has a choice: We can vote for real help, in the form of H.R. 1983 and the Gonzalez substitute thereto; or we can vote for a cruel and empty joke, offered by the minority in the form of the Wylie amendment. I ask you to examine your conscience, and when the time comes, reject the Wylie substitute and its empty gesture; and vote for the Gonzalez language, which provides real assistance and real hope to people who need it, deserve it, and who cannot survive without it.●

MORAL CLARITY IN THE NUCLEAR AGE

(Mr. WEBER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. WEBER. Mr. Speaker, Michael Novak, a Catholic theologian and resident scholar at the American Enterprise Institute, has written an excellent letter on the issue of nuclear arms. This letter is particularly important for all of us to read since we are in the process of voting on the nuclear freeze resolution.

Professor Novak's letter has appeared in National Review and is the feature in the March edition of Catholicism in Crisis, a monthly journal of lay Catholic opinion published by the Jacques Maritain Center at Notre Dame.

I would commend this polemic work to my colleagues. It deserves much thought and reflection.

MORAL CLARITY IN THE NUCLEAR AGE—A LETTER FROM CATHOLIC CLERGY AND LAITY

(In January, 1982 at the first meeting of the American Catholic Committee (now the American Catholic Conference), a small group of laity, clergy and religious concerned about Catholic morality in a nuclear age decided that, all things considered, it would be better to construct a positive document than merely to criticize other points of view. To their credit, the first draft of the pastoral letter of the U.S. bishops had already requested such dialogue, public discussion, and open debate. To meet this request, the following document was drafted, redrafted and eventually submitted to more than 200 persons for critique and comment. The third draft, including countless corrections and suggestions, follows.)

INTRODUCTORY

1. Although in recent times, as in earlier times, there has been a tendency to use the expression "the Church" to mean chiefly its ordained leaders, the clergy, the Church in fact consists of the entire people of God, including those laymen and laywomen who participate in "the saving mission of the Church." As the Second Vatican Council puts it:

"Every layman should openly reveal to [his pastors] his needs and desires with that freedom and confidence which befits a son of God and a brother in Christ. An individual layman, by reason of the knowledge, competence, or outstanding ability which he may enjoy, is permitted and sometimes even obliged to express his opinion on things which concern the good of the Church. When occasions arise, let this be done through the agencies set up by the Church for this purpose. Let it always be done in truth, in courage, and in prudence, with reverence and charity toward those who by reason of their sacred office represent the person of Christ." (*Lumen Gentium #37.*)

2. In recent years, many laymen, laywomen and clergy have awaited the early drafts of a pastoral letter from the U.S. bishops on morality in nuclear matters. Both the first and second drafts which have appeared have awakened many questions. Rather than merely react to flawed portions of the two early drafts—with which many bishops are not yet satisfied—it seemed wiser to attempt a constructive statement of our own reasoned moral views. The task is immensely difficult. No more than our bishops do we expect complete unanimity. Emulating their example, we are moved by our responsibilities to the Gospel of Jesus Christ and to our vocations as Christians in the world. We hope that this constructive act will be useful to our bishops, and we make it public in accord with their express desire that the complex issue involved be treated to extensive and reasoned debate.

3. For nearly the whole of our adult lifetimes, since the first use of atomic power, and since the passing of its secrets into the hands of the U.S.S.R., we have all of us lived under the shadow of new and terrible

weapons. Descriptions of the horrible devastation which might be wrought upon the entire world through these weapons have been set before the public not only in scientific testimony but also in popular novels and movies. For more than thirty years, a primary moral imperative placed upon governments and peoples has been to assure that these weapons shall never be unjustly used.

4. The technology upon which these weapons are based is sufficiently simple that its secrets have now become dispersed throughout the world. Knowledge is good in itself; so is human liberty; we can scarely wish that these secrets had never been learned. Moreover, it is virtually impossible that, once discovered, they can wholly be repressed or permanently banished from this earth. The moral imperative that they never be unjustly used, therefore, will retain its full force for the foreseeable future.

5. Yet it must immediately be observed that such weapons have two quite different uses. The most obvious use is through their explosion in warfare. The more subtle use is through intimidation, since powers which possess them exercise over others who do not a threat beside which conventional armed defenses pale. While the use of nuclear weapons in the first sense is most to be guarded against, use in the second sense also constitutes a grave danger to justice, liberty, and peace. The moral imperative mentioned above applies to both uses.

6. More than once in our lifetime, superior nuclear force has obliged weaker nations either to surrender (Japan) or to abandon projects in which they were engaged (USSR in Cuba) or otherwise to moderate their intentions and actions. The possession of nuclear weapons seems also to have moderated actions which might in other times have led to confrontation by force of conventional arms. In this sense, while nuclear weapons constitute a grave threat to justice, liberty, and peace, their possession has also had pacific effects.

7. From biblical times, the human race has often been warned that God might will or permit its destruction. When Cain slew Abel, he prefigured the possibility of a threat to all the progeny of Adam and Eve, including himself, for by the same passion he might have slain not only his brother but also his parents and finally himself. In the story of Noah, the Bible instructs us in an image of the destruction of the whole world by flood, and warns us of God's threat to destroy all the world by fire. Sodom, Gomorrah, and other cities were utterly destroyed in vivid biblical warning, as was the Temple of Jerusalem. To live under threat of flood, fire, glacier, plague, pestilence, war and destruction is not novel for an imagination attuned to biblical history. The destruction of Carthage, the levelling of the glories of Greece and Rome, and the coming night of barbarism inspired St. Augustine to oppose secular millenarianism and a false sense of catastrophe, as he penned *The City of God.* The ruin of civilization is not a theme new to our time, nor is the theme of the destruction of all things living. Since Jewish and Christian conscience has long been steeled by contemplation of the fragility of this world and the overpowering sovereignty of God, our generation should not separate itself too dramatically from all others. The prophecies in the Book of Revelation exceed even the horrors of the twentieth century.

8. In fulfilling the moral imperative to prevent unjust uses of nuclear weapons, therefore, Christian citizens must exercise clear and sustained thought. Any flight of reason into panic must be quietly resisted, and every flight into illusion curbed. Both for good and for ill, the "mobilization of the masses" has frequently characterized life in this century. Neither slogans nor cold fear is a suitable substitute for prudent judgment. Questions of this magnitude cannot be left to experts, governmental or ecclesiastical, but must be prayerfully and lucidly reflected upon by all citizens. Only a broadly supported, carefully reasoned public policy, sustained over decades, meets the imperative laid upon all of us. Strong majorities must grasp and nourish such a policy.

9. For this reason, we Catholic citizens welcome the effort of the National Conference of Catholic Bishops in the United States, and the bishops of various Conferences in Europe and elsewhere, to draft pastoral letters on nuclear arms. The bishops have a right and duty to express the truth of the Gospels entrusted to them and to restate the Catholic tradition for our time. On these matters, they, and only they, in their vocation as teachers, have full authority with respect to the Gospels and the Catholic Faith.

10. According to the teaching of Jacques Maritain and Etienne Gilson, there are three spheres of Gospel teaching in human life.[1] The first concerns the life of the spirit, human life in the light of eternity. The second concerns those areas of the social order on which the Gospels and Catholic teaching directly impinge and in which they are necessarily enmeshed—such areas as are addressed in the social encyclicals of the Popes, for example. The third concerns the area of worldly interpretation of social reality and fact, tactical and strategic judgment oriented to results in the concrete world of history, choice among various permissible means, practical detail and, in general, questions of prudential judgment.

11. While in all three spheres, every member of the Church may have important witness to contribute, there is an ordinary differentiation of functions and authority. In the first of these spheres, the teaching of the bishops is clear and supreme when in conformity with that of the Holy Father and the whole college of bishops. In the second, the teaching of the bishops and popes is necessary and fruitful, although more engaged with matters fraught with ambiguity and danger of error. In the third, the focus of Catholic teaching normally passes from the hands of the bishops and popes to the concrete moral reasoning of individual Catholics responsible for fulfilling their vocations in the world. This is because in the world of contingency and action, Church leaders cannot summarize all concrete possibilities, but must enunciate religious ideals and moral principles and demand that lay persons apply them to concrete situations prudently and prayerfully. In this third sphere, the God of the Last Judgment will not be satisfied by a claim that a Christian followed the general authority of his bishop or of anyone else; each will be judged by what he or she did in the light of his or her own concrete moral reasoning in particular cases. From such personal responsibility, there will be no escape in the encompassing light of Judgment.

12. It is in this third sphere that we associate ourselves in the task of Christian moral reasoning, reflecting on the realities of nuclear weapons in our time. We are conscious of the presence of God. It is His judgment we fear. "The fear of the Lord is the beginning of wisdom." *(Proverbs 9:10).* Being faithful to the teachings of the Gospel and of the Catholic tradition, including the recent teachings of the Second Vatican Council, the Popes, and the Bishops, we propose to deal as clearly and as conscientiously as we can with the prudential matters of the third sphere. We speak for no others but ourselves. The matters with which we wrestle are, in the nature of the case, full of ambiguity, complex in their chains of reasoning, dependent upon difficult judgments of fact at every step. Other Christians of good will are certain to make quite different judgments at any ten or twelve places in the argument. So it always is in complex judgments of fact. We are certain only that we have tried to be faithful to biblical realism: both to the Gospels and the Catholic tradition, and to a realistic assessment of matters of fact and rational principle. We welcome argument, since it is by argument that we have arrived where we are, and by argument that we hope to learn. Among ourselves, we also have differences. Nonetheless, we have found it possible to offer what follows as a public and moral policy which we as Catholics support.

PART I—PEACE IN THE WORLD TODAY: CATHOLIC PERSPECTIVES

13. The Catholic tradition on war and peace is long and complex: it reaches from the Old Testament and from the beginning of the New, from the slaughter of the innocents at the birth of Christ to the baptism of the Roman centurion, from the practice of the early Church to recent statements by Pope John Paul II. Its development cannot be sketched in a straight line. It seldom gives a simple answer to complex questions. It speaks through many voices. It has produced multiple forms of religious witness.

14. We rely upon *The Pastoral Constitution on the Church in the Modern World and on The Decree on the Apostolate of the Laity* of Vatican II as the most authoritative recent statements on the question on nuclear weapons and on the role of the laity. We note that *The Pastoral Constitution* carefully differentiated in its own teaching between those elements "of permanent value" and others of "only a transitory one." It said that future "interpreters must bear in mind . . . the changeable circumstances which the subject matter, by its very nature, involves."[2] In this spirit, we are mindful of the indispensable, central role of accurate discrimination and sound prudential judgment.

15. We note also that Vatican II did not speak of nuclear weapons as such, but of "scientific weapons."[3] We understand this more general concept to be essential, since developments in rocketry, computers, and explosives since 1945 have given even "conventional" weapons awesome destructive power at great distances and with amazing accuracy. Because of their power, many of the novel "conventional" weapons seem to fall under the same moral strictures as do nuclear weapons, in terms of proportionality and discrimination in targeting. Indeed, the larger "conventional" weapons now exceed in their destructive power the smaller nuclear weapons. If one cannot distinguish between such weapons on the scale of sheer physical power, nonetheless, the divide between conventional and nuclear explosives is a critical boundary.

16. The *Pastoral Constitution* bids us to read the "signs of the times." We note three

[1] Footnotes at end of article.

vital factors, in particular. The first is recorded in the *Pastoral Constitution* itself:

"Insofar as men are sinful, the threat of war hangs over them, and hang over them it will until the return of Christ . . . In spite of the fact that recent wars have wrought physical and moral havoc on our world, conflicts still produce their devastating effect day by day somewhere in the world." [4]

The second comes from that Constitution's definition of peace:

"This peace cannot be obtained on earth unless personal values are safeguarded and men freely and trustingly share with one another the riches of their inner spirits and their talents." [5]

This is not the peace of totalitarianism. It is the peace of liberty and justice. The third vital factor is that considerations of the need to avoid nuclear war ". . . compel us to undertake an evaluation of war with an entirely new attitude." [6]

It is a moral imperative to deter not only nuclear war but all war. Yet the very act of nuclear deterrence has its own novel characteristics, involving new ways of thinking about intention, threat, use, means and ends, and lesser evils. "An entirely new attitude" is required on some of these matters.

17. At the center of the Catholic teaching on war and peace is, first, the sovereignty of God and, second, the dignity of the human person. The perennial sinfulness of humans makes the threat of war perennial; the longing of humans to be true to the image of God within them makes perennial the longing for peace. Directly to take innocent human life is a prerogative only of sovereign God, the Author of life. To defend the dignity of human life is both the motive force of peace and the just cause of war. When an unjust aggressor injures human dignity, to stand aside is a form of complicity and collusion. To resist an unjust aggressor with proportionate means is demanded by justice. Thus, human dignity is the cause both of just peace and of just war. As there are wars which are unjust, so also there is peace which is unjust.

18. It is sometimes held that there are on these questions plural traditions in the Catholic church, one addressed to Catholics and another addressed to the pluralistic public, one evangelical and the other based on natural law, one committed to pacifism and the other committed to the tradition of just war reasoning. But there is not one teaching for initiates, another for the uninitiated; not one teaching for the perfect, another for the imperfect. In the matter of celibacy and marriage there may be two vocations in the church, yet one vision of a common faith. So in matters of war and peace there is more than one vocation, yet one common teaching about justice in war and in peace. One common set of precepts, many different counsels; one life of charity, many different vocations; this is our vision.

A. Peace and the kingdom

19. Although God has always promised his people peace and rest, the paradoxical nature of these promises is ever present in the Bible. "Not as the world gives do I give peace," Jesus says. *(John 14:27).* Again: "I have come to bring not peace but the sword." *(Matthew 10:34).* And, admonishing Peter in Gethsemane, Jesus says: "Put your sword back into its place; for all those who take up the sword shall perish by the sword. Do you think that I cannot appeal to my Father, and he will at once send me more than twelve legions of angels? But how then should the scriptures be fulfilled, that it must be so?" *(Matthew 26:52-54).*

20. In the Old Testament, God is often portrayed as One who leads his people into battle, whose power helps them to prevail, who avenges wrongs done to them by their enemies. Paradoxically, Gideon says "God is peace," and the blessing of the Lord on Israel includes this, that "the Lord lift up his countenance and give you peace." *(Numbers 6:23-27).* Ezekiel speaks for Yahweh: "I will make a covenant of peace with them; it shall be an everlasting covenant with them. . . ." *(Ezekiel 37:26).* Yet as sin persists, so does war. False prophets "heal the wound of the people lightly." *(Jeremiah 6:14; Ezekiel 13:16)* Peace would have come, had humans not persisted in sin: "Oh! that you had hearkened to my commandments! Then your peace would have been like a river, and your righteousness like the waves of the sea." *(Isaiah 48:18).* Only in the time of full righteousness and no more sin, the people "shall bend their swords into plowshares, and their spears into pruning hooks; nation shall not lift up sword against nation, neither shall they learn war any more." *(Isaiah 2:4).*

21. Although Jesus came as the Prince of Peace, inaugurating a kingdom of peace, He was a man of sorrows, bloodily slain on the cross. He called His disciples to share in self-sacrifice. His vision of this world was no vision of the easy triumph of justice and light. On the contrary, the vision of Jesus is a divisive force in history, dividing even families, a two-edged sword which "pierces to the division of soul and spirit, of joints and marrow, and discerns the thoughts and intentions of the heart." *(Hebrews 4:12).* It will divide believer from infidel. It will trouble individuals, like the rich young man *(Matthew 19:16-26),* and in time divide the nations. In this world Jesus does not promise peace. When Jesus speaks of peace, it is not as the absence of war between nations, or as an end to terror and lies, but, rather, as a form of knowing and being in union with God *(John 17:3),* a "peace which the world cannot give." *(John 14:27).* It is worth noting that no one in the New Testament thinks of telling the Roman centurions to give up their military careers—neither Jesus *(Matthew 8:5-13),* nor John the Baptist *(Luke 3:14),* nor St. Paul *(Acts 22:25).*

22. In being condemned to a cruel death *(Galatians 3:13),* Jesus did not defend himself against unjust treatment and assaults upon his human dignity. He followed here not his will, but His Father's, offering a redemptive sacrifice for all. His gentleness under torment, his non-violence, and his forgiveness of his killers have led some to choose in imitation of Him non-violence as a way of life, both in their persons and in public policy. We recognize this choice, but believe it to be a misreading both of the Scripture and of virtually the entire Catholic tradition. We sharply distinguish between pacifism as a personal commitment, implicating only a person who is not a public figure responsible for the lives of others, and pacifism as a public policy, compromising many who are not pacifists and endangering the very possibility of pacifism itself. It is not justice if the human race as a whole or in part is heaped with indignities, spat upon, publicly humiliated, and destroyed, as Jesus was. It is not moral to permit the human race so to endure the injustice of the passion and death of Christ. Many classic arguments against pacifism as a Christian vocation have been offered in Christian history. Closest to our own time, the arguments of Reinhold Niebuhr and C. S. Lewis may be cited. While following closely the paradoxical language of the Scriptures and the Catholic tradition, and choosing against pacifism for ourselves, we honor the liberty of others to choose differently, and in particular the calling of the clergy not to take up arms.

B. Kingdom and history

23. With Pope John II we hold:

"Christian optimism based on the glorious cross of Christ and the outpouring of the Holy Spirit is no excuse for self-deception. For Christians, peace on earth is always a challenge because of the presence of sin in man's heart.

"Although Christians put all their best energies into preventing war or stopping it, they do not deceive themselves about their ability to cause peace to triumph, nor about the effect of their efforts to this end. They therefore concern themselves with all human initiatives in favor of peace and very often take part in them. But they regard them with realism and humility. One could almost say that they relativize them in two senses: They relate them both to the self-deception of humanity and to God's saving plan." [7]

24. History is open; therefore, one must always say that "Peace is possible." On the other hand, we heed Pope John Paul II, who observes "that in this world a totally and permanently peaceful human society is unfortunately a utopia, and that ideologies that hold up that prospect as easily attainable are based on hopes that cannot be realized, whatever the reason behind them." [8]

25. History is full of ambiguities, contingencies, and complex patterns of fact. No two people perceive world affairs in identical fashion. Interpretations even of the simplest events radically diverge. In this respect, we cherish the wisdom of the *Pastoral Constitution:*

"Very often their Christian vision will suggest a certain solution in some given situation. Yet it happens rather frequently, and legitimately so, that some of the faithful, with no less sincerity, will see the problem quite differently. Now if one or the other of the proposed solutions is too easily associated with the message of the Gospel, they ought to remember that in those cases no one is permitted to identify the authority of the church exclusively with his own opinion. Let them, then, try to guide each other by sincere dialogue in a spirit of mutual charity and with anxious interest above all in the common good." [9]

C. The moral choices for the kingdom

26. From some early Christians through Dorothy Day and Martin Luther King, Jr., some Christians—joining others like Leo Tolstoy, Mahatma Gandhi, and Norman Thomas—have held that any use of military force is immoral. Yet we observe that military and police power has been necessary from time immemorial to preserve civilized societies—and pacifists themselves—against unjust aggression and brutal violation of rights. As a set of practical methods, nonviolent techniques have preeminence for non-pacifists as well as pacifists. They are, after all, the stuff of diplomacy and statecraft, within which adversaries observe civil discourse and amenities of many sorts. Although a full discussion of these issues would take us too far afield, we observe that there are important distinctions to be made between force and violence, between non-violence and pacifism, and between the power and the authority of the state. For example, non-pacifists prefer non-violence to violence, respect for legitimate authority to

naked state power, and legitimate uses of force to violent acts. Deterrence itself is a form of non-violence, a legitimate use of force, based upon legitimate authority.

27. While some Christian communities, such as the Mennonites, the Quakers and the Church of the Brethren, make the refusal of military service an obligation for their members, the Catholic church has not done so—indeed, has afforded many arguments, biblical and theological, moral, and political, against pacifism. In this world of sin and threat of war, for every pacifist who refuses to take up arms, some other citizen, who would also prefer to live in peace, must take his place. Nonetheless, in the full liberty of an open church, nonviolent witness through a conscientious refusal of military service has been honored in the Catholic tradition. Recognizing this liberty of conscience, we nonetheless argue against the pacifist option, as did C. S. Lewis:

"Only liberal societies tolerate Pacifists. In the liberal society, the number of Pacifists will either be large enough to cripple the state as a belligerent, or not. If not, you have done nothing. If it is large enough, then you have handed over the state which does tolerate Pacifists to its totalitarian neighbour who does not. Pacifism of this kind is taking the straight road to a world in which there will be no Pacifists." [10]

Thus widespread pacifism in churches and universities during the 1930s helped convince Hitler and the Japanese that the West lacked the resolve to defend itself, and encouraged them to launch World War II.

28. The pacifist refuses to restrain with proportionate force an aggressor who is injuring the innocent. By contrast, St. Augustine understood the command of love to demand a just defense of the innocent. This is because St. Augustine understood that the world of history is in part evil, and that action to restrain evil is an essential component of justice. While some Christians stress the fact that the "New Kingdom" has already come with Jesus, others, like Augustine, stress the continuing power of sin and the complex texture of social ambiguity. War, for example, may arise from human sinfulness, but it may also afford a tragic remedy for sin in political society. (It was in this spirit that we observed above that the possession of nuclear weapons has had both threatening and moderating effects during the past twenty-five years.) Moreover, if love demands the defense of others (such that a failure to defend them can be a sin), both love and justice also command self-defense. Peace is sometimes unjust; war is sometimes morally imperative. In clarifying such paradoxes, the traditional just war teaching has stood the tests of time. Many who claim to reject it do, nonetheless, invoke its criteria; as, for example, in judging nuclear weapons immoral (for lack of proportionality and lack of discrimination), in defending wars of liberation like those against Somoza and the Shah, and in opposing the U.S. presence in South Vietnam.

29. The essence of just war theory lies in the conviction that wars are wrong and to be avoided, except under quite stringent conditions. These are seven in number: (1) Only a *competent authority* may declare a war for the common good and in the interests of the public order. (2) It must be inspired by a *just cause:* such as to defend against agression, to protect innocent life and human rights from real and certain injury and to resist tyranny. (3) A *right intention* must guide the purpose, means, conduct, and aims of war in the light of the "just cause." Violence may be chosen only (4) *as a last resort*, when all peaceful methods of negotiation have failed, and (5) with *probability of success*—so that irrational resort to force is not mandated in the name of justice. The nature of the war itself must manifest (6) *proportionality:* the damage to be inflicted and the cost incurred must not constitute a greater evil than the evil to be avoided. (7) *Just means* which are *both discriminate* and *proportional* must be employed. This means that: (a) *discrimination* between combatants and civilians, while not easy to observe under modern conditions, must be maintained in every act of war; (b) the *proportionality* of each act of war derives from its indirect, collateral, and long-term effects. It will be noted that common sense criticism of wars and the conduct of wars usually fall under one of these headings.

30. There are some gaps in just war theory today, since new conditions have raised new questions. Among these may be mentioned the following: (a) Does any band of idealists or cynics that takes up arms in the name of a "just cause" constitute a competent authority to launch a just war? (b) Under what circumstances, if any, are acts of terrorism (that is, violent acts directed at persons, property, or public order), for whatever motives, whether revolutionary or absurdist or other, justified? (c) Considering the current literature of instruction in the conduct of guerrilla warfare, the training of terrorists, and the techniques of espionage and subversion, what light can be shed by "just war theory" on existing practices in wide-spread underground wars? (d) According to just war theory, is a "cold war" of espionage and counter-espionage to be preferred to a "hot war" of conventional conflict, as a means of self-defense; and, if so, according to what standards of behavior? (e) Under the "paradoxes of deterrence" (to be discussed below), does the traditional teaching on "intention" have to be refined and stated more precisely? (f) If it may be concluded that a particular totalitarian regime is evil in a special way—as was the case with National Socialism under Adolf Hitler, at least from the time of the death camps in 1941—do other nations accrue moral responsibilities, in the name of justice, for what happens *within* those regimes? What responsibility have citizens of one nation to be keepers of the human rights of those of another? These are only a few of the unanswered questions of our day.

PART II—WAR AND PEACE TODAY

31. Because of the unparalleled power of nuclear weapons, it is easy to be deflected from reasoned discourse. When one has listened to eminent scientists and physicians detail the horrors of the worst imaginable case of nuclear destruction, one is driven to recall the lessons of Christian faith about the precariousness of all human life, the approaching end of history, the perennial wickedness and obdurateness of the human race, and the total sovereignty of God. Nuclear weapons have changed our world but have not altered the fundamentals of the Jewish-Christian vision. In the biblical era, only about 50 million human beings, widely separated from each other, lived on earth. Under ancient conditions of communications, those who lived in a village, a town, a region, or even a country believed they knew "the whole world," and did not know they inhabited a tiny planet spinning in space. For them, the destruction of their whole world could descend in one violent sacking, pillage, and leveling—as, more than once, the heads of infants in Israel were dashed against stones; and as Moscow, Kiev, Warsaw fell to Mongol invaders in horrors still not forgotten. Images of horrible plague and destruction often arose in medieval times. Not even our fears are as novel as we think. This is the context in which Pope John Paul II said at Hiroshima: "In the past it was possible to destroy a village, a town, a region, even a country. Now it is the whole planet that has come under threat." [11] Today, nuclear weapons add new dimensions of scale and time, through prolonged radioactivity. These new possibilities made two questions most insistent: Can nuclear war be prevented? If so, which strategies and tactics, and which principles of human behavior, are most likely to succeed in preventing it? The first question involves a principle: we must seek to prevent nuclear war. The second, while also involving principles, is ultimately a question for prudential judgment.

A. The new moment

32. There is a widespread, well-organized, and well-financed "peace movement" in several free countries today, particularly in those about to make decisions for their future defense against superior nuclear forces now arrayed against them: West Germany, the Netherlands, Denmark, Belgium and the United Kingdom. (France is militarily independent of NATO and has its own deterrent; its "peace movement" is far less visible.) There is also a well-organized "peace movement" in many cities in the U.S. Some find the public discussion here and abroad "unprecedented in its scope and depth." Democratic societies entrust such matters to public discussion; that is one reason they are worth defending. Democracy itself depends upon the civility, reasonableness, and wisdom of the discussion.

33. Political peace has always been precarious, as when statesmen imply fragility in such phrases as "the balance of power." An overall balance of power, always shifting, does not *guarantee* peace. Yet experience has shown that the capacity to retaliate in kind has prevented some weapons systems from being used, even when peace is breached—witness chemical weapons in World War II. But deterrence has never been wisely thought of as a "safe and stable" system, except by comparison with other proposed alternatives. Today a spiritual sea change does threaten deterrence. Since 1945, the 400 million persons of the North Atlantic Alliance have enjoyed liberty and prosperity unparalleled in human history. Changes in material conditions also unleashed new possibilities for spiritual fulfillment. This great transformation in life has been sudden and profound. Children can scarcely know the almost wholly different conditions under which their parents entered upon life during the Depression and war-time. The horrors and deprivations of forty years ago are unknown to a majority of those now living. Consequently unrealistic and utopian expectations find fertile soil. Deterrence is sometimes judged against ideals, not against recent history. There is a danger that history may once again repeat itself, not only in Europe but elsewhere. Preserving peace and defending justice are political tasks, and politics, while always ambiguous and imperfect, is the instrument of natural law for the protection of the weak and the innocent. Constitutional law, democratic procedures and political processes are far from perfect, but they are noble in their dependence upon civil discourse,

persuasion, and realistic judgment about the less than perfect.

34. To be sure, it is tragic that so much treasure has had to be spent on arms since 1945. The post-war world might have been different. Moreover, if one compares the crude atomic bomb of 1945 and its primitive delivery system with the weaponry thirty-seven years later to be found in the arsenals of the U.S. and the U.S.S.R., one sees that the "arms race" means not only treasure spent but conditions transformed. This is true even though the total money spent on nuclear weapons and their technology has been a very small fraction of U.S. economic resources. Expenditures on the research and production of nuclear weapons by the United States since 1945 have been estimated to be less than $400 billion, about $12 billion per year. In fiscal year 1983, U.S. expenditures on nuclear weapons constitute nine percent of the military budget, 2.9 percent of the entire federal budget, and about 0.6 percent of GNP.[12] Compared to conventional arms, nuclear arms are vastly less expensive.

35. Under the terms of the treaties ending World War II, the United States has chiefly been charged with the defense, not simply of its own interests, but of Western Europe and Japan, as well. After the war, all Western nations virtually disarmed. Even in a face of a massive Soviet build-up since 1965—the most massive in peacetime history—the defense budget of 1981 for G.N.P., was for Belgium, 3.3; Britain, 5.4; Canada, 1.7; Denmark, 2.5; France 4.1; Germany 4.3; Greece, 5.7; Italy, 2.5; Japan, 0.9; Luxembourg, 1.2; Netherlands, 3.4; Norway, 3.3; Portugal, 3.8; Spain, 1.9; Turkey, 4.5; U.S., 6.1.[13] (It is estimated that the Soviet Union spends, for its military alone, not counting the military KGB, between 11-12 percent.)[14] These considerations suggest two conclusions. First, the percentage of national resources spent on arms by Western allies is low. Second, the percentage of national resources spent on nuclear arms, in the case of the U.S., is ten times lower. Thus, when in 1976, the Holy See condemned the arms race as a danger, an act of agression against the poor, and a folly which does not provide the security it promises, the Holy See could not reasonably be interpreted as asking the Western allies to spend much less than they are. The reason for poverty in the world is not adequate defense. Furthermore, efforts to supplant reliance on nuclear weaponry with reliance on conventional weaponry are bound to raise military costs dramatically, since conventional weapons are far more expensive.

36. While we cannot speak for the "arms race" of Third World countries or in the Soviet Union, we do note that the percentage of world gross economic product being spent on arms has declined during every year since 1967. In 1978, the last year for which figures are available, the world spent 5.4 percent of its gross economic product on arms, down from 6.7 percent a decade earlier. In 1978, this amounted to $480 billion.[15] Since virtually all nations of the world are welfare states to some degree or another, it must be noted that government expenditures alone for health and welfare, not counting expenditures by private citizens on their own behalf, amounted to several times more than military expenditures. In the United States, for example, the percentage of the *federal* budget spent on health and welfare programs of various sorts during 1982 was 51 percent, and on the defense budget 26 percent.[16] This does not include human services provided by state and local governments and by private agencies of every sort. Since the United States bears the free world's heaviest defense burden, comparisons of percentages of human services expenditures to military expenditures in West Germany, the United Kingdom, and other nations are even more favorable. In the free nations, moneys from all sources spent on health, education, welfare and other human purposes exceed moneys spent on weapons by a factor of about 20 to 1.

37. It is, nonetheless, true that lower spending on defense would be advantageous to all. Since government spending which creates deficits has implications for inflation and unemployment, every reduction in pressure on government budgets may have creative effects throughout the economy. For many reasons, we favor the minimum amount of defense spending consistent with moral obligations to defend the innocent with just means. We recognize that moral means may be more costly than less moral means, as conventional deterrence may be more expensive than nuclear deterrence, but we accept this as the price of moral behavior.

38. To say "no" to nuclear war is both a necessary and a complex task, especially since *saying* "no" doesn't make it so. It is also a task full of paradox, and demands new ways of thinking. It is a task demanding perseverance from one generation to another. It is a task exquisitely dependent upon cool-headedness and the force of reason, a task made difficult by outbursts of passion, hyperbole, flagrant accusation, and misleading assertion. In denouncing the relations between the United States and U.S.S.R. for being based upon a balance of nuclear power, some critics fail to imagine the consequences of losing a war to tyrannical powers. Some also fail to imagine the consequences of attempting a balance of conventional power. First, the history of modern Europe is not reassuring about balances of conventional power. Second, world leaders do not seem by their behavior to fear conventional wars, of which there have been more than 67 since World War II, as they fear nuclear conflict. Third, currently the conventional military arms of the Soviet union sufficiently outnumber those of Western Europe as to create an imbalance, whose rectification would require immediate, sustained and heavy military expenses by western nations. A political leader seeking to solicit those expenses from voters might not be successful, and might not win support from the churches, universities, and the press. In short, an alternative to the nuclear balance is easier to talk about than to realize. Further, it is one sided to speak of "psychological damage" done to ordinary people, especially the young, by the nuclear balance without comparing it to the "psychological damage" which would be caused by heavier taxes and conscription for conventional forces, on the one hand, and by intimidation under "Finlandization," on the other hand.

Appeasement, too, causes "psychological damage." It is also extreme to contrast the "billions readily spent for destructive instruments"—seventeen billion dollars were spent in the U.S. in 1982 on strategic forces[17]—with "pitched battles" being waged in the U.S. Congress "about a fraction of this amount for the homeless, the hungry, and the helpless." Moneys allocated by Congress for housing assistance, food stamps, medicaid, medicare and other forms of welfare vastly exceed moneys allocated for nuclear arms. Although one might wish that cuts in spending on nuclear weapons would go to the homeless, the hungry, and the helpless, the second draft of the Pastoral Letter of the U.S. Catholic Bishops (November 1982) prudently observes: "Rejection of some forms of nuclear deterrence might therefore require a willingness to pay higher costs to develop conventional forces. Leaders and peoples of other nations might also have to accept higher cost for their own defense if the United States government were to withdraw any threat to use nuclear weapons first."[18]. Saying no to nuclear weapons may, therefore, impose a greater burden on the poor than at present.

B. Religious leadership and public debate

39. Religious leaders who wish to influence public policy by influencing public opinion owe a special debt to democratic states, and incur an obligation to defend them against those who would destroy them. *"Rulers must be supported and enlightened by a public opinion that encourages them or, where necessary, expresses disapproval," Pope John Paul II says,* thus preferring societies in which the public may express disapproval of their leader.[19] Is it just to defend such societies with nuclear weapons? Some would "build a barrier against the concept of nuclear war." But a parchment barrier will not prevent nuclear war. As even God's commandments have frequently been disobeyed, so also a nuclear war may be waged by sinful men. Since this possibility cannot be excluded, it does not seem wrong for the potential victims of nuclear war to give some thought to "surviving" it. Is it a necessary assumption that any one use of any one type of nuclear weapon will result almost at once in the explosion of every nuclear weapon? History is full of surprises and sudden turns. What seems most probable often does not occur. Prudent leaders must, therefore, consider other possible eventualities.

40. It is possible that one step into nuclear warfare will escalate outside human control to total expenditure of every nuclear weapon. But this is not the only possibility. Moral reflection requires the moralist to face other eventualites. Today, these possibilities are shaped by two great concrete realities: the actual nature of the Soviet Union and the actual nature of the United States and other Western democracies. The problem of saying "no" to nuclear war is not abstract; it is concretely directed most of all to Moscow, to Washington, and European capitals. Actual decisions about existing and forthcoming nuclear weapons are made by real persons in specific political and geographic locations. Moral thinking about nuclear war must be concrete, as well as abstract.

C. The concrete moral context

41. In deciding ethical questions in political matters it is wise procedure to seek first a clear grasp of realities, interests and powers. This attained, one then wisely asks: "What ought we to do?" and appeals to all one's resources of vision and principle. Virtually all arguments about the prevention of nuclear war hinge on judgments concerning the nature of the Soviet Union and its nuclear forces. In 1968, the U.S. had a larger number of nuclear warheads, a greater total throwweight, and a larger and more varied number of delivery systems, than did the Soviet Union. In an effort to promote arms control, Defense Secretary McNamara froze the strategic bomber fleet at 600 aircraft, froze the number of land-based missiles at 1,054, and froze the maximum number of

nuclear submarines at 41. Subsequently, by 1982 the total throwweight of U.S. nuclear arsenals has been reduced by more than one-half, and warheads have been reduced in number and in size.[20] Emphasis has been placed upon smaller, more accurate warheads, in order to meet just war criteria of proportionality and discrimination, and in order to avoid entrapment in a strategy of Mutual Assured Destruction. (We ourselves judge that this shift away from MAD is morally correct despite the fact that MAD affords conceptual simplicity and lower costs.) Since 1968, no new delivery system for the U.S. land-based missiles has been built, no new bomber has been built, and both the ICBM missiles (1,052) and the B-52's (315) are entering obsolescence.

Since 1968, by contrast, the Soviets have developed the number, power, variety and accuracy of their delivery systems and warheads. As Secretary Harold Brown said: "When we build, they build. When we stop building, they build." The U.S. did try a freeze, for fourteen years. The trend lines of Soviet forces kept mounting, while those of U.S. forces either fell or rose more slowly or have now become subject to public pressure for a freeze. The Soviets have now developed a strategic triad with nuclear weapons on aircraft and in submarines. Their land-based missiles outnumber ours by a third, and are more modern, larger, and more powerful.[21] Although some critics of U.S. policy fear that the U.S. may by 1990 develop a "first strike" capability against Soviet land-based missiles—an intention denied by U.S. officials—the Soviets already possess such a capability.[22] Their land-based missiles are sufficient in number and power to deliver at least two warheads on each of the 1,052 American silos, while still retaining a large number of warheads and delivery systems for a second strike. If it is wrong for the U.S. to have a first stike capability, it would seem to be wrong to acquiesce in the Soviets having one.

42. Some citizens are inclined to stress the possibilities of negotiation, agreement, neighborly coexistence, and perhaps even ultimate friendship with the Soviets. Pointing out that now friendly nations like Germany and Japan were not long ago our foes, they correctly say that in world affairs there are no permanent enemies. They believe that taking risks, making first steps, and launching initiatives will draw the Soviet leaders into amicable, or at least non-hostile, relations. Since the days of Lenin, the Soviets have supported frequent "peace offensives." Surely, some citizens conclude, peace is better than war, agreement better than conflict, amity better than struggle. Much depends on how cynical Soviet leaders are. If their purpose is the eventual destruction of democratic societies, feigned friendship may suit them now. On the other hand, if they intend to become a nation like other nations, committed to live and to let live, respectful mutuality may be possible. Among these and other possibilities, how would we judge the purposes and character of the leadership of the Soviet Union? That is the factual question on which subsequent ethical judgment turns. Naivete in this judgment, on the one hand, or excessive cynicism, on the other, would undercut moral correctness in later judgments. For it is not moral to place trust in a liar, nor is it moral, from erroneous hardness of heart, to refuse trust. Judgment about the leadership of the Soviet Union must be carefully developed, beginning with their own view of themselves and their strategies for war, or else further moral judgment is flawed. This is another instance of the crucial role played by prudence.

43. In assessing the purposes and character of the Soviet leaders, it is crucial to observe three facts. First, the number of relevant decisionmakers is very small (fourteen in the Politburo), and their means of attaining power and of holding power are far from regular, systematic, open, and under public control. Much jockeying goes on; there have been many murders, executions, disappearances, and obliterations from the historical record ("non-persons") among them. Second, the ideology of Marxism-Leninism which legitimates their role in history, their authority, and their morality operates as a check upon their behavior. Even for those who do not believe this ideology in their hearts, ideological deviation may swiftly become a source of vulnerability to their positions and their lives. Third, the culture of centuries of Russian experience, including xenophobia and a sense of inferiority, affects their understanding of the role of the Russian people in history. Observers properly debate what comparative weights to assign to each of these three characteristics: organizational struggle; the ideology of Marxism-Leninism; and Russian experience and culture. All three factors bear on the Soviet sense of security and historical destiny. All three must be soberly considered. Whether one entertains prospects of friendship or coexistence or struggle with such leaders is much affected by such assessment. How one weighs the moral value of Soviet words and deeds is also affected by one's judgment about their cultural world. Words spoken and deeds done have full significance only in such contexts. How to interpret their significance within one's own context is quite a different matter.

44. The record of arms control negotiations during the past hundred years has been, for the most part, a record of deception on the part of the cynically ambitious and of self-deception on the part of those who thought peace might be bought cheap.[23] The record of negotiations of other nations with the Soviet Union on non-aggression and non-interference pacts, and concerning treaties on chemical and biological warfare, and the like, has always required unusual amounts of vigilance against betrayal. Marxist-Leninist ideology rejects "bourgeois formalism," including promises and signed agreements; Soviet practice in observing treaties, while sometimes good, is selective. Furthermore, to demand on-the-ground verifiability of Soviet arms is to demand a sweeping change within the structure of Soviet society. Despite all this, negotiations are both necessary and useful. But signed agreements by Soviet leaders cannot be understood by prudent persons as deterrents to any course of action Soviet leaders choose to take when they choose to take it. Parchment barriers have seldom restrained players of Realpolitik.

45. In 1968, defense Secretary McNamara judged that U.S. strategic forces were both superior to Soviet forces and at a point of sufficiency for the deterrence of any possible Soviet attack. For this reason, he instituted the freeze mentioned above. Secretary McNamara's judgment was that the Soviets would build up their forces until they reached parity. By 1972, with the signing of Salt I, leaders on both sides claimed that parity had been reached. Since 1974, the Soviets have added two new generations of delivery systems and warheads, with others in development. This includes missiles of unprecedent size and throwweight for the strategic services, and large, swift missiles for the European theater, as well.[24] In a sense, the nuclear initiative has passed into Soviet hands.

46. As for the United States, military budgets in constant 1972 dollars remained relatively level from 1962-1982, and expenditures for nuclear weapons as a percentage of the military budget and in constant 1972 dollars have also remained remarkably level.[25] From 1968 until 1976, virtually every presidential campaign and many congressional campaigns were conducted on the pledge to cut military spending. As a proportion of GNP, military spending went from 9 percent in 1960 to 5 percent in 1980. As a proportion of the federal budget, military spending during the same period went from 44 percent to 23 percent. Beginning under President Carter, then raised again under President Reagan, the military budget (in actual outlays) has now been slated to rise, in real terms, at 7 percent per year, reaching about 6.3 percent of GNP and 32.4 percent of the projected federal budget for 1984. Unlike other nations, the United States is charged not solely with its own defense but with that of Western Europe and Japan. It is estimated that the maintenance of 303,000 troops in Europe costs the defense budget $133 billion yearly, compared to the expenditure (in 1981) of $16.7 billion on all nuclear forces together.[26] U.S. strategic bombers, under the McNamara freeze, have been reduced from 600 to 315. The number of land-based ICBMs remain at 1,052. The number of nuclear submarines remains at 31, of which only half are on station at any one time. Military hardware inexorably becomes obsolete and less reliable with age. Even without expanding capacity, the replacement of weapons systems every ten or fifteen years is required. Such hardware, therefore, has a time factor: a preponderance (almost two-thirds) of U.S. delivery systems are older than ten years, while a preponderance (more than two-thirds) of the Soviet delivery systems are less than six year old.[27] Technology, of course, does not stand still, so new generations of weapons have new potential. For U.S. forces, such changes have been generally in the direction of greater accuracy and smaller warheads, subject to control of greater precision.

47. U.S. military strategy is defensive in configuration. This fact is clearest in conventional weaponry. Neither U.S. nor NATO forces are equipped for offensive use, not in numbers of tanks, nor in numbers of fighters, bombers, or support vehicles. No attempt has been made to match Soviet forces on the Western front tank for tank, artillery piece for artillery piece, aircraft for aircraft. To equalize the numbers of U.S. forces with Soviet forces in Western Europe would require raising the number of NATO fighter planes and interceptors from 3,100 to the 8,600 in the Warsaw Pact forces. To equalize tanks would require raising the northern NATO number of 10,500 to the Warsaw Pact number of 27,300. The Soviet all-ocean navy now numbers 2,429 ships, the U.S. Navy 514.[28] The task of equalizing all forces is not necessary for two reasons. First, the NATO configuration is defensive, the Soviet offensive. Second, U.S. forces are believed still to hold a technological edge, which however, has diminished over the years.

48. It has long been recognized that democracies are inferior to dictatorships in their capacities to mobilize armies during

peacetime. Free voters are reluctant to bear expenses not widely seen to be essential; they discern many social needs of greater moment and value. Free economies seem to thrive on production for peace rather than for military purposes, as the Japanese, West German, and other economies demonstrate. The ideology of the West does not require the destruction of socialism, but the ideology of Marxism-Leninism does teach a law of history according to which socialism must replace capitalism. A part of this law is encapsulated in "The Brezhnev Doctrine" that nations, once socialist, may never be permitted to return to an earlier stage in history. Such cultural and political discrepancies are also part of the present reality.

D. The imperative of deterrence

49. It is not necessary to decide the argument whether Soviet forces, nuclear and conventional, are now superior to U.S. forces, whether in Europe or worldwide. Forces superior in number are not necessarily superior in other respects. More important for forces committed to defense is the simpler question of sufficiency for deterrence of aggression. Superiority is not essential. Sufficiency is. Moreover, sufficiency to deter aggression is a moral imperative of the right to self-defense and the duty to defend the innocent from unjust aggression. This includes the defense of good citizens living now under totalitarian regimes who, as Solzhenitsyn reminds us, would be left by our failure without any hope whatever.

50. This is the concrete context within which the moral standing of doctrines of deterrence arises. The overriding moral imperative is to deter the use of nuclear weapons, both their explosive use and their political use to intimidate the free. To fulfill this imperative, prolonged social sacrifices and resoluteness of public will are indispensable. To weaken this will is immoral, since a public unwilling to meet these sacrifices fails in its moral duty. That duty is purely defensive.

51. Some hold that it is not enough to deter aggression. One must also attempt to bring about changes in the potential aggressor, especially by appeals to self-interest in avoiding mutual destruction, by negotiations, by cultural exchanges, by trade, and, in a word, by peaceful and friendly pursuits. With these arguments we are in full accord, when and insofar as the potential aggressor shows himself by deeds to be a mutual partner. Adolf Hitler, however, both betrayed and was betrayed by Joseph Stalin. Not all states seek relations of mutuality. In affairs of state, Aristotle once observed, one must be satisfied with a tincture of virtue. Reinhold Niebuhr in *Moral Man and Immoral Society* showed with several reasons why this is so. Just conduct can, however, be morally demanded of states, and exacted by the force of arms.

52. An adequate morality of conduct between states, therefore, must take account of the varying moral conduct of different states, including outlaw states whose only moral law is their own aggrandizement. Such states have appeared, and do appear, in history. Knowledge about how such states act is pivotal.

53. In this context, moral clarity in a nuclear age raises exceedingly difficult questions. A major complexity is this. The possession of Soviet nuclear arms on the borders of the West has political uses far beyond material considerations like potential physical destruction; this point has been well stressed by German Catholics. Since nuclear weapons have a political as well as an explosive use, deterrence of both uses demands a sufficiency of threat. The only known path to this sufficiency is a corresponding threat of destruction to a potential aggressor's industrial base or else of its warmaking capacity. The first alternative is called "countervalue," the second "counterforce." The moral problem posed by countevalue strategies is that they hold non-combatants in urban areas hostage. The moral problem posed by counterforce strategies is that they awaken possibilities of a hair-trigger response to perceived threats. The countervalue strategies require much less accuracy, fewer warheads and delivery systems, and much less expenditure. The counterforce strategies require far greater technological sophistication, numbers, precision, and prior intelligence. It must be said that both strategies make one sad, except by comparison with the only current alternative. That alternative is to fail in the duty of defending the innocent, by having no deterrent at all. Such a dilemma, like the Fall, ought not to have existed, but when it does exist, actions to prevent evil are not bad but good. On its face, it would seem that countervalue strategies are less to be approved, by the just war criteria of proportionality and indiscriminate taking of innocent life. Countervalue strategies give rise to the terror of Mutual Assured Destruction. On the other hand, some support them because they seem to afford less risk of miscalculation and cost less money. Furthermore, some regimes are such that they do not shrink from using Western principles to confound Western strategies, deliberately emplacing offensive weaponry amidst civilian targets.

54. It is clear that the complexities of nuclear deterrence change the meaning of "intention" and "threat" as these words are usually used in moral discourse. Those who intend to prevent the use of nuclear weapons by maintaining a system of deterrence in readiness for use do *intend* to use such weapons, but only in order *not* to use them, and do *threaten* to use them, but only in order to *deter* their use. That this is not mere rationalization is shown by the fact that several generations of nuclear weapons systems have become obsolete and been retired, without ever having been used. These are considered the successful and moral systems. In the same way, deterrence is judged to be successful insofar as nuclear was does not occur.

55. That a human system like deterrence is not infallible, is not foolproof, and does not convey full safety and security, goes without saying. In the world of contingent matters of fact, no system is. That one might devoutly wish for some other alternative also goes without saying. Contemplation of the horror of a breakdown in deterrence, through either the outbreak of nuclear hostilities or the intimidation of innocent peoples leads some to seek a way out of this dilemma by putting the best possible face upon the enemy to be deterred. But this is to deny the premise from which the dilemma arises in the first place. Were the Soviet Union a benign nation, even a nation like Japan and Germany, a nation like others, the need for deterrence would by now have much diminished or disappeared. The U.S. has no deterrent in place against any other power. The reality of the Soviet Union is the linchpin of the dilemma.

56. But the moral dilemma remains. No choice before U.S. leaders is wholly satisfactory. To abandon deterrence is to neglect the duty to defend the innocent, to preserve the Constitution and the Republic, and to keep safe the very idea of political liberty. No President by his oath of office can so act, nor can a moral people.

57. We must, then, confront anew the moral hazards of deterrance. The fundamental moral principle at stake is to make the moral choice which occasions the fewest evil consequences. To abandon deterrence occasions the greatest evil, for it entails endangering that liberty which is more precious than life itself. Free societies are an indispensable social condition of free moral life and the preservation of human rights. That is why for the signers of the Declaration of Independence (and for millions before and since) liberty is worth the pledge of life, fortune, and sacred honor. Insofar as deterrence succeeds, no evil is committed and the worst evils—whether of destruction under nuclear war or of abandoning the duty to preserve liberty—are avoided. It is the fundamental moral intention of those who embrace deterrence that it should succeed in preventing these worse evils. Those who say that deterrence may fail are, of course, correct. But they do not, and cannot, show that the abandonment of deterrence will succeed either in preventing nuclear devastation or in preserving liberty. Their claim to a superior morality is, therefore, flawed in a fundamental respect.

58. An example may illustrate this. Had Japan had the capacity in 1945 to strike Sacramento and Portland as Hiroshima and Nagasaki were struck, one may doubt that President Truman would have ordered the flight of Enola Gay. In that case, a bloody amphibious assault on the Japanese mainland may have had to ensue, with far greater devastation and loss of life than actually occurred. Two points arise from this illustration. Without justifying the decision of President Truman, the first highlights the uses of deterrence from the point of view of the Japanese. The second highlights the awful destructive force even of modern conventional warfare. It was perhaps for this reason that the Second Vatican Council spoke of "modern scientific weapons" rather than explicitly of nuclear weapons.

59. Some find the moral flaw in deterrence in the choice of an evil means to attain a good end, calling this "consequentialism." They admit that the end of preventing nuclear war is good. But they hold it evil actually to intend to use any deterrent force lacking proportionality and moral discrimination in order to attain this end. This formulation contains, we judge, two flaws. First, the appropriate moral principle is not the relation of means to ends but the choice of a moral act which prevent greater evil. Clearly, it is a more moral choice and occasions lesser evil to hold a deterrent intention than it is to allow nuclear attack. Second, the nature of the intention in deterrence is different from intention in ordinary moral action. There is a paradox in its nature, such that the word intention is clearly being used equivocally.

It is true that on entering the arena of public policy and prudential judgment, moral actors who make public policy are bound primarily by the ethic of consequences rather than by the ethic of intentions. ("The road to hell is paved with good intentions.") Further, existing alternatives in a world of sin often present policy makers no alternative that is purely good, and oblige moral actors to choose the course that occasions the least evils. Nonetheless, the quality of moral intentions deserves moral scrutiny. Alas, the world "intention"

(like "threat") has many meanings. Since many moral issues cluster here, some detail is necessary.

In the carrying of a firearm, (a) a policeman, (b) a burglar, and (c) a murderer each has a different intention with respect to using the firearm. The policeman intends deterrence but no actual use unless governed by justice and the disciplines of his profession; the burglar intends only a threatening and conditioned use, outside justice; the murderer intends not a conditional but a willful use. These three are only a few of the many senses of "intention" and "threat". The intention in deterrence, for example, is analogous to case (a), not to (b), and certainly not to (c). In nuclear matters, we would further distinguish between a fundamental, secondary, and architectonic intention. Each of these must also be treated in turn.

The fundamental moral intention in nuclear deterrence is never to have to use the deterrent force. That this is in fact so is shown by the honorable discharge of military officers, after their term of duty expires, who have succeeded in their fundamental intention. Besides this fundamental intention, however deterrence requires by its nature a secondary intention. For the physical, material weapon is by itself no deterrent without the engagement of intellect and will on the part of the entire public which called it into being. It is also no deterrent if it fails to meet and to halt the will, intellect, and social organization of the particular opposing regime. A people which would be judged incapable of willing to use the deterrent would tempt an adversary to call its bluff. Thus, a secondary intention cannot be separated from deterrence. Without that secondary intention, distinct from the fundamental intention, a deterrent is no longer a deterrent but only an inert weapon backed up by a public lie.

60. As a counter to this, some might argue that the Soviet Union could never be sure whether a weapon held in readiness were backed by the secondary intention to use it. Given Soviet ideology about the perfidy of capitalist powers, however, Soviet leaders would be obliged to assume the worst. Arguing the casuistry of truth-telling may indeed permit leaders of one nation to allow the leaders of another, who have no title to know the truth, to be self-deceived. But probes and tests of real intentions cannot be ruled out. In nuclear matters, such uncertainty willfully created would seem to constitute immoral behavior.

61. The word intention has yet a third sense, beyond the two subjective intentions we have so far discussed. The Catholic moral tradition holds that human acts have objective intentionality apart from subjective dispositions. In order to construct and to maintain a nuclear deterrent force, a democratic society must generate a complex, highly rational, socially organized, objective intentionality. Citizens through their representatives vote funds for it; research and production are organized, elaborate systems of communication and command are maintained. The architectonic of objective political intention suffuses the entire process. This already is a sustained intention of a crucial sort. To be sure, many individuals must also be committed to their tasks to suffuse this objective intentionality with appropriate subjective dispositions. The latter are indispensable. But a society which possesses a deterrent also has an organized objective intention. In the case of the United States, individuals add to this objective intention subjective intentions which are both fundamental—that the deterrent succeed in never being used—and secondary—that the deterrent be held in readiness for use. To say that a nation may possess a deterrent but may not intend to use it is fulfilled by the fundamental intention but not by the objective intention and the secondary intention. To condemn the latter is to frustrate the former and to invite a host of greater evils.

62. Moral clarity in a nuclear age requires that governments not willfully allow cetain kinds of miscalculation to arise in the minds of other governments. While not every capability or intention or option needs to be—or should be—revealed, a basic and clear set of understandings is necessary. This requirement rules out bellicose threats as it rules out mere bluff. Public statements about nuclear policy must, therefore, be unambiguous and reasoned, restrained and understated. Leaders have sometimes erred in this matter. Communications links between adversaries should be swift, clear, unthreatening, and unambiguous, especially during times of stress. The record of the last thirty-seven years shows that this is difficult but possible.

63. A dilemma arises when some say that countervalue strategies are immoral in substance but preferable on grounds of economy and sufficiency; but that counterforce strategies, more moral in substance, are immoral because more dangerous. A similar dilemma arises when some say that making nuclear weapons smaller and more precise, so as to approximate the force of larger conventional weapons, thus reducing the moral problem of proportionality and indiscrimination, makes the use of nuclear weapons more thinkable and so should be avoided. If the use of both sorts of nuclear weapons is to be deterred, total reliance on one alone is likely to enlarge the options and temptations of an aggressor.

64. Similarly, some critics condemn the attainment by the U.S. of a "first strike" capability, while ignoring the fact that the Soviets already have, or very shortly will have, this capacity with respect to U.S. land-based delivery systems. By "first strike" capability is meant the capacity to destroy the opponent's delivery systems before they can be called into use. This the United States does not have, and has no plans to attain. The one-hundred MX missiles requested by Presidents Reagan and Carter (who requested 200) cannot possibly wipe out all Soviet land-based missiles. Since two warheads on each silo are believed to be required, the 1,398 Soviet land-based delivery systems cannot be threatened by the MX, for it would be suicide to strike some without destroying all. Meanwhile the existing 1,052 American silos *are* vulnerable to the Multiple-warheads of a fraction of the Soviet missile force. Since U.S. B-52s are not likely to penetrate Soviet defenses, a "first strike" by the Soviets may leave only submarine-launched missiles under U.S. command. To launch these would guarantee a second strike on U.S. cities. Given these capacities, the Soviets could, even without a first strike, hold U.S. forces immobilized and in checkmate, freeing Soviet conventional forces from restraint. Nuclear weapons do not have to be fired in order to exact surrender.

65. The reasons why the U.S. maintains a strategic triad—land-based, airborne, and submarine-borne delivery systems—are two: first to reduce the temptation of a simple "first strike" and, second, to prevent the President of the United States from facing only a single option, the command to destroy Soviet cities. Such an option would be suicidal for American cities. No president can be fairly placed in that position.

66. In short, given the nature of the Soviet leadership, its ideology, and its political culture, and recognizing the configuration of its own nuclear forces, we see no completely satisfactory position: neither abandonment of the deterrent, nor a deterrent strategy based upon counterforce, nor a deterrent based upon countervalue. Among these, we judge the best of the ambiguous but morally good options to reside in a combination of counterforce and countervalue deterrence. We uphold the fundamental intention of deterrence that no nuclear weapon ever be used. We uphold the secondary intention of being ready to use the deterrent within the narrowest feasible limits, as indispensable to making deterrence work. We reject the policy of national bluff which permits possession but does not permit its essential secondary intention. We discern no other way to defend the Constitution of the United States, to protect its institutions of liberty, and to prevent the most awful aggression against innocent peoples here and elsewhere. It would hardly be better for us if some other people bore this burden, but in any case there is none who can lift it from us. In due course, the Soviet Union may learn to prefer ways of peace aboard and ways of liberty at home—in which case, peace among nations may be possible. For this we labor and pray.

E. CONVENTIONAL WAR AND NUCLEAR WAR

67. Even should the spectre of nuclear war be lifted at last from the human race, we recognize the horrors of modern conventional warfare. The power and terrible accuracy of rocket-driven conventional arms, launched at great distances, became visible during the last days of World War II. These horrors have been magnified since, as exhibited in the Falkland Islands and elsewhere. In World War I, 15 million civilians died. In World War II, 51 million civilians died. In some 67 conventional wars since that time, millions of other civilians have died. It cannot be thought that an end to nuclear deterrence will necessarily usher in an era without war. Insofar as war springs from evil in the human heart, insofar as that evil is ineradicable except by the grace of God, and insofar as human beings can, and do, resist God's grace, we do not expect that war will ever be wholly eliminated from human history. Nonetheless, the dream of a world without war abides. Institutions of liberties and rights, peaceful competition and cooperative labors, and the conversion of every human heart are devoutly to be labored for. They cannot be said to have yet been attained. Like Christ, we see ahead the cross: Not our will, but Thine be done.

68. Distinguished strategists have argued that an end to nuclear deterrence raises the probabilities of conventional war on the part of the Soviet Union. This is because of the great superiority of Soviet conventional forces, wherever they should choose to mass them, on the Central German Plain or on the northern borders of the Middle East.[29] However this may be, we hold it to be a good worth sacrificing for to raise the capabilities of NATO forces in Europe and the Middle East to a level sufficient to deter any Soviet temptation to aggression. The editors of The Economist have worked out a study of the as-yet unmet requirements of such sufficiency. They hold that this goal is

costly, but attainable.[30] Economically, at least, it is feasible; whether political will for the sacrifices entailed is available is questionable. Still, the present weakness of NATO on the German plain now makes recurrence to defense with tactical nuclear weapons a necessary part of NATO strategy. To supplant this reliance on tactical nuclear weapons with a sufficient conventional deterrent seems to us both morally good and morally required. Even so, prudence requires that the nuclear deterrent must be held in reserve. Certainly, it will have to be so until the current imbalance in conventional forces is redressed. We urge speedy and generous cooperation to this end, even though welfare states naturally prefer to evade heavier expenditures except for social programs.

69. It has not been sufficiently recognized, in the U.S. and in Europe, that the people of the United States have made themselves hostage to an outbreak of war in Europe. Should such a war arise, and should a terrified Europe demand that tactical nuclear weapons be called into play (when, for example, Soviet troops had made a breakthrough across half of Germany), further nuclear escalation could not be ruled out, in which the Soviets would threaten the United States with nuclear destruction. To protect themselves from this possibility, the people of the United States might someday seek disengagement from the European theater. But this step, too, would have fateful consequences not only for Europe and the United States but for humankind. In this context, the cry for "No First Use" of tactical or other nuclear weapons has for some much appeal. Heeding such a cry, the United States might at first save itself. It is not likely to have done so for long. Until an adequate conventional deterrent is in place in Europe, we hold a pledge of "no first use" to be divisive and destabilizing. Perhaps most clearly among our differences, this conviction differentiates our judgment from that of the bishops' second draft. Since NATO forces are not designed for offensive use, the question arises only in the case of Soviet aggression. Deterrence of that aggression is the first moral imperative. When NATO conventional forces are able to present a sufficient deterrent without recourse to nuclear weapons, such a pledge would be in effect whether stated or not.

PART III—FACING THE FUTURE

70. We do not consider the present situation of nuclear deterrence ideal; we consider it a moral choice involving the lesser evil. When we look to the future, we see both creative possibilities and even greater dangers. The greatest danger is spiritual. Democratic peoples find protracted danger and sacrifice more onerous by far than do the leaders of totalitarian states. The latter benefit by military mobilization; the former find it a threat to democracy itself. Again, successful deterrence buries the evidence that brought it into play to begin with, and a free people must take up the argument ever anew. Thus, hope for peace nourishes illusions in a democratic people, eternal vigilance being the price of liberty most difficult to pay. That is why today broad popular discussion, argument and consensus are indispensable to the preservation of liberty. The military strategy of the United States and its allies depends upon popular understanding and popular support.

71. In this respect, every citizen might well wish that our lives were not burdened, as they are, by sacrifices for defense. Many cannot help wishing that nuclear dangers might simply vanish. Indeed, much time and energy is well spent trying to imagine prudent steps to diminish the present danger.

72. Many citizens have hoped that a mutually verifiable nuclear freeze by both the U.S. and the U.S.S.R. would offer surcease. We judge that the hope that the Soviets will consent to on-site verification is remote. We recognize that verification by technical means such as satellite observation and electronic monitoring is subject to deception and disinformation. Moreover, there are four reasons for believing that a freeze now would be destabilizing. First, the Soviet nuclear force already holds two destabilizing advantages, both in its "first strike" capacity concerning the U.S. land-based Minutemen and and in its targeting of European capitals with SS-20s. Similarly, the trend lines of new Soviet developments are up, whereas the process of strengthening U.S. and NATO deterrent forces is appropriately democratic and slow. Second, a freeze at present levels does not at all diminish the present danger; it freezes it in place. This danger includes the rapidly approaching obsolescence of U.S. delivery systems and the relative youth of Soviet systems. Third, we note that a "verifiable" freeze—including a freeze upon nuclear research and development (which can go on inside buildings anywhere)—would require a massive regimen of verification beyond anything remotely sustainable at present. Finally, Soviet officials have begun offering schemes of reduction, below levels envisaged by a mere freeze. For these reasons, we judge that a negotiated freeze may well be inferior to negotiated reductions, and thus cannot be insisted on by moralists. Such concrete judgment must finally be resolved democratically, by duly constituted governments amid reasoned public debate, in which good people disagree.

73. Since the Soviets have several forms of superiority at present—not necessarily in every respect, but in some important ones—it is obviously difficult for Soviet leaders to surrender advantages they have amassed through great sacrifices on the part of their peoples. On the other hand, Soviet leaders have reason to fear the greater inventiveness of free societies. If American and NATO resolve were now to falter, Soviet leaders would have reason to continue their present successful strategy. If, on the contrary, they must face the fact that the U.S. and NATO are determined to maintain deterrence through new inventions, they may conclude that they must alter their course. The linchpin of preventing war is Soviet will. Soviet intentions, strategies, weapons development and procurement follow from Soviet will. At the present moment, we judge that negotiations for reductions in both strategic and theater nuclear weapons coincide with real interests on both sides. Such negotiations, however fragile and risky, as history shows, have a reasonable prospect of success, provided that the Soviets perceive greater risks in the determination of Western nations to rectify the current imbalance. Such an opportunity must be pursued, despite the sorry record of arms negotiations in the past. Caution is required since negotiations for the sake of negotiations may occasion greater evils. Criteria distinguishing moral from less than moral negotiations are required. Many of our current difficulties arise out of judgments made by American negotiators in the past. The current emphasis on large offensive land-based missiles, for example, and on offensive rather than defensive weapons, arose from past negotiations.[31] Nonetheless, a change in Soviet will, through negotiations if possible, is to be pursued with determination.

74. The question of defensive weapons raises further technological possibilities in the future. It is not our role to recommend particular weapons systems, but it is important to recall that technology does not stand still and that the future is not determined. Future developments in satellite detection systems, matched with non-nuclear satellite weapons, could enable defenders to destroy ballistic weapons shortly after takeoff. Long-range ballistic missiles would, therefore, be rendered obsolete. Some experts hold that current technology affords just such a defensive possibility now, others believe this will not be feasible until well into the future, when laser weapons are available. In any case, this is a non-nuclear defense. As a deterrent system, it does not rely on counterforce or countervalue but on non-nuclear defensive instruments. Not only does its moral character seem to be superior, but its implementation would seem to remove the threat of land-based missile systems. While it is not our role here to pass judgment for or against this or other particular systems, we do wish to note that the present situation may one day be lifted from the human race. The human race is neither static nor foredoomed.

75. For most of its history, the human race did not live under nuclear threat; there is nothing inevitable or necessary about the continuance of that threat. Efforts to remove it must be sound, prudent, and wise, lest they result in a deterioration of the present situation into something even worse. But eventually to life such a threat is surely within the reach of sustained moral efforts. It is the vocation of Christians and Jews not only to reflect on the world but to change it, bringing it closer to the outlines of the Kingdom promised in both the Old and the New Testaments. It is the vocation of American citizens, civilian and military, called by the Seal of the United States to evoke *Novus Ordo Seclorum*, a new order of liberty and justice for all, to extend the boundaries of liberty and justice by peaceful means, through the consent of the governed. Although not without failures and flaws, the purpose of the United States foreign and military policy since World War II has been to defend and to extend such liberties, on which alone true peace can rest. We cherish the hope that even our adversaries will one day experience liberty for all their peoples, and join with us in the cooperative task of bringing all peoples on earth to a fuller measure of human development, in peace, liberty, and justice for all humankind, fulfilling thereby the will of God on earth. It is in seeking to follow His Will that we have, to the best of our ability, formulated these arguments for the respectful consideration of our fellow Catholics, our fellow citizens, and all persons of good will throughout the world. May God favor this purpose. Though His ways be dark His constancy abides forever.

NOTES

[1] See Maritain, Appendix, "The Structure of Action," *Integral Humanism*, trans. Joseph W. Evans (New York: Scribner's, 1968), pp. 291-308. Addressing the Society of Jesus on February 27, 1982, John Paul II said: "As I said on 2 July 1980 in Rio de Janeiro, priestly service 'if it is really to be faithful to itself, is essentially and *par excellence* spiritual. This must be even more emphasized in our times against the many tendencies to secularize the priest's work by reducing it to a purely philan-

thropic function. He is not a medical doctor, a social worker, a politician, or a trade unionist. In certain cases, no doubt, the priest can help, but in a supplementary fashion—as in the past priests have done so with remarkable success. Today, however, these services are admirably rendered by other members of society, whilst our service is always more precisely and specifically spiritual.' " (*Allocution of Pope John Paul II to Jesuit Provincial Superiors.*) In his follow up Letter of March 25, 1982 to the entire Society of Jesus, Father Paolo Dezza applied the prescriptions of the Holy Father, while speaking of the recommendations presented by Pope Paul VI: "The second recommendation was not to confuse roles proper to priests with those proper to lay people. In the economic, social and political fields, the role of the priest is to educate toward justice and social commitment, and to encourage lay people to carry out their duties fully without replacing them in these. The priest's role is to indicate Christian principles concerning economic, social and political life; to denounce injustice, to exhort people to work with the improvement or reform of institutions, to 'expound the social doctrine of the Church, not so much as to find solutions for concrete social and political problems, which is the task of lay people, but to help them reflect on the principles which should guide the search for such solutions.' [19] Quoted in ibid., p. 38.

[20] "It is often stated or assumed that the quantity of nuclear weapons possessed by the United States has steadily increased and that we now possess more nuclear weapons than ever. This is not so." Fact Sheet No. 227-82, Office of Assistant Secretary of Defense (Public Affairs), June 1, 1982. Although the exact number of nuclear warheads is classified, a careful student can deduce that, while the number of strategic warheads has remained relatively steady, the number of tactical warheads has declined, resulting in an overall reduction in the totality of the U. S. stockpile since 1965.

[21] The Soviet ICBM force currently numbers 1,398 missiles, compared to 1,049 for the U.S., and possesses greater aggregate throw-weight than the U.S. missile force. The latest generation of Soviet missiles are more accurate than their American counterparts, and the smallest Soviet MIRVd warheads are almost twice as large as the largest U.S. MIRVd warheads. See *The Military Balance 1982-83*, pp. 112-113; and Committee on the Present danger, *Has America Become Number 2?* (Washington, D.C., 1982), p. 16.

[22] Admiral Thomas Hayward, the Chief of Naval Operations, testified before the Senate Armed Services Committee in 1979: "With respect to essential equivalence it is my view that without any question the Soviets will have a first-strike capability over the next few years. If that is not a loss of essential equivalence, I do not know what is . . . ." *Military Implications of the Treaty on the Limitation of Strategic Arms and Protocol Thereto*, Hearings, Senate Armed Services Committee, Part I, p. 177.

[23] After chronicling the various unsuccessful efforts at arms control in this century, historian Barbara Tuchman says: "I have engaged in this long and dreary survey in order to show that control of war in the form of disarmament or limitation of arms has been a fruitless effort." Part of the reason why this is the case is suggested by the following observation by Salvador de Madariaga, chairman of the League of Nations Disarmament Commission and Disarmament Conference, in 1973, which Tuchman quotes: "The trouble with disarmament was (and still is) that the problem of war is tackled upside down and at the wrong end . . . . Nations don't distrust each other because they are armed; they are armed because they distrust each other. And therefore to want disarmament before a minimum of common agreement on fundamentals is as absured as to want people to go undressed in winter." Barbara W. Tuchman, "The Alternative to Arms Control," *New York Times Magazine*, April 18, 1982, pp. 93. 98. See also theodore Draper, "How Not to Think About Nuclear War," *New York Review of Books*, SMALL July 15, 1982, pp. 35-43. "Once different weapons and even different weapons systems must be evaluated and balanced off against each other, negotiations inevitably degenerate into endlessly futile haggling sessions, brought to a close only by agreement on a crazy quilt of trade-offs and loopholes. Negotiations of this sort become more important for the mere consolation that the deadly antagonists are negotiating than for anything the negotiations may bring forth . . . . Short of abolishing all nuclear weapons forever and everywhere, deterrence is all we have" (p. 42).

[24] Modernization of the Soviet ICBM force has focused on the SS-17, SS-18, and SS-19 missiles; during the last decade, over half of Soviet silos have been rebuilt to house these weapons. See Department of Defense, *Soviet Military Power* (Washington, D.C.: U.S. Government Printing Office, 1981), p. 24. Of particular concern is the giant SS-18, which carries a payload large enough and accurate enough to threaten U.S. ICBMs in their silos. The SS-18, of which 308 have been deployed, dwarfs the proposed MX: it is 120 feet high, 10 feet in diameter, has a throw-weight of 16,000 pounds, and can carry up to 10 warheads. By comparison, the MX, which cannot be deployed before 1986, is 72 feet in length, about 8 feet in diameter, possesses a throw-weight of about 8,000 pounds, and can carry 6-10 warheads. The SS-19 is comparable in these respects to the MX. See *The Military Balance 1982-83*, p. 113 and Michael B. Donley, ed., *The Salt Handbook* (Washington, D.C.: The Heritage Foundation, 1979), pp. 62, 75. The Committee on the Present Danger notes that "in only the last five years, the number of deployed Soviet IRBM (Intermediate Range Ballistic Missile) warheads targeted on NATO—Europe and Asia—has more than doubled." *Has America Become No. 2?*, p. 21. The principal threat is the Soviet SS-20: "The SS-20, with three MIRVs per missile and significant improvements in survivability, mobility, responsiveness, and accuracy, is a far more capable weapon than the older SS-4 and SS-5 missiles . . . . [it] can cover the entire European theatre and provide significant coverage of other areas." Organization of the Joint Chiefs of Staff, *United States Military Posture for FY 1983*, p. 27.

[25] Charles Mohr, "Drop in U.S. Arms Spurs Debate on Military Policy," *New York Times*, October 24, 1982, p. 56. For spending on nuclear forces as a percentage of the military budget for 1962-1982, see Kevin N. Lewis, *The Economics of SALT Revisited* SMALL (Santa Monica, Calif.: Rand Corp., 1979), p. 10, and Caspar W. Weinberger, *Annual Report to Congress, Fiscal Year 1983*, p. A-1.

[26] For the number of U.S. military personnel in NATO, see *Defense/81*, Special Almanac Issue (September 1981): 22. The cost of the U.S. commitment to NATO is given in the remarks of Senator Ted Stevens on the continuing appropriations legislation for fiscal year 1983. See U.S. Congress, Senate, *Congressional Record*, 97th Cong., 2d. sess., December 16, 1982, 149, pt. 3: S15138. The budget figure for nuclear forces includes both those over which the Department of Defense has jurisdiction and those which the Department of Energy supervises, and covers all personnel, operation and maintenance, and warhead procurement costs, strategic as well as tactical/theater.

[27] See *The Military Balance 1982-83*, pp. 112-113, 140; and *Soviet Military Power*, pp. 55-56. The data supplied by these sources indicates that about 62 percent of U.S. strategic warheads are on systems with an initial operational capability prior to 1972, whereas 70 percent of Soviet strategic warheads are on systems initially deployed since 1977.

[28] *The Military Balance 1982-83*, pp. 132-33. For figures on the U.S. Navy see *Annual Report to Congress, Fiscal Year 1983*, p. III-20. For the Soviet Navy, see *Soviet Military Power*, p. 40. Both sets of figures include attack submarines, major surface combat vessels and minor surface combatants (corvettes, patrol craft, minesweepers, amphibious ships, and support craft). The U.S. figure as given in the *Report to Congress* does not include ballistic missile submarines; the Soviet figure does. Adding this figure (31) to the U.S. count gives 545 ships.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DAUB (at the request of Mr. MICHEL), for today, on account of official business.

Mr. FORD of Michigan (at the request of Mr. WRIGHT), for today, on account of a death in the family.

Mr. COLEMAN of Texas (at the request of Mr. WRIGHT), for today, on account of official business.

Ms. MIKULSKI (at the request of Mr. WRIGHT), for today, on account of official business.

Mr. HEFTEL (at the request of Mr. WRIGHT), for an indefinite period, on account of medical reasons.

Mr. EMERSON (at the requests of Mr. MICHEL), for today, on account of inspecting flood damage in the Eighth Congressional District, Missouri.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BATEMAN) to revise and extend their remarks and include extraneous material:)

Mr. WALKER, for 15 minutes, today.

Mr. BADHAM, for 15 minutes, today.

(The following Members (at the request of Mr. CORRADA) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. MACKAY, for 5 minutes, today.

Ms. FERRARO, for 60 minutes, on May 11.

Mr. MITCHELL, for 60 minutes, on May 10.

Mr. LUNDINE, for 60 minutes, on May 12.

Mr. RICHARDSON, for 60 minutes, on May 13.

Mr. GARCIA, for 30 minutes, on May 12.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. WEBER, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $4,226.25.

(The following Members (at the request of Mr. BATEMAN) and to include extraneous matter:)

Mr. LEWIS of Florida.
Mr. GINGRICH.
Mrs. MARTIN of Illinois.
Mr. DENNY SMITH.
Mr. BROOMFIELD.
Mr. ERLENBORN.
Mr. KEMP.
Mr. LEWIS of California in three instances.
Mr. GILMAN.
Mr. WEBER.
Mr. GREEN.
Mr. MARRIOTT.

(The following Members (at the request of Mr. CORRADA) and to include extraneous matter:)

Mr. TRAXLER in two instances.
Mr. HOYER.
Mr. RODINO.
Mr. LANTOS.
Mr. SKELTON.
Mr. WAXMAN.
Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. FAUNTROY.
Mr. WYDEN.
Mr. GARCIA.
Mr. DERRICK.
Mr. TORRICELLI.
Mr. MARKEY.
Mr. HUBBARD.
Mrs. COLLINS.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.

SENATE BILL AND JOINT RESOLUTIONS REFERRED

A bill and joint resolutions of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 287. An act to establish the Harry S Truman National Historic Site in the State of Missouri, and for other purposes; to the Committee on Interior and Insular Affairs.

S.J. Res. 67. Joint resolution to designate the week of September 25, 1983, through October 1, 1983, as "National Respiratory Therapy Week"; to the Committee on Post Office and Civil Service.

S.J. Res. 94. Joint resolution to authorize and request the President to designate May 8, 1983, to June 19, 1983, as "Family Reunion Month"; to the Committee on Post Office and Civil Service.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 219. Joint resolution declaring the support of the U.S. Government for efforts of the U.S. Soccer Federation to bring the World Cup to the United States in 1986, designating the Secretary of Commerce as the official representative of the U.S. Government of the Federation Internationale de Football Association, and for other purposes.

ADJOURNMENT

Mr. CORRADA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 50 minutes p.m.), the House adjourned until tomorrow, Tuesday, May 10, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1086. A letter from the Acting Comptroller General of the United States, transmitting a special message on deferral of budget authority for the strategic petroleum reserve petroleum account, pursuant to section 1015(a) of Public Law 93-344; to the Committee on Appropriations.

1087. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend chapter 157 of title 10, United States Code, to authorize the Secretary of Defense to provide transportation for next of kin of certain persons who are unaccounted for, to attend annual national meetings sponsored by the National League of Families of American Prisoners and Missing in Southeast Asia; to the Committee on Armed Services.

1088. A letter from the Secretary of Energy, transmitting notice of a delay in the submission of the national energy policy plan, pursuant to title VIII of the Department of Energy Organization Act; to the Committee on Energy and Commerce.

1089. A letter from the Secretary of Health and Human Services, transmitting the 1982 annual report of compliance with the Consumer-Patient Radiation Health and Safety Act of 1981, pursuant to section 981(d) of Public Law 97-35; to the Committee on Energy and Commerce.

1090. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 5-29, "D.C. Revenue Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1091. A letter from the Chairman, District of Columbia, transmitting D.C. Act 5-25, "D.C. Retirement Board First Regulations Adoption Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1092. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 5-26, "Medicare Supplement Insurance Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1093. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 5-27, "Advisory Neighborhood Commission Boundaries Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1094. A letter from the Secretary of the Interior, transmitting the annual report covering calendar year 1982 on the implementation of the Alaska Native Claims Settlement Act, pursuant to section 23 of the act; to the Committee on Interior and Insular Affairs.

1095. A letter from the Acting Assistant Secretary of the Interior (Indian Affairs), transmitting a proposed plan for the use and distribution of the judgment funds awarded to the Seneca-Cayuga Tribe of Oklahoma et al. by the Indian Claims Commission in dockets 341-A and 341-B, pursuant to section 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

1096. A letter from the Chairman, International Trade Commission, transmitting a draft of proposed legislation to provide authorization of appropriations for the U.S. International Trade Commission for fiscal year 1985; to the Committee on Ways and Means.

1097. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to require that customs duties determined to be due upon a liquidation or reliquidation are due upon that date, and for the other purposes; to the Committee on Ways and Means.

1098. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to implement the Customs Convention on Containers, 1972; to the Committee on Ways and Means.

1099. A letter from the Administrator, Food and Nutrition Service, transmitting a revision to the projected cost savings of draft legislation, "The Child Nutrition Amendments of 1983," submitted on April 21, 1983; jointly, to the Committees on Agriculture and Education and Labor.

1100. A letter from the Director, Office of Management and Budget, transmitting a draft of proposed legislation to omit cost-of-living adjustments in certain Federal retirement and disability programs for a specified period of time, and for other purposes; jointly, to the Committees on Post Office and Civil Service, Armed Services, and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HUGHES: Committee on the Judiciary. H.R. 2174. A bill to amend title 18 of the United States Code to prohibit certain tampering with consumer products; with amendments (Rept. No. 98-93). Referring to the Committee of the Whole House on the State of the Union.

Mr. FUQUA: Committee on Science and Technology. H.R. 2514. A bill to enhance the transfer of technical information to industry, business, and the general public by amending the act of September 9, 1950 (15 U.S.C. 1151 et seq.), to establish a technical information clearinghouse fund, and for other purposes (Rept. No. 98-94, Pt. I). Ordered to be printed.

Mr. FUQUA: Committee on Science and Technology. H.R. 2513. A bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1984, and for other purposes; with amendments (Rept. No. 98-95). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WAXMAN:

H.R. 2934. A bill to amend the Public Health Service Act to extend through fiscal year 1985 the health planning authority under that act and to repeal that authority September 30, 1986, and for other purposes; to the Committee on Energy and Commerce.

By Mr. SHELBY (for himself, Mr. MADIGAN, and Mr. BROYHILL):

H.R. 2935: A bill to amend the Public Health Service Act to replace title XV of such act with a block grant to States for health planning; to the Committee on Energy and Commerce.

By Mr. APPLEGATE (for himself, Mr. MONTGOMERY, Mr. HAMMERSCHMIDT, Mr. SAM B. HALL, JR., Mr. MCEWEN, Mr. DASCHLE, Mr. WYLIE, Mr. MARTINEZ, Mr. DENNY SMITH, Mr. LEATH of Texas, Mr. BURTON, Mr. SHELBY, Mr. MICA, Mr. DOWDY of Mississippi, Mr. HILLIS, Mr. EDWARDS of California, Mr. SOLOMON, Mr. EDGAR, Mr. SMITH of New Jersey, Mr. EVANS of Illinois, Mr. SUNDQUIST, Ms. KAPTUR, Mr. BILIRAKIS, Mr. HARRISON, Mrs. JOHNSON, Mr. MOLLOHAN, Mr. ROWLAND, Mr. RICHARDSON, Mr. HEFNER, Mr. JENKINS, Mr. SPENCE, and Mr. ROGERS):

H.R. 2936. A bill to amend title 38, United States Code, to increase the authorized number of members of the Board of Veterans' Appeals in the Veterans' Administration, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. APPLEGATE (for himself, Mr. MONTGOMERY, Mr. HAMMERSCHMIDT, Mr. SAM B. HALL, JR., Mr. MCEWEN, Mr. DASCHLE, Mr. WYLIE, Mr. MARTINEZ, Mr. DENNY SMITH, Mr. LEATH of Texas, Mr. BURTON, Mr. SHELBY, Mr. MICA, Mr. DOWDY of Mississippi, Mr. HILLIS, Mr. EDWARDS of California, Mr. SMITH of New Jersey, Mr. EDGAR, Mr. SUNDQUIST, Mr. EVANS of Illinois, Mr. BILIRAKIS, Ms. KAPTUR, Mrs. JOHNSON, Mr. HARRISON, Mr. MOLLOHAN, Mr. ROWLAND, Mr. RICHARDSON, Mr. HEFNER, Mr. JENKINS, Mr. SPENCE, and Mr. ROGERS).

H.R. 2937. A bill to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans, to increase the rates of dependency and indemnity compensation for surviving spouses and children, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. DONNELLY:

H.R. 2938. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for tuition and fees for elementary and secondary education; to the Committee on Ways and Means.

By Mr. DOWNEY of New York:

H.R. 2939. A bill to expand the eligibility of handicapped and other institutionalized individuals for training provided under the Job Training Partnership Act; to the Committee on Education and Labor.

By Mr. ERLENBORN (for himself, Mr. PACKARD, and Mr. NIELSON of Utah):

H.R. 2940. A bill to consolidate existing Federal vocational and adult education programs, to simplify requirements for States and other recipients participating in Federal vocational and adult education programs, and to authorize certain State and national programs for the development of vocational skills and basic skills in the work force that will improve productivity and economic growth, and for other purposes; to the Committee on Education and Labor.

By Mr. GARCIA (for himself, Mr. ROE, Mr. STOKES, Mr. CORRADA, Mr. BROWN of California, Mr. TOWNS, Mr. TORRES, Mr. CROCKETT, Mr. HERTEL of Michigan, Mr. MITCHELL, and Mr. ACKERMAN):

H.R. 2941. A bill to amend the Internal Revenue Code of 1954 to provide a refundable income tax credit for expenses incurred by an employer in providing remedial education to employees; to the Committee on Ways and Means.

By Mr. GEKAS:

H.R. 2942. A bill to provide for a verdict of guilty but mentally ill in the Federal courts; to the Committee on the Judiciary.

By Mr. KOGOVSEK:

H.R. 2943. A bill to authorize appropriations for grants to the Washington Workshop Foundation; to the Committee on Education and Labor.

By Mr. LEHMAN of Florida:

H.R. 2944. A bill to amend the Controlled Substances Act to provide penalties for persons who obtain or attempt to obtain narcotics or other controlled substances from a retail pharmacy by force and violence, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MCNULTY (for himself, Mr. OBERSTAR, Mr. WILLIAMS of Montana, and Mr. WEAVER):

H.R. 2945. A bill to prohibit the Export-Import Bank of the United States from financing the establishment or enhancement of the capacity of a foreign country to produce certain commodities in competition with, or similar to, U.S.-produced commodities; to the Committee on Banking, Finance and Urban Affairs.

H.R. 2946. A bill to amend the Foreign Assistance Act of 1961 to prohibit the furnishing of assistance to establish or enhance the capacity of a foreign country to produce certain commodities in competition with, or similar to, U.S.-produced commodities, and for other purposes; jointly, to the Committees on Foreign Affairs and Banking, Finance and Urban Affairs.

By Mr. PEASE:

H.R. 2947. A bill to provide for the temporary suspension of duty on the importation of fluorspar; to the Committee on Ways and Means.

By Mr. SHELBY (for himself, Mr. MONTGOMERY, Mr. SMITH of New Jersey, Mr. APPLEGATE, Mr. SUNDQUIST, Mr. MOLLOHAN, Mr. BILIRAKIS, Mr. MICA, Mr. RICHARDSON, Mr. SOLOMON, Mr. EDWARDS of California, Mr. EDGAR, Mr. SAM B. HALL, JR., Mr. DASCHLE, Mr. MARTINEZ, Mr. EVANS of Illinois, Ms. KAPTUR, Mr. PENNY, Mr. ROWLAND, Mr. HEFNER, and Mr. JENKINS):

H.R. 2948. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to provide mortgage assistance to veterans with loans guaranteed by the Veterans' Administration in order to avoid foreclosure of such loans and for other purposes; to the Committee on Veterans' Affairs.

By Mrs. SMITH of Nebraska:

H.R. 2949. A bill to exclude agricultural commodities from certain requirements that such agricultural commodities be transported on privately owned U.S.-flag commercial vessels and vessels of the United States; to the Committee on Merchant Marine and Fisheries.

By Mr. SOLOMON:

H.R. 2950. A bill to amend the Military Selective Service Act to enhance enforcement of the registration requirement under that act; jointly, to the Committees on Armed Services and Education and Labor.

By Mr. TAUKE (for himself, Mr. LEACH of Iowa, Mrs. MARTIN of Illinois, Mr. EVANS of Iowa, Mr. DURBIN, and Mr. EVANS of Illinois):

H.R. 2951. A bill to restrict the authority of the Chief of Engineers to terminate certain leases on the upper Mississippi River; to the Committee on Public Works and Transportation.

By Mr. WIRTH:

H.R. 2952. A bill to authorize appropriations for the Federal Communications Commission for fiscal years 1984 and 1985; to the Committee on Energy and Commerce.

H.R. 2953. A bill to authorize supplemental appropriations for public broadcasting; to the Committee on Energy and Commerce.

By Mr. WON PAT (for himself, Mr. LAGOMARSINO, Mr. DE LUGO, Mr. CORRADA, Mr. KILDEE, and Mr. SUNIA):

H.R. 2954. A bill to establish an Insular Areas Commission on Federal Laws to study the application of the laws of the United States to Guam, the Virgin Islands, and American Samoa; to the Committee on Interior and Insular Affairs.

H.R. 2955. A bill to facilitate economic development in the territories of the United States through the mobilization of private capital and skills and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WYDEN:

H.R. 2956. A bill to permit group health care payors to provide for alternative rates with providers of health care; to the Committee on Energy and Commerce.

By Mrs. MARTIN of Illinois:

H.J. Res. 262. Joint resolution to clarify and reaffirm that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services; to the Committee on Government Operations.

By Mr. ALBOSTA:

H. Res. 186. Resolution expressing the sense of the House of Representatives with respect to American workers being taxed on a portion of their employer-paid health insurance benefits; to the Committee on Ways and Means.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

113. By the SPEAKER: Memorial of the General Assembly of the State of Indiana, relative to election returns; to the Committee on Energy and Commerce.

114. Also, memorial of the Legislature of the State of Maine, relative to acid precipitation; to the Committee on Energy and Commerce.

115. Also, memorial of the House of Representatives of the Marianas Commonwealth, relative to a freeze in nuclear arms; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 42: Mr. CORCORAN.

H.R. 81: Mr. CONYERS.

H.R. 82: Mr. CONYERS.

H.R. 178: Mr. CHAPPELL and Mr. SHUMWAY.

H.R. 887: Mr. SHUMWAY.

H.R. 924: Mr. SIMON and Mr. NEAL.

H.R. 1010: Mr. VANDERGRIFF.

H.R. 1039: Mr. HERTEL of Michigan, Mr. LANTOS, Mr. MITCHELL, Mr. NEAL, Ms. OAKAR, Mr. SCHEUER, Mr. SOLARZ, Mr. YATRON, and Mr. YOUNG of Alaska.

H.R. 1049: Mr. RUSSO.

H.R. 1077: Mr. KRAMER, Mr. KOGOVSEK, and Mr. STENHOLM.

H.R. 1176: Mr. CHENEY, Mr. COATS, Mr. SIMON, Mr. WAXMAN, Mr. LEVINE of California, Mr. HANSEN of Utah, Mr. ARCHER, Mr. ANDREWS of Texas, Mr. MCKERNAN, Mr. DEWINE, Mr. MCCOLLUM, and Mr. WYLIE.

H.R. 1244: Mr. HOWARD, Mr. APPLEGATE, Mr. BORSKI, Mr. BOSCO, Mr. CLARKE, Mrs. HALL of Indiana, Mr. KOLTER, Mr. TOWNS, and Mr. WISE.

H.R. 1493: Mr. ALBOSTA, Mrs. BYRON, Mr. CAMPBELL, Mr. DANIEL B. CRANE, Mr. DAVIS, Mr. DICKINSON, Mr. FRANKLIN, Mr. GRAMM, Mr. HAMMERSCHMIDT, Mr. HUBBARD, Mr. KRAMER, Mr. LEATH of Texas, Mr. MORRISON of Washington, Mr. NIELSON of Utah, Mr. PACKARD, Mr. PAUL, Mr. ROGERS, Mr. SHUMWAY, Mr. SNYDER, Mrs. VUCANOVICH, Mr. WILLIAMS of Ohio, Mr. WILSON, and Mr. HILER.

H.R. 1497: Mr. MCCLOSKEY.

H.R. 1604: Mr. LIVINGSTON.

H.R. 1624: Mr. HORTON and Mr. MARTIN of North Carolina.

H.R. 1752: Mr. RANGEL, Ms. FERRARO, Mr. DOWNEY of New York, and Mr. ACKERMAN.

H.R. 1883: Mr. FORD of Michigan.

H.R. 1976: Mr. SCHEUER, Mr. ROTH, Mr. ECKART, Mr. SAWYER, Mr. JACOBS, Mr. OWENS, Mr. KILDEE, Mr. CHAPPIE, Mr. MRAZEK, Mr. MCKINNEY, Mr. FEIGHAN, Mr. DANNEMEYER, Mr. SENSENBRENNER, Mr. NIELSON of Utah, Mr. LAFALCE, Ms. SNOWE, Mr. CONYERS, Mr. LUNGREN, Mr. EDGAR, Mr. HALL of Ohio, Mr. BEREUTER, Mr. CARPER, and Mr. MARRIOTT.

H.R. 2053: Mr. CLARKE and Mr. HORTON.

H.R. 2099: Mr. MITCHELL, Mr. MORRISON of Connecticut, Mr. MORRISON of Washington, and Mrs. HOLT.

H.R. 2100: Mr. MORRISON of Connecticut, Mr. OWENS, Mr. CLINGER, and Mr. FORD of Tennessee.

H.R. 2118: Mr. FUQUA.

H.R. 2174: Mr. GEKAS, Mr. CAMPBELL, Mr. PEASE, Mr. PORTER, and Mr. MONTGOMERY.

H.R. 2183: Mr. MCGRATH, Ms. KAPTUR, Mr. TOWNS, Mr. FAZIO, Mr. MITCHELL, Mr. CLINGER, Mr. HERTEL of Michigan, and Mr. SIMON.

H.R. 2191: Mr. YATRON, Mr. NEAL, Mr. EDGAR, Mr. FOGLIETTA, Mr. MITCHELL, Mr. WOLPE, Mr. WIRTH, Mr. TAUKE, and Mr. TORRICELLI.

H.R. 2193: Mr. GEKAS.

H.R. 2204: Mr. RANGEL, Mr. CROCKETT, Ms. FERRARO, Mr. MORRISON of Connecticut, Mr. HERTEL of Michigan, Mr. WORTLEY, and Mr. SIMON.

H.R. 2250: Mr. LOWERY of California, Mr. LEWIS of California, Mr. PORTER, Mr. MCCANDLESS, and Mr. MARKEY.

H.R. 2372: Mr. OWENS, Mr. ANDERSON, and Mr. BATEMAN.

H.R. 2483: Mr. MOAKLEY, Mr. FORD of Tennessee, Mr. WORTLEY, Mr. MCKINNEY, Mr. STOKES, Mr. SUNIA, Mr. SMITH of New Jersey, and Mr. FLORIO.

H.R. 2490: Mr. RUSSO, Mr. PURSELL, Mr. EVANS of Illinois, Mr. GARCIA, Mr. KOSTMAYER, and Mr. WISE.

H.R. 2564: Mr. BEVILL, Mr. GLICKMAN, Mr. LOWERY of California, and Mr. LAGOMARSINO.

H.R. 2568: Mr. ROE, Mr. BROWN of Colorado, Mr. SIMON, Mr. SMITH of New Jersey, Mr. OBERSTAR, Mr. FEIGHAN, Mr. FRANK, Mr. MARKEY, Mr. HORTON, Mr. CORRADA, Mr. SOLARZ, Mr. SCHUMER, and Mr. ACKERMAN.

H.R. 2601: Mr. SENSENBRENNER, Mr. KASICH, Mr. SUNIA, Mr. HALL of Ohio, and Mr. LAGOMARSINO.

H.R. 2701: Mr. ROE, Mr. LEHMAN of Florida, Mr. SAM B. HALL, JR., Mr. MURTHA, Mr. WON PAT, Mr. RODINO, Mr. FAUNTROY, Mr. FORSYTHE, Mr. FASCELL, Mr. ADDABBO, Mr. DWYER of New Jersey, Mr. GAYDOS, Mr. HUGHES, Mr. BOSCO, Mr. MITCHELL, Mr. BONIOR of Michigan, Mr. CROCKETT, Mr. BEILENSON, Mr. EDGAR, Mr. SABO, Mrs. BOXER, Mr. HORTON, Mr. MORRISON of Connecticut, Mr. RATCHFORD, Mr. HERTEL of Michigan, Mr. SIMON, and Mr. SENSENBRENNER.

H.R. 2721: Mr. RICHARDSON, Mr. LENT, Mr. RITTER, Mr. JEFFORDS, and Mr. PATTERSON.

H.R. 2732: Mr. COATS, Mr. WEBER, Mr. DANIEL, Mr. BLILEY, Mr. HILER, Mr. WYLIE, Mr. FRENZEL, Mr. BURTON, and Mr. GEKAS.

H.R. 2759: Mr. LOWERY of California, Mr. JACOBS, Mr. KINDNESS, Mr. DE LA GARZA, Mr. FORSYTHE, Mr. WILSON, Mr. JENKINS, Mr. MACK, and Mr. HUTTO.

H.J. Res. 153: Mr. OWENS and Mr. FRANK.

H.J. Res. 207: Mr. MCKINNEY, Mr. HOYER, Mr. O'BRIEN, Mr. COUGHLIN, and Mr. COYNE.

H.J. Res. 215: Mr. TAUKE.

H.J. Res. 226: Mr. FASCELL, Mr. TOWNS, Mr. LEHMAN of Florida, Mr. BERMAN, Mr. FUQUA, Mr. GREEN, Mr. O'BRIEN, Mr. BOUCHER, Mr. RAHALL, Mr. VANDER JAGT, Mr. GONZALEZ, Mr. GUARINI, Mr. KASICH, Ms. FERRARO, Mr. MATSUI, Mr. MOAKLEY, Mr. FAZIO, Mr. DANIEL, Mr. SIMON, Mr. WIRTH, Mr. SUNIA, Ms. OAKAR, Mr. PRITCHARD, Mr. MINISH, Mr. WON PAT, Mr. BONIOR of Michigan, Ms. MIKULSKI, Mr. RATCHFORD, Mr. CLAY, Mr. SHELBY, Mr. DUNCAN, Mr. NELSON of Florida, Mr. RANGEL, Mr. HANCE, Mr. WYDEN, Mr. DE LA GARZA, Mr. HAWKINS, Mr. CHANDLER, Mr. TAUZIN, Mr. BEVILL, Mr. VANDERGRIFF, Mr. HAMMERSCHMIDT, Mr. JONES of North Carolina, Mr. DOWNEY of New York, Mr. ROE, Mr. RICHARDSON, Mr. FAUNTROY, Mr. CORRADA, Mr. KOLTER, Mr. CHAPPIE, Mr. HOWARD, Mr. DWYER of New Jersey, Mr. STUMP, Mr. FISH, Mr. BARNES, Mr. ADDABBO, Mr. ACKERMAN, Mr. WAXMAN, Mr. LELAND, Mr. WALGREN, Mr. STOKES, Mr. SKELTON, Mr. APPLEGATE, Ms. KAPTUR, Mr. BIAGGI, Mr. MADIGAN, Mr. LIPINSKI, Mr. RODINO, Mr. CLARKE, Mr. ANDREWS of North Carolina, Mr. SOLARZ, Mr. SCHEUER, Mr. ROSE, Mr. ARCHER, Mr. PRICE, Mr. LAGOMARSINO, Mr. LONG of Maryland, Mr. FORD of Tennessee, Mr. BROYHILL, Mr. WINN, Mrs. HOLT, Mr. GRADISON, Mr. IRELAND, Mr. HARTNETT, Mr. HERTEL of Michigan, Mr. CORCORAN, Mr. KASTENMEIER, Mr. SKEEN, Mr. ST GERMAIN, Mr. LOWRY of Washington, Mr. PRICE, Mr. KEMP, Mr. FLIPPO, Mr. ORTIZ, Mr. SMITH of New Jersey, Mr. BRITT, Mr. HUGHES, Mr. BORSKI, Mr. DOWDY of Mississippi, Mr. SABO, Mr. LANTOS, Mr. LEWIS of Florida, Mr. ANDERSON, Mr. FAZIO, Mr. TRAXLER, Mr. NICHOLS, and Mr. SWIFT.

H. Res. 159: Mr. CLAY, Mr. PEASE, Mr. DIXON, Mr. FORD of Michigan, Mr. OBEY, Mr. FAZIO, Mr. GARCIA, Mr. LEVINE of California, and Mr. FAUNTROY.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

86. By the SPEAKER: Petition of Virginia Beach City Council, Virginia Beach, Va., relative to longshoremen's and harbor workers' compensation; to the Committee on Education and Labor.

87. Also, petition of William B. Hoyt, assemblyman, State of New York, relative to gas prices; to the Committee on Energy and Commerce.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1983

By Mr. SAVAGE:

—Page 8, line 7, strike out "insured" and all that follows through "or" on line 8.

SENATE—*Monday, May 9, 1983*

The Senate met at 12 noon and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

O God, Thou art my God, early will I seek Thee. My soul thirsteth for Thee, my soul longeth for Thee in a dry and thirsty land . . . to see Thy power and Thy glory.—Psalm 63: 1, 2.

God of Light and Life and Love, receive our worship. Thou dost not need our worship, for Thou art perfect and complete and infinitely self-sufficient. But we need to worship, our true humanness demands it. We do not add to Thee by our worship, but we diminish ourselves when we do not. Worthy art Thou to receive glory and honor, adoration and praise. Let Thy power and Thy glory be manifest in us. In the name of Him in whom dwells all power in Heaven and on Earth. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

ORDER OF PROCEDURE

Mr. TOWER. Mr. President, it is my understanding that, under the previous order, the reading of the Journal has been dispensed with, no resolution shall come over under the rule, the call of the calendar has been dispensed with, and the morning hour has been deemed expired. Is that correct?

The PRESIDENT pro tempore. The Senator is correct.

Mr. TOWER. Mr. President, I am prepared to reserve my time for now and defer to the distinguished minority leader.

Mr. BYRD. I thank the distinguished Senator.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

NUCLEAR FREEZE RESOLUTION

Mr. BYRD. Mr. President, I do not believe that the agreement prevented the operation of rule XIV with respect to a resolution which was introduced.

The PRESIDENT pro tempore. The Senator is correct.

Mr. BYRD. I therefore ask that the resolution be read the second time.

The PRESIDENT pro tempore. The clerk will read the resolution.

The assistant legislative clerk read as follows:

A House joint resolution (H.J. Res. 13), calling for a mutual and verifiable freeze on and reduction in nuclear weapons.

Mr. BYRD. I ask unanimous consent that further proceedings in connection with this measure be stopped at this point.

The PRESIDENT pro tempore. Objection having been heard to further proceedings, the bill will go on the calendar.

Mr. BYRD. Mr. President, I ask unanimous consent that I may be permitted to reserve my time.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. TOWER. Mr. President, I ask unanimous consent that the Senate turn to the immediate consideration of routine morning business for not to exceed 30 minutes, with time allotted to Senators not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Mississippi is recognized.

A TRIBUTE TO GOV. JOHN BELL WILLIAMS

Mr. COCHRAN. Mr. President, the State of Mississippi and our Nation suffered a severe loss earlier this year when former Governor and Congressman John Bell Williams passed away. He was my friend.

When he was elected to serve in the House of Representatives he was only 26 years old. For 21 years he faithfully and enthusiastically represented the citizens of his district.

In 1967, he was elected Governor of our State and served during his 4-year term with distinction.

In his years of retirement from public service, his interest in politics and government continued. He was always available for counsel and advice for those who sought it. I was one who did, and I benefited greatly from it.

Recently, a friend of ours, Guy N. Rogers, wrote a heartwarming reminiscence that was published in the Clarion-Ledger of Jackson, Miss. I know his many friends in the Congress would appreciate getting to read it. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LATE GOVERNOR WARMLY REMEMBERED

(By Guy N. Rogers)

Reading recent comments on how history would judge the late John Bell Williams' public service as longtime congressman and as governor of Mississippi, I felt that as a close friend I must pass on some of my impressions of him during many years of association.

However, I will leave the chronicling of his public service to historians. I will deal instead with his personal qualities and the private side of this warm-hearted individual as he was known to his friends.

During his funeral service and while looking at his pallbearers, my mind wandered back to the many times that all of us whom he referred to as the "Raymond Road Mafia" would gather at his home for a "called" meeting. It also occurred to me for the first time that although we were all within his select group of friends that each of us was a "special friend" who could share with him his many special interests.

Since most of his life had been in politics, he had Brad Dye, Charlie Griffin, John McLaurin, Jimmy Morrow and Woodrow Matthews to milk this subject for all it was worth.

An even closer love was Raymond and Hinds Junior College. He could reminisce for hours about the good old days with Lockett Peyton, Miller Dent, Giles Crisler and many others. He could share his love for flying with A.F. Summer, now deceased, and David "Booga Bottom" Harris. Doug Gunter and Billy Fulgham were his law partners and both served on his staff while he was governor. He loved to listen to Rex Armistead tell about all of the "old thieves" he had known during all of his years in law enforcement. The "Mize Boys," Johnny and Bob, would make him laugh until he cried with some of their wild stories.

Although I fished and golfed with him—and ate my share of Coleman's Bar-B-Q's with him on trips—our close relationship grew out of his love of music. Sonny Hill was also heavy in the music bit with us. He was the pro while J.B. and I were strictly amateurs.

My favorite story about John Bell and his music goes back to his governorship when a group of people were picketing around the Governor's Mansion. Some had scaled the fence and were sitting on it. Judge Summer, the attorney general, told me the governor had called and wanted me to come to the mansion as quickly as possible. I grabbed some arrest warrants and tore out to the

mansion where I was ushered into his office by a security guard.

I said, "Governor, I have the arrest warrants." He gave me a very quizzical look and said, "You have what? I didn't call you down here for that—I went to Barnette's (Music Co.) and bought some trumpet duets and I thought we would try them out."

He had a music stand set up, and he played the trumpet Harry James had given him and I played one that belonged to his son Kelly. We played for nearly an hour.

When I got ready to leave, I said "Governor, do you want us to arrest those people sitting on the fence." He said, "Naw, they aren't bothering anyone and they have a right to disagree with anything I have said or done. And besides, I want all of those who criticized the building of the fence to see what a fine perch it makes for the birds who feel compelled to demonstrate."

When I got back to the office A.F. asked me what happened and when I told him he broke into a big grin and said, "That's John Bell and I should have known."

We called him "Governor," "Coach," "Guv," and many other names of endearment. He was the kindest, most gentle, compassionate and lovable human being I have ever known. I truly believe that he was incapable of entertaining a mean or ugly thought about his fellow man.

He was intensely loyal to his friends and this loyalty was returned to him tenfold. He was also no name-dropper, even though he car-pooled with three other freshmen congressmen who each later became president of the United States. The secretaries in our law firm would nearly drop the phone when a call would come in saying, "This is the White House calling for Gov. John Bell Williams." The president would then chat and laugh with him just as old friends do.

This is all over now but the memories linger on. I would give anything in the world to have my telephone ring and hear that unmistakable voice say, "Hello there podnah—the Crossgates Chapter of the Raymond Road Mafia is meeting tonight and your attendance is required—that is, if Frieda will let you out to mix and mingle with this terrible bunch. The agenda calls for eating, drinking and some powerful lying."

Or, "Podnah, you had better tune in WKKE—Helen O'Connell is singing Green Eyes."

I doubt if we will ever meet as a group again because we have lost our Godfather. None of our lives will ever be the same again.

Mr. COCHRAN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, I ask to be recognized in morning business without the time being charged against my reserved time.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR PROXMIRE'S 10,000TH VOTE

Mr. BYRD. Mr. President, I take the floor at this time to call to the attention of the Senate that the distinguished Senator from Wisconsin (Mr. PROXMIRE) has joined the 10,000-vote club. On the last rollcall vote that occurred on May, 6 which was last Friday, rollcall vote No. 79, Mr. PROXMIRE cast his 10,000th rollcall vote.

There are not many Senators who have ever cast 10,000 votes. Senator JACKSON is nearing 11,000, but he was in the House 10 years before he came to the Senate in 1959, I believe it was.

Mr. TOWER. Scoop came in 1953.

Mr. BYRD. That is right; he came to the Senate in 1953, the year that I came to the House of Representatives, and he had been previously a Member of the House for 10 years, so he is within close range of the 11,000 rollcall vote mark. But the Senator from Wisconsin not only has cast 10,000 rollcall votes, he has cast 8,300—give or take a little—consecutive rollcall votes without missing a vote. That is a record for this body. There are some Members of the House who have remarkable voting records which cover a number of years without having missed a rollcall vote. Senator PROXMIRE is the champ in that regard in the Senate with, roughly, 8,300 rollcall votes without missing a vote. This demonstrates great dedication, perseverance, and purpose.

By taking the floor today, I call attention to the fact that he has now cast 10,000 rollcall votes. I do not know whether he was even aware of that on Friday on rollcall No. 79. He probably was.

I yield the floor.

Mr. PROXMIRE. Mr. President, I thank my good friend. He knows much more about my record than I do. As I have said before, the country might be better off if I had missed them all.

Mr. President, I understand we are in morning business?

Mr. BYRD. There have been a few occasions when, as the leader on this side, I have wished the Senator from Wisconsin would take a walk. But he is not the kind who will take a walk.

Mr. PROXMIRE. I thank the leader for being so gracious and generous in his remarks.

WHY BRITISH AND FRENCH NUCLEAR WEAPONS SHOULD NOT BE PART OF UNITED STATES-SOVIET INTERMEDIATE MISSILE CONTROLS

Mr. PROXMIRE. Mr. President, a prime stumbling block in securing agreement between the United States and the Soviet Union on limiting intermediate nuclear missiles in Europe has been the issue of what to do about the Soviet insistence that we count the missiles of the French and English. England is part of NATO. France is not. But France has coordinated its military defense with NATO. So why should we not agree to count the French-English nuclear power along with any additions the United States decides to deploy as the basis for seeking equality with the U.S.S.R.?

In yesterday's Washington Post, Lawrence Eagleburger, the Under Secretary of State for Political Affairs, answers this question in some detail. Eagleburger offers four principal reasons why the Soviet position is wrong and we would be wise to reject it. Here they are:

First. Each nuclear power—the United States, the U.S.S.R., China, Britain, and France—is a member of the UN Security Council with the power of veto. Each has maintained the unilateral independent means of self-defense and specified the desire not to have their forces taken into account in any bilateral negotiations between the United States and the U.S.S.R.;

Second. Both the French and the British have relatively feeble nuclear forces, compared to the Soviet Union, and provide no protection for nonnuclear European/NATO countries who must look to the United States for nuclear deterrence;

Third. The Soviet Union now has an overwhelming nuclear preponderance in Europe, which negotiations aimed at achieving any degree of equality must recognize. Eagleburger makes this point. But the Harvard Nuclear Study Group, in a book just released, makes it with even more force.

The Harvard University group shows a Warsaw Pact versus NATO preponderance in Europe of 3.2 to 1 in launchers and 4.6 to 1 in warheads. Mr. President, I ask unanimous consent that a table from "Living with Nuclear Weapons," by the Harvard Nuclear Study Group, be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—WARSAW PACT—NATO NUCLEAR WEAPONS IN EUROPE (RANGES GREATER THAN 1,000 MILES)

Type	Launchers	War-heads/ bombs
Warsaw Pact:		
SS-20	345	1,035
SS-5	16	16
SS-4	275	275
Missiles	636	1,326
Backfire	100	400
Badger	310	620
Blinder	125	250
Bombers	535	1,270
Total	1,171	2,596
NATO:		
Polaris A-3 (UK)	64	64
M-20 (France)	80	80
SSBS S-2 (France)	18	18
Missiles	162	162
Vulcan B-2	48	96
F-111 E/F	156	312
Bombers	204	408
Total	366	570

TABLE I.—WARSAW PACT—NATO NUCLEAR WEAPONS IN EUROPE (RANGES GREATER THAN 1,000 MILES)—Continued

Type	Launchers	Warheads/bombs
Warsaw Pact/NATO ratio:	3.2:1	4.6:1

Source: "The Military Balance, 1982–83" (International Institute for Strategic Studies, 1982). The figure for SS–20s has been updated to November 1, 1982. The 60 U.S. FB–111A bombers based in the U.S. but designated for deployment to Europe in a crisis have not been included. The 400 warheads in the U.S. strategic forces assigned to NATO have not been included here, since they are counted in SALT/START and the corresponding Soviet assignment is unknown. However, French forces have been included.

Mr. PROXMIRE. Mr. President, finally, Eagleburger points out in his article that the Soviet attempt to obtain compensation in past agreements for the French and British nuclear weapons is nothing new. They have tried to obtain such a consideration in the past. And this country has always resisted such Soviet efforts. And yet the Soviet Union, in spite of the United States objection with respect to including the French and English missiles, has entered into agreements.

Mr. President, I ask unanimous consent that the Eagleburger article to which I have referred be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 8, 1983]

THE ARMS TALKS IN EUROPE

(By Lawrence S. Eagleburger)

WHY WE DON'T COUNT THE FRENCH AND BRITISH MISSILES

A fundamental element of the Soviet position in the negotiations on intermediate-range nuclear forces (INF) is that the nuclear systems of Britian and France must be "taken into account," in effect, by their inclusion under a ceiling on U.S. forces. Both the NATO allies, whose security rests on a strong U.S. nuclear deterrent tied inseparably to the defense of Europe, and the United States have rejected this Soviet claim.

The Soviet demand to address these forces in bilateral negotiations is procedurally inappropriate and substantively without merit. Britain and France are sovereign countries, over whose forces the United States has no control. The Soviet demand to include British and French forces is groundless on military terms, would divide the NATO alliance and undercut the U.S. strategic guarantee to Europe. Its effect has been to slow progress in the negotiations.

In pressing their claim on British and French forces, spokesmen for the Soviet Union emphasize the principle of "equality and equal security" as being basic to their approach to arms control. They assert that in applying the principle of "equality and equal security" in the context of the INF negotiations, they must "take account" of British and French forces in assessing their own security. Therefore, they maintain they are justified in demanding unequal forces between the United States and the U.S.S.R.; specifically, they propose that the number of British and French "medium-range nuclear systems" be subtracted from the ceiling they propose be set for U.S. systems.

In practice, however, the Soviet Union does not follow its principle of "equality and equal security." It does not apply that principle evenhandedly to the security of the United States and its allies, but one-sidedly to the security of the Soviet Union. The result is to produce inequality and unequal security. The Soviet spokesmen, in describing this principle, have stressed that in applying it all factors affecting Soviet security must be taken into account, including not only the manifold military factors but also geographic and other considerations. When asked what they mean by "other considerations," they respond that these include "political" considerations.

The INF negotiations involve issues central to security in Europe—that is, on the one side, the security of the territory of the NATO allies in Europe and, on the other, the security of the territory of the members of the Warsaw Pact, including the Soviet Union, in Europe. Let us begin by examining, as the Soviet spokesmen say one should, the full range of factors bearing upon "equal security."

With respect to geography, the territory of the NATO countries in Europe is small compared to that of the Warsaw Pact states in Europe—some 925,000 square miles on the NATO side to about 2.5 million square miles on the Warsaw Pact side. The depth of front is a few hundred kilometers on the NATO side; on the Warsaw Pact side, it can be measured in thousands. Moreover, the Soviet Union has direct access to NATO Europe unimpeded by natural barriers. It can move its forces up to Western Europe over secure interior lines of communication. In contrast, forces in the United States are separated from Europe by 5,000 kilometers of ocean. Thus, in the context of "equal security," geography favors the Soviet Union.

The political asymmetries between NATO and the Warsaw Pact are striking. The NATO Alliance is a voluntary alliance. The Brezhnev doctrine makes it clear that the Warsaw Pact is quite a different character. The Warsaw Pact operates under central direction, tight coordination and strict discipline. Such rigid conformity would be inconsistent with the nature of the NATO alliance and with the characters of its member states. Those states have freely elected parliaments responsive to public opinion informed by an independent press and vigorously expressed. Anyone in Moscow need only read the Western press to be confident that no NATO country can acquire arms beyond those its people consider the minimum necessary for collective defense against aggression and that no one them, alone or in concert, would consider initiating an attack on the Soviet Union or any of its associated states.

It is not possible for anyone in the West to have similar confidence that he truly understands what is going on in the inner decisionmaking circles in Moscow. None of us in the West would embrace the political system of the Warsaw Pact countries. Nevertheless, such a system is efficient in terms of building and directing military forces and dictating a unified strategy and fully coordinated tactics, both military and political. Thus, in the context of "equal security," political asymmetries favor the U.S.S.R. and the Warsaw Pact, not the United States and NATO.

In assessing the military factors, it is appropriate to begin with those bearing most immediately on the INF negotiations and then proceed to those more generally affecting the security balance in Europe. It was the deployment of SS20 missiles by the Soviet Union in 1977 that brought about NATO's 1979 decision to respond to the deployment with its own deployment of U.S. Pershing II and groundlaunched cruise missiles in Europe. NATO's determination to proceed with deployments brought the Soviets to accept the U.S. offer to seek an arms control solution to the INF problem.

The only systems that both the United States and the U.S.S.R. agree should be limited in an INF agreement are groundlaunched nuclear missile systems of intermediate range. The current imbalance between the United States and the U.S.S.R. in longer-range INF missile systems is not in dispute. The Soviets have approximately 600 such systems with 1,300 warheads, of which approximately 500 with 1,000 warheads are in or on the fringes of Europe. The United States has none.

If we then proceed to those systems that one side asserts should be limited on an INF agreement and the other side believes should not be limited, we are brought to consider nuclear-capable aircraft in Europe. The Soviets propose counting only such aircraft as have a combat radius greater than 1,000 kilometers, though they exclude a number of their own aircraft with a combat radius more than 1,000 kilometers, while including some U.S. aircraft with a combat radius of less than 1,000 kilometers.

However, in the context of "equal security," all aircraft capable of hitting the territory of the NATO or the Warsaw Pact countries in Europe should be counted. On this basis, and using counting rules developed in previous arms control agreements, the U.S.S.R. has 6,300 such aircraft in Europe; the United States has 400. To take account of the fact that most of the Soviet planes used for training and those in storage are in Europe while the comparable U.S. planes are in the United States, it is appropriate to refer to a NATO study that compares NATO and Warsaw Pact aircraft on the basis of counting only those assigned to combat squadrons manned by trained crews and believed assigned nuclear roles. On this basis, the balance is 2,500 such aircraft on the Warsaw Pact side as opposed to about 800 on the NATO side.

We are now brought to systems that neither side proposes should be limited in an INF agreement, but that the U.S.S.R. asserts must be taken account of by subtraction from the Soviet-proposed ceiling for U.S. INF systems. These are the British and French nuclear systems—both missile systems and nuclear-capable aircraft. The bulk of these are submarine-based missile systems. Their characteristics are identical to those of the U.S. and U.S.S.R. SLBMs, which both the United States and U.S.S.R. agree should be classed as being "strategic" systems. They are not "intermediate range" systems.

Even the Soviet spokesmen, in arguing for the proposition that British and French systems be taken into account, base their case on the assertion that the U.S.S.R. must take them into account in assessing its security in the context of "equal security," not on the basis of the balance in systems to be limited in an INF agreement.

By the same logic, the United States and the other members of NATO would be entitled to take into account the full range of factors that bear on their security in Europe.

In addition to the geographic and political factors already discussed, there are other military factors: the conventional military balance in Europe, the balance in chemical warfare weapons, the balance in nuclear

weapons of shorter range than those under discussion in INF and those of inter-continental range—those under discussion in the START negotiations.

There can be little doubt that the conventional balance in Europe favors the Warsaw Pact. All the major indicators of relative combat strength favor the Warsaw Pact, including the numbers of combat divisions and of planes, tanks, artillery tubes and other major categories of military equipment.

The balance in chemical weapons is entirely one-sided in favor of the Warsaw Pact.

The balance in tactical nuclear systems also favors the Warsaw Pact. NATO has a tenuous advantage in the number of artillery tubes capable of firing nuclear shells, but NATO tactical missile systems are outnumbered and outranged by Soviet systems having a range of 120 to 300 kilometers.

In the START negotiations, it is the U.S. hope and anticipation that the sides will eventually be able to agree on substantial reductions to equality in the most significant measures of capability. At the present time, however, it is evident that in most of the indices of effectiveness, the balance in systems of intercontinental range does not favor the United States.

In summation of this part of the analysis, there is no basis whatever for the Soviet assertion that they are entitled to compensation for British and French nuclear systems in the context of the full range of factors bearing on "equal security."

On the other hand, there are very strong reasons why British and French systems should not only be limited in a bilateral agreement between the United States and the U.S.S.R., but why their systems should not be "taken into account" in an INF agreement.

Along with the United States, the U.S.S.R. and China, Britain and France constitute the five members of the U.N. Security Council with the power of veto. They historically have taken an independent view of their national security and have maintained the unilateral military means, as do the United States and the U.S.S.R., to protect this independence. They have both declared that they do not wish their nuclear forces to be limited or to be "taken into account" in bilateral negotiations between the United States and the U.S.S.R.

They consider their nuclear forces to constitute the minimum nuclear deterrent necessary to protect their own national interests. The non-nuclear NATO countries cannot count on the relatively small U.K. or French nuclear forces to provide adequate deterrence of aggression or the threat of aggression against their territory; they must look to the nuclear forces of the United States for that measure of deterrence.

In past bilateral arms control agreements, the U.S.S.R. has attempted to obtain compensation for U.K. and French systems, and the United States has firmly resisted such attempts. The U.S.S.R. has nevertheless found it possible to enter into such agreements.

The Soviet public-relations campaign on this issue is based on suggesting that Western spokesmen have said what they have not said, and then demonstrating that this is untrue. Soviet Spokesmen loudly assert that British and French nuclear systems exist, as though someone had denied that fact. They assert that Britain and France are members of NATO as though that were a great discovery. They assert that British and French forces are "aimed at them," as though any other nation constituted a security threat to NATO. None of these facts is in dispute; the point is these facts are overwhelmed by a series of much more significant facts, such as the geographic, political and military asymmetries outlined above. The United States is fully aware of the advantages these asymmetries confer on the Soviet Union. However, we have not proposed to take them into account by unequal limits between the United States and U.S.S.R.

The essence of the Soviet position is that the only country whose security really counts is the U.S.S.R. If it is secure, then all other countries or parties in its orbit are secure. It asserts the unilateral right to security because of the uniqueness of its socializing mission; it is carrying out a mission allotted to it by history; it is entitled to forces equal to or superior to the aggregate of those of all other states combined since all other states are potential objectors to its hegemony. The Soviet claim is thus a claim for absolute security. The obverse of absolute security for the U.S.S.R. is absolute insecurity for all other nations in the world.

Mr. TOWER. Mr. President, will the Senator yield, on my time?

Mr. PROXMIRE. I am happy to yield to the Senator from Texas.

Mr. TOWER. Mr. President, I commend the Senator from Wisconsin for putting the Eagleburger article in the RECORD. I think it is a very closely reasoned case.

The Soviets, themselves, have tended in the past to acknowledge the French and British systems as strategic systems because they have brought them up in strategic arms negotiations.

In fact, they are designed only as a deterrent to attacks against French or British soil, not attacks against NATO as such, just as our Minuteman system—and perhaps ultimately some MX—is designed to protect the continental United States against attack.

So they should not be considered in the NATO context. I think the Eagleburger article is well worth reading by everyone. I commend the Senator from Wisconsin for putting it in the RECORD, and I hope my colleagues will read it.

Mr. PROXMIRE. I thank my friend, the distinguished chairman of the Armed Services Committee.

He is right: In fact, in West Germany, which is the most logical place for the Soviets to initiate an attack, and in any attack against Italy, obviously the French and English missiles would be of no avail.

THE LIFTING OF MARTIAL LAW—AN ILLUSION OF PROGRESS

Mr. PROXMIRE. Mr. President, on December 13, 1981, the military government in Poland imposed a state of martial law—an action that resulted in the wholesale violation of the most basic rights of Polish citizens. At least 10,000 people were jailed without charges or trial. Thousands more were formally arrested and detained for exercising fundamental rights.

One year later, on December 21, 1982, amid much fanfare, the Polish Government announced the "suspension" of martial law. However, a recent report by the lawyers Committee for International Human Rights indicates this action has resulted in little meaningful improvement. In fact, this move established some of the primary elements of martial law as permanent features of the Polish legal system. Already, this new statutory regime has been used to incarcerate large numbers of people for exercising basic rights.

During martial law, isolation centers for prisoners frequently operated without the most elemental respect for human dignity. Despite subzero winter temperatures, few detention cells had heat, and often their windows were broken, allowing snow to blow in and ice to form on the floor. It was not uncommon for one 8- by 10-foot cell to house 10 to 20 prisoners who were allowed only one bath or shower a week. The unsanitary conditions, contributed to the spreading of epidemic influenza and other diseases. Medical care was said to be inadequate or nonexistent.

This pattern of degrading treatment remains a source of worldwide concern for the safety and health of the 1,500 to 5,000 Poles who remain imprisoned after arrest or conviction under martial law and the thousands who reportedly have been sent to military forced-labor camps.

Mr. President, for over 200 years the United States has endorsed human rights throughout the world. We have consistently spoken out against violations such as those occurring in Poland. Our strong stance has proven to be very effective in many cases. It has also been a major factor in achieving our Nation's status as a world leader. However, if we desire to remain a highly credible and influential Nation in advocating international human rights, we must continue to demonstrate our commitment to this goal at every possible opportunity. The Genocide Treaty is one such opportunity.

Mr. President, the right of people to exist is the most basic human right. The Genocide Treaty is designed to help preserve this right. Therefore, I urge my colleagues to continue their strong support of human rights by quickly ratifying the Genocide Convention.

NATIONAL NURSE RECOGNITION DAY

Mr. MATSUNAGA. Mr. President, I rise as a cosponsor of Senate Joint Resolution 66 designating May 6, 1983,

National Nurse Recognition Day, to send my heartiest congratulations to the members of the nursing profession throughout the Nation.

National Nurse Recognition Day is a fitting tribute to the women and men whose high standards of excellence, untiring dedication, unique capacity for compassion, and self-sacrifice in behalf of others mark them apart. As members of the single, largest health care group in the country, nurses possess pivotal responsibilities that represent the all-important link in this country's medical care system.

It is with particular pleasure that I extend my warmest aloha to Hawaii's 13,000 active licensed nurses, who can be rightfully proud of the immeasurable contributions they have made toward the betterment of the delivery of health care in the Aloha State.

Like nurses everywhere, they must fight hard to preserve the traditional image of a nurse as a nurturing and caring professional, while at the same time, they assume a seemingly untraditional stance to demand compensation comparable to that of other professionals, as is their rightful due.

As health care costs continue to rise, the acceptance of independent nurse practitioners gains ground because more and more Americans recognize that primary care provided by these nurses is less costly while more and more physicians who initially opposed the idea have come to recognize that nurse practitioners can relieve them of routine health responsibilities.

Since 1974, I have introduced legislation to provide for the compensation of nurse practitioners under medicare and medicaid and have cosponsored a similar measure in the 98th Congress.

Mr. President, as a member of the Senate Finance Committee and the Senate Labor and Human Resources Committee, I keenly feel that it is important that we lawmakers especially be sensitive to the need of the nursing profession.

I must confess, Mr. President, that in pushing for this legislation I am exhibiting a deeply felt partiality to the nursing profession, a partiality which has its origins in my own experience as a patient in an Army evacuation hospital in Italy during World War II. While confined there, their treatment of me and my wounds inspired me to verse. I have with me one of my poems dedicated to wartime nurses, which—with your indulgence, Mr. President—I would like to recite for the RECORD, in undying appreciation of their selfless services in war and peace:

Untouched by worldly human greed,
With sacrifice of self her creed,
Her light of mercy warmly shines
Throughout a world of battle-lines.

"You will get well; you must get well,"
Her words the pain of wounds dispell,
And courage give to spirits crushed,
Awake designs for living, hushed.

And when all human efforts fail,
She looks to Florence Nightingale,
And turns to God, in heart, to pray.
With Him to plead for Death's delay.

"Please, God, don't let him die; he's young.
His song of life is still unsung.
Then, there's his wife, in hope, serene,
With child to him unheard, unseen."

Her hands, her heart, her mind, her all
Devoted to profession's call,
She drowns the woes of life; her own
In tears to others never shown.

Those lines were penned on November 20, 1943, nearly 40 years ago, Mr. President, when I was recuperating in an Army hospital in Italy. The ardor and admiration which those field nurses of World War II inspired in me has not dimmed one bit with the years. It has only convinced me that we cannot accept their selfless dedication as something inspirational without giving back to them their due in economic terms. Otherwise, we are only putting them on a pedestal with prose while depreciating their worth in the job market.

Mr. President, in behalf of the people of Hawaii, permit me by this means to express my gratitude for the fine work and professionalism maintained by the nurses of our Nation. National Nurse Recognition Day, no doubt, will focus special attention on the nursing profession and the individuals whose services touch us all.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to 22 U.S.C. 1928(a)-1928(d), as amended, appoints the following Senators as members of the Senate delegation to the North Atlantic Assembly spring meeting to be held in Copenhagen, Denmark, June 9-13, 1983: the Senator from Utah (Mr. HATCH) and the Senator from Maryland (Mr. SARBANES).

The Chair, on behalf of the Vice President, pursuant to 22 U.S.C 276(d)-276(g), as amended, appoints the Senator from Alabama (Mr. HEFLIN) as a member of the Senate delegation to the Canada-United States Interparliamentary Group during the first session of the 98th Congress to be held in Kenora, Canada, on June 16-20, 1983.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

The PRESIDING OFFICER. Under the previous order, the clerk will report the pending business.

The assistant legislative clerk read as follows:

A Senate concurrent resolution (S. Con. Res. 27) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

The Senate resumed consideration of the concurrent resolution.

AMENDMENT NO. 1242

Mr. DOMENICI. Mr. President, I discussed the present situation with the distinguished Senator from Florida (Mr. CHILES) and it is my understanding that at around 1 p.m. the distinguished senior Senator from Washington (Mr. JACKSON) and the distinguished senior Senator from Georgia (Mr. NUNN), the proponents of the amendment at the desk, temporarily set aside, will be here to discuss their amendment.

Since there is nothing else that we are aware of that is pending, I suggest the absence of a quorum and ask that it be charged equally to both sides. I so ask unanimous consent to do that.

The PRESIDING OFFICER. Is there objection?

MINORITY LEADER'S RESERVED TIME YIELDED BACK

Mr. BYRD. Mr. President, reserving the right to object—and there is no such thing as reserving the right to object to call for a quorum—I want to yield back the 10 minutes which were reserved to me under the standing order.

The PRESIDING OFFICER. The time is yielded back.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Nunn-Jackson and Domenici amendments be temporarily set aside so that I can offer a perfecting amendment to the Hollings amendment to clarify some mathematical inconsistencies.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 1245

(Purpose: Technical amendment to make corrections in amendment No. 1240 as adopted by the Senate)

Mr. DOMENICI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. DOMENICI), for Mr. HOLLINGS, proposes amendment numbered 1245.

Mr. DOMENICI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 8, delete the number and insert in lieu thereof "$1,790,050,000,000".

On page 4, line 9, delete the number and insert in lieu thereof "$1,981,850,000,000".

On page 16, line 19, delete the number and insert in lieu thereof "$28,400,000,000".

Mr. DOMENICI. Mr. President, this is a technical amendment that I offer in behalf of Senator HOLLINGS. This technical amendment is to clear up some numerical errors in the Hollings amendment as adopted by the Senate on Friday. It has been cleared on both sides.

I now yield to the Senator from Florida.

Mr. CHILES. Mr. President, the distinguished chairman is correct. Both sides have looked at this amendment. It is necessary to conform the amendment and to make further amendments, if adopted, would require us to have these corrections made.

The PRESIDING OFFICER. Is all time yielded back?

Mr. CHILES. I yield back the remainder of my time.

Mr. DOMENICI. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1245) was agreed to.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CHILES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JACKSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JACKSON. Is the Nunn-Jackson amendment now pending?

The PRESIDING OFFICER. The Domenici substitute is now pending.

Mr. JACKSON. Is the Nunn-Jackson amendment to the Domenici substitute——

The PRESIDING OFFICER. It is an amendment to the bill and was temporarily laid aside.

Mr. JACKSON. Was it temporarily laid aside?

The PRESIDING OFFICER. The Senator is correct.

Mr. JACKSON. So that the amendment, then, is pending?

The PRESIDING OFFICER. It would take unanimous consent or a call for regular order to make it pending.

Mr. JACKSON. I ask unanimous consent that it be made the pending business.

Mr. DOMENICI. Mr. President, reserving the right to object, and I do not intend to object, in order to debate, which is what I understand the distinguished Senator wants to do——

Mr. JACKSON. That is correct.

Mr. DOMENICI. The amendment to which he refers is at the desk. I do not think we have to set anything aside to debate it.

If the Senator wants to set the Domenici amendment aside temporarily, it is all right with me. But I do not think we have to. In terms of the Senator debating, he can have time on his amendment, can he not?

The PRESIDING OFFICER. Not unless it is pending.

Mr. DOMENICI. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Washington.

AMENDMENT NO. 1242, AS MODIFIED

Mr. JACKSON. Mr. President, I send a substitute to the desk for the Nunn-Jackson amendment, which is purely technical. I think my good friend from New Mexico will agree with that.

The PRESIDING OFFICER. Is there any objection to the modification of the amendment? Without objection, the amendment is so modified.

The amendment (No. 1242), as modified, is as follows:

On page 3, increase the figure on line 13 by $6,300,000,000.

On page 3, increase the figure on line 14 by $5,900,000,000.

On page 3, increase the figure on line 15 by $3,700,000,000.

On page 3, increase the figure on line 19 by $1,800,000,000.

On page 3, increase the figure on line 20 by $4,700,000,000.

On page 3, increase the figure on line 21 by $8,300,000,000.

On page 4, increase the figure on line 1 by $1,800,000,000.

On page 4, increase the figure on line 2 by $4,700,000,000.

On page 4, increase the figure on line 3 by $8,300,000,000.

On page 4, increase the figure on line 7 by $1,800,000,000.

On page 4, increase the figure on line 8 by $6,500,000,000.

On page 4, increase the figure on line 9 by $14,800,000,000.

On page 4, increase the figure on line 14 by $1,800,000,000.

On page 4, increase the figure on line 15 by $4,700,000,000.

On page 4, increase the figure on line 16 by $8,300,000,000.

On page 6, increase the figure on line 5 by $6,200,000,000.

On page 6, increase the figure on line 6 by $1,700,000,000.

On page 6, increase the figure on line 11 by $5,600,000,000.

On page 6, increase the figure on line 12 by $4,400,000,000.

On page 6, increase the figure on line 17 by $2,900,000,000.

On page 6, increase the figure on line 18 by $7,500,000,000.

On page 25, increase the figure on line 11 by $100,000,000.

On page 25, increase the figure on line 12 by $100,000,000.

On page 25, increase the figure on line 17 by $300,000,000.

On page 25, increase the figure on line 18 by $300,000,000.

On page 25, increase the figure on line 23 by $800,000,000.

On page 25, increase the figure on line 24 by $800,000,000.

Mr. JACKSON. Mr. President, the various alternatives on national defense funding discussed in the context of this budget resolution debate reflect an array of judgments about the appropriate sums to be devoted to our national security posture over the next 3 fiscal years. The judgments offered and the debates conducted have been serious and substantive. The central question—what we must spend to insure a strong and deterring national security posture in a tense and uncertain world—is a most serious and substantive one. The amendment now before you reflects the considered appraisal of myself and my distinguished colleague from Georgia of how that question should be answered. The ultimate goal of the amendment is to channel national defense funding over the next 3 fiscal years toward levels which are needed, yet affordable, predictable and sustainable. In the long term, achieving this goal will help maintain a sound and vital national defense establishment.

Mr. President, this amendment would provide for real growth of 6.5 percent in budget authority for the national defense function in fiscal year 1984; this growth would be over the baseline, $244.1 billion, used in the Budget Committee's reported resolution. Under the amendment, real growth in fiscal year 1985 would be 5.5 percent; real growth in fiscal year 1986 would be 5 percent. The amendment also assumes a 4 percent across-the-board military and civilian pay raise starting April 1, 1984—which is also assumed by the Domenici package introduced last week. Under the Nunn/Jackson amendment, the pay and inflation assumptions in the final 2 years of the resolution period are consistent with those of the Dominici package. I ask unanimous consent that

a table comparing the amendment with the President's request, the Budget Committee resolution and the Dominici alternative be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit No. 1.)

Mr. JACKSON. I believe that attaining a level of national defense funding which supports and preserves a healthy defense posture and is affordable, predictable and sustainable is an aim common to the proponents of all the various defense funding alternatives. The Nunn/Jackson amendment would bring national defense funding down to a 5 percent real growth level, but do so more gradually than either the Budget Committee resolution, which goes to 5 percent real growth in fiscal year 1984, or the Domenici alternative, which goes from 7.5 percent real growth in fiscal year 1984 to 5 percent real growth in fiscal year 1985. The President is seeking more than 10 percent real growth in fiscal year 1984 and a similar level in fiscal year 1985. But sudden downward adjustments in planned defense funding interfere with effective and efficient management of defense programs. To avoid this type of disruption our amendment would reduce real growth in fiscal year 1984 from the estimated fiscal year 1983 real-growth level of 7 to 6.5 percent, and provide a smoother glide path down to a 5 percent real growth level by fiscal year 1986.

Under this more gradual transition, our defense funding adjustments would make less of a contribution to easing the Federal deficit during the resolution period than the Budget Committee's proposal. In terms of outlays, its effect would be about the same as the Domenici proposal. In my judgment, this less steep approach is necessary to allow defense planning to adjust efficiently to a lower but more sustainable level. Without the time to adjust, we could generate inefficiencies which would further erode the purchasing power of the defense dollars we spend.

Whatever adjustments to the President's fiscal year 1984 request ultimately are deemed appropriate, we must avoid those which force the readiness accounts to bear a disproportionate share of the burden. This is a pitfall to which we have fallen prey in the past; indeed, the readiness status of our forces finally is approaching what it ought to be.

To avoid its slipping again, we must be sure that the ratio between reductions in budget authority and reductions in outlays from the President's request, especially in fiscal year 1984, will permit continued balance between the readiness of U.S. forces and future investment. Too small a ratio, which appears, in at least fiscal year 1984, to be a characteristic of both the Domenici proposal—1.6 to 1—and the House Resolution—1.6 to 1—will inevitably focus reductions on the fast-spending pay and readiness accounts. It is almost impossible to achieve targeted outlay reductions by paring the prescribed level of budget authority in the slower spending accounts; for examples, procurement. The Nunn/Jackson amendment would avoid this pitfall by consciously setting a ratio, 3.0 to 1, between reductions in budget authority and reductions in outlays for fiscal year 1984. Similarly, for fiscal year 1985 and fiscal year 1986, the Nunn/Jackson ratios have been set consciously to avoid incentives on the part of defense planners to rob readiness in order to pay for new weapons.

Mr. President, effective management of national defense, and indeed the overall Federal budget, over the next 3 years and beyond, demands that adjustments in defense funding now be forward looking; we cannot be myopic, but must structure modifications to the President's proposals now which will void restricting budget adjustment flexibility in future years. A low budget-authority-to-outlay ratio like the Domenici proposal—which forces modifications to the quick spend-out accounts in fiscal year 1984—will mean two things in terms of spending adjustments in the out years.

First, with few budget authority adjustments in slower spending accounts; for example, procurement in fiscal year 1984, most of the impact of fiscal year 1984 adjustments will occur immediately. By contrast, a more balanced approach to budget authority reductions would permit adjustments made in slower spending accounts now to bear fruit as savings in later years.

Second, with few budget authority adjustments in slower spending accounts; for example procurement, decisions on investment programs become locked in. Thus, when spending reductions are sought in future years, we increasingly will be required to slash readiness accounts or forgo truly needed investments to pay for decisions we made in prior years.

The amendment offered by myself and my distinguished colleague from Georgia seeks to avoid these evils by maintaining a sensible ratio between reductions in budget authority and outlays as defense funding is channeled toward at a lower real growth rate over the next 3 fiscal years.

Mr. President, this amendment would reduce the President's request by some $66 billion in budge authority and some $36 billion in outlays over the 3-year period of the budget resolution. This is roughly the same reduction in outlays as the Domenici proposal, but is between $7 billion more of a reduction in budget authority. The latter difference reflects the higher ratios I described earlier.

In the final analysis, the amendment is intended to move national defense funding toward a sustainable growth level in a realistic period of time, avoiding undesirable disruptions of the more sudden reductions embodied in the Budget Committee resolution and the Domenici proposal. But let me observe that I have said toward a sustainable growth level. It may very well be that something less than 5 percent real growth in budget authority—perhaps our NATO target of 3 percent real growth—should be the ultimate goal of this process. The President's request itself would drop down to real growth levels of less than 4 percent in fiscal year 1987 and fiscal year 1988. By that time, national defense funding will have started to digest the large infusion of dollars needed to make up for a period of relative inattentiveness. The base on which any future real growth would be built will be very substantial.

Whatever the decision in the year's beyond those covered by this resolution, the stream of funding should allow for all major programs that the country needs to maintain a modern, ready, and sustainable force. That task may be achievable with a further gradual decline in budget authority real growth to 4 percent in fiscal year 1987 and 3 percent in fiscal year 1988. Decisions this far into the future need not be made in the context of this resolution. But I raise these points as food for thought as we begin to look beyond the next 3 years.

Mr. President, the amendment offered by myself and my distinguished colleague from Georgia attempts to accommodate the recognized need for levels of national defense funding which are more predictable and sustainable. The amendment is not a panacea for all the questions which have been raised in this debate. However, in my judgment it is the preferred, more balanced course of action, and I strongly urge my colleagues to support it when it comes to a vote tomorrow.

I thank the Chair.

Mr. JACKSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. Mr. President, the Jackson-Nunn amendment to the defense spending levels contained in the Budget Committee resolution, which Senator JACKSON has just spoken to, is designed to:

First, provide for defense spending levels that are predictable, affordable, and sustainable over the long term;

Second, provide for a balance between budget authority and outlays to protect the emphasis on the readiness of our current forces.

This amendment moves us toward these two key goals in the following fashion:

First, by incorporating a modest real growth pattern over the 3-year budget resolution period starting in fiscal year 1984 with approximately 6½-percent real growth, followed by approximately 5½-percent real growth in 1985 fiscal year, and 5 percent in fiscal year 1986.

Second, by insuring that the crucial readiness accounts will be protected by maintaining a ratio between budget authority and outlay reductions—of approximately 3½ to 1—which is higher than either the Budget Committee mark or the Domenici substitute.

Mr. President, before going into a more detailed explanation, I shall outline some of the broad rationale. In my judgment, it is important to take more than just a 1- or 2-year view of defense spending. The cyclical ups and downs in defense spending in the last 10 to 12 years have, in large part, prevented an effective planning and budgeting process which is essential to insuring that defense spending results in real growth in military capability. We need to instill some stability in the defense spending pattern so that there is some predictability over the long term as to what levels or resources the Defense Department can reasonably expect to be available. Obviously these levels must be such that they provide for the needed improvements in our defense capability. From strictly a numerical standpoint, based on the changes in the last 10 years and our own legitimate security needs, the levels of defense spending suggested by the Reagan administration are probably justified for the most part.

However, it is clear that these heavily front-loaded budgets do not permit efficient spending or at least do not encourage efficient and effective spending and are not sustainable over the timeframe given the administration's planned budget deficit levels, considering the overall budget. Improving our military capability can best be accomplished with more moderate real growth patterns than the enactment of large increases for 1 or 2 years followed by successive reductions which fluctuate from year to year. In both the first instance and the second instance there is little analytical basis for the Pentagon to develop budget priorities and to provide the necessary link between our military strategy and our budget resources.

For this reason, Senator JACKSON and I are offering an amendment which provides a moderate real growth for the 3-year period addressed by the budget resolution, approximately 6½ percent in fiscal year 1984, approximately 5½ percent in fiscal year 1985, and 5 percent approximately in fiscal year 1986.

Compared to the Domenici plan, which I understand we will vote on tomorrow or Wednesday, our amendment provides for a better transition from the current real-growth expenditures of over 10 percent down to the 5-percent real-growth levels established in both the Budget Committee and Dominici plan for fiscal year 1985 and fiscal year 1986.

Compared to the Domenici plan, our amendment provides for greater budget authority reductions in fiscal year 1984, that is in this year we will reduce budget authority more than Senator DOMENICI would, but we also insure that readiness is protected by providing for more outlay spending in this fiscal year. Over the 3 years, our amendment establishes a ratio of reductions between budget authority and outlays so that readiness is preserved in the outyears and so that we do not build up a sizable amount of prior-year obligations due to a heavy emphasis on budget authority in procurement accounts.

Mr. President, I guess one way to summarize this is the Jackson-Nunn amendment would provide less of a credit-card approach. We will recognize reality in terms of outlays, what actually has to be spent in cash this year, this fiscal year, but we are giving less of a credit card for future years thereby insuring that we will have the defense budget under control and thereby also assuring that the Defense Department will be able to plan rationally for critical programs.

We do want to permit modernization. We also want to avoid getting down the road in 2 or 3 years and having Congress and the administration then have to severely cut the outlays because of previous charges on budget authority which we will be doing this year and next.

Mr. President, Senator JACKSON and I will have a modification of our amendment and we will be introducing that modification in the next few minutes.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. NUNN. Mr. President, it is my understanding that modification is in order.

The PRESIDING OFFICER. The author of the amendment has the right to modify his amendment.

Mr. NUNN. We will be sending a modification to the desk in the next few minutes.

Mr. President, I ask unanimous consent that the quorum call be charged equally, and I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I yield such time off the bill to the Senator from New York as he may need.

The PRESIDING OFFICER. The Senator from New York.

DOMENICI-BAKER AMENDMENT NO. 1243

Mr. MOYNIHAN. I thank my good friend, the distinguished ranking member.

Mr. President, over the weekend it has been possible to make some calculations about the impact which the Domenici-Baker substitute proposal would have on the credit markets of the Nation.

I am one of those Senators who is blessed with a staff of first-rate econometricians, and we have come up with a set of calculations that truly ought to alarm this body.

I can state in sum—and I see the Senator from Florida might want to know this, hear it directly—under the proposed substitute measure of the chairman (Mr. DOMENICI), in 1983, 65 percent of all the investment capital in the Nation's capital markets will be absorbed by the Federal Government—65 percent of all available investment. In 1984, 57 percent of all available capital, in 1985, 51 percent of all available capital. There has never in the history of the United States been a sustained period in which anything approaching these levels of capital displacement and crowding out have taken place.

The Federal participation rate in domestic credit markets over the last quarter century has averaged 20 percent. In 1981, it reached 25 percent. Now it is moving toward 38 percent and the resolution before us would have it move to 65 percent.

Mr. President, this is economic madness. Can you imagine the bellowing we would be hearing from the other side of the aisle if a Democratic administration proposed to have the Federal budget and the Federal Government take up 65 percent of the available credit in the United States and do so without even suggesting there was something out of order? I do not think in the Soviet Union the Politburo gets hold of 65 percent of the available investment capital in the country. It would be a state economy indeed to do more than that.

As we go from 65 percent, then to 57 percent, then to 51 percent, of total credit raised, where will we find the money, the capital for the reindustrialization of the United States of which we hear so much? How will the interest rates come down to make such capital available for the private sector?

What has happened? What has happened, Mr. President, is that there has been a total failure of policy. Not since the days of Smoot-Hawley has elemental precaution with respect to the role of government in the economy been so completely abandoned. And you have the ruins of that policy in these statistics.

I repeat that for the last quarter of a century the Federal Government has used some 20 percent of the available investment capital in a given year. This began to rise, in 1981, to 25 percent. In fiscal 1982, it jumped dramatically to 38 percent. It is now up toward 50 percent, and the budget before us calls for a series of fiscal years in which the Federal Government will take up, first, 65 percent of available credit, next 57 percent of available credit, and next 51 percent of available credit. There has never been such an event in American economic history.

And I say, Mr. President, that this data is new. It has been developed by us over the weekend. It is based upon the CBO calculations in every respect. And, I offer it not just for the difficulty or the disaster—and I hope I do not use such words casually—that this resolution prepares us for, but to contrast it with the resolution that the Budget Committee passed.

The Senate budget resolution, I grant, begins at a high level, but that level goes down very steadily and the downward curve is pronounced and real and available to the financial analysts whose concern these matters are. There is no such equivalent in the Domenici-Baker resolution. The economic quackery of the past 2 years has brought us to the point where the Federal Government is now going to have to borrow, beginning next year, two-thirds of the available new capital for investment in this country.

How are you going to run an ecomomy in which the Federal Government, just to pay its debts, takes up two-thirds, 65 percent of available capital? There is silence on the opposite side of the aisle. I should hope there might be some reflection as well as embarrassment connected with that silence.

Mr. President, I rise only that I might call to the attention of my colleagues a series of troubling calculations with respect to the substitute resolution offered by the distinguished Senator from New Mexico (Mr. DOMENICI) that, in turn, give force to an equally troubling set of conclusions.

Having studied the particulars of the Baker-Domenici substitute to the Senate Budget Committee's resolution, I feel bound to report that the substitute, if enacted by Congress, would result in an unprecedented period of sustained Government intrusion into the Nation's financial markets. More precisely, the substitute resolution proposed by the majority would perpetuate, for as long as we can now determine, a situation in which over half of all the available investment capital in the Nation's financial markets is absorbed by the Federal Government.

As a percentage of the total funds raised in domestic credit markets, Federal participation—which is to say borrowing for the Federal deficit, federally guaranteed loans and other Federal borrowing not included in the budget deficit—will remain at staggering levels under the Baker-Domenici substitute. The percentages under the substitute are these:

Fiscal year 1983, 65 percent; fiscal year 1984, 57 percent, and fiscal year 1985, 51 percent.

By way of contrast, I would note that over the past quarter century the Federal participation rate in domestic credit markets averaged 20 percent. In fiscal year 1981 it reached 25 percent—a fourth of all credit was absorbed by the Federal Government. The following year, fiscal year 1982—the first reflecting the full scope of the administration's economic program—Federal participation in the credit markets jumped dramatically to 38 percent, the highest rate in a quarter century and probably the highest rate in our Nation's history, though the statistical series in question, produced by the Federal Reserve Board, extends back only as far as 1955.

Now these rates will rise to even higher levels, and will be sustained over time in a manner that has no equivalent in our history.

It is not difficult to imagine the consequences. The administration says that we have entered a period of recovery. They do not generally report what it is that we are recovering from, as it is the worst recession of the postwar era; a recession evolving entirely from a mistaken set of economic theories adopted by the administration as it came to office in 1981. The administration's notion that huge tax cuts could generate revenue to finance a massive defense buildup was one of the worst economic assumptions in the history of our Nation. The administration's fiscal program, coupled with the tightest monetary policy and highest real interest rates in our history, produced the recession. And the recovery the administration now proclaims is the slowest, most tepid recovery from any recession of the postwar era.

If the Baker-Domenici substitute is put in place, the prospect of a sustained recovery—however sluggish—will shrink. Private capital demand has been so depressed by the recession, that the escalating demands of Federal borrowing have not been much noticed. But if we are entering a recovery, as the administration says, what will happen to those seeking loans for corporate expansion, homes and automobiles as they compete with a government that will lay claim to over half of all available credit? They will surely be crowded out of the market. Interest rates will climb once more: Unprecedented Federal borrowing will mean unprecedented competition for the scarce remaining credit available to consumers and businesses.

We should be clear: The Baker-Domenici substitute is a formula for dis-

aster as certain as the Laffer Curve. In the latter, "increased revenues from decreased taxes would be used to rebuild our defense capabilities," as the President put it when campaigning for office in 1980. The Baker-Domenici substitute promises only that "decreased deficits from make-shift taxes will be used to restore confidence in the financial markets." It will not happen. Just as the financial markets reacted with uncertainty to the large revenue losses projected in the President's 1981 tax cut, they will react with uncertainty to the prospect of "contingency taxes" suggested by the "sense of Congress" language in the Baker-Domenici substitute.

The deficit projections under the Baker-Domenici substitute are astounding. They would double the current national debt in but 5 years, adding another $1 trillion to the deficit. To offset these deficits, the Baker-Domenici substitute proposes a vague "sense of Congress" resolution in support of future deficit-reducing actions that are unspecified, though we are to understand that a series of "contingency taxes" will be put into place.

These "contingency taxes" are a double threat to the Nation's capital markets. They impose a high degree of uncertainty into the financial calculations of any enterprise. Neither corporations nor individuals will be able to engage in tax planning or long-range investment strategies.

Persons will respond to these contingency taxes, especially if they are designed to be temporary, by drawing down savings rather than reducing consumption. The pool of capital available for all financing, Federal and private, will therefore shrink by about the same amount as the temporary tax shrinks the deficit. We can say this will be the case because it happened once before, when Congress imposed a temporary surcharge on income taxes in 1968.

The combination of uncertainty over future taxes, large (almost unimaginable) deficits, and uncertainty about monetary policy will leave economic policy in disarray if the Baker-Domenici substitute is adopted. It will spell the end of recovery as interest rates climb, deficits grow, and the Federal Government absorbs half the credit that might otherwise go to mortgages, loans and capital formation.

The essence of this substitute is both profound and dispiriting: it says that despite record deficits, despite the prospect of unprecedented Government intrusion into the financial markets, and despite the recent failures of economic policymaking, we will take no remedial action because we cannot predict the future. That is, of all events, an admission of failure at the task of governing. The Republican majority in the Senate, in concert with a Republican administration, is hereby confessing that it cannot manage economic policy. It cannot produce a realistic budget. It cannot govern.

And I hope it is not unbecoming to suggest that there have been and still are, alternatives. Last March, I noted that this Nation's economic policy will not be rational nor sensible until we recognize that there must be better coordination between fiscal and monetary policies. And we did indeed include the first statement by Congress ever on monetary policy in the budget resolution approved last year.

Again this year, I proposed with the senior Senator from Colorado (Mr. HART) on March 2, that Congress adopt language in this year's budget resolution that would achieve a more proper mix of fiscal and monetary policies by targeting a national economic program on economic growth.

And, in closing, I should note that the Senate Budget Committee's resolution—unlike the Baker-Domenici substitute—reflects a path of declining deficits and declining Federal participation in credit transactions. Under the committee resolution, Federal participation in the credit markets will decline to 32 percent by fiscal year 1988—that is, below its level of 1982. In fiscal year 1985, the last year covered by the Baker-Domenici substitute, Federal participation under the committee resolution would be 16 percent below the level suggested by the substitute.

In short, the only "recovery resolution" pending before the Senate is the Senate Budget Committee's version. It is far less than perfect. But it is the only option available to the Senate if the Nation is to have a recovery from the worst recession of our time.

Mr. President, I ask unanimous consent that materials relating to the presentation I have just made be printed at this point in the RECORD.

There being no objection the material was ordered to be printed in the RECORD, as follows:

FEDERAL PARTICIPATION IN THE NATION'S FINANCIAL MARKETS

[Dollars in billions]

	1983	1984	1985
Estimates of the effect of the Baker/Domenici substitute:			
Total funds raised in U.S. credit markets	$431	$471	$515
Federal borrowing from public (on-budget deficit)	$204	$192	$186
Off-budget borrowing	$28	$31	$29
Federally guaranteed borrowing	$47	$47	$49
Federal participation rate (percent)	65	57	51

[Dollars in billions]

	1983	1984	1985	1986	1987	1988
Estimates of the effect of the Senate Budget Committee resolution:						
Total funds raised in U.S. credit markets	$431	$471	$515	$558	$600	$645
Federal borrowing from public (on-budget)	$204	$163	$147	$133	$135	$124
Off-budget borrowing	$28	$31	$29	$27	$28	$28
Federally guaranteed borrowing	$47	$47	$49	$51	$52	$53
Federal participation rate (percent)	65	51	44	38	36	32
Estimates of the effect of the CBO baseline:						
Total funds raised in U.S. credit markets	$431	$471	$515	$558	$600	$645
Federal borrowing from public (on-budget and off-budget deficit)	$215	$212	$224	$241	$260	$267
Federally guaranteed borrowing	$44	$45	$48	$51	$53	$56
Federal participation rate (percent)	60	55	53	52	52	50

TABLE 1.—BORROWING UNDER FEDERAL AUSPICES: ABSORPTION OF DOMESTIC CREDIT MARKET FUNDS

[Fiscal years; in billions of dollars]

	5-year averages—					1980	1981	1982
	1955–59	1960–64	1965–69	1970–74	1975–79			
Total funds raised in domestic credit markets [1]	$35.5	$50.8	$80.6	$148.7	$307.8	$366.4	$427.2	$408.7
Federal borrowing	$2.1	$4.5	$6.4	$13.0	$56.8	$70.5	$79.3	$135.0
Net guaranteed loans	$4.0	$4.3	$5.1	$13.9	$13.6	$31.6	$28.0	$20.9
Net Government-sponsored enterprise borrowing	$0.4	$0.7	$1.0	$5.0	$12.6	$21.4	$34.8	$43.8
Total funds raised under Federal auspices	$6.5	$9.5	$12.4	$31.9	$83.0	$123.5	$142.1	$199.7
Federal absorption rates (percent)	18	19	15	21	27	34	33	49
Federal absorption rates without Government-sponsored enterprises (percent) [2]	17	17	14	18	23	28	25	38

[1] Funds raised by non-financial sectors, excluding equities.

[2] Government sponsored enterprises are privately owned, but federally chartered corporations. These organizations include the Federal National Mortgage Association (FNMA), the Student Loan Marketing Association (SLMA), the Federal Home Loan Bank System and the Farm Credit System. These organizations are generally included in analyses of Federal Government participation in the nation's credit markets, even though they are quasi-private corporations.

Source: Federal Reserve Bulletin Flow of Fund accounts, adjusted during 1965–69 for consistency with budget concepts.

From: 1984 Budget, "Additional Details" volume, p. 122 Office of Management and Budget, Executive Office of the President.

HOW THE ESTIMATES WERE DERIVED FOR CALCULATING TOTAL CREDIT RAISED IN DOMESTIC CREDIT MARKETS

The Federal Reserve Board maintains a data base for analyzing financial market activity called the Flow of Funds. We took their figure for total credit raised on a fiscal year basis for 1982 ($408.7 billion) and used CBO economic assumptions to derive estimates for fiscal years 1983-1988. The calculations are as follows:

[Dollars in billions]

	CBO assumption for percent change for nominal GNP	Prior year credit raised	Current year credit raised
Fiscal year:			
1983	5.4	$408.7	$431
1984	9.4	431.0	471
1985	9.2	471.0	515
1986	8.4	515.0	558
1987	7.6	558.0	600
1988	7.5	600.0	645

All information on off-budget borrowing (borrowing not included in the budget deficit by the Federal Government) and borrowing for Federally guaranteed loans from the "Report of the Committee on the budget of the United States for the First Concurrent Resolution on the Budget, FY 1984", pages 141 and 142.

Estimates for borrowing for guaranteed loans assume that only one-half of the total commitments for guaranteed loans are used in each fiscal year. Therefore, we have reduced the guaranteed loan estimates contained in the Committee Report on pages 141 by half.

Mr. DOMENICI. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DURENBERGER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

(During the quorum call Mr. PRESSLER assumed the chair.)

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHILES. Mr. President, I yield time off the bill to the distinguished Senator from Hawaii.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that I may be able to proceed as if in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

(Mr. MATSUNAGA'S remarks are printed earlier in today's RECORD under routine morning business.)

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

Mr. JOHNSTON. Will the Senator withhold that?

Mr. GORTON. I withhold.

Mr. JOHNSTON. Mr. President, I yield 2 minutes to the Senator from Georgia (Mr. NUNN).

AMENDMENT NO. 1242, AS MODIFIED FURTHER

Mr. NUNN. Mr. President, Senator JACKSON and myself introduced an amendment a couple of hours ago relating to defense. We would like to send a further modification to the desk.

Mr. President, I do send a further modification to the desk in behalf of Senator JACKSON and myself.

The PRESIDING OFFICER. Without objection, the amendment is modified further.

The amendment, as modified further, is as follows:

On page 3, increase the figure on line 13 by $4,900,000,000.

On page 3, increase the figure on line 14 by $2,900,000,000.

On page 3, decrease the figure on line 15 by $200,000,000.

On page 3, increase the figure on line 19 by $1,000,000,000.

On page 3, increase the figure on line 20 by $2,000,000,000.

On page 3, increase the figure on line 21 by $2,500,000,000.

On page 4, increase the figure on line 1 by $1,000,000,000.

On page 4, increase the figure on line 2 by $2,200,000,000.

On page 4, increase the figure on line 3 by $2,900,000,000.

On page 4, increase the figure on line 7 by $1,000,000,000.

On page 4, increase the figure on line 8 by $3,200,000,000.

On page 4, increase the figure on line 9 by $6,100,000,000.

On page 4, increase the figure on line 14 by $1,000,000,000.

On page 4, increase the figure on line 15 by $2,200,000,000.

On page 4, increase the figure on line 16 by $2,900,000,000.

On page 6, increase the figure on line 5 by $4,900,000,000.

On page 6, increase the figure on line 6 by $1,000,000,000.

On page 6, increase the figure on line 11 by $2,900,000,000.

On page 6, increase the figure on line 12 by $2,000,000,000.

On page 6, decrease the figure on line 17 by $200,000,000.

On page 6, increase the figure on line 18 by $2,500,000,000.

On page 25, increase the figure on line 17 by $200,000,000.

On page 25, increase the figure on line 18 by $200,000,000.

On page 25, increase the figure on line 23 by $400,000,000.

On page 25, increase the figure on line 24 by $400,000,000.

Mr. NUNN. Mr. President, this modification will provide in the Jackson-Nunn amendment a real growth in budget authority for fiscal year 1984 of 6.5 percent, a real growth in budget authority in fiscal year 1985 of 5.5 percent, and a real growth in fiscal year 1986 of 5 percent.

This will add to the current pending resolution that came out of the Budget Committee, but will be somewhat less than the Domenici substitute. The key here, Mr. President, is not the numbers as much as it is the relationship between budget authority and outlays.

It would be our strong view that the Domenici proposal that we will be voting on later in the week has an inordinately unrealistic relationship between budget authority and outlays. I believe the ratio is approximately 1.6 percent in terms of reduction.

The PRESIDING OFFICER. All time has expired.

Mr. NUNN. I ask unanimous consent to proceed for 2 more minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NUNN. The Jackson-Nunn amendment would provide for approximately a 3-percent ratio between reductions when measuring the reductions in budget authority and the reductions in outlays. The Domenici substitute will have about a 1.6 relationship between budget authority and outlays.

To try to put a very complicated and complex matter in its simplest terms, what it means is that we are cutting down on the credit card represented by budget authority; we are keeping the cash outlays approximately the same as in the Domenici proposal, but what this will do is to require us to take some realistic steps now in terms of reducing budget authority so that in the outlays, that is, next year, the year after and the year after, we will have the defense budget under control in the sense that we will be able to make those outlays as projected in both ours and in the Domenici resolution rather than dream.

If you keep sending out charges on the credit card, when it comes time to pay them in terms of outlays in the outyear, then you have to pay the bill. So the driving force in defense spending is budget authority. To pretend that you can continue to have very large budget authority in proportion to outlays is simply to ignore the reality of the defense procurement process. So we are trying, by this amendment and its modification, to create the proper relationship between budget authority and outlays to raise the numbers of both compared to the Budget Committee resolution, but to be somewhat less in budget authority than the Domenici substitute.

We hope our colleagues will study this closely so when we vote on it tomorrow, we will all be better acquainted and have an opportunity to better understand the defense budget authority and outlay categories.

Mr. JACKSON. Mr. President, I ask for the yeas and nays on the Nunn-Jackson amendment, which was previously introduced.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

THE REPUBLICAN SUBSTITUTE BUDGET

Mr. JOHNSTON. Mr. President, I am almost as shocked by the results embraced in this package as I was by the deficits for 1983 and beyond implicitly accepted in the administration's fiscal year 1984 budget proposals which were submitted in February.

To put this proposal in perspective, consider this: Three years ago, in February 1980, President Carter's fiscal year 1981 budget projected a $15.8 billion deficit. That deficit was received with such alarm that the Carter administration, only 2 months later, was forced to revamp its proposal and submit a new budget trimming spending in both fiscal year 1980 and fiscal year 1981. Congress acted responsibly to the then-shocking projection of a $16 billion deficit, instead of a balance, by increasing the level of spending reductions recommended by President Carter and adopting for the first time reconciliation instructions to reduce spending by $6 billion as part of the first concurrent resolution for fiscal year 1981 in May 1980. Although it took far more time than many of us wished, Congress continued to work to reduce burgeoning spending estimates. That July, Congress approved over $3 billion in rescissions from fiscal year 1980 appropriations bills and, in December, passed the omnibus reconciliation bill, with over $8 billion in further deficit reductions.

Even these bold and unprecedented steps to control deficits proved insufficient in the face of unexpected, sharp oil price hikes by OPEC in June and raging inflation. Recognizing this, in early 1981, President Reagan and Congress faced the rising fiscal year 1981 deficit problem squarely, approving in June over a half billion dollars in fiscal year 1981 rescissions and, a month later, adopted through the omnibus reconciliation bill cuts in the fiscal year 1982 budget totaling over $35 billion.

Now, in the face of a deficit greater than $200 billion in fiscal year 1983, almost 3½ times greater than the huge $57 billion deficit we faced in fiscal year 1981, we are being asked to postpone major deficit-reducing actions until next year or the year thereafter. Imagine postponing action in the face of these changes:

[By fiscal years; in billions of dollars]

Reagan's 1981 deficit projection:	
1983	−22.0
1984	+.5
1985	+6.9
1986	+29.9
May 1983 CBO deficit: Projection of Republican substitute:	
1983	−204.0
1984	−192.0
1985	−186.0
1986	−196.0

Imagine postponing action in the face of these changes: Instead of a $22 billion deficit in 1983, as projected by the President in his 1981 deficit projection—instead of that $22 billion deficit, we have $204 billion in deficits, according to the CBO reestimation of the Republican substitute.

Instead of a $0.5 billion surplus in fiscal year 1984, the substitute projects a $192 billion deficit.

Similarly, in 1985, the Reagan projection was $6.9 billion in surplus; instead, they now project a $186 billion deficit. Instead of a $29.9 billion surplus in fiscal year 1986, CBO projects a deficit of $196 billion in 1986.

Imagine being asked to postpone major additional actions on entitlements and revenues while adding $17 billion in fiscal year 1984 and fiscal year 1985 alone for defense. Such a proposal, at best, would have been laughable 3 years ago.

In testimony before the Senate Budget Committee earlier this year, witness after witness from every part of the political spectrum emphasized the necessity of decisive actions this year to reduce future deficits. On February 24, FRB Chairman Paul Volcker warned, "The most obvious obstacle to sustained recovery is the prospect of huge Federal deficits even as the economy expands." Surely, deficits in the $180 to $220 billion range still meet the definition of "huge."

As Volcker further noted:

There may be a danger that numbers in the $200 billion plus range have been cited so frequently as make them seem almost comfortable and familiar. No matter how readily $200 billion slips off the tongue, the hard fact remains that deficits of this magnitude would preempt an unprecedented share of our net savings, keep "real" interest rates high, and divert funds from the investment and the housing we need and want.

Not only are deficits of this size, which hover at 5 percent of GNP for the foreseeable future, moving us, as the Bipartisan Budget Group of former Cabinet Secretaries puts it, into risky and dangerous "uncharted fiscal territory," but such huge deficits left unfettered are also putting the prospects for a sustained recovery this year in jeopardy. Even the President's own Council of Economic Advisers in their annual report released on February 2, 1983, warned that:

The prospect of large budget deficits in the second half of this decade may also have an adverse effect on the prospects for recovery in 1983. Clear evidence of the willingness of the administration and the Congress to reduce Federal budget deficits substantially in the second half of the 1980's can play an important part in insuring a healthy and balanced economic recovery in the more immediate future.

That is, aside from the "crowding out" risk these deficits pose for private investment in the future when the recovery is well underway, deficits of the size now contemplated pose a more immediate threat: Sending interest rates soaring.

Dr. Jack Carlson, chief economist for the National Association of Realtors, noted:

The strong increase in residential investment and automobile sales have combined with falling world oil prices to improve the prospect of noninflationary economic recovery. However, enormous Federal budget deficits for the foreseeable future will keep real interest rates high by historical standards and dampen recovery to only about two-thirds the average recovery of the last 30 years.

CBO Director Alice Rivlin, in testimony before the Budget Committee on February 15, also warned us that:

Substantial reductions in the deficit over the entire projection period 1984–88 are needed if a balanced recovery is to be sustained and the low-investment scenario avoided. This points to the need for a multiyear plan that is devised and legislated this year. Prompt action must be taken both to insure an orderly reduction in out-year deficits and to reduce the uncertainty about future fiscal policy.

In my view, the sense of the Congress language contained in section 3 of the Republican substitute which proposes vague, unspecified savings in fiscal years 1986–88 if deficits stay above 2.5 percent of GNP, will have no more credibility with the financial markets than did the "magic asterisk" savings proposed in 1981 for the fiscal year 1984 budgets.

We all remember the magic asterisks added to these budgets with unspecified savings, none of which ever materialized and none of which ever had any credibility.

In fact, it was in part because of the unspecified, vague nature of the deficit reductions in the outyears that the Senate Budget Committee on April 6, 1981, scuttled the first version of the fiscal year 1982 budget resolution by a bipartisan 8 to 12 vote. Only after a savings package was specified to put us back on the path to a balanced budget was the vote reversed, 3 weeks later, and the fiscal year 1982 resolution reported to the floor.

Unfortunately, however, that package consisted primarily of management savings, savings to eliminate waste, fraud, and abuse and other savings which never materialized. The tough decisions about additional deficit reductions were postponed then. And as a result, that fragile $22 billion fiscal year 1983 deficit and the balanced budget for fiscal year 1984 have instead blossomed into the current $200 billion deficits. Postponing again the addition of a specific and concrete plan for the 1984–88 period will only exacerbate our current crisis. In my view, there is no reason for anyone in the financial markets to find any real hope that action will be taken next year, an election year, or the year thereafter to bring deficits substantially down below $200 billion.

I can only conclude that this substitute will set the stage for rapid in-

creases in real interest rates now, which will slow the growth momentum we are counting on and set the stage for a monumental crowding out of private investment next year, or for another clash between fiscal and monetary policy with further fears of monetizing the debt which could set off a new round of double digit inflation. The Bipartisan Budget Group issued warnings earlier this year about the dangerous effect long-term deficit projections, such as those contained in this substitute, could have for our economy. That group concludes, as I do, that unprecedented levels of real long-term interest rates "are clearly related not simply to the collision between tight money policy and loose fiscal policy but to the market's uncertainty and concern about the Government's long-term budget policy." This substitute gives us the worst of both worlds and will only set the stage for further deterioration in the living standards of all Americans.

The micro aspects of the proposal also give me grave cause for concern. As compared to the committee reported resolution, interest costs alone under this substitute would increase $42 billion over 5 year, or by over $460 for each taxpayer in this country between now and 1988. In fiscal year 1984 and fiscal year 1985, over $17 billion in budget authority and $6 billion in outlays would be added to the committee recommendations just for defense. The 5 year total addition would amount to over $58 billion in budget authority and over $47 billion in outlays. And that is if, and only if, the 7½ percent real growth in fiscal year 1984 for defense is limited to 5 percent real growth in future years. Altogether, this substitute would add over $300 billion to the 5 year, $700 billion deficit approved by the committee, bringing the 1983-88 addition to the debt to over $1 trillion. If adopted unchanged, this substitute would by 1988 more than double the level of the public debt we balked at in 1981, from $1 trillion to well over $2½ trillion. This would more than double the burden of debt for each family of four in the United States to almost $44,000, a legacy which will only erode the future standard of living for our children and our grandchildren.

Last week, I with some of my colleagues, Senator NUNN, Senator EXON, Senator BOREN, and others, offered a substitute budget to reduce the deficits contained in the committee-reported resolution by over $125 billion and from the baseline by over $550 billion by fiscal year 1988. Savings in interest payments alone under this plan, because of lower deficits, were projected at over $50 billion from the baseline. This, I firmly believe, is the proper direction. The direction proposed in this substitute is just the opposite: Adding $306 billion more in deficits by 1988 than did the committee.

Under this substitute, deficits would be reduced from 6.4 percent of GNP in 1983 only slightly, to 4.6 percent in 1988, or by only 1.8 percent in 5 years. This would leave deficits at almost double the average in 1975-79, another recovery period. Moreover, the level of debt held by the public would likely grow close to 50 percent of GNP by 1988, hardly giving us an atmosphere conducive to private investment. Our plan, in contrast, would have reduced deficits to less than 1.2 percent of GNP under baseline economics, resulting in a balance shortly thereafter and would have halted dramatically the growth rate of debt held by the public as a percent of GNP, creating the stage for more private investment and improved productivity. If we do not want to mortgage the economic future of our children, and leave them a legacy of lowered standards of living, steps such as those I outlined must be taken now, by specific and concrete action.

Mr. President, I urge the Senate to reject this substitute and work seriously to reduce the deficits we are facing now. If experience is any guide, postponing action until next year or later will only make our job more unpalatable, more difficult, and ultimately more painful.

I cannot help but say, Mr. President, that the same group of Senators who proposed the balanced budget substitute which I just described proposed such a substitute last year. The steps that were necessary last year, though difficult, were much easier than those which we proposed this year. The same thing will be true next year if we again propose a balanced budget substitute; the budget will balance later in numbers of years and the steps to be taken will be more difficult then than now. Of course it is difficult to cut rates of increase in the different budget categories. Everyone wants an increase. No one wants to have his rate of increase restrained, whether it is national defense, entitlements, highways, or in any other kind of Government spending program. But unless we get those rates of increase under control and unless we do it now, things are going to get much more difficult, mortgaging the future of our children, the future of our Nation, the American economic way of life, the American dream, if you will.

I hope the Senate will deal seriously with the matter of high budget deficits and go in exactly and precisely the opposite direction as is represented by the Republican substitute.

Mr. GORTON addressed the Chair.

The PRESIDING OFFICER. The yeas the nays having been ordered on the Nunn amendment, and the time having expired, the amendment will be voted on tomorrow at 2 o'clock.

The question recurs on the Domenici substitute.

The Senator from Washington.

Mr. GORTON. I yield myself such time from the bill as I may use.

Mr. President, I wish to speak very briefly on the Jackson-Nunn amendment and also briefly on the presentation just made by my friend from Louisiana, Senator JOHNSTON. I emphasize, in both respects, that I speak for myself and not the chairman of the Budget Committee.

In connection with the Jackson-Nunn amendment, against which I intend to vote tomorrow, I should like to point out for the RECORD, as I did to my dear friend and colleague the senior Senator from Washington, that despite the fact that we are of opposite parties, this will mark the first time in my 2½ years as a Member of the U.S. Senate in which we have actually spoken or debated on opposite sides of an issue.

Having made that statement, I need to add to it that perhaps, as measured against the Domenici amendment, which is before us at the present time, it represents a constructive step.

As the Senator from Georgia pointed out, it also certainly creates a relationship between budget authority and outlays which is more realistic and promises more restraint in future years than does the 7.5-percent budget authority increase for fiscal year 1984, which is contained in the budget authority amendment itself.

Nevertheless, I must of necessity point out that the proposal by the Senators from Washington and Georgia is not set forth as an amendment to the Domenici amendment. It is an amendment to the budget resolution which was reported to the Senate by the Budget Committee. In that respect, it is of course an increase, an increase of more than 1 percent per year; and it is a continuation, in my view, of the percentage game which has occupied too much of our time in the debate over national defense.

While, for shorthand purposes, the report of the Budget Committee is listed as a 5-percent real increase in the budget for national defense for fiscal year 1984, it is in fact a decision on the part of the committee, made on policy grounds, asking for certain features in the national defense budget for fiscal year 1984. It comes closer, over the period covered by the budget resolution, to being a 5.3-percent increase, but it nonetheless is policy related.

One of those policies—but only one of them—is the necessity that the budget for national defense reflects the same kind of discipline which is being imposed by this resolution on other spending programs, the problems in connection with which were

eloquently stated by the Senator from Louisiana in his last statement.

It may be that before we finish this debate, we will in fact increase the increased rate for national defense; but I suspect that it will be only for tactical purposes, for purposes of a conference with the House of Representatives, which I am firmly convinced recommended much too small a budget for our national defense and military structure.

I remain convinced, however, that the appropriate eventual figure is that included in the resolution before us at the present time, and therefore I am constrained to vote against the Jackson-Nunn amendment.

Moving to a different and even larger subject, the Senator from Louisiana eloquently and accurately has outlined both the history of budget deficits and the difficulties of dealing with them.

He pointed out, most trenchantly, in my view, that a process leading to a balanced budget which was difficult last year became more difficult this year and will be even more difficult a year from now, when we next debate this proposition.

Perhaps that increasing difficulty is best reflected by the proposition that 1 year ago, his proposal received 23 votes on the floor of the U.S. Senate, and last Thursday, it received 13. As I was one of those 13, I know that the Senator from Louisiana joins me in saying that it was a rather lonely group. In fact, what it showed more graphically than anything else was that the middle ground in these budget debates is overwhelmed by the extremes.

Many Members, a great majority of the Members, on his side of the aisle voted against his proposal because it cuts to deeply, from their point of view, into numerous spending programs, almost across the board. Many Members on this side of the aisle voted against his proposal because they felt that it included his tax numbers and increases in revenues and taxation which were far greater than they were willing to accept.

I must confess that I joined them in that respect. I felt that those numbers were too great, that they represented too large an increase in taxation. Nevertheless, I felt that, could we get the whole package, the Nation would be better off with both those reductions in spending and those increases in revenues and the corresponding reduction in budget deficits.

The debate and the vote on that proposition last week, however, probably showed better than anything else the number of Members of this body who regard budget deficits as the most important element in a budget debate.

We get a great deal of lipservice to the proposition that budget deficits should be lower, but we find that almost every Member has priorities higher and more significant than those deficits.

I disagree, however, with the conclusion of the Senator from Louisiana—the conclusion that we should defeat the Domenici amendment which is before us at the present time. I believe that that defeat, in effect, would lead to a worse situation and not a better one. If we were eventually to end up with no budget resolution at all, I suspect—as a matter of fact, I would expect—that there would be little, if any, discipline on the spending process. Without reconciliation, few, if any, entitlement programs would be changed and reformed at all. I also tend to believe that no significant action would be taken with respect to revenues, either, under those circumstances.

The Senator from Louisiana well knows that, privately at least, almost certainly a majority of the Members, even on his side, believe that the requests for new revenues of $30 billion in 1984 and $45 billion in 1985, which are a part of this budget resolution, not only are unattainable, but also might well have a negative impact on the economy.

As a result, rather reluctantly, I have come to the conclusion that the proposal of the Senator from New Mexico, which is before us now, is perhaps the best we can do. It at least recognizes the need for additional revenues. I wish it were recognized more eloquently and more firmly.

I may say in passing that a final resolution resulting from a conference with the House will do exactly that. This proposal does recognize the need for greater discipline in the spending process that we are likely to get simply by moving from this point into an appropriations bill.

So, while I voted, with some degree of enthusiasm and some reservations, for the proposal made last Thursday by the Senator from Louisiana, it did receive only 13 votes; and it seems to me that it is now appropriate for us to go forward with a resolution which can go to conference with the House of Representatives and can result in a budget which at least begins to move in the direction of spending and revenues on which the Senator from Louisiana and I agree.

Mr. JOHNSTON. Mr. President, I yield myself such time on the bill as I may use.

I thank the distinguished Senator from Washington for his kind comments on the amendment for which he voted, and indeed he also joined with me and others in our amendment of last year which would have balanced the budget.

I must say that the budget process has been somewhat of a disappointment in its failure to deliver on its ability to restrain budget deficits.

The theory was supposed to have been that by dealing with the whole budget at one time and in one resolution, you could avoid being nibbled to death by individual increases, that looking at the whole budget in a macroeconomic way, you could bring it all down, and indeed that was the theory behind our amendment of last week, that things which you could not do looked at individually, such as restraining the rate of increase of entitlements, taken by itself and not in relationship to other restraints of spending, would have been unacceptable, not only to the Senate as a whole but to me and to those of us who offered the amendment.

But the idea was if we could present a balanced budget with equitable and fair restraints of spending in all categories, it could be bought, it could be accepted by the Senate.

Alas, as the distinguished Senator from Washington pointed out, there were only 13 brave souls who joined onto that. Last year, if I recall correctly, there were only 21 or 23, whatever it is, not very many, although I must say last year we got a great many Senators who said, "Well, you are heading in the right direction, but for an election year I would be for you, I am almost persuaded," all of those almost words that could almost lead one to believe that we very nearly passed that piece of legislation.

Here we are standing in the ashes of that balanced budget amendment, and we find indeed that we are going in exactly the opposite direction. There is not one single category of spending in the so-called Domenici substitute which is lower or equal to those that we had in our amendment, and in every single category they seem to take the higher figures, higher in national defense, up from 5 percent to 7½ percent, which is a gigantic increase.

There is no restraint at all in entitlements. There simply is the explanation, "Well, it cannot be done." There is virtually nothing put in on revenues.

My friend from Washington says, "Well, you know, you cannot pass $30 billion in additional revenues."

Who says we cannot pass $30 billion in additional revenues? It is but for the threat of veto of the President, and it seems to me that the President may be turned around if Congress reacts unfavorably to these huge deficits. It seems to me, the only problem standing between us and suspending the third year of the tax cut is the threat of veto by the President which, of course, is a substantial threat, but it would take very few votes on the Republican side of the aisle to join with many of us on this side of the aisle who although we are very strongly for tax cuts—in fact, we are for no taxes,—who wants to be for taxes when you

can be for no taxes and for lower taxes? Of course, this is wonderful.

But in the face of a $204 billion deficit, it seems to me to be cutting taxes in that kind of atmosphere is foolish in the ultimate.

I just think that there are enough Senators and enough Members of the House of Representatives who recognize the folly of that action, that is, cutting taxes in the midst of a $200-plus billion deficit, that it could be done.

Indeed, when we get to the conference committee, I would at least hope that some middle figure can be adopted, although this business of bargaining chips, you must say, Mr. President, whether it is in nuclear arms or in budget matters, seems to be leading the country in the wrong direction. We seem to be building the MX not because we need additional warheads, not because it contributes to American security, but because somehow it is supposed to scare the Russians so we can get a better arms control deal and so it is that we add much additional spending in the budget resolution or at least we are being urged to do so by the so-called Domenici substitute, more money for taxes or should I say less savings in taxes, more spending in national defense, a lot more, so that we will somehow have these bargaining chips when we go to the conference committee.

There is not a single bargaining chip in that Domenici substitute on the low side. There is nothing in there that is going to somehow give us an advantage to bargain for lower budget deficits but simply to bargain them up.

So, Mr. President, if that is the theory, and I guess it is, of the Domenici substitute, I say it is going in the wrong direction.

Mr. GORTON. Mr. President, will the Senator yield?

Mr. JOHNSTON. I yield.

Mr. GORTON. I do not think the Senator really would follow through with that last statement that the Domenici proposal is almost billions of dollars lower and thus resulting in lower deficits in domestic spending than is the House budget with which we will be conferenced; is that not the case?

Mr. JOHNSTON. The Domenici substitute is the same as the Budget Committee proposition so in that sense I say the Domenici substitute did not go down at all. It simply accepted one area of spending as proffered by the Senate Budget Committee and everything else it increased; most categories were increased.

Mr. GORTON. The Senator is correct, when we compare it with what was reported by the Senate Budget Committee but, of course, it is much lower than the House of Representatives is.

Mr. JOHNSTON. Yes; it is, and it should be. It is not as low as I would have it, not as low as the amendment that the Senator from Washington and I voted for that only got 13 votes. Unrealistic, perhaps, but, Mr. President, I think it all depends on how you look at this economy.

I think the Domenici substitute looks at the economy from the standpoint of the fact that the budget deficits are maybe uncomfortably large or maybe a little bit embarrassing, maybe a little bit inconsistent with Republican rhetoric, but really at the bottom there is nothing to worry about, no cause for alarm. We have had budget deficits before, and we can get by with them by pretending we do not like them and pretending we are going to blame them on someone else and maybe blame it on Democratic Congresses in the past who richly deserve some of the credit for big deficits. No none disputes that.

But if you look at it as I look at it, Mr. President, that this is a real mortgage on the economic future of the country, that it will abort this economic recovery before it gets underway, that it will surely bring higher interest rates, a new round of stagflation, recession, high unemployment, and all that that brings, then the Domenici substitute is totally unacceptable.

The thing that is curious to me, and I must say it is really curious not just out here to speak, but I mean it is inside, deeply curious, is how he ever expects to get a majority on the Republican side of the aisle to vote for that. How can deficits of that size be bought? I do not understand it, Mr. President. I mean I have heard the distingished Senator from Washington who I must admit in a brilliant statement the other morning on public radio put the best face possible on a very difficult case. How anyone really can believe that, believe it is OK, as Paul Volcker said the other day, the fact that these deficits have been around now for enough months and in large enough size as to almost become comfortable and familiar, and the fact that you can trip $200 billion off the end of the tongue in a facile way does not make them any less frightening, any less difficult for the country.

I do fear that Paul Volcker is right, that is, that these huge deficits have been around now for enough months that even Ronald Reagan is not afraid of them any more. Indeed he appears to be embracing them almost eagerly, as he asks us to increase defense spending and to keep taxes ever decreasing.

Mr. President, there is an article in Business Week of May 16, 1983, by William B. Franklin, chief outlook editor, which I think would be constructive to put in the RECORD at this point for the edification of my colleagues and public on this subject of the size of deficits. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BUSINESS OUTLOOK: THE FEDERAL DEBT STILL HAS THE RECOVERY ON A SHORT LEASH

BUSINESS OPTIMISM IS ON THE RISE, YET PLANS FOR CAPITAL SPENDING ARE DOWN

(By William B. Franklin, Chief Outlook Editor)

The data now appearing show that the second quarter will bring a modest improvement over the first three months of 1983. The leading indicators for March rose a strong 1.5%. This, together with an uninterrupted seven-month gain, means that the recovery is still in train.

But the upswing hasn't picked up speed, as the recent strong advances in the Commerce Dept.'s composite index might suggest.

Consumers are still holding back. And capital spending, after adjustment for inflation, will be off this year for the second year in a row.

The major hurdle to recovery remains rapidly growing federal debt, which limits a decline in interest rates. Rapid disinflation has curbed the growth of government revenues, but it hasn't reduced prospective government spending.

Budget outlays have risen above earlier estimates as new spending programs are initiated, and older programs are not being cut back.

As long as the modest pace of the recovery keeps private credit demand in check, however, the Treasury has more room to operate in the credit markets—and rates can ease downward.

The first $6.5 billion chunk of the Treasury's recent $15 billion financing package brought the lowest average yield on three-year notes in nearly three years. However, improvement in key long-term rates remains slow.

Despite the hard-core problems of federal debt and stubbornly high interest rates, the leading indicators are quite positive. The 1.5% increase in March follows a gain of 1.4% in February and a smashing 3.2% in January.

The pluses still outnumber the minuses. In March, of the 11 available foreshadowing indicators, seven were up and four were down.

The major contributors to the advance in the Commerce Dept.'s composite index of leading indicators was a considerable acceleration insensitive commodity prices, a sharp increase in the number of companies reporting slower deliveries of goods, and an increase in the factory workweek.

Also on the plus side, indicators were up for new business formations, contracts and orders for new plant and equipment (adjusted for inflation), stock market prices, and the inflation-adjusted money supply.

On the negative side were an increase in initial claims for unemployment insurance, fewer new orders for consumer goods and materials (adjusted for inflation), a slight reduction in homebuilding permits, and a decline in consumer and business borrowing.

The index of coincident indicators—those that track the current path of the economy—advanced 0.7% in March, more than making up for the 0.5% decline in February, but less than the 1.3% gain in January.

Business optimism is improving. Dun & Bradstreet's quarterly survey of almost 1,500 business executives shows that the index of their optimism about sales for the second quarter jumped 18 points, to 55, after rising slightly in the previous quarter.

There has also been a sharp advance in the number of companies expecting increasing profits. Richard D. Rippe, economist for Dean Witter Reynolds Inc., notes that as a result of the 1981 Accelerated Cost Recovery System (ACRS), depreciation allowances are up substantially, which improves the quality of profits.

By his estimates, the ACRS reduced tax liabilities in the first quarter by $10 billion to $11 billion.

But the improved picture for sales, profits, and cash flow is still having little effect on expansion plans.

The spring survey by the Economics Dept. of McGraw-Hill Publications Co. indicates that business plans to spend $312.2 billion for new plant and equipment in 1983. That is a decline of 1.3 percent from 1982, and allowing for an expected 5.6 percent price increase, real outlays would fall 6.5 percent. Moreover, the implied quarterly pattern that fits in with this survey is for little, if any, real growth in capital spending until the fourth quarter.

However, as the McGraw-Hill economists speculate, the price assumption may well prove too high. If so, real growth for the year may do somewhat better than the numbers indicate.

THE SOARING DOLLAR REMAINS A DRAG ON THE ECONOMY

One very serious drag on business is the adverse trade balance. The merchandise trade deficit in March was $3.6 billion: Exports were $16.8 billion, while imports rose to $20.4 billion.

Exports, hobbled by the soaring dollar, are the major problem. Although they rose 2.6 percent in March, mainly because of a 32 percent jump in commercial aircraft exports, they remained 9.3 percent below March of last year.

Compared with the average level of other currencies, the U.S. dollar rose an unprecedented 45 percent from mid-1980 to the end of 1982.

Since November it has backed down only 3 percent. This has kept U.S. goods more expensive at a time when other countries are tightening their belts.

Falling oil prices and production, in particular, curbed demand for U.S. goods in the oil-producing countries. U.S. exports to OPEC tumbled 10 percent in March, after falling 6 percent in February.

Other less developed countries are finding it difficult to borrow to finance imports. U.S. exports to Mexico, for example, plunged 17 percent in March.

On the other hand, U.S. imports remain strong, in part because the highpowered dollar makes the price of foreign goods more attractive. U.S. imports rose 2.4 percent in March, despite the beneficial effect of lower oil prices.

In particular, chemical imports in March were 18 percent ahead of a year ago. Buyers are importing more than they used to, partly because foreign-made chemicals cost 10 percent to 30 percent less than U.S. products.

The competitive pressure on other import-sensitive industries was also evident in March—and it will continue through the year. Textile imports rose 7 percent in the month, while steel imports jumped 10 percent.

HOUSING COULD FIZZLE IF INTEREST RATES STAY HIGH

The construction industry is still buoying the recovery—but not at the heady rates of earlier in the year.

The value of new construction projects declined 2 percent in March, to an annual rate of $245.4 billion, seasonally adjusted. Construction spending fell 3 percent in February, although it had jumped 7 percent in January.

The weakness since January has been concentrated in nonresidential building and public construction. In particular, spending for commercial and industrial buildings declined 3 percent in March; the value of public construction dropped 7 percent.

But residential construction, over one-third of total spending, rose in both March and February and now stands 40 percent ahead of last year.

Further gains are in the cards. The Dodge index of construction contracts rose 10 percent in March, to 131 (1977=100), according to the F. W. Dodge Div. of McGraw-Hill Information System Co.

Homebuilding and public works provided the March strength. But underutilized capacity inhibited contracting for business-related buildings.

Homebuilding must be supported by home buying—and continued declines in mortgage rates are necessary for that. In March, however, the effective rate on the purchase of new homes stopped falling. The rate rose for the first time in the past nine months, to 13.51 percent, from 13.16 percent in February.

Moreover, new-home sales backed down for the second consecutive month in March, to a seasonally adjusted annual rate of 577,000.

Currently, new-home sales are running well below the level necessary to support the recently strong level of housing starts. So it's likely that, without further declines in interest rates, the housing rebound will fizzle.

Mr. GORTON. Mr. President, I yield myself such time from the bill as may be necessary.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from Washington.

Mr. GORTON. My friend from Louisiana has, to my delight, retained his curiosity. He is curious as to how those of us who support the substitute proposed by the Senator from New Mexico can look with such equanimity on these very, very large budget deficits.

I must say the Senator from Washington is also curious, and he is curious at what theory there is that says that we can tax our way out of a recession, that $30 billion more in taxes beginning on July 1 will somehow or another result in greater economic growth than would otherwise be the case. I suppose those two complementary curiosities are at the heart of the problem which we face at the present time.

The maximum in the way of taxation proposed by the Senator from Louisiana next year would reduce the budget deficit by perhaps one-sixth or one-seventh from slightly under $200 billion to perhaps slightly under $170 billion. All of the pressures on interest rates and so on from high deficits would remain. Nothing would be changed except for higher taxation.

Most of us on both sides have believed the appropriate time to use increases in taxation for appropriate and proper economic purposes is to restrain an economy which is growing too rapidly to be sustained and thus to restrain a return to inflation. Yet it seems to me, as it does to the Senator from New Mexico, who is my Budget Committee chairman, that it would be a serious error at this point to have very significant increases in taxation especially when they would in any event represent such a small proportion of budget deficits. We come far closer to agreement as to the necessity for such increases when the recovery has actually taken hold, and if there is appropriate criticism of some of the proposal on this side of the aisle, it is that you do not even include the recognition which the President made himself of the necessity for such revenue increases at a time of high recovery and high growth, at a time of approximately 2 or 3 years from now. I expect just such proposals are likely to come out of any conference with the House of Representatives.

But I may say at the present time it is something of a paradox I believe for the Senator from Louisiana to say that tax increases are appropriate even when we are only modestly restraining spending. It was one thing to vote for a $15 billion tax increase, as I did along with the Senator from Louisiana, in return for at least that amount of spending restraint over and above what is proposed by the Budget Committee. It was quite another to vote for a budget resolution itself which includes $30 billion in new taxes without anything like a comparable restraint in spending.

Mr. JOHNSTON. Mr. President, if the Senator will yield, I do not propose a tax increase. I propose suspending the third year of the tax cut which has not yet gone into effect. I recognize some would call this a tax increase because of bracket creep but it is not a tax increase; it is merely suspending that in the face of these record deficits.

What is the paradox and how is it that I would justify suspending a third year of the tax cut in the midst of a recession? Well, it depends, I think, Mr. President, on what you regard as the greatest obstacle to sustained recovery or the greatest threat to the recovery. Whether it is, on the one hand, the lack of demand, the lack of incentive in the economy or whether it is, on the other hand, the fear of higher interest rates returning. I would say it is the latter, Mr. President. It is real interest rates that are the concern right now, real interest

rates which continue to be at not historically high records but very unusually high rates compared to real interest rates in our economy, particularly in long-term interest rates. Inflation is down, I guess, below 4 percent now, and yet long-term mortgage money is still in excess of 12 percent or higher—I am advised it is 11.5—and that is still a long-term real interest rate of some 7-plus percent, which is many times, which is several times, higher than it has been by traditional rates.

Why is that? Simply because the money managers who set the markets in long-term interest rates and indeed in short-term interest rates fear the return of high interest rates because of the size of these deficits. That is economic theory which has been preached by virtually all economists from all persuasions, from all political parties, whether liberal or conservative. They all recognize that is the phenomenon and that is the reason for it. So it just depends on what your greatest fear is.

In my view, if we showed a resolve to get these deficits down to manageable amounts, perhaps not as far as the distinguished Senator from Washington and I were willing to go with a balanced budget by 1988 under a high-growth situation as proposed in our amendment but just to bring them down to manageable amounts, I believe the market would be reassured, I believe real interest rates would come down to more traditional levels, and I believe we may set the scene for another boomtime as we did in the 1960's. I think it is entirely possible to have that kind of sustained boom, provided we get the economy out from under the weight, the overwhelming weight, of $200 billion deficits for as far as the eye can see.

So reducing a $204 billion deficit by a modest $30 billion in 1 year by suspending a tax cut may not seem to be a large reduction to the distinguished Senator from Washington, although I might add that it is larger than the savings contemplated by the President's budget deficits and by the Domenici deficit over a period of years, over the period of the 5 years, it is larger than the cumulative savings, I believe, over that period of time; nevertheless, it is certainly large enough to show the resolve of the Congress in striking out in a brandnew direction, at least brandnew in terms of recent years, in restraining the growth of these Federal deficits.

Mr. President, I suggest the absence of a quorum, equally divided.

The PRESIDING OFFICER. On whose time?

Mr. JOHNSTON. Equally divided.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JOHNSTON. Mr. President, I ask unanimous consent that it may be in order for the distinguished Senator from Arkansas (Mr. PRYOR) to introduce and discuss two amendments for a period not to exceed 10 minutes and that the Domenici and Nunn-Jackson amendments be laid aside for that period of 10 minutes.

The PRESIDING OFFICER. Are there objections?

Mr. PRYOR. Mr. President, before the distinguished Senator makes that request, may I ask him if he would modify that only slightly to ask for 10 minutes per amendment? I have two amendments.

Mr. JOHNSTON. Mr. President, I modify that request to the extent of 10 minutes per amendment.

Mr. GORTON. Mr. President, that is fine, but this side should have an equal amount on each of the amendments.

Mr. PRYOR. I did not hear the Senator's statement.

Mr. GORTON. This side should have an equal time on each of the amendments.

Mr. PRYOR. I certainly have no problem with that.

Mr. JOHNSTON. Mr. President, I withhold that request for just a minute.

Mr. President, I withdraw the unanimous-consent request and ask unanimous consent, instead, that we temporarily lay aside the Domenici amendment and the Nunn-Jackson amendment in order for the distinguished Senator from Arkansas to introduce and discuss his first amendment, at the conclusion of which, unless we make another unanimous-consent request, we will return to the present amendment.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? If not, it is so ordered.

Mr. PRYOR. Mr. President, I deeply appreciate both managers of the bill allowing me this opportunity.

AMENDMENT NO. 1246

(Purpose: To cut funds for nuclear warhead production)

Mr. PRYOR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an amendment numbered 1246.

Mr. PRYOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, decrease the figure on line 13 by $2,000,000,000.

On page 3, decrease the figure on line 14 by $3,400,000,000.

On page 3, decrease the figure on line 15 by $3,600,000,000.

On page 3, decrease the figure on line 19 by $1,000,000,000.

On page 3, decrease the figure on line 20 by $2,500,000,000.

On page 3, decrease the figure on line 21 by $3,400,000,000.

On page 4, decrease the figure on line 1 by $1,000,000,000.

On page 4, decrease the figure on line 2 by $2,500,000,000.

On page 4, decrease the figure on line 3 by $3,400,000,000.

On page 4, decrease the figure on line 7 by $1,000,000,000.

On page 4, decrease the figure on line 8 by $3,500,000,000.

On page 4, decrease the figure on line 9 by $6,900,000,000.

On page 4, decrease the figure on line 14 by $1,000,000,000.

On page 4, decrease the figure on line 15 by $2,500,000,000.

On page 4, decrease the figure on line 16 by $3,400,000,000.

On page 6, decrease the figure on line 5 by $2,000,000,000.

On page 6, decrease the figure on line 6 by $1,000,000,000.

On page 6, decrease the figure on line 11 by $3,200,000,000.

On page 6, decrease the figure on line 12 by $2,300,000,000.

On page 6, decrease the figure on line 17 by $3,200,000,000.

On page 6, decrease the figure on line 18 by $3,000,000,000.

On page 25, decrease the figure on line 17 by $200,000,000.

On page 25, decrease the figure on line 18 by $200,000,000.

On page 25, decrease the figure on line 23 by $400,000,000.

On page 25, decrease the figure on line 24 by $400,000,000.

Mr. PRYOR. Mr. President, the amendment I am offering this afternoon will freeze the funding for the nuclear weapons at the fiscal year 1982 level and will save around $2 billion.

It does not eliminate funding for new nucler warheads but serves only to slow their rate of alarming growth.

It would not take money from the Defense Department—the cuts are from the nuclear energy defense programs which are run by the Department of Energy.

It does not cut the Pentagon budget. It cuts only the Department of Energy budget.

Mr. President, I would like to take a few moments to talk about the dramatic escalation of our nuclear stockpile. I am deeply concerned about the alarming growth in this area of funding and the priority it has been given. What is at issue here is not whether we have or do not have nuclear warheads. We have lived for almost four

decades under the "umbrella of nuclear terror." It has become a way of life for all of us. What is at issue here, however, is the incredible number of nuclear warheads that will comprise our future stockpile.

Let us look at some simple facts:

First. Between 1955 and 1965 over 30,000 nuclear warheads entered our stockpile.

Second. Nuclear weapons range in size from nuclear land mines which weigh about 150 pounds to multimegaton bombs that weigh more than 8,000 pounds.

Third. Six types of nuclear warheads are in production today. Sixteen different ones are presently in research and development.

Fourth. On May 1, I had the opportunity to take a look at a B-52 at Blytheville Air Force Base in Arkansas. I talked with the crew and as we were standing under the aircraft in the bomb-bay doors, I was told that each B-52 carries in that small area, about the size of the back of a pick-up truck, more destructive power than all the bombs that were dropped in the Second World War. It was an eerie feeling to be standing there and looking at such a small space and to be thinking about all the power that it could hold.

Fifth. Ruth Leger Sivard has been publishing "World Military and Social Expenditures" since 1974. She started this endeavor the year after she left the job as Chief of the Economics Division of the U.S. Arms Control and Disarmament Agency. She points out that the world's stockpile of nuclear weapons is equivalent to 16,000 million tons of TNT. In World War II, we expended 3 million tons of TNT and killed 40 to 50 million people. Another alarming statistic is that world public expenditures average $19,300 per soldier and yet for the school-age child the average is only about $380.

Sixth. About 23,000 new nuclear warheads are planned for construction during the next 10 years and an additional 14,000 are identified in current research and development programs throughout the mid-1990's.

Seventh. Our new warhead production rates will be twice what our production rates were in the 1970's. Soon, we will be producing about 2,000 new warheads per month.

Eighth. By the mid-1990's we will have over 32,000 warheads if none are retired from our present stockpile.

Ninth. To meet the requirements of increased warhead production, we have initiated a number of programs to increase the supply of plutonium and tritium from a rate of 3,000 pounds per year of plutonium to a rate of almost 9,000 pounds per year.

Thus, we are planning to have in the neighborhood of somewhere between 26,000 and 32,000 warheads in as many as 22 different varieties. Now, 32,000 does not sound like a big number. We all probably know of several towns in our home States that have a population of around 32,000. If we decided to set off one nuclear device once each minute, it would take us almost 22 days to explode 32,000 warheads. If we were to set one off each hour, it would take us almost 4 years to deplete our nuclear stockpile.

I have given some basic facts about the number of warheads. Now let us talk about funding.

First of all, back in 1975 the annual budget for the actual production of nuclear weapons was a mere $1.2 billion. By 1980, it had doubled to $2.4 billion. By fiscal year 1983 it had doubled again to over $5 billion. And by fiscal year 1987 it is due to hit the $8 billion mark. So, looking at these figures a little more closely, we come up with some interesting observations:

First. From fiscal year 1975 to fiscal year 1987, a period of 12 years, the funding for nuclear weapons will increase by 638 percent.

Second. Between fiscal year 1975 and fiscal year 1987, the nuclear weapons funding will have doubled three times over. We are into a geometric progression that staggers the mind.

Third. From fiscal year 1980 to fiscal year 1987, a period of 7 years, we are looking at a 231-percent increase in funding for nuclear weapons. Has any other program in all of Government escalated so rapidly? Mr. President, I think not.

Enough of these facts and figures. Let us talk about what they mean.

First of all, there are going to be some of my colleagues, I imagine, who will argue that we need to modernize our "aging" nuclear warhead force, that we need more efficient and "cleaner ways" to destroy our potential adversaries.

Let me respond.

First. Nuclear weapons are not like submarines or bombers or missiles. They are not operated every day like the systems that would deliver these warheads.

Second. Thus, their aging process is not as acute as the delivery systems which we are in the process of modernizing.

Third. When it comes to nuclear war, there is no "clean" way to destroy your opponent. What disturbs me about the different kinds of warheads that we are going to build is that I think it might reflect a dangerous kind of mentality, a mentality which drives itself to think of every conceivable way to use a nuclear weapon. This kind of thinking is, to put it simply, insane. Sometimes I think we all must have a genetic deficiency if we continue to escalate this madness.

We seem to fall back on the question of, "How much is enough?" How many warheads do we need? Again, some basic facts:

First. A mere 400 megatons of nuclear warheads will obliterate both the United States and the Soviet Union, and we have 16,000 megatons.

Second. There are probably 400 or 500 targets in the Soviet Union, depending on how much of their industrial base and civilian population one wants to obliterate. So, if we have 32,000 warheads, what would our kill ratio be? If you apply simple arithmetic to this, you come up with this very interesting fact: With 32,000 warheads we may ultimately possess, we could destroy the Soviet Union almost 50 times over.

This is not like the catch phrases of "window of vulnerability" or "escalation control." We all know that we would not be controlling the escalation if we destroyed the Soviet Union or any potential adversary 50 times over. This would simply be obliteration. And when you think of our other potential adversaries we might even be able to destroy some of them 10,000 times over.

With these facts and figures, we all ought to be able to sleep a little easier, knowing that we have such a high rate of overkill, knowing what our nuclear supremacy really is.

But I find that in my own personal life, it is becoming more and more difficult to get a good night's sleep knowing of these planned renovations to our nuclear warhead stockpile. They often reveal only thoughts of nuclear terror and dreams of nuclear annihilation.

It is easy for all of us to deal with the mere addition of 10,000 to 12,000 warheads to our existing 26,000-warhead stockpile. We are so used to dealing with billions and billions. What is a mere 12,000?

We think that we are on our way to becoming a Nation rich in defenses. I believe that there are certain segments of our national defense that need to be modernized, but to allow our nuclear warhead stockpile to escalate in size and variety to the proposed level of 32,000 warheads is nothing less than a total affront to human dignity and the human race. It is simply unconscionable, ludicrous, and unthinkable.

Where is our conscience today? I guess we can go through each day, knowing that our present educational system is in shambles; knowing that young people today are going out into the world with less education than their parents. But we accept this. We claim to have our national priorities in proper perspective. We claim to "see the light," and that we are going to do better.

I heard on CBS Evening News a few days ago that over 25 percent of American children under the age of 5 are now living below the poverty level. That is around $7,700 per year.

I guess we can all sleep well tonight. For we are a strong nation, a proud nation. But we are losing our sense of national priorities. We are losing this perspective because of issues like the amount of growth and escalation in our nuclear weapons stockpile.

We are putting the building of nuclear warheads before the building of our children's minds.

We are putting the building of bombs before our basic needs.

Mr. President, this amendment is not going to stop the nuclear arms race. It is not going to amount to a nuclear freeze. It will amount to a rollback of what we are expending, approximately, in the level of fiscal year of 1982 and would save some $2 billion that we could possibly even apply to the deficit or to other human needs and concerns.

Mr. President, I strongly support this amendment. I hope it will be adopted by my colleagues.

At this time, Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Who yields time?

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, as I understand it, the other two amendments, the Nunn-Jackson amendment and the Domenici amendment, have been temporarily laid aside and the distinguished Senator has offered his amendment which is now before the Senate.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. Mr. President, let me say to my friend, the proponent of this amendment, that he knows I hold him in the highest esteem, and I do. Frankly, this budget resolution is not the place to debate a nuclear freeze. I think he knows that. Basically, the Senate should know that what this amendment does, regardless of what the Senator says it does, is to take the defense function of the budget and reduce that function's targets by $2 billion in budget authority and $1 billion in outlays for the year 1984, $3.2 billion in budget authority and $2.3 billion in outlays in 1985; and $3.2 billion in budget authority and $3 billion in outlays in 1986.

The reason I make the point is that this portion of the defense function goes to the Energy and Water Subcommittee on Appropriations under a crosswalk; then they use the money crosswalked into their jurisdiction for all of the programs within their jurisdiction. If this, instead of being $1 billion in outlays and $2 billion in budget authority, were a half billion dollars, it would have the same result. It goes to this subcommittee and they have to appropriate, they are left with that much less money available in the crosswalk process for use in all of those programs.

Having said that, the budget amending process on the floor of the U.S. Senate has evolved into a forum where issues are debated. Senators come to the floor and bring an add-on of $2 billion and talk about a new program they have in mind, when everyone understands clearly—and I am sure my good friend, the proponent of the amendment, understands—that that really does not mean anything. It just means that we are either adding to or subtracting from the function of Government—in this case that goes to the Appropriations Committee for use by them in funding all of the programs, ongoing and otherwise, within their jurisdiction.

I do not choose to use a lot of time debating the propriety of the Senator's assumptions because I really think that, ultimately, on issues of this type with this many dollars being taken out of a function of Government that is already tight—and every year they have a very difficult time coming in within the numbers that are allocated by crosswalk—I think the compelling majority of this body is going to understand clearly that that is what this is. It is not a nuclear-freeze amendment, it is to cut $2 billion in budget authority and $1 billion in outlays from the defense function of this Government, which happened, among many things, to contain some money for nuclear weapons, nuclear armament, and the like.

Having said that, Mr. President, there are some Senators far more versed than I in whose jurisdiction this issue lies. I certainly do not want to use a lot of my time in the event they choose to make their points on the floor, but I also indicate to my good friend (Mr. PRYOR) that it is my understanding of the parliamentary situation that, while this vote will be stacked and he has the yeas and nays ordered, there is nothing in the order to this point that precludes a motion to table when the time comes in the process tomorrow, or whenever it is, for a vote on his amendment.

I shall not do that tonight because I do not want to restrain the debate. We would have to yield back our time. I shall not do that tonight even when the debate is finished, when our hour is up. I do want the Senator to understand that is my understanding, and I shall ask the Parliamentarian and ask the Chair if my understanding is correct.

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. I yield the floor, Mr. President, and reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. PRYOR. Mr. President, if a response is in order to our distinguished chairman, I would like to say to my very good friend from New Mexico, the chairman of the Budget Committee, as someone who has to attempt to reconcile all these millions and billions of budget authority and outlays, frankly, I do not see how one human being can understand all of this. I compliment the distinguished chairman of the Budget Committee. I think he probably has as good an understanding of the process as anyone, perhaps more than anyone in this body. He is a gentleman in every way.

I would like to take issue, Mr. President, with just one or two things the distinguished chairman commented on. That is, by saying that the budget resolution, and I think I am quoting him almost exactly, is not the place to debate a nuclear freeze—first, this is not a nuclear-freeze resolution. This is simply an amendment that would take us back to the fiscal year 1982 expenditure of dollars that we were using then to produce nuclear weapons and nuclear warheads. It is not a nuclear freeze. It is not something where we are unilaterally disarming ourselves. It is not an amendment which is going to put us in any more danger of the Soviets than we are already are.

I also would like to say that if the distinguished chairman can point to any part of the budget process that is going to be rising from 1980 to 1987 at the rate of a 231-percent increase, I would like him to do so. Perhaps there are some programs that are growing in that order of magnitude and escalating at that rate and with that degree of intensity. If there are any other programs growing like that, then I am not aware of them. I do not think we are escalating any program faster in percentages than we are the development and production of nuclear warheads.

Mr. DOMENICI. Mr. President, I say to my good friend on my time, I do not know offhand of any that are so projected, but I could tell my friend that if the CCC program continued from now to 1987 as it did in the last 3 years, it would far exceed in percentage increase what the Senator is describing.

Mr. PRYOR. Mr. President, I would like to say I have attempted in every way that I can to accommodate the chairman of the Budget Committee to find dollars to accommodate the chairman of the Budget Committee to find dollars to operate the programs like the CCC program, which is a constructive program that is going to leave behind something of this generation and our civilization to be remembered for. Here is an opportunity to pick up $2 billion in savings. If the chairman

so wants to, he can make the recommendation at the proper levels, I am sure, to find not only the CCC program but also many other programs of government in the coming years.

Mr. DOMENICI. Mr. President, I yield myself 5 minutes.

I say to my good friend that while he did not choose to call this a nuclear freeze, I did, because obviously, his assumption is that in the energy function of government, where most of the research and development and other aspects of the nuclear armament business happens to find itself—perhaps that is a surprise to some Members here on the floor.

Dramatically, if we freeze at this year's level, which is effectively what the Senator is asking be done if his amendment passes and if his assumptions are binding on the committee, it is more of a freeze in the real sense than some of the rhetoric of resolutions that are around calling for it. I did not want him to think that I used the words lightly; I used them kind of literally, since I was assuming that what he wanted to happen with his amendment would indeed be a freeze.

Again, I am not sure we shall use the whole hour that we have in opposition, but I hope Senator PRYOR understands that I have called a couple of Senators in whose jurisdiction this is, including Senator MCCLURE, who chairs the Appropriations Subcommittee for this function, to see if they want to come to the floor to debate. I shall reserve whatever time I have left of the hour to see what response they want to make.

Mr. PRYOR. Mr. President, let me respond to the distinguished chairman of the Committee on the Budget by saying until the other Members get to the floor who may want to speak on this amendment, may I inquire of the chairman, if there are no other amendments to be brought up at this time until they arrive, I have yet another amendment that I would like to present and lay down, assuming a vote tomorrow. Would that be an appropriate thing to do in this time?

Mr. DOMENICI. Mr. President, how much time does the Senator from New Mexico have in opposition?

The PRESIDING OFFICER. The Senator from New Mexico has 52 minutes.

Mr. DOMENICI. How much time has the proponent?

The PRESIDING OFFICER. He has 44 minutes remaining.

Mr. DOMENICI. If the Senator will give me just a few minutes, I shall check. In the meantime, I shall charge the time to myself in opposition by suggesting the absence of a quorum and charging the time to me.

I do that, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the Domenici substitute and the pending Pryor amendment be temporarily laid aside and that all provisions of the Budget Act regarding floor consideration of the aforementioned amendment shall remain in full force and effect.

The PRESIDING OFFICER. Is there objection? Hearing none it is so ordered.

AMENDMENT NO. 1247

(Purpose: To reduce funds for security assistance programs.)

Mr. PRYOR. Mr. President, I do appreciate the distinguished Senator from New Mexico, also the chairman of the Budget Committee, yielding to me at this time. I do have an amendment, Mr. President, that I send to the desk at this time.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an amendment numbered 1247.

Mr. PRYOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. is there objection? Hearing none, it is so ordered.

The amendment is as follows:

On page 3, decrease the figure on line 13 by $880,000,000.

On page 3, decrease the figure on line 14 by $880,000,000.

On page 3, decrease the figure on line 15 by $880,000,000.

On page 3, decrease the figure on line 19 by $180,000,000.

On page 3, decrease the figure on line 20 by $590,000,000.

On page 3, decrease the figure on line 21 by $760,000,000.

On page 4, decrease the figure on line 1 by $180,000,000.

On page 4, decrease the figure on line 2 by $590,000,000.

On page 4, decrease the figure on line 3 by $760,000,000.

On page 4, decrease the figure on line 7 by $180,000,000.

On page 4, decrease the figure on line 8 by $770,000,000.

On page 4, decrease the figure on line 9 by $1,530,000,000.

On page 4, decrease the figure on line 14 by $180,000,000.

On page 4, decrease the figure on line 15 by $590,000,000.

On page 4, decrease the figure on line 16 by $760,000,000.

On page 7, decrease the figure on line 6 by $880,000,000.

On page 7, decrease the figure on line 7 by $180,000,000.

On page 7, decrease the figure on line 13 by $880,000,000.

On page 7, decrease the figure on line 14 by $590,000,000.

On page 7, decrease the figure on line 20 by $880,000,000.

On page 7, decrease the figure on line 21 by $760,000,000.

Mr. PRYOR. Mr. President, this amendment relates to the foreign sales of weapons. My amendment is pretty simple. It is intended to slow down the escalation of U.S. arms sales and other military assistance to foreign countries by reducing funding for function 150 by $880 million in budget authority for fiscal year 1984.

Although we cannot target specific military assistance categories in this budget resolution, we need to go on record to protest the arms merchant mentality that we have acquired in recent years.

In its first year this administration more than doubled the previous year's arms sales. Approval of this amendment, Mr. President, will be a guide to our colleagues on the Foreign Relations and Appropriations Committees as they consider security assistance legislation this year.

This amendment is not aimed at any particular country or region. It simply seeks an overall reduction in our emphasis on military aid.

This amendment would reduce funding for such programs as the Economic Support Fund, International Military Education and Training, Foreign Military Sales Credits, and Military Assistance Programs.

To understand, Mr. President, the need for this sort of amendment that I am bringing before the Senate this afternoon, we need to stand back for a moment and take a look at the frightening growth of the worldwide arms trade.

In the decade from 1965 to 1975 we saw a quadrupling of worldwide arms sales. Since that time arms sales have increased geometrically, and in all likelihood will continue to do so. Arms sales and gifts worldwide, official and unofficial, may amount to the staggering figure of some $200 billion, about the same as transfers of food.

Unfortunately, most of the increase in arms sales and gifts has gone to Third World countries. In 1975, for example, $8 billion in weapons were delivered to the Third World. By 1980, just 5 short years later, that figure had grown to $18.3 billion, a 130 percent increase, with an additional $41 billion in contracts for future delivery. By contrast, total economic aid to these countries is only about $20 billion.

Mr. President, arms purchases by the less developed countries are now increasing at a rate of 25 percent each year, and I am talking about sophisticated arms. I am not talking about castoff tanks or rifles or anything of that sort.

Mr. President, the question that I ask the Senate today is what is the U.S. exact role in this escalation? Let us examine it for a moment. When President Reagan took office—and Mr. President, I would like to say this speech is bipartisan, I am not taking on President Reagan on this issue, all Presidents have been guilty in some respect of escalating this arms race—but when President Reagan took office he made it very clear that one of the centerpieces of his foreign policy would be military assistance. Well, that is one promise that the President has kept. In his first year in office President Reagan sold an all-time high of $21.5 billion in U.S. arms. That total more than doubles the total from the previous year. I think it is important to remind ourselves that this increase has been undertaken at the same time as administration cuts in education, small business assistance, Farmers Home Lending and a number of other domestic spending programs. I am talking about priorities, Mr. President.

The United States supplies 45 percent of all arms aid to the less developed countries. In 1982 the United States reached a record high in arms transfer agreements with the Third World at $15.3 billion. The Soviets ranked second with $10.2 billion.

The policy implication of these sales should be very clear to all of us:

Arms sales to a given region may create an imbalance of strength that leads to an open conflict.

Arms sales lead to a spiraling build-up of both sides to the dispute until the sheer availability of weapons leads to open war. At this moment many potential conflicts are brewing: Gabon-the Congo, Somalia-Kenya, South Africa-Botswana, Lesotho-Swaziland, Guatemala-Belize, Venezuela-Colombia, Venezuela-Guyana, India-Pakistan, and on and on. The United States supplies arms to most, if not all, of these countries.

Now that we are freely selling state-of-the-art weapons to Third World nations, we run the risk of disseminating sensitive weapons technology that is best kept for our own use;

In times of shifting alliances, our own weapons can come back to haunt us, as Britain's did during the Falklands war.

U.S. technicians are being drawn to weapons manufacturers and to recipient nations, dangerously decreasing the supply of competent technicians in our own armed services;

U.S. aid is being diverted from long-term development assistance. Last year, for example, the ratio of military to development assistance was 57 to 43 percent.

Finally, too much of our military aid has gone to governments that do not come close to meeting American standards of human rights and self-determination. I refer to such leaders as Mobutu in Zaire, Duvalier in Haiti, Somoza in Nicaragua, and a variety of other Third World potentates with Swiss bank accounts and starving countrymen.

I believe the American people are today embarrassed by our military support for these sorts of governments and I believe, Mr. President, our people want it to stop.

My amendment does not stop all of this aid, it simply slows it down. It does not even address the question of off-budget military sales guarantees, although the Senate should be very aware that this credit account has a strong fiscal impact as well as a strong imprint on our foreign policy. The budget this year includes $5.4 billion for foreign military sales guarantees, and that is a figure that should not be ignored.

The chairman of the Senate Foreign Relations Committee, Senator PERCY, and the ranking minority member, Senator PELL, have both suggested in the past, to the best of my knowledge, to the Budget Committee chairman that the two committees should look into the possibility of placing the foreign military sales guarantee program totally in the budget and on the budget in future years.

Our liability exposure under this program may end up dwarfing the present IMF controversy. According to the General Accounting Office, 13 nations are now unable to make interest payments due this year. Some of these debts are being rescheduled, but the administration is asking for $950 million of this debt to be forgiven in fiscal year 1983. That is a polite way of saying that we are making a gift of nearly $1 billion in weapons.

Potential taxpayer liability of the Pakistan F-16 sale alone could amount to $1.1 billion. And what is the administration's response? A request for another $50 million this year for Pakistan.

In addition, I am certain we can expect a supplemental request later this year to restore the revolving fund that supplies guarantees on weapons sales.

Mr. President, how can we look at the rest of the world with a straight face and boast of our food for peace program, when half of our international assistance goes for the tools of war?

I only wish that our Government were half as aggressive in promoting agricultural exports as it is in pushing arms sales. We have some of the best salesmen in the world selling arms. Frankly, I think we have some of the sorriest selling agricultural commodities on our farms.

Maybe we ought to let the Pentagon run our wheat program, our rice program, or soybean program. Maybe we ought to transfer Public Law 480 over to the Defense Department and get some of those same people who are selling arms and weapons to sell the crops that our farmers produce.

I realize that we cannot "line item" this military aid out of the budget. But I think we need to cut this $880 million out of the budget now and go on record here today on at least two major points:

The first point is to express our concern over the emphasis which is being put on weapons sales as a foreign policy tool; and, two, to guide our colleagues on the Foreign Relations and Appropriations Committees when the time comes for them to deal with security assistance legislation or arms sales to other countries.

As I have said before, this amendment does not target any particular country or region. It is up to those two committees—Appropriations and Foreign Relations—to decide where our security interests really lie and direct aid to those areas. But I hope we will reduce our arms sales to a lower level and show a much greater selectivity in choosing recipients.

We are the leading arms merchant of the world. That is not a label I like to see attached to this country. This amendment is the first step toward reversing the dangerous path and the escalation that we have seen and that we are seeing today in sales of our arms to foreign countries.

I know full well that some of the Members of this body may well come to this floor—maybe this afternoon and maybe tomorrow—and say, "Well, the budget resolution is not the place to conduct a debate on military assistance to other countries." Well, when you get down to it, Mr. President, there are only three opportunities that we have in this body, other than being on one of the committees—I am not on Foreign Relations and I am not on appropriations—but we really have basically three chances to look at this particular issue from the budget angle: First is the budget resolution, which we are considering today. Second is the authorization bill, which will be coming in the next several weeks. Finally, it would come in the appropriations bill later in the year.

What has happened in the past, Mr. President, is our appropriation bill and our authorization bill come up and sort of run together in something called a continuing resolution. Suddenly we find ourselves 2 or 3 or 4 days before Christmas debating foreign policy, debating appropriations, debating defense, and debating domestic programs, when we actually have only moments to debate those subjects before final disposition is made.

The other reason that I raised this issue, Mr. President, on the budget resolution is pretty simple: because it is an important issue; it is a critical

issue. I, as one Senator, would like to take every opportunity that is available to me to raise this issue with my colleagues and to ask for their consideration of what we should do in the field of arms sales to foreign countries.

We also need to consider the main purposes of a budget resolution. First is to set overall spending and revenue and deficit levels. Second, within broad guidelines, is to set priorities among competing categories of spending. This is exactly what I am attempting to do with this amendment. It is meant to give guidance to our colleagues on the authorization and the appropriation committees to once again go back and look and find out for certain if the sales of these weapons to foreign countries are actually justified. We must have an examination and a thorough examination of this issue. And I bring this amendment at this time to the floor of this Senate for that purpose.

Mr. President, on this amendment, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. PRYOR. Mr. President, I wonder if the Presiding Officer would recount. I believe some more of my colleagues have walked into the Chamber.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PRYOR. I thank the Chair.

Mr. President, I have no additional comments to make in this area at this time.

I yield to the distinguished chairman of the Budget Committee.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Is the Senator finished?

Mr. PRYOR. Yes.

Mr. DOMENICI. I will take only a few moments and then yield to Senator PERCY.

Once again, Mr. President, while I commend the distinguished Senator for his position as to what he would like this amendment to do, I do not happen to agree. As chairman of the Budget Committee, I would just tell the Senate what could really happen if the amendment prevails and then just leave the issue up to the Senate.

I do not have to repeat the basic argument that I made on the last Pryor amendment, when the distinguished Senator made certain assumptions with reference to the expenditure of funds for nuclear preparedness. In that amendment, he assumed that by taking a certain amount of money out of the defense function we would be freezing future nuclear-armament expenditures at this year's level. I give a similar argument here.

The distinguished Senator, in this particular amendment, is doing nothing more or nothing less than taking $0.9 billion in budget authority and $0.2 billion in outlays from our recommendation for 1984 and then estimating an additional $0.9 billion in budget authority and $0.6 billion in outlays for 1985 and estimating another $0.9 billion in budget authority and $0.8 billion in outlays in 1986 to be taken out of the function called international affairs.

In its truest sense and in its most realistic sense, that is what the amendment does. So Senators should be voting on the following issue. Do they want the Senate Budget Committee's mark for function 150, International Affairs, reduced by those amounts or not?

The distinguished Senator who proposes the reduction would suggest that the United States is spending in this function more than he would like for security assistance and for military transfers. I would remind the Senate, according to our best estimates, security assistance is split evenly, half for military assistance and half for nonmilitary assistance. Security assistance is made available to a number of friendly nations for various purposes. Some of this foreign aid is helpful to the recipient countries almost exclusively; in others, most of them, there is mutual benefit in that the funds help those countries and, at the same time, help us through purchases of American goods and services, especially agricultural and other commodities.

There is no way that voting on his amendment, to reduce this function by almost $1 billion in budget authority in fiscal 1984, enables one to stand on the floor and say that the amendment will reduce the transfer of military armaments. As the Senator said, many arms sales are not even on-budget. Our reports suggests doing just that, putting them on-budget.

The Pryor amendment would basically reduce the function, tighten it, so that the appropriators will have to make tough decisions as to how they are going to allocate the money among the various overseas programs, military and nonmilitary assistance.

It seems to me that while the Senator might think this money will come out of military sales, which he is convinced are too high, I would remind the Senate that it could just as easily come out of assistance that we give to Israel. It could just as easily come out of critical assistance that we provide to Egypt, Turkey, or Jamaica. These security assistance funds are mostly balance-of-payments support that is desperately needed by our friends and allies. What about the World Bank, no favorite of this Senator, or the United Nations?

Likewise, friendly countries such as Kenya, Egypt, Oman, Portugal, where we have base access facilities for American forces would be hurt. I will remind the Senate that the money for those purposes comes out of this particular International Affairs function. So does money for the Eximbank and Radio Free Europe.

I would hope those who want to study this overnight would look at the budget resolution and the explanation of this function and decide whether or not they really want to take this much money out of the International Affairs function. This amendment would leave up to the appropriators to decide what they are going to cut from the many programs, both nonmilitary assistance and military assistance; by tomorrow afternoon, each Member should decide whether they think we can cut so much this year, when we are making some significant progress in the Middle East and elsewhere. Again, the basic issue is not arms sales, it is whether to take almost $1 billion out of this function or not.

I would be pleased to yield to my good friend, the chairman of the Foreign Relations Committee. I would say to my good friend, Senator PRYOR, we do not intend to use much additional time tonight. I will talk to the leadership as to when we are ready to go out. I will then advise as to how much longer we can debate the issue and the Senator can proceed at that point.

Mr. PERCY. I thank the distinguished chairman of the committee. This is the first time that I can publicly state that I know what he is going through. When the committee reported out the first format in 1974, we never anticipated we would be, at this stage in our deliberations, as locked in as we are. But I commend the tenacity and the great purpose that our distinguished chairman has. I will certainly support him in his effort to oppose the amendment introduced by our distinguished colleague from Arkansas, for whom we have a great regard and a high respect.

Certainly, I have no problem in agreeing with the concern he has expressed about arms sales. We did peak in arms sales in 1982 and I assume that total arms sales will be reduced in 1983.

I can also agree that FMS guarantees must go on budget. I concur with that. They ought to be on budget. We will continue to pursue efforts to bring them on budget.

But the amendment before the Senate by the distinguished Senator from Arkansas really does not affect either one of these. It affects grant military aid and the economic support fund. It affects the security, therefore, of the United States of America. When he talks about arms sales and the economic support fund, in a sense, really, if I could say so, it is mixing apples and oranges, and we have to

really narrow it down now to what we are talking about.

Let me talk about one of the areas of greatest concern to the past administration and to this administration, and, really, to the entire free world. I am talking about the action that was taken by the Soviet Union in moving brutally into Afghanistan and subjecting that country to military occupation by a foreign power. The Soviet Union has occupied that country and has subordinated it to its will. The Soviet Union is now within 300 miles of the Strait of Hormuz and the Persian Gulf.

When I was in Moscow in November 1980, I made it unmistakably clear to Secretary General Brezhnev, Ustinov, the Joint Chiefs of Staff, and Foreign Minister Gromyko that the concern of the world was not only for the people of Afghanistan, but also for the entire security of the free world. As Clark Clifford, on behalf of President Carter once said, this could mean war, if anyone moved in to interfere with the movement of oil out of the Middle East to the free world. It would decimate the economy of Japan; it would cripple Western Europe. It would severely injure the United States of America, both our economy and our security.

Therefore, we began at that time, under a Democractic administration and carried on under a Republican administration, the creation of a rapid deployment force to protect and provide protection for that vital resource absolutely essential to the free world.

We have spent billions of dollars on that effort.

We need bases in that area. We cannot rely on bases that are remote bases. We need bases in that area. The nations of Kenya, Oman, and Somalia have worked with us in providing access to military facilities.

We do not pay rental for these base facilities overseas. This was not an easy decision for any one of those countries to come to because there are forces in that area, powerful forces, working politically to prevent them from going ahead with this program.

I have seen the base being built in Oman, and we know the value of that facility to be able to provide protection for the most vital raw material on which our economy and our national security depend.

The Senator's amendment would cripple our ability to provide the aid levels necessary for Kenya, Oman, and Somalia to continue this kind of effort, just as it would interfere with the cooperation we are providing to Turkey, Portugal, Egypt, and the Philippines.

I would like to ask my distinguished colleague a few questions.

Is it not true that, for instance, the amendment would cut the request of the administration for grant military aid to Turkey from $230 million to $57 million? Turkey is an important NATO ally on the vulnerable southern flank and it is in desperate economic shape. Is that not the effect this amendment would mandate?

Mr. PRYOR. Let me respond to my friend, the distinguished chairman of the Committee on Foreign Relations, a Member of this body that I have the greatest respect for. I also have great respect for his committee.

I would like to respond by saying that, in my remarks in offering and supporting the amendment, I said that I did not want in any way to have this amendment target any particular country or region of the world. What this amendment does is simply take roughly 5 percent of function 150 and ask the Foreign Relations Committee, which the distinguished Senator chairs, and the Appropriations Committee simply to go back, take another look, and see if we cannot find $880 million in savings for fiscal year 1984.

It is a simple amendment. It is not an Earth-shaking amendment. It is not an amendment, in this Senator's opinion, that is going to damage our national defense in any way. Nor should it in any way cripple the allies that we have that the distinguished Senator referred to.

So, Mr. President, in answer to the Senator's question, I agree with him that we owe a great debt to some of those countries he mentioned. They are strong allies of ours, there is no question there. I am just hopeful that the Committee on Foreign Relations and the Committee on Appropriations can go back, take another look and see what we can do about a program that is escalating beyond our comprehension.

Mr. PERCY. Mr. President, I wish to say to my distinguished colleague that I simply have to make the assumption that he has already made, that the cuts would have to come out of security assistance. I do not see any place else they can come from.

I would like to remind my distinguished colleague that the Committee on Foreign Relations and the chairman and ranking minority member took this position 2 years ago, that there were places we could cut. We did cut $900 million out of our programs. The administration objected at the time, but later, when they saw the kind of budget condition we faced, they concurred, and that is exactly the figure we ended up with.

The problem now is that we are facing a new set of circumstances. We are facing a whole new ball game when, after cutting $900 million out 2 years before, we now go back and say let us cut even further.

I can only come to the conclusion that, with respect to Turkey, which is in a much worse condition today and the need is much greater, to ask us to cut the request of the administration all the way from $230 million, which has been requested, back to $57 million, which was the figure that was in fiscal 1983, is an impossible task. We have already cut, the committee has already cut this to $110 million. That is a figure that is already unacceptable to the administration.

Let us take the question of Portugal. This amendment would cut both MAP and ESF for Portugal. I only ask my distinguished colleague how we could possibly do that with Portugal today, struggling as they are. How could we possibly cut them that deep?

Let us take the case of Pakistan. Economic support funds in the amount of $125 million would be cut out by the pending amendment. I only ask my distinguished colleague if he has ever been in Pakistan.

Mr. PRYOR. I have not been in Pakistan.

Mr. PERCY. I would ask him to try to picture what Pakistan's situation is today, trying to absorb nearly 3 million refugees who have fled out of Afghanistan, women and children. Freedom fighters who have come out sneak back into the country to try to protect their country. But they have 3 million refugees in Pakistan from Afghanistan. To cut them $125 million in economic support funds, when there are so many programs that we are working on with Pakistan, to cause them to see our way in some of those things—this would truly undercut the President. It would give the feeling to these countries abroad that the President is powerless to negotiate. They cannot wait until we act.

Many times, they have made representations based on the best advice that we can give them that we would stand behind the economic assistance program of that kind.

Mr. PRYOR. Mr. President, may I respectfully respond at this time?

Mr. PERCY. Yes, I shall yield for a question or a brief comment. We do have to get out, I understand, at 6 o'clock. We are just about reaching the end of our line on debate tonight.

Mr. PRYOR. I was not going to respond, but I think the distinguished chairman is under some misapprehension about what this amendment proposes.

It does make a reduction in function 150. But within this function, it could affect any of the military assistance programs. That is, the grants, which allow foreign governments to buy U.S. military equipment or foreign military sales credits, forgiven loans and loan guarantees, which allow them to buy U.S. military equipment and training.

The cut could also be taken from the international military education and training program or the economic support fund, grants and loans to our allies to free up their own budget so

they can use their own money for military expenditures.

By my calculations, my amendment would leave the chairman and his committee and the Appropriations Committee roughly $3.6 or $3.7 billion to divide up any way they see fit. That is what my amendment does. It forces a greater selectivity with some of these programs and a second look. That is all my amendment does.

Mr. PERCY. If the Senator from Arkansas would just take into account one thing, the funds that he is saying we can cut from do not exist, because the FMS guaranty program he mentioned is off budget. We do not have that available to cut if it is not on-budget. So the assumptions the Senator is going on are absolutely incorrect. We do not have that leeway from which we could cut.

Let me ask the Senator this question: The Senate Foreign Relations Committee has added $100 million grant military assistance and $125 million in economic aid to last year's level for Israel. For Egypt, the Senator's amendment would mean a reduction from the request of $250 million in grant military aid. That is where we would have to take it from. Does the Senator intend to do this?

If this amendment were adopted, those are the areas we would have to go after. For that reason, I would vigorously oppose the amendment.

Mr. PRYOR. Mr. President, it would be up to the distinguished chairman of the Foreign Relations Committee, members of the committee, and members of the Appropriations Committee, to come back at the proper time with these recommendations.

This amendment in no way—in no way—takes dollars for specific countries away from them. It forces our two committees, the authorizing committee and the Appropriations Committee, to take another look at the totality of this program.

Finally, I say to the distinguished chairman, when I talk about what the committee still has to work with, I am referring to the entire on-budget security assistance package. We all recognize that this represents only one-half of the total security request, which includes off-budget loan guarantees. We know that and we understand it. All I am doing is taking about 5 percent from function 150, in rough terms, about $880 million in authority, and limiting the number of dollars that we can commit to that authority.

Mr. PERCY. Mr. President, I shall take just 1 additional minute, because the floor manager wishes to wind up this debate now.

With a cut the size of the pending amendment, we would have no choice but to make the cuts the size of which I have indicated affecting Israel, affecting Egypt, affecting Pakistan, certainly affecting Turkey, Portugal, and Sudan, and the cases I have mentioned involved so deeply in our Rapid Deployment Forces—Oman, Somalia, and Kenya. There is no alternative to that.

I only ask my distinguished colleague, when we look at the responsibility we have for supporting the Camp David process, what would it do to that process to a country like Egypt, cut off now from the resources it used to have in the Arab world, relying upon our good faith to help them and make up for the fact that they do not have available to them any funds that they had before—what would happen to them?

What would happen to the peace process if this amount was cut from Israel? What would happen to the peace process and the rapid deployment forces if we simply could not man and complete those bases that we have undertaken?

I simply hope that this amendment would be defeated. I feel very, very strongly about it. There is no alternative for a cut of this size other than to cut the kind of programs that I have tried to outline.

Mr. PRYOR. I should like to close by saying I respectfully disagree with the interpretation of the distinguished chairman as to what my amendment does. I have enjoyed listening to his remarks.

I might ask the distinguished chairman of the Budget Committee if possible there would be a little further discussion on this tomorrow. I would like to reserve the remainder of my time.

Mr. PERCY. I suggest, Mr. President, that the distinguished Senator and our staff get together right now, if we can, because it is a factual question that we are trying to settle. I would hope that we could settle it so that the Senate would have the facts on which to judge the case.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator from New Mexico is recognized.

Mr. DOMENICI. I understand that the distinguished acting majority leader seeks to be recognized. It is my understanding—and I might put this in the nature of a parliamentary inquiry—that since we have not yielded back our time on the pending amendment, when the Senate returns to the resolution tomorrow, so long as it does so before the hour of 2 p.m., will not the second Pryor amendment, the one that we are presently debating, be the pending business?

The PRESIDING OFFICER. The Senator is correct.

Mr. DOMENICI. I thank the Chair. I yield to the distinguished acting majority leader.

ROUTINE MORNING BUSINESS

Mr. TOWER. Madam President, I ask unanimous consent that the Senate proceed to the consideration of routine morning business for a period not to exceed 15 minutes, with statements made therein not to exceed 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL ANTITAMPERING ACT

Mr. TOWER. Madam President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 109, S. 216, a bill to amend title 18.

Mr. BYRD. Madam President, reserving the right to object—and I will not object—has the budget matter been laid aside?

The PRESIDING OFFICER. We are now in morning business.

Mr. BYRD. I thank the Chair.

I have no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 216) to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause, and insert the following:

That this Act may be cited as the "Federal Anti-Tampering Act".

SEC. 2. Chapter 65 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"§ 1365. Tampering with household products

"(a) Whoever, with intent to kill, injure or otherwise endanger the health or safety of any person or to cause significant damage or injury to the business of an individual, partnership, corporation, association, or other business entity, tampers with and thereby taints, or tampers with and thereby renders materially false or misleading the labeling of, or container for, any household product which is in, is intended to be in, or continues to affect interstate or foreign commerce, or attempts, threatens, or conspires to do so, shall—

"(1) be imprisoned for not more than ten years or fined not more than $20,000, or both;

"(2) if serious bodily injury results, be imprisoned for not more than twenty years or fined not more than $50,000 or both; and

"(3) if death results, be imprisoned for any term of years or for life or fined not more than $100,000, or both.

"(b)(1) Whoever imparts or conveys false information, knowing the information to be false, concerning an act or attempted act which, if true, would constitute a violation of subsection (a) shall be imprisoned for not more than one year or fined not more than $10,000, or both.

"(2) Whoever willfully and maliciously imparts or conveys false information, knowing the information to be false, concerning an act or attempted act which, if true, would constitute a violation of subsection (a) shall be imprisoned for not more than five years or fined not more than $25,000, or both.

"(c) A violation of this section may be investigated by the Federal Bureau of Investigation and by any other Federal agency which has investigative jurisdiction over such violation under title 21 of the United States Code.

"(d) A person has the intent required for an offense under this section if the person knows or has reason to know that the normal and usual consequence of the actual, attempted, planned, or threatened tampering would be to kill, injure, or otherwise endanger the health or safety of any person or to cause significant damage or injury to the business of an individual, partnership, corporation, association, or other business entity.

"(e) As used in this section—

"(1) the term 'household product' means—

"(A) any food, drug, device, or cosmetic; or

"(B) any article, product, or commodity of any kind or class which is customarily produced or distributed for sale through retail sales agencies or instrumentalities for consumption by individuals, or use by individuals for purposes of personal care or in the performance of services ordinarily rendered within the household, and which usually is consumed or expended in the course of such consumption or use;

"(2) the term 'food' has the definition given such term in section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)) and also includes 'meat food product' as such term is defined in section 2(j) of the Federal Meat Inspection Act (21 U.S.C. 601(j)), 'poultry' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(e)), 'poultry product' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(f)), 'egg product' as such term is defined in section 4(f), of the Egg Products Inspection Act (21 U.S.C. 1033(f)), and 'egg' as such term is defined in section 4(g) of the Egg Products Inspection Act (21 U.S.C. 1033(g));

"(3) the term 'drug' has the definition given such term in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1));

"(4) the term 'device' has the definition given such term in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h));

"(5) the term 'cosmetic' has the definition given such term in section 201(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(i));

"(6) the term 'labeling' has the definition given such term in section 201(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(m)); and

"(7) the term 'serious bodily injury' means bodily injury to a person which involves—

"(A) a substantial risk of death;

"(B) extreme physical pain;

"(C) protracted and obvious disfigurement; or

"(D) protected loss or impairment of the function of a bodily member, organ, or mental faculty.".

SEC. 3. The table of sections at the beginning of chapter 65 of title 18 of the United States Code is amended by adding at the end thereof the following new item:

"1365. Tampering with household products.".

Mr. THURMOND. Madam President, I am extremely pleased to bring S. 216, the Federal Anti-Tampering Act, to the floor today. Enactment of this bill must be one of the highest priorities of the 98th Congress. Early in the Congress, I expressed my resolve to send this crucial legislation to the President's desk as soon as it was humanly possible. I am happy that the Committee on the Judiciary and this body have made such considerable progress toward that goal already.

We have regrettably witnessed a series of recent events which have seriously undermined public confidence in the safety of consumer products and sent chills through respected manufacturers all over the country.

In a well-publicized incident in Chicago, several persons died after taking Tylenol capsules filled with cyanide. The manufacturer, a subsidiary of Johnson & Johnson, utimately recalled 31 million bottles of that pain reliever from retailers, wholesalers, and the public. They estimate that the total cost of warning the public, recalling the product, testing, and destroying suspected capsules was $100 million.

A wave of "copycat" crimes was reported after that crisis. In a hearing which I chaired on March 4 of this year, the Judiciary Committee received testimony indicating that there have been reported incidents involving oral hygiene products contaminated with acid, over-the-counter drugs laced with rat poison, and beverages mixed with insecticides.

Next to the Tylenol incident, the most devastating situation occurred with respect to "Ball Park" hot dogs manufactured by a Michigan firm. Following a consumer complaint that a razor blade had been found in a hot dog, the company voluntarily recalled 350,000 pounds of their product and spent a frantic weekend putting packages of hot dogs through metal detectors. Although the initial complainant ultimately confessed that she had put the razor blade into the hot dog herself, that false claim cost the company approximately $1 million in recall expenses and lost profits. By contrast, its annual profit is only $8 million.

Clearly, then, these vexatious tampering crimes can cause devastating losses for innocent citizens and business people. In response, in the 97th Congress, I introduced, and this body passed, Federal legislation aimed at deterring this reprehensible conduct. The other body failed to pass a separate bill, and a crime package which contained a limited tampering provision was vetoed by the President because of concerns over other parts of the bill. In this Congress, at the earliest opportunity, I introduced S. 216, which was identical to the bill which we passed last year. I am pleased to have 58 of my colleagues as cosponsors.

On March 4, I chaired a hearing during which we received testimony from the Department of Justice and representatives of several affected industries. Based on the testimony that we received, I successfully offered an amendment to S. 216 when the committee considered it on April 12. As it was reported by the committee, without objection, the Federal Anti-Tampering Act creates new felony offenses in title 18 of the United States Code, punishable by strong penalties. Specifically, it would make it an offense to tamper with a consumer product, or its label or container, with intent to cause injury or death to another person or significant damage to a business, or with reason to know that such harm would be the usual result. In addition, it would make it a Federal offense to knowingly convey false information concerning a tampering offense.

Under existing provisions in the Food and Drug Act, the penalties for tampering do not provide a sufficient deterrent to this dangerous sort of activity. For this reason, the bill reported by the committee contains penalties based upon the harm that results. They range from 10 years of imprisonment and a $20,000 fine, to life imprisonment and a $100,000 fine, where death results. The hoax offenses are patterned after similar offenses relating to aircraft hijacking, which have been highly successful in deterring that type of activity.

The committee amendment retained the provision in the original bill which covers tampering with intent to damage a business. I believe, as did the committee, that it is important for Federal tampering legislation to cover that situation. Malicious tampering aimed at causing significant harm to an innocent business is clearly criminal conduct.

Madam President, S. 216 attempts to balance the need for Federal involvement in some tampering crimes, without unnecessary intervention into cases more appropriately left to the State and local governments. With the help of the Justice Department and representatives of affected industries, we have created a bill which achieves an appropriate balance, while providing a strong deterrent to these reprehensible crimes. I urge my colleagues

to support S. 216, as it was reported by the Committee on the Judiciary.

AMENDMENT NO. 1250

(Purpose: To correct an inequity in the case of certain patents)

Mr. THURMOND. Madam President, I send to the desk an amendment on behalf of the distinguished Senator from North Carolina (Mr. EAST), Mr. HOLLINGS, and myself.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND), for himself, Mr. EAST, and Mr. HOLLINGS, proposes an amendment numbered 1250.

Mr. THURMOND. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the Committee amendment add the following section:

SEC. 4. (a) The following new section shall be added to title 35 of the United States Code:

"§ 155A. Patent Term Restoration

"(a) Notwithstanding the provisions of section 154, the term of each of the following patents shall be extended in accordance with this section:

"(1) Any patent which encompasses within its scope a composition of matter which is a new drug product, if during the regulatory review of the product by the Federal Food and Drug Administration—

"(A) the Federal Food and Drug Administration notified the patentee, by letter dated February 20, 1976, that such product's new drug application was not approvable under section 505(b)(1) of the Federal Food, Drug and Cosmetic Act;

"(B) in 1977 the patentee submitted to the Federal Food and Drug Administration the results of a health effects test to evaluate the carcinogenic potential of such product;

"(C) the Federal Food and Drug Administration approved, by letter dated December 18, 1979, the new drug application for such product; and

"(D) the Federal Food and Drug Administration approved, by letter dated May 26, 1981, a supplementary application covering the facility for the production of such product; and

"(2) Any patent which encompasses within its scope a process for using the composition of matter described in paragraph (1).

"(b) The term of any patent described in subsection (a) shall be extended for a period equal to the period beginning February 20, 1976, and ending May 26, 1981 and such patent shall have the effect as if originally issued with such extended term.

"(c) The patentee of any patent described in subsection (a) shall, within ninety days after the date of enactment of this section, notify the Commissioner of Patents and Trademarks of the number of any patent so extended. On receipt of such notice, the Commissioner shall confirm such extension by placing a notice thereof in the official file of such patent and publishing an appropriate notice of such extension in the Official Gazette of the Patent and Trademark Office.".

(b) The analysis for Chapter 14 of such title 35 is amended by adding at the end thereof the following:

"155A. Patent term restoration.".

Mr. THURMOND. Madam President, I am pleased to join Senator EAST and Senator HOLLINGS in offering this amendment designed to provide redress to a health care company harmed by an agency of the Federal Government. This is a noncontroversial provision which passed the other body in the 97th Congress and enjoys bipartisan support in this body.

Madam President, the details of this unfortunate episode have been outlined by the distinguished Senator from North Carolina, and I will not repeat them. In sum, because of an egregiously long approval process demanded by the Food and Drug Administration, only a small part of the 17-year patent term to which the company was entitled was effectively available to them. This amendment would restore to the patent life of the affected product only that time caused by the unfair FDA delay. As such, it would provide relief similar to that provided in a similar case in the orphan drug bill during the 97th Congress.

Madam President, I hope the Committee on the Judiciary will promptly report more comprehensive patent term restoration legislation. Hearings have already been scheduled for later this month. However, in the interim, I believe we should provide immediate relief in this case.

● Mr. EAST. Madam President today, Senator THURMOND, Senator HOLLINGS, and I are proposing an amendment designed to remedy a particularly egregious hardship caused to a health care company by an agency of the Federal Government. I submit that it is a noncontroversial amendment which passed the House of Representatives unanimously during the last Congress. In my judgment, it also would have passed the Senate unanimously had it come to a vote. Unfortunately, the bill was attached to highly controversial legislation during the rush of the special session last Congress, and consequently no vote occurred.

The facts are these. About 20 years ago, research scientists discovered a new life-sustaining anesthetic called Forane. The company that discovered Forane extensively tested the anesthetic, both on animals and, later, on humans. The product was patented in October 1970. As my colleagues are aware, our patent laws give the inventor of a product 17 years of exclusive use. The intent behind the law was to grant the inventor the exclusive marketing of the product for that period of time. In the case of Forane, the inventor was only permitted less than 7 years of exclusive marketing. This is because the approval process for Forane took more than 10 years, and less than 7 years of effective patent coverage remained rather than the 17 year intended by Congress.

This regulatory delay began with a claim by a single doctor that inhalation agents have carcinogenic potential. Subsequently the FDA repudiated that doctor's study; found it to be deficient; so stated publicly in the Federal Register; and finally allowed Forane to be marketed in May 1981 (more than 10 years after the patent was issued).

The amendment I introduce today would restore to the company only that portion of the patent term lost during this delay. It would not restore to the company any time involved in routine animal and human testing. In short, this bill would restore life to the patent term for the period of time beginning with the date the FDA held up the new drug application on the basis of the deficient study (Feb. 20, 1976) until the date the FDA approved the company's application covering the facility for the production of the product (May 26, 1981), a period of 5 years and 3 months.

To my knowledge, there has been only one other situation analogous to this and the unfairness of that situation was corrected by an amendment to the orphan drug bill which was passed during the last session of the Congress. Fairness and equity demand that this hardship situation be treated in a similar manner.

I encourage my colleagues to support this amendment and respectfully urge its speedy approval.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1250) was agreed to.

Mr. THURMOND. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Madam President, I assume that we have just adopted the amendment offered by the Senator from North Carolina (Mr. EAST).

Mr. THURMOND. Yes.

AMENDMENT NO. 1251

(Purpose: To provide that certain conduct is punishable under this act)

Mr. PRYOR. Madam President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an amendment numbered 1251.

Mr. PRYOR. Madam President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, following line 25, insert the following:

(3) Whoever willfully and maliciously imparts or conveys false information, knowing the information to be false that a household product as described in subsection (a) is or has been tainted shall be imprisoned for not more than one year or fined not more than $10,000 or both.

Mr. PRYOR. Madam President, I believe this amendment has been accepted by the distinguished chairman of the Judiciary Committee.

Mr. THURMOND. Madam President, we are willing to accept the amendment of the distinguished Senator from Arkansas.

Mr. PRYOR. I thank the chairman.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1251) was agreed to.

Mr. THURMOND. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Madam President, I commend the chairman of the Judiciary Committee (Mr. THURMOND) and the ranking member (Mr. BIDEN) for the leadership they have shown with respect to this subject. I was pleased to join with them and many of our colleagues once again in the sponsorship of this extremely important piece of legislation, the Federal Anti-Tampering Act. And I am pleased to urge its swift enactment today.

The people of this country have had their fill of those individuals who would seek to take the law into their own hands to attempt to satisfy some so-called grievance, whether real or imagined. Whether we are talking about those who would threaten to blow up our Nation's memorials to achieve "instant unilateral disarmament," or others who would poison our citizens for other predilections, this madness must stop.

This bill, which is similar to the legislation that I cosponsored last year, will make future drug tampering like the Tylenol case, a Federal crime. Not only will the full weight of the Federal criminal justice system be brought to bear if future outrages of this kind occur, but also the massive resources of our Government including those of the FBI, will be immediately called into action should such a situation arise again.

Madam President, my preference would have been to require the death penalty for these kinds of cases, but I realize that as the result of recent Supreme Court decisions, our Federal death penalty laws will have to be substantially rewritten. That effort is already underway, and I look forward to seeing to it that those efforts may reach fruition during this session of the Congress. I do agree with many of my colleagues, however, that the drug-tampering problem must be addressed immediately, and I therefore heartily endorse this legislation which would criminalize this type of outrageous conduct as soon as possible.

Mr. THURMOND. Madam President, I ask for a third reading.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (S. 216) was passed, as follows:

S. 216

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Anti-Tampering Act".

SEC. 2. Chapter 65 of title 18 of the United States Code is amended by adding at the end thereof the following new section:

"§ 1365. Tampering with household products

"(a) Whoever, with intent to kill, injure or otherwise endanger the health or safety of any person or to cause significant damage or injury to the business of an individual, partnership, corporation, association, or other business entity, tampers with and thereby taints, or tampers with and thereby renders materially false or misleading the labeling of, or container for, any household product which is in, is intended to be in, or continues to affect interstate or foreign commerce, or attempts, threatens, or conspires to do so, shall—

"(1) be imprisoned for not more than ten years or fined not more than $20,000, or both;

"(2) if serious bodily injury results, be imprisoned for not more than twenty years or fined not more than $50,000 or both; and

"(3) if death results, be imprisoned for any term of years or for life or fined not more than $100,000 or both.

"(b)(1) Whoever imparts or conveys false information, knowing the information to be false, concerning an act or attempted act which, if true, would constitute a violation of subsection (a) shall be imprisoned for not more than one year or fined not more $10,000, or both.

"(2) Whoever willfully and maliciously imparts or conveys false information, knowing the information to be false, concerning an act or attempted act which, if true, would constitute a violation of subsection (a) shall be imprisoned for not more than five years or fined not more than $25,000, or both.

"(3) Whoever willfully and maliciously imparts or conveys false information, knowing the information to be false that a household product as described in subsection(a) is or has been tainted shall be imprisoned for not more than one year or fined not more than $10,000 or both.

"(c) A violation of this section may be investigated by the Federal Bureau of Investigation and by any other Federal agency which has investigative jurisdiction over such violation under title 21 of the United States Code.

"(d) A person has the intent required for an offense under this section if the person knows or has reason to know that the normal and usual consequence of the actual, attempted, planned, or threatened tampering would be to kill, injure, or otherwise endanger the health or safety of any person or to cause significant damage or injury to the business of an individual, partnership, corporation, association, or other business entity.

"(e) As used in this section—

"(1) the term 'household product' means—

"(A) any food, drug, device, or cosmetic; or

"(B) any article, product, or commodity of any kind or class which is customarily produced or distributed for sale through retail sales agencies or instrumentalities for consumption by individuals, or use by individuals for purposes of personal care or in the performance of services ordinarily rendered within the household, and which usually is consumed or expended in the course of such consumption or use;

"(2) the term 'food' has the definition given such term in section 201(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(f)) and also includes 'meat food product' as such term is defined in section 2(j) of the Federal Meat Inspection Act (21 U.S.C. 601(j)), 'poultry' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(e)), 'poultry product' as such term is defined in section 4(e) of the Poultry Products Inspection Act (21 U.S.C. 453(f)), 'egg product' as such term is defined in section 4(f), of the Egg Products Inspection Act (21 U.S.C. 1033(f)), and 'egg' as such term is defined in section 4(g) of the Egg Products Inspection Act (21 U.S.C. 1033(g));

"(3) the term 'drug' has the definition given such term in section 201(g)(1) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(g)(1));

"(4) the term 'device' has the definition given such term in section 201(h) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(h));

"(5) the term 'cosmetic' has the definition given such term in section 201(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(i));

"(6) the term 'labeling' has the definition given such term in section 201(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321(m)); and

"(7) the term 'serious bodily injury' means bodily injury to a person which involves—

"(A) a substantial risk of death;

"(B) extreme physical pain;

"(C) protracted and obvious disfigurement; or

"(D) protracted loss or impairment of the function of a bodily member, organ, or mental faculty.".

SEC. 3. The table of sections at the beginning of chapter 65 of title 18 of the United States Code is amended by adding at the end thereof the following new item:

"1365. Tampering with household products.".

"SEC. 4. (a) The following new section shall be added to title 35 of the United States Code:

"§ 155A. Patent Term Restoration

"(a) Notwithstanding the provisions of section 154, the term of each of the following patents shall be extended in accordance with this section:

"(1) Any patent which encompasses within its scope a composition of matter which is a new drug product, if during the regulatory review of the product by the Federal Food and Drug Administration—

"(A) the Federal Food and Drug Administration notified the patentee, by letter dated February 20, 1976, that such product's new drug application was not approvable under section 505 (b) (1) of the Federal Food, Drug and Cosmetic Act;

"(B) in 1977 the patentee submitted to the Federal Food and Drug Administration the results of a health effects test to evaluate the carcinogenic potential of such product;

"(C) the Federal Food and Drug Administration approved, by letter dated December 18, 1979, the new drug application for such product; and

"(D) the Federal Food and Drug Administration approved, by letter dated May 26, 1981, a supplementary application convering the facility for the production of such product; and

"(2) Any patent which encompasses within its scope a process for using the composition of matter described in paragraph (1).

"(b) The term of any patent described in subsection (a) shall be extended for a period equal to the period beginning February 20, 1976, and ending May 26, 1981 and such patent shall have the effect as if originally issued with such extended term.

"(c) The patentee of any patent described in subsection (a) shall, within ninety days after the date of enactment of this section, notify the Commissioner of Patents and Trademarks of the number of any patent so extended. On receipt of such notice, the Commissioner shall confirm such extension by placing a notice thereof in the official file of such patent and publishing an appropriate notice of such extension in the Official Gazette of the Patent and Trademark Office.".

"(b) The analysis of Chapter 14 of such title 35 is amended by adding at the end thereof the following:

"155A. Patent term restoration.".

The title was amended so as to read: "A bill to amend title 18, United States Code, to combat, deter, and punish individuals who tamper with household products with intent to cause personal injury, death, or other harm, and for other purposes.".

Mr. THURMOND. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. TOWER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DR. CLEMMIE EMBLY WEBBER OF ORANGEBURG, S.C., NATIONAL MOTHER OF THE YEAR

Mr. THURMOND. Madam President, yesterday our country observed an important day honoring some very special people—mothers. All across America, mothers were honored for their unselfish devotion to their children and for the strength and unity they preserve in families.

There is perhaps no greater satisfaction for a mother than to hear her family say, "Thank you," and to know that her devotion and efforts, her tears and joys; are not forgotten.

Though mothers are set apart on Mother's Day, there is one particular mother to whom I want to call special attention, Dr. Clemmie Embly Webber of Orangeburg, S.C., who was recently named the 1983 Mother of the Year by the American Mothers Committee.

Earlier this year, I had the pleasure of paying tribute to Dr. Webber for becoming the 1983 South Carolina Mother of the Year, and now I take even greater pride in honoring her for this highly commendable achievement.

To fully understand the magnitude of this distinction, one need only examine the credentials of the organization which sponsors the Mother of the Year competition, the American Mothers, Inc. The purpose of American Mothers, Inc., is to develop and strengthen the moral and spiritual foundations of the family and home. Established in 1933 as part of the Golden Rule Foundation, this nonprofit and interfaith organization conducts the annual search for the State and National Mother of the Year. Of course, numerous other groups sponsor similar contests, but this nearly 50-year-old event is recognized nationwide as the most prestigious of all mother of the year competitions.

After reviewing the life and accomplishments of Dr. Webber, it comes as no surprise that she was chosen for the national honor. As a wife, mother, grandmother, educator, church and civic activist, she is the embodiment of an ideal mother. Dr. Webber exemplifies those personal characteristics and skills which make her worthy to represent mothers, and her contributions to the quality of life within her family and community are very evident. Her influence has touched and enriched the lives of many, and the fruits of her labor are now appropriately recognized through her selection as Mother of the Year.

President Reagan even took time out of his demanding schedule to call Dr. Webber in Orangeburg on Mother's Day to offer his congratulations. The President expressed well the invaluable role mothers play in society when he stated in his Mother's Day proclamation:

> To our mothers we owe our highest esteem, for it is from their gift of life that the flow of events begins that shapes our destiny. . . . The quality and scope of their activities, as well as their overriding concern for the well-being of their families and our country, inspires and strengthens us as individuals and as a Nation.

I am confident that the President praised Dr. Webber for the fine example she has set for all mothers. Truly, the words of his proclamation accurately describe the qualities of Dr. Clemmie Embly Webber.

Madam President, I know the Senate joins me in congratulating Dr. Webber on becoming the 1983 National Mother of the Year. In order to share more about this outstanding individual, I ask unanimous consent that articles from the Columbia, S.C., State and Record newspapers be included in the RECORD at the conclusion of my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Columbia (S.C.) Record Apr. 27, 1983]

HIGH HONOR

The American Mothers Committee has done Clemmie Emily Webber of Orangeburg and her fellow South Carolinians honor by choosing her the National Mother of the Year.

Mrs. Webber's life and career are a noble testament to not only motherhood but to high human achievement in intellectual as well as emotional terms.

A dedicated, full-time mother and homemaker as a young wife, she raised three children who, through her example, made their own positive imprints on their environment. One became a superior court judge in the District of Columbia, another a doctor of pathology and a third a public administrator and law student.

As her children grew older, Mrs. Webber went back to school, earning master's and a doctoral degree in chemistry. As Dr. Webber she taught for a number of years at South Carolina State College, working closely with pre-medical students.

Since her retirement from the State College faculty, she has been active on a variety of educational projects and on the Orangeburg County Council on Aging.

Dr. Webber—mother, grandmother and educator—is richly deserving of the tribute recently paid her. We congratulate her.

[From the State, Apr. 24, 1983]

MOTHER OF YEAR FROM SOUTH CAROLINA WINS NATIONAL PRIZE

The S.C. Mother of the Year, Clemmie Embly Webber of Orangeburg, was named National Mother of the Year Friday night at ceremonies in New York.

She competed with others from around the country for the honor, given by the American Mothers Committee.

A native of St. Matthews and a former professor at S.C. State College in Orangeburg, Mrs. Webber, a mother of three, was honored earlier this month as state Mother of the Year with a plaque presented by Gov. Dick Riley.

She holds a doctorate in science education.

[From the State, May 9, 1983]

TELEPHONE CALLS, NEWSPAPER ADS MARK MOTHER'S DAY

Clemmie Webber of Orangeburg was nothing short of flabbergasted to receive a call from President Reagan on Saturday night.

The president's call to Mrs. Webber, who recently was named National Mother of the Year, was just one of millions made to mothers all over the country this weekend.

And while many Americans called their mothers, others decided to communicate Mother's Day greetings through classified advertisements in their local newspapers.

Reagan chose the next best thing to being there, but he had a little trouble reaching his party.

Mrs. Webber, a mother of three who recently retired from a long and varied teaching career, said Sunday that the president first tried to call her at home. When he got no answer, he called the Orangeburg County Sheriff's Department in an effort to locate her.

"This being a small town, I guess they didn't have too much trouble," Mrs. Webber said. She and her husband, Paul, were attending the annual alumni banquet at South Carolina State College.

A sheriff's deputy ushered her out of the banquet room and gave her a number to call at the White House. So Mrs. Webber set out to call the president from a pay phone at the student center.

"It was really kind of funny," she said. "It took three operators before I got one who didn't think it was just a prank."

When she finally did get the president, "We had a delightful chat," Mrs. Webber said. The call was mostly small talk, and Reagan congratulated her on her selection as National Mother of the Year, she said.

While other American moms' phone calls might not have been as exciting as Mrs. Webber's, they certainly conveyed messages that were no less heartfelt.

WORLD CUP SOCCER

Mr. MOYNIHAN. Madam President, I am aware that a group of distinguished Americans from the United States Soccer Federation has been trying to arrange for the United States to play host to the 1986 World Cup. Indeed, an organizing committee has been formed, with President Reagan as honorary chairman, former Secretary of State Henry Kissinger as chairman, and a number of distinguised Americans from the worlds of sport, government, and business, including the chief executives of Ford, Pepsico, R. J. Reynolds, and Norton Simon.

We in the Congress have also made clear our complete support for that effort. The House on May 3 passed unanimously a resolution stating its support; the Senate on May 6 did so as well. I enthusiastically support this effort.

It is for this reason that I was particularly concerned to learn of remarks made recently by Mr. Joao Havelange, the president of the Federation Internationale de Football Association, or FIFA, the world governing body for soccer, about this American effort to host the World Cup. Mr. Havelange has suggested that sporting and financial interests in the United States States do not support soccer or our efforts to have the World Cup tournament played here, and that there are not adequate facilities in the United States to play world class soccer.

Mr. Havelange is dead wrong. Our efforts to host the World Cup in 1986 are supported not only by the directors of the U.S. Soccer Federation, but a broad-based group of government and corporate leaders. Indeed, these people have met every requirement established by FIFA for hosts of the World Cup. Moreover, they have demonstrated that first class facilities do exist in this country.

Of greater importance, soccer is an immensely popular sport in the United States. There are over 4 million young people playing soccer in the United States today, and the number is expanding rapidly. Soccer is played today in over 5,000 secondary schools and 520 American colleges and universities. A professional soccer league exists with wide support in a number of cities.

Indeed, a National Soccer Hall of Fame has been proposed to be established in Oneonta, N.Y., near my home. Senators from other parts of the country may not be aware that two of America's consistently finest collegiate soccer teams are resident in Oneonta: those of Hartwick College and the Oneonta campus of the State University of New York. This reflects the degree of support and enthusiasm for soccer in the middle part of New York State, where many of us hope the hall of fame will soon be established.

I think that having the World Cup played here in the United States in 1986 would boost immeasurably the popularity of soccer in this country, and thus enhance in time the quality of the game played worldwide.

It is sad, therefore, that FIFA has so far refused to send an inspection team to the United States so that we might demonstrate our unique capability to host the cup. The United States is entitled to a fair shake from FIFA in its deliberations as to who should host the 1986 World Cup. The kind of statements made by Mr. Havelange do not help that process at all.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed in the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:11 p.m., a message from the House of Representatives delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1190. An act to provide emergency credit assistance to farmers, and for other purposes.

The message also announced that the Speaker has appointed Mr. ZABLOCKI, Chairman, Mr. ROSE, Vice Chairman, and Mr. WHITEHURST, vice Mr. BURTON of California, Chairman, deceased, Mr. HAMILTON, Vice Chairman, and Mr. PRITCHARD, resigned, as additional members of the U.S. Group of the North Atlantic Assembly.

ENROLLED BILL SIGNED

At 3:03 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the Speaker has signed the following enrolled joint resolution:

H.J. Res. 219. A joint resolution declaring the support of the U.S. Government for efforts of the U.S. Soccer Federation to bring the World Cup to the United States in 1986, designating the Secretary of Commerce as the official representative of the U.S. Government of the Federation Internationale de Football Association, and for other purposes.

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

MEASURES PLACED ON THE CALENDAR

The following joint resolution was read the second time and placed on the calendar:

H.J. Res. 13. A joint resolution calling for a mutual and verifiable freeze on and reduction in nuclear weapons.

The following bill was read twice and placed on the calendar:

H.R. 1190. An act to provide emergency credit assistance to farmers, and for other purposes.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1015. A communication from the Assistant Secretary of the Interior for Territorial and International Affairs, transmitting, pursuant to law, a copy of the deficit elimination plan for the Government of Guam; to the Committee on Energy and Natural Resources.

EC-1016. A communication from the Secretary of Commerce, transmitting a draft of proposed legislation providing for termination of Federal management and control of the Pribilof Islands; to the Committee on Energy and Natural Resources.

EC-1017. A communication from the Director of the Minerals Management Service, Department of the Interior, transmitting, pursuant to law, a report on refunds of excess royalty payments to Amoco Production Co., Shell Oil Co., and the Superior Oil Co.; to the Committee on Energy and Natural Resources.

EC-1018. A communication from the Assistant Secretary of the Interior, transmitting, pursuant to law, the fiscal 1982 report on Outer Continental Shelf Lease Sales and Evaluation of Alternative Bidding Systems; to the Committee on Energy and Natural Resources.

EC-1019. A communication from the Chairman of the U.S. International Trade Commission, transmitting, pursuant to law, the 33d quarterly report on Trade Between the U.S. and Nonmarket Economy Countries; to the Committee on Finance.

EC-1020. A communication from the Deputy U.S. Trade Representative, transmitting, pursuant to law, the biannual report on the operation and effect of the International Sugar Agreement; to the Committee on Finance.

EC-1021. A communication from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements, other than treaties, entered into by the United States within the previous 60 days; to the Committee on Foreign Relations.

EC-1022. A communication from the Acting Secretary of the U.S. Postal Rate Commission, transmitting, pursuant to law, notice of a request by the Postal Service for a proposed decision by the Commission on proposed changes in rates of postage and classifications for electronic computer originated mail; to the Committee on Governmental Affairs.

EC-1023. A communication from the Chairman of the Federal Home Loan Bank Board, transmitting, pursuant to law, the Board's 1982 Government in the Sunshine report; to the Committee on Governmental Affairs.

EC-1024. A communication from the Chairman and Members of the Personnel Appeals Board, transmitting, pursuant to law, the annual report of the Board for October 1, 1981, through December 31, 1982; to the Committee on Governmental Affairs.

EC-1025. A communication from the General Counsel of the Legal Services Corporation, transmitting, pursuant to law, the report of the Corporation's compliance with the Freedom of Information Act for the period of January 7, 1982, through December 31, 1982; to the Committee on the Judiciary.

EC-1026. A communication from the Commissioner of the Immigration and Naturalization Service, transmitting, pursuant to law, copies of orders suspending deportation as well as a list of persons involved; to the Committee on the Judiciary.

EC-1027. A communication from the Chairman of the National Commission on Libraries and Information Science, transmitting, pursuant to law, the Commission's report for fiscal year 1982; to the Committee on Labor and Human Resources.

EC-1028. A communication from the Comptroller General, transmitting a report on the analysis of migration characteristics of children served under the Migrant Education Program; to the Committee on Labor and Human Resources.

EC-1029. A communication from the Secretary of Education, transmitting, pursuant to law, the annual report of the Women's Educational Equity Act Program for fiscal year 1982; to the Committee on Labor and Human Resources.

EC-1030. A communication from the Secretary of Education, transmitting, pursuant to law, a copy of final regulations regarding aid to the bilingual education training projects program; to the Committee on Labor and Human Resources.

EC-1031. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the National Cancer Institute Director's report for fiscal year 1982 and the annual plan for fiscal years 1984-88 for the national cancer program; to the Committee on Labor and Human Resources.

EC-1032. A communication from the Secretary of the Interior, transmitting, pursuant to law, a report covering actions taken by the Department during calendar year 1982 regarding the Alaska Native Claims Settlement Act; to the Committee on Energy and Natural Resources.

EC-1033. A communication from the Deputy Secretary of the Treasury, transmitting a draft bill to require that customs duties determined to be due upon a liquidation or reliquidation are due upon that date, and for other purposes; to the Committee on Finance.

EC-1034. A communication from the Deputy Secretary of the Treasury, transmitting a draft bill to implement the Customs Convention on Containers, 1972; to the Committee on Finance.

EC-1035. A communication from the District of Columbia Auditor transmitting, pursuant to law, a report entitled "Annual Audit of the Washington Convention Center Fund"; to the Committee on Governmental Affairs.

EC-1036. A communication from the Acting Assistant Secretary for Indian Affairs of the Department of the Interior, transmitting, pursuant to law, a proposed plan for the use and distribution of the judgment funds awarded to the Seneca-Cayuga Tribe of Oklahoma et al. in dockets 341-A and 341-B and to the Cayuga Nation of Indians in docket 343 by the Indian Claims Commission; to the Select Committee on Indian Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 925: A bill to make certain technical corrections in the Atlantic Salmon Convention Act of 1982 (Rept. No. 98-78).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, with amendments:

S. 1117: A bill to amend the Rail Passenger Service Act to authorize additional appropriations for the National Railroad Passenger Corporation, and for other purposes (Rept. No. 98-79).

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation, without amendment:

S. 1099: A bill to consolidate and authorize certain marine fishery programs and functions of the National Oceanic and Atmospheric Administration under the Department of Commerce (Rept. No. 98-80).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. WILSON (for Mr. GORTON (for himself and Mr. JACKSON)):

S. 1234. A bill to clear certain impediments to the licensing of the vessel Norden for employment in the coastwise trade; to the Committee on Commerce, Science, and Transportation.

By Mr. THURMOND (by request):

S. 1235. A bill authorizing appropriations to the Executive Director, U.S. Holocaust Memorial Council, for services necessary to perform the functions of the U.S. Holocaust Memorial Council; to the Committee on the Judiciary.

By Mrs. HAWKINS:

S. 1236. A bill to amend the Controlled Substances Act, and for other purposes; to the Committee on the Judiciary.

By Mr. BAKER (for Mr. SYMMS (for himself and Mr. MCCLURE)):

S. 1237. A bill to amend the Internal Revenue Code of 1954 to clarify the definition of geothermal energy, and for other purposes; to the Committee on Finance.

By Mr. HOLLINGS (for himself and Mr. PELL):

S. 1238. A bill to encourage and promote the continued leadership of the United States in ocean policy, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. WEICKER:

S. 1239. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Human Resources.

By Mr. GRASSLEY (for himself, Mr. THURMOND, Mr. DECONCINI, Mr. HEFLIN, Mr. JEPSEN, Mr. KASTEN, Mr. RANDOLPH, Mr. DOMENICI, Mr. HUDDLESTON, Mr. WARNER, Mr. DOLE, and Mr. DENTON):

S. 1240. A bill to strengthen law enforcement in the areas of child exploitation and pornography and to increase the criminal penalties in such areas, and for other purposes; to the Committee on the Judiciary.

By Mr. MELCHER (for himself, Mr. INOUYE, Mr. BAUCUS, and Mr. BURDICK):

S. 1241. A bill to provide for an Indian housing program for construction and financing for Indians, and for other purposes; to the Select Committee on Indian Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. WILSON (for Mr. GORTON (for himself and Mr. JACKSON)):

S. 1234. A bill to clear certain impediments to the licensing of the vessel *Norden* for employment in the coastwise trade; to the Committee on Commerce, Science, and Transportation.

SAILING VESSEL NORDEN

● Mr. GORTON. Mr. President, the bill I am introducing today would grant coastwise privileges to the sailing vessel *Norden*. This vessel is one of the last links between true old world sailing ships and the more modern

water craft of today. Built and designed in 1919 by the renowned naval architect, J. Ring Anderson, the *Norden* plied the North Sea for some 40 years before retiring from her trade as a cod fishing vessel and brought to the United States in the 1970's.

This vessel has been a part of the Northwest sailing scene since 1977, and has been a significant participant in wooden boat festivals and maritime activities. This bill would allow the vessel to be chartered, and thereby give the owners a little more ability to maintain the historic value of the vessel.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1234

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provisions of law to the contrary, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel *Norden* (official number 584767) to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade so long as such vessel is owned by a citizen of the United States.●

By Mr. THURMOND (by request):

S. 1235. A bill authorizing appropriations to the Executive Director, U.S. Holocaust Memorial Council, for services necessary to perform the functions of the U.S. Holocaust Memorial Council; to the Committee on the Judiciary.

U.S. HOLOCAUST MEMORIAL COUNCIL

Mr. THURMOND. Mr. President, last month, Washington was host to the American Gathering of Jewish Holocaust Survivors as this Nation observed the Days of Remembrance. This is a time set aside annually to reflect on the horrors of the Nazi concentration camps and the millions who suffered there. It is appropriate that the United States commemorate this event since the liberating American armies played the major role in bringing these atrocities to light. As a soldier in the First U.S. Army in World War II, I was present when the Buchenwald concentration camp near Weimar was liberated and know firsthand of the horrors that occurred in these camps. Further, America has become the homeland for many of the few survivors and they and their descendants now form an integral part of our society.

Public Law 96-388 created the U.S. Holocaust Memorial Council as a permanent organization under the Department of the Interior and rendered it eligible for private funding. While the council is to continue to plan the yearly observance, a further, and perhaps more important, change is the establishment of a museum with a concomitant educational program dedicated to the victims of the Holocaust. This memorial will serve as a graphic reminder of both the capacity of man for cruelty to his fellow man and of the necessity of maintaining and, indeed, strengthening our democratic values and system of government.

The bill that I am introducing today at the request of the Reagan administration, would amend the United States Holocaust Memorial Council Act to authorize appropriations for fiscal year 1984.

The requested authorization would enable the council to carry out its responsibilities through September 1984 as provided in the President's budget. The amended authorization is necessary to the operation of the living memorial museum, continued observance and expansion of the Days of Remembrance, as well as the preservation and development of research and documentation of the Holocaust.

I ask unanimous consent that a copy of the bill and the letter of transmittal be printed in the CONGRESSIONAL RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows;

S. 1235

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8 of the Holocaust Memorial Council Act (Public Law 96-388, as amended, 36 U.S.C. 1408) is amended as follows: After "1983", strike out the colon and insert in lieu thereof, ", and $1,953,000 for the Fiscal Year 1984:".

U.S. HOLOCAUST MEMORIAL COUNCIL,
February 9, 1983.

Hon. GEORGE BUSH,
President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft bill, "Authorizing appropriations to the Executive Director of the United States Holocaust Memorial Council for services necessary to perform the functions of the United States Holocaust Memorial Council."

We recommend that the bill be referred to the appropriate committee for consideration, and that it be enacted.

Public Law 96-388, October 7, 1980 (94 Stat. 1547), provided for the establishment of the United States Holocaust Memorial Council to provide appropriate ways for the Nation to commemorate Days of Remembrance, plan, construct, and oversee the operation of a permanent living memorial museum to the victims of the Holocaust, and develop a plan for carrying out the recommendations of the President's Commission on the Holocaust. Section 8 of Public Law 96-388 authorized $722,000 for Fiscal Year 1981; $800,000 for Fiscal Year 1982; and $850,000 for Fiscal Year 1983, to carry out the purposes of this Act.

The enclosed draft bill would amend the appropriation authorization in Section 8 of the United States Holocaust Memorial Council Act (Public Law 96-388, as amended; 36 U.S.C. 1408) to authorize an appropriation of $1,953,000 for Fiscal Year 1984.

Such an authorization and appropriation would enable the Council to carry out its responsibilities through September 30, 1984, as provided in the President's 1984 budget. The amended authorization is necessary to the operation of the living memorial museum, continued observance and expansion of Days of Remembrance as well as the preservation and development of research and documentation of the Holocaust.

The Council has made measurable progress in carrying out its mandated responsibilities since its inception in 1981. It is anticipated that the requested increased funding level in 1984 will allow each of its functions to be fully operational.

A similar letter is being sent to The Honorable Thomas P. O'Neill, Jr., Speaker of the House of Representatives.

Sincerely,

SEYMOUR SIEGEL,
Executive Director.

By Mr. BAKER (for Mr. SYMMS (for himself and Mr. MCCLURE)):

S. 1237. A bill to amend the Internal Revenue Code of 1954 to clarify the definition of geothermal energy, and for other purposes; to the Committee on Finance.

GEOTHERMAL ENERGY

● Mr. SYMMS. Mr. President, I am introducing legislation today with my colleague from Idaho, Senator MCCLURE, to promote the development of low temperature geothermal resources throughout the United States.

The legislation that I am introducing clarifies the definition of "geothermal energy" within the Internal Revenue Code of 1954. In so doing, it eliminates an arbitrary temperature "threshold" imposed by the Internal Revenue Service. The bill also insures that the business and residential energy tax credits will apply to energy systems that are supplied primarily, but not exclusively, by geothermal energy.

The legislation is necessary because the IRS has written unreasonably restrictive regulations to implement the geothermal provisions of the Energy Tax Act of 1978 Public Law 95-618).

The IRS regulations state, for example, that "equipment that uses energy from a geothermal deposit is eligible (for the business energy credit) only if uses geothermal energy exclusively."

In addition, the regulations state that only water 122° F. (50° C.) or hotter qualifies as a "geothermal deposit." This means that any space heating or ground water heat pump equipment using geothermal water colder than 122° F. cannot qualify for either the residential or business energy credit.

A third example of how the IRS regulations limit the application of the renewable energy tax incentives is the case of a company building an innovative electrical generating plant which

will use geothermal energy and waste food. Under the regulation, the owners of the powerplant can take the geothermal credit on the equipment extracting or distributing the geothermal fluids and the biomass credit on the equipment used in burning the wood. However, those components of the powerplant which use energy from both geothermal and biomass sources cannot qualify for either credit.

As these examples illustrate, the geothermal tax credit regulations developed by the IRS do not conform with the intent of Congress in enacting the Energy Tax Act.

The Energy Tax Act of 1979 (Public Law 95-618) provides a residential energy tax credit for certain energy conserving and renewable energy source expenditures made in connection with a taxpayer's principal residence. The credit applies to expenditures on energy-conserving items such as insulation and storm windows, as well as to investments in solar, wind, and geothermal energy property, categorized as renewable energy source property. In this latter case, the act provided that a credit may be claimed for 30 percent of the first $2,000 of expenditures and 20 percent of the next $8,000 of expenditures up to a maximum credit of $2,200 for expenditures made after April 19, 1977, and before January 1, 1986. Subsequently, the Crude Oil Windfall Profit Tax Act of 1980 (Public Law 96-223) expanded the renewable energy credit to 40 percent of $10,000 in expenditures to a maximum credit of $4,000 for expenditures made after December 31, 1979, and before January 1, 1986.

The Energy Tax Act of 1978 also provided for a 10-percent tax credit for investment in solar, wind and geothermal energy equipment used by businesses. The geothermal energy tax credit was increased to 15 percent and extended through the end of 1985 by the Crude Oil Windfall Profit Tax Act of 1980.

For tax purposes, the Energy Tax Act of 1978 defined geothermal energy in the following way:

* * * the term "geothermal deposit" means a geothermal reservoir consisting of natural heat which is stored in rocks or in an aqueous liquid or vapor (whether or not under pressure).

The law set no temperature requirement in its definition of geothermal energy. In fact, the Senate Finance Committee report described that the purpose of the legislation was to "induce consumers of oil and gas to conserve energy and convert to alternative energy sources."

It is clear that the overly restrictive definition of "geothermal property" adopted by the IRS has substantially lessened the incentives for homeowners or businessmen to convert to geothermal energy use. Thus, the regulations do not fully comply with the legislative intent of the 1978 act.

As a member of the Senate Finance Committee's Subcommittee on Energy and Agricultural Taxation, I believe that the Federal energy tax laws should be fairly administered. That is why I am introducing this legislation. I believe it will make the existing geothermal tax credits more evenly available. That, in turn, should measurably speed up the development of America's low temperature geothermal resources.

Mr. President, I ask unanimous consent that a fact sheet explaining the need for this legislation and outlining its main provisions, and the text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

GEOTHERMAL TAX LEGISLATION

BACKGROUND AND NEED

In its report on the Energy Tax Act of 1978 (Public Law 95-618), the Senate Finance Committee stated that the purposes of the legislation were to "induce consumers of oil and gas to conserve energy and convert to alternative energy sources." To meet this goal, the Energy Tax Act provided major tax incentives for the production of energy from such resources as geothermal, solar, wind, and biomass. These incentives—mostly in the form of tax credits, deductions, and allowances—have generated unprecedented interest in developing alternative energy projects.

However, regulations issued in 1981 by the Internal Revenue Service have drastically limited the application of the alternative energy incentives enacted in 1978 and reaffirmed and expanded by the Crude Oil Windfall Profits Tax Act of 1980 (Public Law 96-223). With regard to geothermal energy, four specific limitations imposed by the IRS appear to run contrary to Congressional intent:

Only water of a temperature of 122°F (50°C) or greater is considered "geothermal energy," even though the Energy Tax Act itself contains no temperature threshold. As a result, homeowners or businesses with water cooler than 122°F cannot qualify for the residential or business energy investment credits.[1]

A homeowner who installs a geothermal system to heat his residence cannot qualify for the residential energy credit unless 100 percent of the energy in the system is supplied by geothermal sources. Geothermal energy systems often include peaking equipment fueled by oil, gas, or coal. This peaking equipment typically provides less than 20 percent of the total annual energy load, since it is only used on the coldest days of the year. But, such peaking equipment would disqualify the system.

A business that installs geothermal equipment cannot qualify for the energy investment credit if the geothermal fluids are mixed with energy from another source. Geothermal resources may not, in some instances, be hot enough to fully satisfy an industrial process heat requirement. However, by adding a few degrees to the heat supplied from the geothermal source, it will often be possible to displace a large fraction of the conventional fuel consumed in the plant. Under the IRS limitation, if a geothermal system requires even a minimal addition of non-geothermal heat, then the entire system becomes ineligible for the energy tax credit.

A company building an electric powerplant using geothermal and energy from another alternative energy resource, such as biomass, can take the geothermal credit on the equipment run solely on geothermal energy and the biomass credit on the equipment fueled exclusively by wood. But, those components of the plant using both geothermal and biomass energy cannot qualify for either credit.

[1] The residential credit is 40 percent of the first $10,000 of qualifying expenditures and the business credit for qualifying equipment is 15 percent.

S. 1237

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) CLARIFICATION OF DEFINITION OF GEOTHERMAL ENERGY. Paragraph (3) of section 613(e) of the Internal Revenue Code of 1954 (defining geothermal deposit) is amended to read as follows:

"(3) GEOTHERMAL ENERGY DEFINED.—For purposes of paragraph (1), the term 'geothermal energy' means the natural heat of the earth (at any temperature) which is stored in rocks, an aqueous liquid or vapor (whether or not under pressure), or any other medium. A geothermal well shall in no case be treated as a gas well for purposes of this section or section 613A, and this section shall not apply to any geothermal property which is located outside the United States or its possessions.".

(b) CLARIFICATION OF APPLICATION OF BUSINESS CREDIT AND RESIDENTIAL CREDIT TO GEOTHERMAL PROPERTY.—

(1) Subparagraph (D) of section 44C(c)(7) of such Code is amended by adding at the end thereof the following: "In the case of a system which uses both geothermal energy and an energy source not eligible for the credit under this section, all of the equipment comprising the system shall be eligible for the credit if, on a British thermal unit (Btu) basis, geothermal energy provides more than 80 percent of the energy in a typical year for which the system is designed. If less than 80 percent of the energy is supplied by geothermal energy, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by geothermal energy (on an annual Btu basis).".

(2) Paragraph (3) of section 48 (1) of such Code is amended by adding at the end thereof the following new subparagraph:

"(D) application of credit under section 46 to equipment which uses both geothermal energy and another energy source.—

(i) In the case of a system which uses both geothermal energy and an energy source not eligible for the credit under Section 46, all of the equipment comprising the system shall be eligible for the credit for Solar, Wind, or Geothermal Property under section 46(a)(2)(C) if, on a British thermal unit (Btu) basis, geothermal energy provides more than 80 prcent of the energy in a typical year for which the system is designed. If less than 80 percent of the energy is supplied by geothermal energy, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by geothermal energy (on an annual Btu basis).

(ii) In the case of a system which used both geothermal energy and another energy source eligible for the credit under section 46 (such as biomass, solar, wind, ocean thermal, or hydroelectric), all of the equipment comprising the system (up to, but not including the electrical transmission stage in the case of an electrical generation facility) shall be eligible for the credit for solar, wind, or geothermal property under section 46(a)(2)(C) if, on a Btu basis, more than 80 percent of the energy in a typical year for which the system is designed, is supplied by geothermal energy, or any of the other forms of energy eligible for the credit under section 46, or any combination thereof (hereinafter referred to in this subparagraph as 'qualified sources'). If less than 80 percent of the energy is supplied by qualified sources, the credit shall apply to those portions of the system which produce, distribute, transfer, extract, or use energy which is more than 50 percent supplied by such qualified sources (on an annual Btu basis).".

(c) CONFORMING AMENDMENT.

(1) Clause (ii) of section 44C(c)(2)(B) of such Code is amended by striking "any geothermal deposit" and inserting in lieu thereof "geothermal energy".

(2) Clause (i) of section 44C(c)(5)(A) of such Code is amended by striking out "energy derived from the geothermal deposits" and inserting in lieu thereof "geothermal energy".

(3) Clause (viii) of section 48(1)(3)(A) of such Code is amended by striking out "energy derived from a geothermal deposit" and inserting in lieu thereof "geothermal energy".

(4) Clause (ii) of section 57(a)(11)(D) of such Code is amended to read as follows:

"(ii) all geothermal properties.".

(5) Subsection (c) of section 263 of such Code is amended by striking out "any geothermal deposit" and inserting in lieu thereof "geothermal energy".

(6) Subparagraph (E) of section 465(c)(1) of such Code is amended by striking out "geothermal deposits" and inserting in lieu thereof "geothermal energy".

(7) Paragraph (1) of section 613(c) of such Code is amended by strking out "geothermal deposit" and inserting in lieu thereof "geothermal well".

(8) Subsection (e) of section 613 of such Code is amended—

(A) by striking out "deposits" each place it appears in paragraph (1) and inserting in lieu thereof "properties", and

(B) by striking out "DEPOSITS" in the subsection heading and inserting in lieu thereof "PROPERTIES".

(9) Subsection (b) of section 614 of such Code is amended—

(A) by striking out "geothermal deposits" in the text and inserting in lieu thereof "geothermal wells", and

(B) by striking out "GEOTHERMAL DEPOSITS" in the subsection heading and inserting in lieu thereof "GEOTHERMAL WELLS".

(10) Paragraph (1) of section 614(c) of such Code is amended by striking out "oil and gas wells and geothermal deposits" each place it appears and inserting in lieu thereof "oil, gas, and geothermal wells".●

By Mr. HOLLINGS (for himself and Mr. PELL):

S. 1238. A bill to encourage and promote the continued leadership of the United States in ocean policy, and for other purposes; to the Committee on Commerce, Science, and Transportation.

NATIONAL OCEAN POLICY COMMISSION ACT OF 1983

● Mr. HOLLINGS. Mr. President, today I am introducing a bill to create a blue-ribbon panel whose purpose is to develop a comprehensive set of recommendations for U.S. ocean policy, based on an evaluation of our current international and domestic ocean interests. This panel would be known as the National Ocean Policy Commission. It is patterned on the highly successful Stratton Commission of the mid-1960's which generated many of the ideas and recommendations that underlie our present-day network of ocean law and policy. I am honored to be joined on this bill by the distinguished senior Senator from Rhode Island, Senator PELL, who has been a loyal and vigorous defender of this Nation's ocean interests throughout his career in National Government.

The Stratton Commission, formally named the Commission on Marine Science, Engineering, and Resources, was established by legislation enacted a few months before my first days in the Senate. I watched the work of that Commission for the next 2 years, and was impressed by the teamwork, esprit de corps, and inspiration of its members and staff. The recommendations in the Commission's landmark report, "Our Nation and the Sea," led to the creation of a lead civilian ocean agency (NOAA), the Coastal Zone Management Act, the estuarine sanctuaries program, the ocean dumping research program, expanded sea grant marine advisory services, and a variety of atmospheric programs like the world weather watch.

Much has transpired since the Stratton Commission published its report in January 1969. Only a few months ago did we see a treaty emerge from the exhausting and exhaustive Third United Nations Conference on the Law of the Sea. That event marked the beginning of a period when our Nation will have to determine how to proceed while much of the world works toward the implementation of a treaty that we have not signed. The Coast Guard is faced with the dilemma of how to make the most effective use of dwindling resources in light of such major new commitments as fisheries law enforcement, drug interdiction, and marine environmental protection. These were responsibilities that the Coast Guard, winding down its involvement in Vietnam, would have had difficulty predicting in 1969.

At the time of the Stratton Commission, there was an awareness of the national value of programs that employed Federal funds to bring our many levels of government together on issues. This is the spirit of the coastal zone management and sea grant college programs. The coastal zone program was not even in existence in 1969 and sea grant was just getting started. Now some 26 coastal States have coastal zone management systems. And a collaborative network of universities, industry, and State and local governments has been forged through sea grant matching funds, for the advancement of the marine economy and education and research in fields of marine expertise. In 1983 we face great budgetary pressures and the administration has suggested that the States and private sector can keep these worthwhile activities going without Federal help.

A National Ocean Policy Commission will present us with an opportunity to gain the insights of thoughtful, dedicated individuals into the direction ocean policy should take amid these rapidly changing circumstances.

The Commission can take a look at U.S. international ocean policy, insulated from the political controversy surrounding the President's decision not to sign the Law of the Sea Treaty. It will also be able to make a fresh evaluation of the appropriate function and location of the National Oceanic and Atmospheric Administration within the executive branch. Such an evaluation is especially important since the President's decision to seek creation of a Department of Trade has been silent on plans for NOAA if the reorganization is accomplished. Furthermore, the Commission can recommend the proper balance of responsibilities among Federal, State, local, and private interests—an essential task before a fair, reasoned judgment can be made on how much of our ocean programs should be borne by the States.

In this bill we seek to establish a body whose members are knowledgeable and experienced in ocean policy matters and come from diverse backgrounds with consumer and environmental groups, marine industries, and the academic community. In addition, we would have gubernatorial and congressional advisers to insure that the Commission makes its recommendations with an understanding of the political context.

In the foreword to "Our Nation and the Sea" the Stratton Commission made the following closing statement:

The Commission harbors no illusions that it has provided final answers to the multitude of questions that relate to the future of the seas. Indeed, the legislation of 1966 itself was envisaged by the Congress only as a first step, and we recognize that no report, no program, can be valid for all time. But we earnestly hope that the work of this Commission will lead to constructive action and a major advance for our Nation and the Sea.

This is a modest statement by a group that succeeded in producing a genuine blueprint for action. I would hope that the commission contemplat-

ed by this bill will produce recommendations as effective in making further advances for our Nation and the sea.●

● Mr. PELL. Mr. President, today it is with great pleasure that I join the distinguished Senator from South Carolina, Senator HOLLINGS, in introducing legislation to create a new U.S. Ocean Commission—a Commission to be charged with analyzing, reviewing, and formulating policy recommendations concerning our myriad domestic and international oceans interests. It is my hope that with the creation of this Commission, U.S. oceans policy will be removed from the political morass into which it has fallen.

I need not reiterate at length, at this time, my well-known views on the ill-conceived decisions by the President to reject the Law of the Sea Treaty, finally negotiated after years of effort and compromise; and to go ahead, precipitously in my view, to establish an exclusive economic zone (EEZ) within 200 miles of our shores. However, I will say that the price the President has paid for all the rankling over these decisions, both in and outside of the administration, has been the creation of an environment in which sound and well-informed policy formulation has become exceedingly difficult, if not imposible. This has led to a vacuum in U.S. oceans policy, as it relates to international affairs. In addition, U.S. oceans policy has suffered domestically from lack of leadership from the administration with regard to the promotion of the wise use and compatible development of our marine resources.

In order to remove such an important subject from this charged environment, Senator HOLLINGS and I are today proposing the establishment of an Ocean Commission. The proposed Commission will be made up of 15 members to be chosen from Federal agencies, academia, industry, and public interest groups involved in various ocean uses. Several Members from the House and Senate as well as eight gubernatorial representatives representing various regions will also serve as advisers to the Commission. The President will select the non-Federal Government members of the Commission from two bipartisan lists of individuals representing oceans experts and interested parties submitted to him by the Speaker of the House, and the Senate majority leader. The Commission will be broadly charged with reviewing current laws, regulations, and policies which effect U.S. oceans interests, and making recommendations to the Congress and the President on a comprehensive national oceans policy that encompasses international and domestic considerations and reflects our overall national interest. The Commission will cease to function after the 2-year schedule provided in the bill, following the submission of a written report on its findings and recommendations. The costs to the taxpayer will be modest, and the potential benefits of a carefully framed oceans policy immense.

As you probably are aware Mr. President, this is not the first time Congress has created an oceans commission to review, analyze, and make recommendations concerning U.S. oceans policy. In 1966, pursuant to the Marine Resources and Engineering Development Act, the U.S. Commission on Marine Science, Engineering, and Resources was established. This Commission which came to be known as the Stratton Commission, after its distinguished Chairman, Julius A. Stratton of the Ford Foundation, labored for 2 years, and in that time very successfully fulfilled its mandate to investigate and make recommendations on a vast array of marine problems.

The comprehensive final report of the Stratton Commission provided an in-depth examination of both current and long-term developments with respect to the future management and development of the living and nonliving resources of the oceans; with respect the necessity and possible methods for protection the marine environment; and with respect to the national security and the economic imperative for promoting the advancement of marine science and technology. Further, the Commission recognized the need for a new international legal/political framework if the United States is to successfully explore and exploit the riches of the oceans beyond our territorial waters. Last but by no means least, the Commission recommended that an independent agency be created to act as the umbrella organization to rationalize our policy formulation with respect to the vast and often conflicting issues and overlapping jurisdictions which have come to characterize oceans matters. I am speaking of the creation of the very successful National Oceanic and Atmospheric Administration (NOAA).

As you can see, the very fruitful work of the Stratton Commission of the 1960's provided an ambitious agenda for U.S. policymakers to pursue in the 1970's. It is my hope that after the 2-year period of deliberations by our newly proposed Commission, it will prove as successful as the Stratton Commission in developing an ambitious, comprehensive, and well-balanced agenda for the 1980's and 1990's. I cannot stress too strongly how important it is that the United States adopt and pursue such an agenda. Perhaps the words of the Stratton Commission express it best:

How fully and wisely the United States uses the sea in the decades ahead will affect profoundly its security, its economy, its ability to meet increasing demands for food and raw materials, its position and influence in the world community, and the quality of the environment in which its people live.●

By Mr. WEICKER:

S. 1239. A bill to provide for the development and implementation of programs for children and youth camp safety; to the Committee on Labor and Human Resources.

CHILDREN AND YOUTH CAMP SAFETY ACT

● Mr. WEICKER. Mr. President, today I am pleased to introduce the Children and Youth Camp Safety Act. For well over a decade my former colleague from Connecticut, Senator Ribicoff, and I have worked to provide protection for youngsters who attend our Nation's summer camps. We have pointed out that while 8 to 10 million boys and girls attend 10,000 summer camps each year, only 10 States have any type of agency responsible for monitoring camp conditions and operations. We have urged this body to pass legislation that establishes a Federal role in aiding States to develop camp health and safety standards. Unfortunately, no affirmative steps have yet been taken.

It is hard to believe, but most States make no effort to safeguard our millions of camping youngsters by requiring that any minimum safety standards be met. Each summer we see the results: drownings, accidental shootings, blindings, and disabling injuries. To an alarming extent, these are the results of poorly trained camp staffs, many of whom are juveniles themselves, and dilapidated facilities that are somehow thought adequate for camping youngsters under the guise of roughing it.

In March of 1978 my constituent, Mitch Kurman of Westport, Conn., appeared before the Senate Subcommittee on Child and Human Development and forcefully presented the case for Federal camp safety legislation. Mitch lost his own son in a tragic camping accident in Maine and he has devoted many years to documenting camp accidents and unsafe camp conditions throughout the United States. He has aroused the conscience of many Americans and I commend him for his tireless efforts on behalf of meaningful camp safety standards.

States are well aware of the problem. Yet the protection necessary to safeguard the health and well-being of our Nation's youth has not yet materialized. In an effort to prevent future deaths or accidents, this bill would provide for Federal financial and technical aid to States to encourage them to develop programs for implementing youth camp safety standards. Furthermore, this measure would insure that States and youth camps are not overburdened by necessary Federal regulations. It would essentially direct any Federal standard promulgated by the Office of Youth Camp Safety to the

Congress for its approval within 60 days.

Now, let us work expeditiously, Mr. President, to see that in this session of Congress prompt and favorable action will be taken to alleviate this persistent problem of camp accidents. Early passage will mean one less summer of disability or death due to preventable camping accidents.

Mr. President, I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1239

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Children and Youth Camp Safety Act".

STATEMENT OF PURPOSE

SEC. 2. (a) It is the purpose of this Act to protect and safeguard the health and well-being of the youth of the Nation attending day camps, residential camps, short-term group camps, travel camps, trip camps, primitive or outpost camps, and Federal recreational youth camps, by providing for establishment of Federal standards for safe operation of youth camps, to provide Federal financial and technical assistance to the States in order to encourage them to develop programs and plans for implementing safety standards for youth camps, and to provide for the Federal implementation of safety standards for youth camps in States which do not implement such standards and for Federal recreational youth camps, thereby providing assurance to parents and interested citizens that youth camps and Federal recreational youth camps meet minimum safety standards.

(b) In order to protect and safeguard adequately the health and well-being of the children and youth of the Nation attending camps, it is the purpose of this Act that youth camp safety standards be applicable to intrastate as well as interstate youth camp operators.

CONGRESSIONAL INTENT REGARDING STATE INVOLVEMENT

SEC. 3. It is the intent of Congress that the States assume responsibility for the development and enforcement of effective youth camp safety standards. The Secretary shall provide, in addition to financial and technical assistance, consultative services necessary to assist in the development and implementation of State youth camp safety standards.

DEFINITIONS

SEC. 4. For purposes of this Act:

(1) The term "youth camp" means any residential camp, day camp, short-term group camp, troop camp, travel camp, trip camp, primitive or outpost camp, or Federal recreational youth camp located on private or public land, which—

(A) is conducted as a youth camp for the same ten or more campers under eighteen years of age;

(B) may include activities promoted or advertised as something other than a youth camp, but offers youth camp activities;

(C) may include any site or facility primarily designed for other purposes, such as, but not limited to, any school, playground, resort, or wilderness area; and

(D) may include any site or facility advertised as a camp for youth regardless of activities offered.

(2) The term "youth camp activities" includes, but is not limited to, such waterfront activities as swimming, diving, boating, lifesaving, canoeing, sailing, and skindiving; such other activities as archery, riflery, horseback riding, hiking, and mountain climbing, and other sports and athletics; and campcraft and nature study activities, under the auspices of a youth camp operator. The term does not include—

(A) the activities of a family and its guests carried out as a purely social activity;

(B) regularly scheduled meetings of voluntary organizations such as the Girl Scouts or Boy Scouts that do not involve camping experience;

(C) regularly scheduled athletic events that do not involve camping experience;

(D) bona fide extracurricular activities conducted under the auspices of the schools;

(E) learning experiences in the arts and drama or conferences of forums; and

(F) activities carried on in private homes.

(3) The term "permanent campsite" means a campground which is continuously or periodically used for camping purposes for a portion of a day by a youth camp operator, which may or may not include temporary or permanent structures and installed facilities.

(4) The term "residential camp" means a youth camp operating on a permanent campsite for four or more consecutive twenty-four-hour days.

(5) The term "day camp" means a youth camp operated on a permanent campsite for all or part of the day but less than twenty-four hours a day and which is conducted for at least five days during a two-week period, but does not include—

(A) swimming facilities operated by a public agency or by a private organization on a membership basis, except where that private organization utilizes such facilities as part of a youth camp;

(B) a day care center except where the center operates a day camp; or

(C) playgrounds and other recreational facilities provided for neighborhood use by local public agencies.

(6) The term "troop camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day for organized groups of campers sponsored by a voluntary organization serving children and youth.

(7) The term "short-term group camp" means an organized camping activity of more than twenty-four but less than a ninety-six-hour period for groups, clubs, and troops of campers sponsored by an organization or person.

(8) The term "travel camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day and which uses motorized transportation to move campers as a group from one site to another over a period of two or more days.

(9) The term "trip camp" means a youth camp which provides youth camp activities conducted for not less than twenty-four hours a day which moves campers under their own power or by a transportation mode permitting individual guidance of a vehicle or animal from one site to another.

(10) The term "primitive or outpost camp" means a portion of the permanent camp premises or other site, under the control of the youth camp operator at which the basic needs for camp operation, such as places of abode, water supply systems, and permanent toilet and cooking facilities are not usually provided.

(11) The term "Federal recreation camp" means a camp or campground which is operated by, or under contract with, a Federal agency to provide opportunities for recreational camping to campers.

(12) The term "camper" means any child under eighteen years of age, who is attending a youth camp or engaged in youth camp activities.

(13) The term "youth camp operator" means any private or public agency, organization, or person, and any individual, who operates, owns, or controls, a youth camp, whether such camp is operated for profit or not for profit.

(14) The term "youth camp staff" means any person or persons employed by a youth camp operator, whether for compensation or not, to supervise, direct, or control youth camp activities.

(15) The term "youth camp director" means the individual on the premises of any youth camp who has the primary responsibility for the administration of program operations and supportive services for such youth camp and for the supervision of the youth camp staff of such camp.

(16) The term "youth camp safety standards" means criteria issued by the Secretary designed to provide to each camper safe and healthful conditions, facilities, and equipment which are free from hazards that are causing, or are likely to cause, death, serious illness, or serious physical harm, including adequate supervision to prevent injury or accident, and safety instruction by properly qualified personnel, wherever or however such camp activities are conducted and with due consideration to the type of camp involved and to conditions existing in nature. The criteria shall address areas including—but not limited to—personnel qualifications for director and staff; ratio of staff to campers; sanitation and public health; personal health, first aid and medical services; food handling, mass feeding and cleanliness; water supply and waste disposal; water safety, including use of lakes and rivers, swimming and boating equipment and practices; firearms safety; vehicle condition and operation; building and site design; equipment; and condition and density of use.

(17) The term "Secretary" means the Secretary of Health and Human Services.

(18) The term "State" includes each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, Guam, the Virgin Islands, and the Trust Territories of the Pacific.

(19) The term "serious violation" means any violation in a youth camp if there is substantial probability that death or serious physical harm could result, unless the operator did not, and could not, with the exercise of reasonable diligence know of the presence of the violation.

(20) The term "consultative services" means (A) advice on the interpretation or applicability of the general duty under section 5, of the general duty under State law required by section 8(b)(2), or of youth camp safety standards, and (B) advice on the most effective methods of complying with such duties and such standards.

(21) The term "Director" means the Director of Youth Camp Safety established under section 6.

(22) The term "special population" means a group of physically or mentally handicapped youth.

GENERAL DUTY

SEC. 5. Each youth camp operator shall provide to each camper—

(1) safe and healthful conditions, facilities, and equipment which are free from recognized hazards which cause, or are likely to cause, death, serious illness, or serious physical harm, and

(2) adequate and qualified instruction and supervision of youth camp activities at all times, wherever or however such youth camp activities are conducted and with due consideration existing in nature.

DIRECTOR OF YOUTH CAMP SAFETY

SEC. 6. (a) There is established in the office of the Secretary an Office of Youth Camp Safety which shall be headed by a Director of Youth Camp Safety. In the performance of his functions under this Act, the Director shall be directly responsible to the Secretary.

(b) The Director shall be appointed by the Secretary and have experience in the field of the operation of youth camps. The position of the Director shall be in the competitive service under section 2102 of title 5, United States Code.

(c) The Director shall prepare and submit a report to the President and to the Congress, on or before January 1 of each year, on the activities carried out under this Act, including the statistics submitted to and compiled by the Director under section 11(c). Such report shall include the certification required under section 8(d).

PROMULGATION OF YOUTH CAMP SAFETY STANDARDS

SEC. 7. (a) The Director shall develop, with the approval of the Secretary, and shall by rule, promulgate, modify, or revoke youth camp safety standards. In developing such standards, the Director shall consult with the Federal Advisory Council on Youth Camp Safety established under section 15, with State officials, and with representatives of appropriate public and private organizations, and shall consider existing State regulations and standards, and standards developed by private organizations which are applicable to youth camp safety, and shall make such suitable distinctions in such standards as are necessary and appropriate in order to recognize the differences in conditions and operations among residential camps, day camps, short-term group camps, travel camps, trip camps, primitive or outpost camps, Federal recreational youth camps and camps serving special populations. The Director shall promulgate the standards required by this section within one year after the effective day of this Act. Such standards shall take effect in each State at the completion of the first regular legislative session of such State which begins after the date on which such standards are promulgated.

(b) Notwithstanding any other provision of law, the Director shall, before promulgating any standard under subsection (a), or any rule or regulation under any other provision of this Act, transmit such proposed standard, rule, or regulation to each House of the Congress. No such proposed standard, rule, or regulation may take effect if either House of the Congress adopts a resolution, within sixty legislative days of continuous session of the Congress after such proposed standard, rule, or regulation is transmitted by the Director, which disapproves such proposed standard, rule, or regulation. Any such resolution shall void the proposed standard, rule, or regulation involved. The failure of either House of the Congress to adopt any such resolution shall not be considered to be an expression by the Congress that the standard, rule, or regulation involved is within the scope of authority delegated to the Director by this Act.

STATE JURISDICTION AND STATE PLANS

SEC. 8. (a) During the two-year period after the initial promulgation of Federal standards and annually thereafter any State which, at any time, desires to assume responsibility for development and enforcement of comprehensive youth camp safety standards applicable to youth camps in the State (other than Federal recreational youth camps operated by a Federal agency) shall submit a State plan for the development of such standards and their enforcement.

(b) The Director shall approve a plan submitted by a State under subsection (a), or any modification thereof, if the Director determines that such plan—

(1) designates a State agency as the agency responsible for administering the plan throughout the State,

(2) provides that each youth camp operator has the same general duty under State law as is provided under section 5,

(3) provides, after consultation with youth camp operators and other interested parties in that State, for adoption and enforcement of comprehensive youth camp safety standards which standards (and the enforcement of such standards) are or will be at least as effective in providing safe operation of youth camps in the State as the standards promulgated under section 7, and provides that where penalties are not employed as a method of enforcement of such standards, a system of licensing and loss of license is in effect which is at least as effective as penalties,

(4) provides for the enforcement of the standards developed under paragraph (3) in all youth camps in the State which are operated by the State or its political subdivisions,

(5) provides a procedure under which the State agency may—

(A) petition the appropriate State court to seek injunctive relief, which shall have a priority hearing on the docket of such court, to restrain any condition or practice in a youth camp or a place where camp activities are conducted where a danger exists which would reasonably be expected to cause death or immediate serious physical harm; or

(B) eliminate the imminence of such danger through the enforcement procedures otherwise provided by State law or regulation, which is at least as effective as that provided in section 13,

(6) provides for a procedure for the issuance of variances from standards developed under paragraph (3) upon application by a youth camp operator showing extraordinary circumstances or undue hardship, on terms and conditions at least as effective as that provided in section 14,

(7) provides for consultative services to youth camps in the State with respect to the general duty and comprehensive youth camp safety standards under such State plan,

(8) provides for an inspection of each such youth camp at least once a year during a period that camp is in operation,

(9) provides for a State youth camp advisory committee, to advise the State agency on the general policy involved in inspection and licensing procedures under the State plan, which committee shall include among its members representatives of other State agencies concerned with camping or programs related thereto; persons representative of professional or civic or other public or nonprofit private agencies, organizations, or groups concerned with organized camping; and members of the general public having a special interest in youth camps,

(10) provides for a right of entry and inspection of all such youth camps which is at least as effective as that provided in section 11,

(11) contains satisfactory assurances that such State agency has or will have the legal authority and qualified personnel necessary for the enforcement of such standards,

(12) gives satisfactory assurances that such State will devote adequate funds to the administration and enforcement of such standards,

(13) provides that such State will coordinate the inspection efforts of such State agency so that undue burdens are not placed on camp operators with multiple inspections,

(14) provides that such State agency will make such reports in such form and containing such information as the Director may reasonably require,

(15) provides assurances that State funds will be available to meet the portions of the cost of carrying out the plan which are not met by Federal funds, and

(16) provides such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement of and accounting of funds received under this Act.

(c) The Director shall approve any State plan which meets the requirements of subsection (b), but shall not finally disapprove any such plan, or any modification thereof, without affording the State agency reasonable notice and an opportunity for a hearing.

(d)(1) The Director shall review annually each of the State plans which he has approved, and the enforcement thereof, and shall certify that each such plan is administered so as to comply with the provisions of such plan and any assurances contained therein, and report such certification to the Congress in the annual report required under section 6(c).

(2) Whenever the Director finds, after affording due notice and opportunity for a hearing, that in the administration of the State plan there is a failure to comply substantially with any provision of the State plan (or any assurance contained therein), and such failure would result in the failure to meet the standards developed by the Director under section 7, he shall (A) notify the State agency of his withdrawal of approval of such plan and upon receipt of such notice such plan shall cease to be in effect, but the State may retain jurisdiction in any case commenced before the withdrawal of the plan in order to enforce standards under the plan whenever the issues involved do not relate to the reasons for the withdrawal of the plan; and (B) shall notify such State agency that no further payments will be made to the State under this Act (or in his discretion, that further payments to the State will be limited to programs or portions of the State plan not affected by such failure), until he is satisfied that there will no longer be any failure to comply. Until he is so satisfied, no further payments may be made to such State under this Act (or payment shall be limited to programs or portions of the State plan not affected by such failure). Any such failure of a State to comply with any provision of the State plan shall not in any way impede any youth

camp therein pending action by the Secretary under this section.

(e) The State may obtain a review of a decision of the Director withdrawing approval of or rejecting its plan by the United States court of appeals for the circuit in which the State is located by filing in such court within thirty days following receipt of notice of such decision a petition to modify or set aside in whole or in part the action of the Director. A copy of such petition shall forthwith be served upon the Director and thereupon the Director shall certify and file in the court the record upon which the decision complained of was issued as provided in section 2112 of title 28, United States Code. Unless the court finds that the Director's decision in rejecting a proposed State plan or withdrawing his approval of such plan is not supported by substantial evidence the court shall affirm the Director's decision. The judgment of the court shall be subject to review by the Supreme Court of the United States as provided in section 1254 of title 28, United States Code.

(f)(1) The Secretary, at the request of the Director, is authorized to make personnel from the Department of Health and Human Services who have the necessary expertise, available to States to assist in developing State plans, and in training State inspectors and other personnel associated with youth camps. The Director may call upon the expertise of organized camping groups for such assistance to Federal and State personnel.

(2) The Secretary, at the request of the Director, shall provide technical assistance and consultative services necessary to assist in the development and implementation of the plan.

GRANTS TO STATES

SEC. 9. (a) The Director shall make grants to the States—

(1) for the development of State youth camp safety plans in accordance with section 8;

(2) to carry out plans approved under section 8;

(3) to assist with plan initiation and training costs; and

(4) for the early operation and improvement of youth camp safety programs.

Any grant made under this section shall be based upon objective criteria which shall be established under regulations promulgated by the Secretary in order to insure equitable distribution. No such grant may exceed 80 per centum of the cost of developing and carrying out the State plan.

(b) Payments under this section may be made in installments and in advance or by way of reimbursement with necessary adjustments on account of underpayments or overpayments.

CONSULTATIVE SERVICES AND ENFORCEMENT

SEC. 10. (a) Upon the request of any youth camp operator or director, or during any inspection under section 11(a), the Director shall provide consultative services to youth camps in States which do not have in effect a State plan approved under section 8. No citations shall be issued nor shall any civil penalties (except penalties for repeated violations under section 12(b)) be proposed by the Director upon any inspection or visit at which consultative services are rendered, but if, during such inspection or visit, an apparent serious violation of the duty imposed by section 5, of any standard, rule, or order provided pursuant to section 7, or of any regulations prescribed pursuant to this Act is discovered, the Director shall issue a written notice to the youth camp operator describing with particularity the nature of the violation, and the action which must be taken within a reasonable period of time specified by the Director for the abatement of the violation. Where a youth camp operator fails to comply with the abatement instructions within the prescribed period, a citation may be issued as provided in subsection (b) or a civil penalty under section 12 may be assessed. Nothing in this subsection shall affect in any manner any provision of this Act the purpose of which is to eliminate imminent dangers.

(b) The Director shall issue regulations and procedures providing for citations to youth camp operators in States which do not have in effect a State plan approved under section 8 for any violation of the duty imposed by section 5, of any standard, rule or order promulgated pursuant to section 7, or of any regulations prescribed pursuant to this Act. Each citation shall fix a reasonable time for abatement of the violation. The Director may prescribe procedures for the issuance of a notice in lieu of a citation with respect to minor violations which have no direct or immediate or serious relationship to safety or health.

(c) The Director shall afford an opportunity for a hearing in accordance with section 554 of title 5, United States Code, to any youth camp operator issued a citation under procedures promulgated pursuant to subsection (b) or subject to penalties under section 12, or under any other procedure applying enforcement by the Director under this Act. Any youth camp operator adversely affected by the decision of the Director after such hearing may obtain a review of such decision in the United States court of appeals for the circuit in which the youth camp in question is located or in which the youth camp has its principal office by filing in such court within thirty days following receipt of notice of such decision a petition to modify or set aside in whole or in part such decision. A copy of the petition shall forthwith be served upon the Director, and thereupon the Director shall certify and file in the court the record upon which the decision complained of was issued as provided in section 2112 of title 28, United States Code. Such decision, if supported by substantial evidence, shall be affirmed by the court. The judgment of the court shall be subject to review by the Supreme Court of the United States, as provided in section 1254 of title 28, United States Code.

INSPECTIONS, INVESTIGATIONS, AND RECORDS

SEC. 11. (a) In order to carry out his duties under this Act, the Director may enter and inspect any youth camp and its records in States which do not have in effect a State plan approved under section 8, may question employees privately, and may investigate facts, conditions, practices, or matters to the extent he deems it necessary or appropriate. The Director shall inspect each such youth camp at least once a year during the period the camp is in operation.

(b) In making his inspections and investigations under this Act the Director may require the attendance and testimony of witnesses and the production of evidence under oath. Witnesses shall be paid the same fees and mileage that are paid witnesses in the courts of the United States. In case of a contumacy, failure, or refusal of any person to obey such an order, any district court of the United States, or the United States courts of any territory or possession, within the jurisdiction of which such person is found, or resides, or transacts business, upon the application by the Secretary, shall have jurisdiction to issue to such person an order requiring such person to appear to produce evidence if, as, and when so ordered, and to give testimony relating to the matter under investigation or in question, and any failure to obey such order of the court may be punished by said court as a contempt thereof.

(c) To determine the areas in which safety standards are necessary and to aid in promulgating meaningful regulations, camps subject to the provisions of this Act shall be required to report annually, on the date prescribed by the Director, all accidents resulting in death, injury, and serious illness, other than minor injuries which require only first aid treatment, and which do not require the services of a physician, or involve loss of consciousness, restriction of activity or motion, or premature termination of the camper's term at the camp. Camps operating solely within a State which have in effect a State plan approved under section 8 shall file their reports directly with that State, and the State shall promptly forward such reports on to the Director. All other camps shall file their reports directly with the Director. The Director shall compile the statistics reported and include summaries thereof in his annual report required under section 6(c).

(d) Any information obtained by the Director, or his authorized representative, under this Act shall be obtained with a minimum burden upon the youth camp operator and with full protection of the rights of youth camp staff members. Unnecessary duplication of efforts in obtaining information shall be reduced to the maximum extent feasible.

(e) A representative of the youth camp staff director and a representative authorized by the youth camp staff shall be given an opportunity to accompany the Director or his authorized representative during the inspection. Where there is no authorized youth camp staff representative, the Director shall consult with a reasonable number of youth camp staff members concerning the matters of health and safety.

PENALTIES

SEC. 12. (a) Any youth camp operator who fails to correct a violation for which a citation has been issued under section 10(b) or for which a notice has been issued under section 10(a) within the period permitted for its correction may be assessed a civil penalty of not more than $500 for each day during which such failure or violation continues, until the camp closes in its normal course of business.

(b) Any youth camp operator who willfully or repeatedly violates the requirements of section 5, or any standard, rule, or order promulgated pursuant to section 7, or of any regulations prescribed pursuant to this Act may be assessed a civil penalty of up to $1,000 for each day during which such violation continues, until the camp closes in its normal course of business.

(c) Civil penalties assessed under this Act shall be paid to the Director for deposit into the Treasury of the United States and shall accrue to the United States and may be recovered in a civil action in the name of the United States brought in the United States district court for the district in which the violation is alleged to have occurred or in which the operator has his principal office.

PROCEDURES TO COUNTERACT IMMINENT DANGERS

SEC. 13. (a) The United States district courts shall have jurisdiction, upon petition

of the Director, to restrain any conditions or practices in any youth camp, or in any place where camp activities are conducted in States which do not have in effect a State plan approved under section 8, which are such that a danger exists which could reasonably be expected to cause death or immediate serious physical harm or before the imminence of such danger can be eliminated through the enforcement procedures otherwise provided by this Act. Any order issued under this section may require such steps to be taken as may be necessary to avoid, correct, or remove such imminent danger and prohibit the presence of any individual in locations or under conditions where such imminent danger exists except individuals whose presence is necessary to avoid, correct, or remove such imminent danger.

(b) Upon the filing of any such petition, the district court shall have jurisdiction to grant such injunctive relief or temporary restraining order pending the outcome of an enforcement proceeding pursuant to this Act.

(c) Whenever and as soon as an inspector concludes that conditions or practices described in subsection (a) exist in any campsite or place of camp activity, he shall inform parents or guardians, camp owners, and camp supervisory personnel and shall assure that all affected campers are so informed of the danger and that he is recommending to the Director that relief be sought.

VARIANCES

SEC. 14. The Director, in States which do not have in effect a State plan approved under section 8, upon application by a youth camp operator showing extraordinary circumstances or undue hardship, and upon the determination by a field inspector, after inspection of the affected premises and facilities, that the conditions, practices, or activities proposed to be used are as safe and healthful as those which would prevail if the youth camp operator complied with the standard, may exempt such camp or activity from specific requirements of this Act, but the terms of such exemption shall require appropriate notice thereof to parents or other relatives of affected campers. Such notice shall be given at least annually. Nothing in this Act shall allow the operation of a substandard camp.

FEDERAL ADVISORY COUNCIL ON YOUTH CAMP SAFETY

SEC. 15. (a) The Secretary shall establish in the Department of Health and Human Services a Federal Advisory Council on Youth Camp Safety to advise and consult on policy matters relating to youth camp safety, particularly the promulgation of youth camp safety standards. The Council shall consist of the Director, who shall be chairman, and sixteen members appointed by the Secretary, without regard to the civil service laws, from persons who are specially qualified by experience and competence to render such service, of which there shall be—

(1) one member each from the Department of the Interior, the Department of Health and Human Services, the Department of Agriculture and the Department of Labor;

(2) eight members from appropriate associations representing organized camping;

(3) three members from the general public who have a special interest in youth camps; and

(4) one member from a private nonprofit organization operating a camp for special populations.

(b) The Director may appoint such special advisory and technical experts and consultants as may be necessary in carrying out the functions of the Council.

(c) Members of the Advisory Council, while serving on business of the Advisory Council, shall receive compensation at a rate to be fixed by the Director but not exceeding $100 per day; including traveltime; and while so serving away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

ADMINISTRATION AND AUDIT

SEC. 16. (a) The Director is authorized to request directly from any department or agency of the Federal Government information, suggestions, estimates, and statistics needed to carry out his functions under this Act; and such department or agency is authorized to furnish such information, suggestions, estimates, and statistics directly to the Director.

(b) The Director shall prepare and submit to the President for transmittal to the Congress at least once in each fiscal year a comprehensive and detailed report on the administration of this Act.

(c) The Director and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of States receiving assistance under this Act.

NONINTERFERENCE

SEC. 17. (a) Nothing in this Act or regulations issued hereunder shall authorize the Director, a State agency, or any official acting under this Act, to prescribe, determine, or influence the curriculum, admissions policy, program, or ministry of any youth camp.

(b) Nothing in this Act or regulations issued hereunder shall be construed to control, limit, or interfere with either the religious affiliation of any camp, camper, or camp staff member, or the free exercise of religion of any youth camp which is operated by a church, association, or convention of churches, or their agencies.

(c) Nothing in this Act or regulations issued hereunder shall authorize the Director, a State agency, or any official acting under this Act, to require or authorize medical treatment for a person who objects (or, in the case of a child, whose parent or guardian objects) thereto on religious grounds; nor shall examination or immunization of such person be authorized or required except during an epidemic or threat of an epidemic of a contagious disease.

AUTHORIZATION

SEC. 18. There are authorized to be appropriated $7,500,000 for the fiscal year 1984, and for each of the four succeeding fiscal years, to carry out the provisions of this Act.

EFFECT ON EXISTING LAWS

SEC. 19. (a) Nothing in this Act shall be construed to supersede or to enlarge or diminish or affect in any other manner the common law or statutory rights, duties, or liabilities of youth camp operators and campers under any law with respect to injuries, diseases, or death of campers arising out of, or in the course of, participation in youth camp activities covered by this Act.

(b) Notwithstanding the provisions of this Act, no State law which provides youth camp health and safety standards equal to or superior to standards promulgated under the provisions of this Act shall be superseded by the provisions of this Act.

By Mr. GRASSLEY (for himself, Mr. THURMOND, Mr. DECONCINI, Mr. HEFLIN, Mr. JEPSEN, Mr. KASTEN, Mr. RANDOLPH, Mr. DOMENICI, Mr. HUDDLESTON, Mr. WARNER, Mr. DENTON, and Mr. DOLE):

S. 1240. A bill to strengthen law enforcement in the areas of child exploitation and pornography and to increase the criminal penalties in such areas, and for other purposes; to the Committee on the Judiciary.

LEGISLATION TO BAN CHILD PORNOGRAPHY

● Mr. GRASSLEY. Mr. President, I am introducing legislation, together with Senator STROM THURMOND, Senator JEREMIAH DENTON, Senator HEFLIN, Senator DOLE, and Senators DECONCINI, JEPSEN, KASTEN, RANDOLPH, DOMENICI, HUDDLESTON, and WARNER, in recognition of the Supreme Court's decision in the case of *New York* v. *Ferber*, ——— U.S. ———, 102 S.Ct. 3348 (1982). In that decision, the U.S. Supreme Court unanimously held that Federal and State governments may act to outlaw distribution of all child pornography, not simply that which is technically obscene. I note for the record that the legislation I introduce today is nearly identical to an amendment that was passed last October to the Violent Crime and Drug Enforcement Act of 1982.

Current Federal law prohibits the use of children in pornographic depictions only if the materials meet the difficult and confusing standard of legal obscenity. Last July, the Supreme Court decided that where our children are involved, the regulation of pornography need not comport with the legal definition of obscenity. Hence, this amendment would remove the requirement of legal obscenity from child pornography statutes. This ultimately makes it easier to prosecute offenders and protect our children.

In Ferber, the Court held that the obscenity standard developed in Miller against California, does not apply to a photographic or other depiction of children actually engaging in sexually explicit conduct. Abandoning the Miller standard of child pornography was predicated upon the Court's recognition that a State has a compelling interest in protecting the physical and psychological well-being of minors. The Court held that child pornography constitutes a category of material—like obscenity—which is outside the protection of the first amendment.

Specifically, in addition to eliminating the requirement that child pornography statutes comport with the technical definition of obscenity, I am removing the commerical-purpose limitation of this provision. Utilization of

the applicable statute, 18 U.S.C. 2252, by enforcement officers has been limited by the fact that the statute covers the distribution of child pornography materials only for commercial purposes.

However, many of the individuals who distribute materials covered by the statute do so by trade or exchange without any commercial purpose. It 18 U.S.C. 2252 is to be rendered more useful as a prosecutorial vehicle, the words "for the purpose of sale or distribution for sale" should be deleted from subsections (a)(1) and (a)(2), and the words "for sale" should be deleted from subsection (a)(2) following the words "knowingly sells or distributes." Additionally, we are striking the "pecuniary profit" provision from section 2253 of title 18, section 3.

A critical feature of any new legislation must be the recognition that only through effective economic deterrents can the business of child pornography be effectively suppressed. Imposition of significantly higher fines is a crucial element of any campaign against networks of child pornography and it is for that reason that this legislation provides for considerably higher fines.

Finally, this legislation will raise the age limit from its current status of 16 to the age of 18 for children to be protected by the act. In an arena like that of child pornography traffic, which is riddled with seduction, coercion and blackmail, children should be protected through their normal minority. Such a change would hardly be radical when 17 States currently define "children" in this context as persons under 18.

No discussion of this amendment would be complete without noting how harmful the use of children in pornographic materials is to the physiological, emotional, and mental health of the child. It should be noted that because the child's actions are reduced to a recording, there is a permanent record of the child's participation and the harm to the child is intensified by circulation.

According to one study by the Academy of Child Psychiatry, sexually exploited children are unable to develop healthy affectionate relationships in later life, have sexual dysfunctions, and tend to become sexual abusers as adults. Another report by the Illinois Legislative Investigatory Commission emphasizes that sexual molestation by adults is often involved in the production of child sexual performances. Justiced O'Connor, in her concurring opinion, summed up the motive behind the decision when she wrote that:

A 12-year-old child photographed while masturbating surely suffers the same psychological harm whether the community labels the photograph "edifying" or "tasteless". The audience's appreciation of the depiction is simply irrelevant to New York's asserted interest in protecting children from psychological, emotional, and mental harm.

Mr. President, at stake is the emotional and physical health of minors. We must protect our children. I urge all of my colleagues to support this legislation.

I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1240

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Child Protection Act of 1983.".

SEC. 2. (a) Section 2252 of title 18, United States Code, is amended—

(1) in subsection (a)(1) by striking out ", for the purpose of sale or distribution for sale, any obscene" and inserting in lieu thereof "any";

(2) in subsection (a)(1)(B) by striking out "such visual or print medium depicts such conduct; or" and inserting in lieu thereof "such visual or print medium visually depicts such conduct or such visual or print medium is obscene and depicts such conduct; or";

(3) in subsection (a)(2) by striking out "for the purpose of sale or distribution for sale, or knowingly sells or distributes for sale, any obscene" and inserting in lieu thereof "; sells, or distributes any"; and

(4) in subsection (a)(2)(B) by striking out "such visual or print medium depicts such conduct;" and inserting in lieu thereof "such visual or print medium visually depicts such conduct or such visual or print medium is obscene and depicts such conduct;".

(b) Subsection (b) of section 2252 of such title is amended to read as follows:

"(b) Any individual who violates this section shall be fined not more than $250,000, or imprisoned not more than 20 years, or both. If such individual has a prior conviction under this section, such individual shall, in addition to the fine provided in the preceding sentence, be imprisoned not less than four years nor more than thirty. Any organization which violates this section shall be fined not more than $500,000.".

(c) Section 2253(1) of such title is amended by striking out "sixteen" and inserting in lieu thereof "eighteen".

(d) Section 2253(3) of such title is amended by striking out ", for pecuniary profit".●

By Mr. MELCHER.

S. 1241. A bill to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes; to the Select Committee on Indian Affairs.

INDIAN HOUSING ACT OF 1983

● Mr. MELCHER. Mr. President, I ask unanimous consent that my bill cited as the "Indian Housing Act of 1983" be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1241

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Indian Housing Act of 1983".

FINDINGS AND POLICY

SEC. 2. (a) The Congress finds, based upon the Federal Government's historical and special legal relationship with, and resulting responsibility to, American Indian people that—

(1) the goal of decent, safe, and sanitary housing has not been realized for many Indian families and elderly residing on Indian reservations and in Indian communities;

(2) nearly 40 per centum of all Indian housing is in substandard condition as compared with a national figure of 12 per centum;

(3) this situation is of grave concern; and

(4) special efforts are needed to mobilize public and private resources for the realization of this goal.

(b) It is declared to be the policy of the United States to provide grants, financing, and loan guarantees to assist Indians in obtaining decent, safe, and sanitary housing.

DEFINITIONS

SEC. 3. For the purpose of this Act, the term—

(1) "adjusted family income" means gross family income less $1,000 for each member of the household, plus a further deduction of $3,400 or the amount of itemized deductions from the family's current Federal income tax return, whichever is higher;

(2) "amortization payment" means that payment which would be the equivalent of the level monthly amount needed to amortize the capital cost of a house over the term of a housing assistance contract for twenty-five years at the Federal Housing Administration mortgage rate in effect on the date of the execution of a project agreement;

(3) "family" means one or more persons maintaining a household. The tribal housing agency shall determine which adult members of a family will be required to execute a housing assistance contract;

(4) "housing assistance contract" means the executed agreement between the tribal housing agency and an eligible family which specifies the terms, conditions, rights, and responsibilities of the parties;

(5) "Indian" means a person who is a member of an Indian tribe or who is an Indian as defined in section 19 of the Act of June 18, 1934 (48 Stat. 988; 25 U.S.C. 479);

(6) "mortgage" means a mortgage, deed of trust, or any other instrument establishing a lien on real property;

(7) "project" means the entire undertaking to provide housing under a project agreement, including the minimum number of housing units to be developed or rehabilitated with funds allocated under such agreement;

(8) "Secretary" means the Secretary of the Interior; and

(9) "standard housing" means a dwelling in a condition which is decent, safe, and sanitary so that it at least meets the following minimums—

(i) general construction conforms to applicable standards for the region;

(ii) the heating system has the capacity to maintain a minimum temperature of sixty-five degrees Fahrenheit in the dwelling during the coldest weather in the region. It must be safe to operate and maintain and deliver a uniform distribution of heat. Applicable tribal heating codes are to be followed or, if there are no applicable tribal

codes, county, State, or national codes shall be used as a guide;

(iii) the plumbing system includes a properly installed system of piping. Fixtures consist of a kitchen sink and a partitional bathroom with lavatory, toilet, and bath or shower. The water supply, plumbing, and sewage disposal systems meet applicable tribal codes, or if there are no applicable tribal codes, the minimum standards of the Indian Health Service, county, or State, whichever is applicable;

(iv) the electrical system includes wiring and equipment properly installed to safely supply electrical energy for adequate lighting and for operation of appliances and meets applicable tribal codes. If there are no applicable tribal codes, county, State, or national codes shall be used as a guide; and

(v) family size per dwelling is not less than—

(I) five hundred and seventy square feet for a family of up to four members;

(II) eight hundred and fifty square feet for a family of five to seven members; and

(III) one thousand and twenty square feet for a family of eight or more members;

except that the Secretary, upon the request of a tribe or tribal housing agency, may, in appropriate circumstances, waive the minimum size standards established by this subparagraph;

(10) "tribal housing agency" means that entity or administrative unit of the tribal government which has been designated or established by the tribe to administer housing programs under this Act;

(11) "tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined or established pursuant to the Alaska Native Claims Settlement Act (86 Stat. 688) which is recognized as eligible for the special programs and services provided by the Bureau of Indian Affairs to Indians because of their status as Indians; and

(12) "trust land" means land title to which is held by the United States for the benefit of an Indian or Indian tribe or title to which is held by an Indian or Indian tribe subject to a restriction against alienation imposed by the United States.

TITLE I—INDIAN HOUSING IMPROVEMENT PROGRAM

BASIC AUTHORITY

SEC. 101. (a) There is hereby established an Indian housing improvement program for the purpose of making grants or providing assistance to preserve existing housing, make repairs, and construct or acquire standard housing for Indians.

(b) The Secretary is authorized, upon application of an Indian tribe or individual, to make grants or provide assistance to assist Indian families who are not eligible for housing assistance under titles II and III of this Act because of low income or extremely isolated circumstances.

(c) The Secretary shall assure that grants or assistance provided under this title shall be consistent with plans and priorities established by tribes and shall, upon the request of the appropriate tribe or tribal housing agency, make such grants or assistance available through agreements with the tribe or tribal housing agency. In the absence of such an agreement, the Secretary may—

(1) make, with appropriate safeguards, direct grants to individual Indians;

(2) contract with private construction firms pursuant to standard Federal contracting procedures, except that the Act of April 30, 1908 (35 Stat. 71; 25 U.S.C. 47), as amended, shall apply unless the concerned tribe requests, through formal action, that the applicability of the Act be waived on a specific procurement action; or

(3) have repairs or new construction performed directly by the Bureau of Indian Affairs.

(d) With respect to assistance provided under agreements entered into pursuant to subsection (c) of this section, a tribe or tribal housing agency, in its discretion, may require an assisted family to make a monthly payment not to exceed the administrative charge established for such tribe or tribal housing agency pursuant to section 210 of this Act or, if no such amount has been approved, an amount satisfactory to the Secretary. Receipts from such payments shall be used solely for housing-related activities of such tribe.

ELIGIBLE ACTIVITIES

SEC. 102. (a) Grants or assistance may be provided under this title to—

(1) finance minor repairs and additions to existing substandard housing to improve safety and sanitary conditions until such time as standard housing assistance can be made available to such family;

(2) finance major repair, renovations, or enlargement of existing dwellings that are structurally sound, but deteriorated, and which can be economically placed in standard condition; and

(3) finance the construction or acquisition of new standard housing where severe need is demonstrated and it is established that there is no reasonable prospect that standard housing can be financed from other sources.

(b) Appropriate insurance shall be required on housing constructed, acquired, or improved under subsection (a) (2) or (3) of this section, unless waived by the Secretary.

RESERVATION OF INTEREST

SEC. 103. (a) Where a house constructed, acquired, or repaired pursuant to section 102(a) (2) or (3) of this title is located on trust land, the Secretary shall not approve the sale or lease of individual trust land or lease of tribal trust land, as the case may be, unless the provisions of section 104 of this title have been met.

(b) Where a house constructed, acquired, or repaired pursuant to section 102(a) (2) or (3) of this title is located on fee land, the Secretary shall insure that a lien upon such land is recorded under appropriate State law, noting the encumbrance imposed by section 104 of this title.

SALE OF PROPERTY

SEC. 104. Any house constructed, acquired, or repaired pursuant to section 102(a) (2) or (3) of this title may be sold, except that the sale price shall not be less than the value of the assistance provided pursuant to section 102 reduced 5 per centum per year for twenty years. The amount of the minimum sale price shall be reimbursed to the United States and shall be credited to the appropriation authorized by section 105 of this title. Any amount in excess of such minimum sale price shall be the property of the assisted Indian family. Where such house is located on tribal trust land, the tribe shall have the right of first refusal on the sale of such house.

AUTHORIZATION

SEC. 105. There are authorized to be appropriated for the purpose of this title not to exceed $30,000,000 in fiscal year 1984, not to exceed $40,000,000 in fiscal years 1985 and 1986, and not to exceed $50,000,000 in fiscal year 1987.

TITLE II—INDIAN HOUSING FINANCE FUND

ESTABLISHMENT

SEC. 201. There is established an Indian housing finance fund (hereinafter referred to as the "fund") for the purpose of providing financing to Indian tribes for the construction, acquisition, or rehabilitation of standard housing for Indian families who are unable to obtain financing from other sources on reasonable terms and conditions and who are not eligible for assistance under title III of this Act, but who can meet the minimum monthly payment required by this title.

TRIBAL HOUSING PLAN

SEC. 202. As a prerequisite for eligibility for financing from the fund, a tribe must prepare and submit to the Secretary for approval a tribal housing plan. Such plan, at a minimum, shall include an inventory of existing housing; an assessment of housing needs; a proposed tribal administrative structure to implement a housing program; an assessment of the tribe's capacity to administer such program; and a projection of how the tribe intends to meet its housing needs over a multiyear period.

APPLICATIONS

SEC. 203. (a) Applications for financing from the fund shall be submitted to the Secretary and shall specify the number of housing units to be developed and methods of production and development; shall include preliminary drawings and specifications; and shall otherwise be consistent with the approved tribal housing plan.

(b) Applications for funding shall be evaluated and approved, subject to the availability of appropriations, based upon, but not limited to, the following criteria—

(1) a priority for those tribes which have not received financing from the fund in prior fiscal years;

(2) a determination of the administrative, management, and accounting capability of the tribe to implement the proposed housing project;

(3) a determination of the percentage of tribal housing units in a substandard condition;

(4) the housing needs of such tribes as contained in the biennial housing inventory required by section 405 of this Act; and

(5) a determination by the Secretary that there is a reasonable prospect of repayment.

(c) The application shall include a tribal ordinance or other evidence of action of the governing body of the tribe designating or establishing a tribal housing agency (hereinafter referred to as the "agency") which shall be responsible for implementing the project agreement.

(d) Nothing herein shall preclude the submission and approval of multitribal applications and the Secretary shall encourage, but shall not require, multitribal applications to achieve economy of scale in housing projects.

PROJECT AGREEMENT

SEC. 204. Upon approval of an application, the Secretary and the agency shall enter into a project agreement which shall specify the amount of funds to be made available, the minimum number of housing units to be developed with such funds, the production method, and such other terms and condi-

tions as may be reasonable and consistent with the provisions of this title.

ADMINISTRATIVE AND FUNDING PROVISIONS

SEC. 205. (a) The project agreement shall set forth the administrative and judicial authorities, forums, procedures, remedies, and sanctions that the tribe or tribal housing agency will employ to insure collections of monthly payments and the deposit of residual receipts as required by section 211 of this title. It shall also contain a provision that the tribe specifically agree that—

(1) it shall require any Indian family executing a housing assistance contract to authorize the Secretary, on his own motion or at the request of the agency, to attach unobligated trust funds of the adult members of such family for a failure to meet the obligations incurred in such contract; and

(2) its unobligated tribal trust funds may be subject to attachment for failure to meet the requirements of section 211 only as provided in subsection (b) of this section.

Notwithstanding any other provision of law, Indian trust funds shall be subject to attachment as provided in this section. Funds attached under this section shall be paid into the fund as residual receipts.

(b) Tribal trust funds shall be subject to attachment only when (1) its tribal housing agency has failed to meet the financial obligations imposed under section 211 of this title; (2) the Secretary has reasonably exhausted all other available remedies to satisfy the default; and (3) the Secretary has made a specific finding that the tribe has not acted in good faith in carrying out the undertaking as required in subsection (a) of this section.

(c) Prior to the attachment of any trust funds as provided in this section, the Secretary shall provide the tribe or Indian family, as the case may be, with written notice of his intent. Within sixty days of such notice, the tribe or Indian family shall be entitled to (1) pay the amount in default; (2) negotiate a repayment schedule satisfactory to the Secretary; or (3) institute such administrative appeals or judicial actions as may otherwise be authorized.

(d) The Secretary may not refuse assistance under this title on the basis that a tribe or Indian family has no trust funds to their credit.

DISBURSEMENTS

SEC. 206. (a) An initial disbursement may be made from the fund, under a project agreement, to cover costs incurred by the agency for preliminary planning and administration. The initial disbursement shall not exceed $50,000 or 3 per centum of the total funding of the project, whichever is greater. Further disbursements under the project agreement shall be made by the Secretary to the contractor or developer based upon the percentage of completion of the project as specified in the project agreement and as determined pursuant to the plans and specifications approved under section 207 of this title. Percentage of completion of a project shall be certified jointly by the agency and a person designated by the Secretary who shall have no financial or tribal interest in the project.

(b) A jointly conducted final inspection and certification of completion of the project shall be made by the designee of the Secretary, the agency, the contractor, or developer, and, where appropriate, the Indian Health Service.

(c) All moneys disbursed from the fund shall be maintained by the agency in an account separate from all other funds of the tribe or the agency and shall be accounted for as provided in the project agreement.

(d) All housing units provided for in the project agreement shall be placed under construction or acquisition contracts within one year of the execution of the project agreement, except that, where the Secretary determines that the inability of the agency to place units under contract is due to circumstances beyond the control of the agency, he may extend the period for an additional ninety days. Funds for units not placed under contract within such time shall be returned to the fund or such amount shall be deducted from approved allocations from the fund for such tribe in subsequent years.

SUBMISSION OF FINAL PLANS AND SPECIFICATIONS

SEC. 207. Within one hundred and twenty days of the initial disbursement of funds as provided in section 206, the agency shall submit to the Secretary the final plans and specifications for housing units to be developed under the project agreement. Such plans and specifications shall include a phased construction schedule necessary to facilitate periodic disbursements from the fund as provided in section 206. The Secretary shall approve such plans and specifications if they meet the standard housing criteria as defined in section 3(9) of this Act and are otherwise consistent with the project agreement. The Secretary shall encourage the development of plans and specifications that reasonably promote the conservation and efficient use of energy in housing constructed under the project agreement.

SITE ACQUISITION

SEC. 208. (a) Prior to the construction or acquisition of any housing units under a project agreement, the agency shall secure either a fee title to, or a lease of, such lands as may be necessary for the construction or acquisition of such units.

(b) Where the housing site is upon tribal or individual trust land, the agency shall secure, without cost to itself, a twenty-five year lease with option to renew for not to exceed an additional twenty-five years. Where the housing site is on fee land, the agency shall require, without cost to itself, the transfer of the fee title to such lands.

(c) Where the Secretary determines that no suitable lands are available to the tribe for construction of housing, he may authorize the use of project funds to purchase land for the tribe. Such land purchase cost shall be a part of the total project cost.

HOUSING ASSISTANCE CONTRACT PROVISIONS

SEC. 209. (a) An eligible Indian family shall make application for housing assistance to the agency. Upon approval of the application by the agency, the family and the agency shall enter into a housing assistance contract (hereinafter referred to as the "contract") in which the agency shall agree to construct or acquire a standard housing unit or rehabilitate an existing house to standard condition for such family upon lands to be provided by the family or the tribe.

(b) The family shall agree in such contract that it shall—

(1) at no cost to the agency, lease or transfer its trust or fee lands on which such housing is to be built, if required by the agency;

(2) make monthly payments to the agency in the amount of 20 per centum of the adjusted family income, except that (A) the adjusted family income shall be reviewed at least biennially during the twenty-five year period of the contract and the monthly payment shall be adjusted upward or downward as indicated, except that upward adjustments in any one year may not exceed 50 per centum of the prior payment, and (B) such monthly payment shall be not more than the amortization payment and not less than the minimum payment established in section 210 of this title;

(3) accept responsibility for all utilities and maintenance; and

(4) subject the trust funds of its adult members to attachment as provided in section 205 of this title.

(c) Where the housing site is located on the trust or fee lands of the family which has fully met its obligations under the housing assistance contract, at the end of twenty-five years, the land will revert to its former status and the agency will transfer full ownership of the house to the family. Where the housing site is located on tribal lands and the family has fully met its obligations under the housing assistance contract, the lands will revert to their former status and the agency will transfer ownership of the house to the family, except that the tribe may not deny the family the continued use of the landsite unless the Secretary, the tribe, and the family negotiate for the tribal purchase of the house for an amount not less than the fair market value of such house.

MINIMUM PAYMENT

SEC. 210. The project agreement shall provide for a minimum monthly payment to be made by families receiving assistance under this title. Such minimum monthly payment shall be composed of—

(1) an administrative charge which shall be in an amount deemed sufficient by the Secretary to enable the agency to perform the administrative functions required by this Act;

(2) a premium for insurance; and

(3) an amount deemed reasonable by the Secretary as a contingency reserve for maintenance. Such amounts shall be deposited by the agency into an interest-bearing account as a reserve for maintenance which may be used, principal and interest, as provided in section 214 of this title.

The minimum payment shall be reviewed annually and may, subject to the approval of the Secretary, be adjusted upward or downward as warranted.

RESIDUAL RECEIPTS

SEC. 211. (a) The project agreement shall require the agency to establish an account for residual receipts. Residual receipts shall be the amount of the monthly payments collected by the agency less the minimum payment to be retained by the agency as provided in section 209.

(b) Residual receipts shall be deposited by the agency in the fund annually on a fiscal year basis. The agency shall, on a quarterly basis, certify to the Secretary the collection and deposit of the required monthly payments in the agency's residual receipt account. Initial residual receipts due the fund are those that are the result of monthly payments established by the agency and which have been certified by an independent audit or agreed to by the Secretary in the project agreement. Thereafter, residual receipts due to the fund shall be in accordance with amounts established by an annual independent audit of the adjusted family incomes of the participating families.

(c) Residual receipts due the fund from an agency shall not fall below 90 per centum of the amount due based upon an amount established by the annual independent audit as required by subsection (b). Within ten days after a determination of a default by an agency in its annual payment of residual receipts to the fund or a failure to make a quarterly certification of collection and deposit of receipts in its residual receipts account, the Secretary shall notify the tribe and the agency in writing of such determination. The tribe or the agency shall have thirty days within which to satisfy the default. Upon a failure of the tribe or agency to do so, the Secretary may—

(1) declare such tribe to be ineligible for further housing assistance from the fund;

(2) take any other action to satisfy the default as may be otherwise authorized by law; or

(3) attach tribal or appropriate individual trust funds as provided and authorized in section 205 of this title, except that the Secretary may exercise this authority only after all other reasonable action has been exhausted.

MONITORING AND INSPECTION

SEC. 212. (a) The agency shall be responsible for the implementation of monitoring and construction inspection procedures necessary to assure the Secretary of satisfactory quality control and fund utilization, including compliance with the minimum housing standards and the approved drawings and specifications of a project. When the Secretary determines that the monitoring and inspection procedures are not adequate, he shall initiate action to assure implementation of such procedures by the agency as a requirement for continuation of the project.

(b) The technical staff of the Indian Health Service within the Department of Health and Human Services shall, in the course of fulfilling its existing responsibilities in providing sanitation facilities to Indian housing, be responsible for the surveillance of the construction, inspection, and monitoring procedures of the agency. The Indian Health Service shall provide recommendations to the agency and the Secretary as to the adequacy of the construction inspection procedures of the agency to assure compliance with the minimum housing standards and the approved plans and specifications.

BONDING REQUIREMENTS

SEC. 213. (a) Tribal and agency officials and employees who are responsible for the receipt and disbursement of funds under this title shall be bonded in amounts satisfactory to the Secretary. No such disbursement shall be made until a bond satisfactory to the Secretary is obtained.

(b) The agency shall require performance bonds from its contractors except for those projects where settlement is on the basis of turnkey construction.

(c) The agency shall also require irrevocable letters of credit, mechanics' and workmen's lien bonds and warranty maintenance bonds or cash equivalents from its contractors in amounts satisfactory to the Secretary.

MAINTENANCE AND UTILITIES

SEC. 214. Maintenance and cost of utilities for the house shall be the responsibility of the participating family. Upon the failure of a family to perform adequate maintenance to the extent necessary to prevent health hazards or preserve the capital value of the unit, the agency shall use the reserve for maintenance established by section 210 of this title to correct any deficiencies. At the end of the contract period, the amount remaining in the maintenance reserve account to the credit of the family, excluding any accrued interest, shall become the property of the family.

AWARD OF CONTRACTS

SEC. 215. All contracts under this title shall be awarded in accordance with procedures satisfactory to the Secretary and shall result in the judicious use of Federal funds. Section 7(b) of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450e) shall apply to all contracts, subcontracts, and employment opportunities supported by funding under this title, except that a tribe may, by formal action of its governing body, waive the applicability of section 7(b) in specific cases.

SALE OF HOUSING

SEC. 216. A family may, subject to the approval of the Secretary and the agency, sell or purchase a house constructed, acquired, or rehabilitated with funds under a project agreement. The minimum sale or purchase price of the house shall be the amount of the principal remaining on the amortization schedule for such house, except that, where a family has a deficit in its reserve for maintenance account, such minimum sale or purchase price shall be increased by that amount. The minimum sale or purchase price shall be reimbursed to the fund and any amount in excess of the minimum sale price shall be the property of the family.

ASSIGNMENTS

SEC. 217. (a) The contractual interest of a family in housing constructed, acquired, or rehabilitated with moneys provided from the fund may be inherited or assigned if the heirs, devisees, or assignees agree to assume the responsibilities and obligations under the original contract, and if any assignee of such interest is otherwise eligible for assistance under this title.

(b) Abandoned houses shall revert to the agency and shall be available to another eligible family under a new housing assistance contract.

DOWNPAYMENT ASSISTANCE

SEC. 218. Tribal housing agencies may use funds made available under a project agreement, if the agreement so provides, to assist Indian families in making a downpayment, including closing costs, on standard housing to be financed through other sources of credit. The family shall be obligated to repay such amount, with or without interest, over a period of not to exceed ten years. Exclusive of closing costs, assistance provided under this section shall not be in excess of 10 per centum of the purchase price of the house.

CREDIT ELSEWHERE

SEC. 219. If an agency, in establishing the adjusted family income of an applicant family, determines that the income of such family is sufficient to support the payment of a reasonable economic rent, the agency shall require such family to provide evidence that at least two lending institutions in the area making home mortgage loans have rejected loan applications submitted by such family before the family is eligible for housing assistance under this title.

RENTAL HOUSING

SEC. 220. Funds made available under this title may, as provided in a project agreement, be used to construct rental housing, except that—

(1) the tribe shall require monthly rental payments from eligible Indian families as determined by section 209 except that the maximum monthly payment shall be an amount agreed upon by the Secretary and the agency;

(2) a minimum monthly rental payment shall be established as provided in section 210 and the tribe shall be responsible for the payment of residual receipts as provided in section 211;

(3) the tribe shall be responsible for the payment of utilities and maintenance costs; and

(4) all other appropriate provisions of this title shall be applicable to such rental housing projects.

AUTHORIZATION

SEC. 221. There are authorized to be appropriated for the purpose of carrying out the provisions of this title $100,000,000 in fiscal year 1984; $200,000,000 in fiscal year 1985; and for fiscal years 1986 and 1987, such sums as may be necessary which, when added to the total residual receipts and other deposits paid into the fund during the preceding fiscal year, will restore the balance in the fund to $250,000,000 at the beginning of each fiscal year.

TITLE III—INDIAN HOUSING LOAN GUARANTEE FUND

ESTABLISHMENT OF FUND

SEC. 301. In order to provide access to sources of private financing for Indian families who otherwise would not be eligible for housing credit because of Federal laws restricting mortgage or other encumbrance of trust land, there is established an Indian housing loan guarantee fund (hereinafter referred to as the "guarantee fund") which shall be available as provided in section 311 of this title.

GUARANTEE AUTHORITY

SEC. 302. The Secretary is authorized to guarantee not to exceed 100 per centum of the unpaid principal and interest due on any loan made to an Indian for the acquisition or construction of a standard house on trust land. Such loans may be secured by any collateral authorized by law.

INTEREST RATE

SEC. 303. Loans guaranteed pursuant to this title shall bear interest (exclusive of premium charges for guarantee and service charges, if any) at a rate agreed upon by the borrower and the lender and determined by the Secretary to be reasonable, but which is not more than that being charged in the area by lenders for home mortgage loans without a guarantee or insurance by a Federal agency or instrumentality.

PREMIUM CHARGES

SEC. 304. The Secretary shall fix such premium charges for the guarantee of loans as are in his judgment adequate to cover expenses and probable losses, and shall deposit receipts for such charges in the guarantee fund.

APPLICATION

SEC. 305. The application for a loan to be guaranteed hereunder shall be submitted to the Secretary for prior approval. Upon approval, the Secretary shall issue a certificate as evidence of the guarantee. Such certificate shall be issued only when the Secretary determines there is a reasonable prospect of repayment.

SALE OR ASSIGNMENT OF LOANS

SEC. 306. Any loan guaranteed hereunder, including the security given therefore, may be sold or assigned by the lender to any financial institution subject to examination

and supervision by an agency of the United States or of any State or the District of Columbia.

LIMITATIONS ON LOANS

SEC. 307. Any loans guaranteed hereunder shall be restricted to those made by a financial institution subject to examination and supervision by an agency of the United States, a State, or the District of Columbia and shall meet the following requirements:

(1) the maturity of any loan guaranteed hereunder shall not exceed thirty-three years;

(2) loans guaranteed hereunder may be made by any lender satisfactory to the Secretary except loans insured or guaranteed by an agency or instrumentality of the Federal Government or made by an organization of Indians from funds borrowed from the United States shall not be eligible for guarantee hereunder;

(3) the liability under the guarantee shall decrease or increase pro rata with any decrease or increase in the unpaid portion of the obligation pursuant to the provisions of the loan agreement; and

(4) any loan made by any national bank or Federal savings and loan association or savings bank, or by any insurance company authorized to do business in the District of Columbia, at least 20 per centum of which is guaranteed hereunder, may be made without regard to the limitations and restrictions of any other Federal statute with respect to (A) ratio of amount of loan to value of property; (B) requirement of mortgage or other security; (C) maturity of loans; (D) priority of lien; or (E) percentage of assets which may be invested in real estate loans.

REGULATORY AUTHORITY

SEC. 308. Whenever the Secretary finds that any lender or holder of a guarantee certificate fails to maintain adequate accounting records or to demonstrate proper ability to service adequately loans guaranteed or to exercise proper credit judgment, or has willfully or negligently engaged in practices otherwise detrimental to the interests of a borrower or the United States, the Secretary may refuse, either temporarily or permanently, to guarantee any further loans made by such lender or holder, and may bar such lender or holder from acquiring additional loans guaranteed hereunder. The Secretary shall not refuse to pay a valid guarantee on loans previously made in good faith.

DEFAULT PROCEEDINGS

SEC. 309. (a) In the event of a default on a loan guaranteed hereunder, the lender holding the guarantee certificate must notify the Secretary of the default in writing and may thereupon proceed under either of the following methods for obtaining payment under the guarantee—

(1) the lender may initiate foreclosure proceedings in a court of competent jurisdiction after providing prior written notice of such action to the Secretary and upon a final order authorizing foreclosure by such a court and upon submission to the Secretary of a claim for payment under the guarantee, the Secretary shall pay to such holder the full pro rata portion of the amount guaranteed plus reasonable fees and expenses as approved by the Secretary and the Secretary shall be subrogated to the rights of the holder of the guarantee and receive an assignment of the obligation and security; or

(2) without seeking a judicial foreclosure or in the event that a foreclosure proceeding initiated by or on behalf of the lender as authorized under paragraph (1) above continues for a period in excess of one year, the lender may submit a claim for payment under the guarantee, except that the Secretary shall only pay to such holder for a loss on any one loan an amount equal to 95 per centum of the pro rata portion of the amount guaranteed, and the Secretary shall be subrogated to the rights of the holder of the guarantee and receive an assignment of the obligation and security.

(b) Upon receipt from the lender of a notice of default, the Secretary may, in his sole discretion, accept assignment of such loan if such action is determined by the Secretary to be in the best interest of the United States and shall thereupon pay to the holder the pro rata portion of the amount guaranteed and shall be subrogated to the rights of the holder of the guarantee and receive an assignment of the obligation and security.

(c) Before any reimbursement is made under subsection (a), all reasonable collection efforts shall have been exhausted by the lender. Upon reimbursement, in whole or in part, to the lender, the note or judgment evidencing the debt shall be assigned to the United States and the lender shall have no further claim against the borrower or the United States. The Secretary shall then take such further collection actions as may be warranted.

CONCLUSIVENESS

SEC. 310. Any evidence of guarantee issued by the Secretary shall be conclusive evidence of the eligibility of the loan for guarantee under the provisions of this title and the amount of such guarantee. Such evidence shall be incontestable in the hands of the bearer and the full faith and credit of the United States is pledged to the payment of all amounts agreed to be paid by the Secretary as security for such obligations. Nothing in this section shall preclude the Secretary from establishing, as against the original lender, defenses based on fraud or material misrepresentation or bar him from establishing by regulations in force on the date of such issuance or disbursement, whichever is earlier, partial defenses to the amount payable on the guarantee.

USE OF GUARANTEE FUND

SEC. 311. (a) There is hereby established an Indian housing guarantee fund which shall be available to the Secretary as a revolving fund without fiscal year limitation for carrying out the provisions of this title. The guaranteed loan program under this title shall be operated separately from the Indian housing finance fund established under title II of this Act and no funds designated for one program may be transferred to the other program. There are authorized to be appropriated $2,500,000 in fiscal year 1984, $3,000,000 in fiscal year 1985, and $3,500,000 in fiscal years 1986 and 1987.

(b) The Secretary may use the guarantee fund for the purpose of fulfilling the obligations with respect to loans guaranteed under this title, but the aggregate outstanding principal amount guaranteed by the Secretary shall be limited to $400,000,000 or such lesser amount as may be provided in appropriations Acts.

(c) All funds, claims, notes, mortgages, contracts, and property acquired by the Secretary under this section, and all collections and proceeds therefrom, shall constitute assets of the guarantee fund. All liabilities and obligations of such assets shall be liabilities and obligations of the guarantee fund. The Secretary is authorized to make agreements with respect to servicing loans acquired or guaranteed under this title and to purchase such guaranteed loans on such terms and conditions as the Secretary may prescribe.

(d) The Secretary may utilize the guarantee fund to pay taxes, insurance, prior liens, expenses necessary to make fiscal adjustments in connection with the application and transmittal of collections, and other expenses and advances to protect the Secretary for loans which are guaranteed under this title or held by the Secretary, to acquire such security property at foreclosure sales or otherwise, and to pay administrative expenses.

TITLE IV—MISCELLANEOUS PROVISIONS

OFFICE OF INDIAN HOUSING PROGRAMS

SEC. 401. (a) The Secretary shall establish in the Bureau of Indian Affairs an Office of Indian Housing Programs which shall be vested with the primary responsibility for administering the programs established by this Act. The Office of Indian Housing Programs shall be under the supervision of a Director of Indian Housing Programs who shall be under the immediate supervision of the Assistant Secretary of the Interior for Indian Affairs.

(b) The authority to approve applications as provided in section 203, execute project agreements as provided in section 204, approve loan guarantees under title III, and to allocate and assign personnel of the Office of Indian Housing Programs within the administrative structure of the Bureau of Indian Affairs shall not be delegated below the Office of the Director of Indian Housing Programs.

(c) Funds appropriated under authorization of this Act shall include employee costs and other administrative expenses of the Office of Indian Housing Programs. Annual appropriation requests for the Office of Indian Housing Programs shall specify the number of employees by location, employee costs, and related administrative expenses. Funds made available for such purposes shall not be available for any other purposes.

TECHNICAL ASSISTANCE

SEC. 402. (a) The Secretary is authorized to provide technical assistance to Indian tribes to assist them in developing tribal housing plans, preparing and submitting applications for financing, and implementing housing programs funded under this Act.

(b) The Secretary shall provide for the establishment of a training program to develop an understanding by the participating families of the respective roles and responsibilities of the tribal housing agency, the Federal Government, and the participants under titles I and II. Such program shall include basic home maintenance training for participating families.

(c) Not to exceed 1 per centum of the funds appropriated under the authority of titles I and II may be used to provide the technical assistance and training authorized by this section.

INDIAN HEALTH SERVICE

SEC. 403. The Indian Health Service in the Department of Health and Human Services shall be responsible for the provision of water and sanitation facilities for houses constructed, acquired, or rehabilitated with assistance provided under this Act. The Secretary shall coordinate with the Secretary of Health and Human Services with respect to such responsibilities and activities and

shall ensure that planning and budgeting for necessary roads and sanitation facilities shall be done in conjunction with planning and budgeting for new housing to be constructed with funds appropriated pursuant to this Act.

SITE IMPROVEMENTS

SEC. 404. (a) Funds appropriated under titles I and II may be used to provide site improvements, streets and driveways within multiunit housing projects. Such streets shall be built to the usual standards of the Bureau of Indian Affairs and, where appropriate, shall thereafter be maintained by the Bureau of Indian Affairs under existing road programs and authorities.

(b) All-weather access roads to multiunit projects constructed under this Act shall continue to be provided by the Secretary through existing road programs and authorizations.

HOUSING INVENTORY

SEC. 405. The Secretary shall conduct a biennial housing inventory of current Indian housing needs and conditions to be used as a basis for determining housing assistance needs for the purposes of sections 202 and 203 of this Act. The Secretary shall submit a copy of such inventory to the Congress.

RULEMAKING

SEC. 406. The Secretary shall promulgate such rules and regulations as are necessary to carry out the provisions of this Act.

RELATION TO OTHER PROGRAMS

SEC. 407. Housing assistance provided under this Act shall not exclude Indians from being eligible for other federally assisted housing programs.

SEC. 408. As a condition for any financial assistance under (titles I and II of) this Act, the Secretary shall require that all contractors and subcontractors employed in connection with any project for which funds have been provided under (titles I and II of) this Act shall comply with the provisions of the Act approved March 3, 1931 (40 U.S.C. 276a–5, known as the Davis-Bacon Act). With respect to construction, alteration, or repair work to which the Act of March 3, 1921, is applicable under this section, the Secretary of Labor shall have the authority and functions set forth in the Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267) and section 2 of the Act approved June 13, 1934 (40 U.S.C. 276c).●

ADDITIONAL COSPONSORS

S. 24

At the request of Mr. HUDDLESTON the name of the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 24, a bill to provide emergency credit assistance to farmers, and for other purposes.

S. 217

At the request of Mr. THURMOND, the name of the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 217, a bill to reform procedures for collateral review of criminal judgments, and for other purposes.

S. 237

At the request of Mr. WALLOP, the names of the Senator from Kentucky (Mr. HUDDLESTON) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 237, a bill to amend the Internal Revenue Code of 1954 to provide for the establishment of reserves for mining land reclamation and for the deduction of amounts added to such reserves.

S. 505

At the request of Mr. MATTINGLY, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 505, a bill to designate the Federal building to be constructed in Savannah, Ga., as the "Juliette Gordon Low Federal Building."

S. 553

At the request of Mr. HART, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 553, a bill to authorize a national program of improving the quality of education.

S. 602

At the request of Mrs. HAWKINS, the names of the Senator from Georgia (Mr. NUNN) and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of S. 602, a bill to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

S. 663

At the request of Mr. ARMSTRONG, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 663, a bill to prohibit the payment of certain agriculture incentives to persons who produce certain agricultural commodities on highly erodible land.

S. 788

At the request of Mr. QUAYLE, the name of the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 788, a bill to amend the Agricultural Act of 1949 to reduce the loan rates for the 1983 through 1985 crops of sugarcane and sugar beets.

S. 832

At the request of Mr. D'AMATO, his name was added as a cosponsor of S. 832, a bill to amend the Age Discrimination in Employment Act of 1967 to remove the maximum age limitation applicable to employees who are protected under such act, and for other purposes.

S. 891

At the request of Mr. CHAFEE, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 891, a bill to develop additional procedures for Federal land sales.

S. 994

At the request of Mr. PRYOR, the names of the Senator from Michigan (Mr. RIEGLE), the Senator from Maryland (Mr. SARBANES), and the Senator from Massachusetts (Mr. TSONGAS) were added as cosponsors of S. 994, a bill to prohibit the production of lethal binary chemical munitions by the United States and to call on the President to continue and intensify recently begun efforts in the Committee on Disarmament with the Government of the Union of Soviet Socialist Republics and other countries to achieve an agreement establishing a mutual, verifiable ban on the production and stockpiling of chemical weapons.

S. 997

At the request of Mr. EXON, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 997, a bill to authorize and direct the Secretary of the Interior to engage in a special study of the potential for ground water recharge in the High Plains States, and for other purposes.

S. 1050

At the request of Mr. BYRD, the name of the Senator from Arkansas (Mr. PRYOR) was added as a cosponsor of S. 1050, a bill to amend the Arms Export Control Act to provide increased control by the Congress over the making of arms sales.

S. 1051

At the request of Mr. TOWER, the name of the Senator from Florida (Mrs. HAWKINS) was added as a cosponsor of S. 1051, a bill to amend the Internal Revenue Code of 1954 to allow certain prepayments of principal and interest to be treated as contributions to an individual retirement account, to allow amounts to be withdrawn from such account to purchase a principal residence, and for other purposes.

S. 1065

At the request of Mr. EXON, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1065, a bill to authorize continued Federal and State cooperative efforts to study the depleting water resources of the States of the high plains, and for other purposes.

S. 1113

At the request of Mr. D'AMATO, the names of the Senator from Alaska (Mr. STEVENS), the Senator from Florida (Mrs. HAWKINS), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 1113, a bill to amend the Internal Revenue Code of 1954 to provide that tax-exempt interest shall not be taken into account in determining the amount of social security benefits to be taxed.

S. 1144

At the request of Mr. HEINZ, the name of the Senator from New Jersey (Mr. BRADLEY) was added as a cosponsor of S. 1144, a bill to suspend periodic reviews of disability beneficiaries having mental impairments pending regulatory reform of the disability determination process.

S. 1170

At the request of Mr. PRYOR, the name of the Senator from Alabama

(Mr. HEFLIN) was added as a cosponsor of S. 1170, a bill to establish a Director of Operational Testing and Evaluation in the Department of Defense, and for other purposes.

S. 1200

At the request of Mr. TRIBLE, the name of the Senator from North Carolina (Mr. HELMS) was added as a cosponsor of S. 1200, a bill entitled the "National Right To Work Bill."

SENATE JOINT RESOLUTION 94

At the request of Mr. MATTINGLY, the name of the Senator from New Jersey (Mr. LAUTENBERG) was added as a cosponsor of Senate Joint Resolution 94, a joint resolution to authorize and request the President to designate May 8, 1983, to June 19, 1983, as "Family Reunion Month."

SENATE JOINT RESOLUTION 97

At the request of Mr. BOSCHWITZ, the names of the Senator from Utah (Mr. GARN) and the Senator from North Dakota (Mr. ANDREWS) were added as cosponsors of Senate Joint Resolution 97, a joint resolution to authorize the erection of a memorial on public grounds in the District of Columbia, or its environs, in honor and commemoration of members of the Armed Forces of the United States and the allied forces who served in the Korean war.

SENATE RESOLUTION 52

At the request of Mr. CHAFEE, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of Senate Resolution 52, a resolution expressing the Senate's opposition to an imposition of a fee on domestic and imported crude oil and refined products.

SENATE RESOLUTION 95

At the request of Mr. PERCY, the names of the Senator from South Carolina (Mr. HOLLINGS), the Senator from Wyoming (Mr. WALLOP), and the Senator from Wyoming (Mr. SIMPSON) were added as cosponsors of Senate Resolution 95, a resolution to express the sense of the Senate that the President should initiate negotiations on a new long-term agreement on agricultural trade with the Soviet Union.

SENATE RESOLUTION 119

At the request of Mr. D'AMATO, the name of the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of Senate Resolution 119, a resolution expressing the sense of the Senate that the United States should proceed with the sale and delivery of F-16 aircraft to Israel.

SENATE RESOLUTION 122

At the request of Mr. MOYNIHAN, the names of the Senator from West Virginia (Mr. RANDOLPH), the Senator from Pennsylvania (Mr. SPECTER), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from West Virginia (Mr. BYRD), and the Senator from Tennessee (Mr. SASSER) were added as cosponsors of Senate Resolution 122, a resolution expressing the sense of the Senate that the President should reduce imports of apparel so that imported apparel comprises no more than 25 percent of the American apparel market.

SENATE RESOLUTION 126

At the request of Mr. WALLOP, the names of the Senator from Illinois (Mr. PERCY), the Senator from Iowa (Mr. JEPSEN), the Senator from Alabama (Mr. HEFLIN), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of Senate Resolution 126, a resolution to express the sense of the Senate that the changes in the Federal estate tax laws made by the Economic Recovery Tax Act of 1981 should not be modified.

AMENDMENTS SUBMITTED

IMMIGRATION REFORM AND CONTROL ACT

HAWKINS AMENDMENT NO. 1244

Mrs. HAWKINS submitted an amendment intended to be proposed by her to the bill (S. 529) to revise and reform the Immigration and Nationality Act, and for other purposes, as follows:

At the appropriate place in the bill add:

SEC. . There are authorized to be appropriated to an immigration emergency revolving fund, to be established in the Treasury, $35,000,000, to be used to provide for an increase in border patrol or other enforcement activities of the Service and for reimbursement of State and localities in providing assistance to the Attorney General in meeting an immigration emergency, except that no amounts may be withdrawn from such funds with respect to an emergency unless the President has determined that the immigration emergency exists and has certified such fact to the Judiciary Committees of the House of Representatives and of the Senate.

FIRST CONCURRENT BUDGET RESOLUTION—FISCAL YEAR 1984

HOLLINGS AMENDMENT NO. 1245

Mr. DOMENICI (for Mr. HOLLINGS) proposed an amendment to the concurrent resolution (S. Con. Res. 27) revising and replacing the congressional budget for the U.S. Government for the fiscal year 1983, and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986, as follows:

On page 4, line 8, delete the number and insert in lieu thereof "$1,790,050,000."

On page 4, line 9, delete the number and insert in lieu thereof "$1,981,850,000,000."

On page 16, line 19, delete the number and insert in lieu thereof "$28,400,000,000."

PRYOR AMENDMENTS NOS. 1246 AND 1247

Mr. PRYOR proposed two amendments to the concurrent resolution, Senate Concurrent Resolution 27, supra, as follows:

AMENDMENT NO. 1246

On page 3, decrease the figure on line 13 by $2,000,000,000.

On page 3, decrease the figure on line 14 by $3,400,000,000.

On page 3, decrease the figure on line 15 by $3,600,000,000.

On page 3, decrease the figure on line 19 by $1,000,000,000.

On page 3, decrease the figure on line 20 by $2,500,000,000.

On page 3, decrease the figure on line 21 by $3,400,000,000.

On page 4, decrease the figure on line 1 by $1,000,000,000.

On page 4, decrease the figure on line 2 by $2,500,000,000.

On page 4, decrease the figure on line 3 by $3,400,000,000.

On page 4, decrease the figure on line 7 by $1,000,000,000.

On page 4, decrease the figure on line 8 by $3,500,000,000.

On page 4, decrease the figure on line 9 by $6,900,000,000.

On page 4, decrease the figure on line 14 by $1,000,000,000.

On page 4, decrease the figure on line 15 by $2,500,000,000.

On page 4, decrease the figure on line 16 by $3,400,000,000.

On page 6, decrease the figure on line 5 by $2,000,000,000.

On page 6, decrease the figure on line 6 by $1,000,000,000.

On page 6, decrease the figure on line 11 by $3,200,000,000.

On page 6, decrease the figure on line 12 by $2,300,000,000.

On page 6, decrease the figure on line 17 by $3,200,000,000.

On page 6, decrease the figure on line 18 by $3,000,000,000.

On page 25, decrease the figure on line 17 by $200,000,000.

On page 25, decrease the figure on line 18 by $200,000,000.

On page 25, decrease the figure on line 23 by $400,000,000.

On page 25, decrease the figure on line 24 by $400,000,000.

AMENDMENT NO. 1247

On page 3, decrease the figure on line 13 by $880,000,000.

On page 3, decrease the figure on line 14 by $880,000,000.

On page 3, decrease the figure on line 15 by $880,000,000.

On page 3, decrease the figure on line 19 by $180,000,000.

On page 3, decrease the figure on line 20 by $590,000,000.

On page 3, decrease the figure on line 21 by $760,000,000.

On page 4, decrease the figure on line 1 by $180,000,000.

On page 4, decrease the figure on line 2 by $590,000,000.

On page 4, decrease the figure on line 3 by $760,000,000.

On page 4, decrease the figure on line 7 by $180,000,000.

On page 4, decrease the figure on line 8 by $770,000,000.

On page 4, decrease the figure on line 9 by $1,530,000,000.

On page 4, decrease the figure on line 14 by $180,000,000.

On page 4, decrease the figure on line 15 by $590,000,000.

On page 4, decrease the figure on line 16 by $760,000,000.

On page 7, decrease the figure on line 6 by $880,000,000.

On page 7, decrease the figure on line 7 by $180,000,000.

On page 7, decrease the figure on line 13 by $880,000,000.

On page 7, decrease the figure on line 14 by $590,000,000.

On page 7, decrease the figure on line 20 by $880,000,000.

On page 7, decrease the figure on line 21 by $760,000,000.

HABEAS CORPUS FEDERALISM ACT OF 1983

EAST AMENDMENTS NOS. 1248 AND 1249

(Referred to the Committee on the Judiciary.)

Mr. EAST submitted two amendments intended to be proposed by him to the bill (S. 52) to combat violent and major crime by establishing a Federal offense for continuing a career of robberies or burglaries while armed and providing a mandatory sentence of life imprisonment, as follows:

AMENDMENT No. 1248

"SEC. . This Title may be cited as the "Habeas Corpus Federalism Act of 1983.

"SEC. 131. Section 2254(a) of title 28, United States Code, is amended to read as follows:

"(a) The Supreme Court, a Justice thereof, a circuit judge, or a district court shall entertain an application for a writ of habeas corpus on behalf of a person in custody pursuant to a judgment of a State court only on a ground which presents a substantial Federal constitutional question, and then only if—

"(1) it was not previously raised and determined,

"(2) there has been no fair and adequate opportunity to raise it and have it determined, and

"(3) it cannot thereafter be raised and determined in a proceeding in the State court, by an order or judgment subject to review by the Supreme Court of the United States on a writ of certiorari.".

SEC. 132. Section 636(b)(1)(B) of title 28, United States Code, is amended to read as follows:

"(B) a judge may also designate a magistrate to conduct hearings, including evidentiary hearings, except evidentiary hearings in cases brought pursuant to section 2254 of this title, and to submit to a judge of the court proposed findings of fact and recommendations for the disposition, by such judge, of any motion excepted in subparagraph (A), of applications for post trial relief made by individuals convicted of criminal offenses and of prisoner petitions challenging conditions of confinement.".

AMENDMENT No. 1249

Add the following new section at the end of the bill:

SEC. . (a) This section may be cited as the "Marihuana Cultivation on Federal Lands Crime Act of 1982".

(b) Chapter 91 of title 18 of the United States Code is amended by adding at the end thereof the following:

"§ 1864. Prohibition against growing marihuana on Federal lands; penalties

"It shall be unlawful for any person knowingly or intentionally to plant, grow or cultivate marihuana on Federal lands unless specifically authorized by another provision of Federal law. Any person who violates this section shall be sentenced to a term of imprisonment of not less than one year and not more than fifteen years, and a fine of not less $10,000 and not more than $15,000,000. Any person who, having previously been convicted of a violation of this section, again violates this section, shall be sentenced to a term of imprisonment of not less than ten years and not more than thirty years and a fine of not less than $100,000 or not more than $30,000,000.".

(c) The section analysis of chapter 91 of title 18 of the United States Code is amended by inserting at the end of thereof the following item:

"1864. Prohibition against growing marihuana on Federal lands; penalties.".

FEDERAL ANTITAMPERING ACT

EAST AMENDMENT NO. 1250

Mr. THURMOND (for Mr. EAST) (for himself, Mr. THURMOND, and Mr. HOLLINGS) proposed an amendment to the bill (S. 216) to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm, as follows:

At the end of the committee amendment add the following new section:

SEC. 4. (a) The following new section shall be added to title 35 of the United States Code:

"§ 155A. Patent Term Restoration

"(a) Notwithstanding the provisions of section 154, the term of each of the following patents shall be extended in accordance with this section:

"(1) Any patent which encompasses within its scope a composition of matter which is a new drug product, if during the regulatory review of the product by the Federal Food and Drug Administration—

"(A) the Federal Food and Drug Administration notified the patentee, by letter dated February 20, 1976, that such product's new drug application was not approvable under section 505(b)(1) of the Federal Food, Drug, and Cosmetic Act;

"(B) in 1977 the patentee submitted to the Federal Food and Drug Administration the results of a health effects test to evaluate the carcinogenic potential of such product;

(C) the Federal Food and Drug Administration approved, by letter dated December 18, 1979, the new drug application for such product; and

"(D) the Federal Food and Drug Administration approved, by letter dated May 26, 1981, a supplementary application covering the facility for the production of such product; and

"(2) Any patent which encompasses within its scope a process for using the composition of matter described in paragraph (1).

"(b) The term of any patent described in subsection (a) shall be extended for a period equal to the period beginning February 20, 1976, and ending May 26, 1981 and such patent shall have the effect as if originally issued with such extended term.

"(c) The patentee of any patent described in subsection (a) shall, within ninety days after the date of enactment of this section, notify the Commissioner of Patents and Trademarks of the number of any patent so extended. On receipt of such notice, the Commissioner shall confirm such extension by placing a notice thereof in the official file of such patent and publishing an appropriate notice of such extension in the Official Gazette of the Patent and Trademark Office.".

(b) The analysis for Chapter 14 of such title 35 is amended by adding at the end thereof the following:

"155A. Patent term restoration.".

PRYOR AMENDMENT NO. 1251

Mr. PRYOR proposed an amendment to the bill, S. 216, supra, as follows:

On page 5, following line 25, insert the following:

(3) Whoever willfully and maliciously imparts or conveys false information, knowing the information to be false that a household product as described in subsection (a) is or has been tainted shall be imprisoned for not more than one year or fined not more than $10,000 or both.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will hold a business meeting on Thursday, May 12, 1983, to mark up S. 856, to provide for an Indian housing program for construction and financing of housing for Indians, and for other purposes.

The meeting will be held in S-224, Capitol, and will begin at 10 a.m. For further information, please contact Mike Mahsetky at 224-2251.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. TOWER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, May 10, at 10 a.m., to mark up the foreign aid legislation.

The PRESIDING OFFICER. Without objection, it is so ordered.

SMALL BUSINESS COMMITTEE

Mr. TOWER. Mr. President, I ask unanimous consent that the Small Business Committee be authorized to meet during the session of the Senate on Wednesday, May 11, to hold a hearing on S. 1022, a bill to amend section

8(a) of the Small Business Administration Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PATENTS, COPYRIGHTS, AND TRADEMARKS

Mr. TOWER. Mr. President, I ask unanimous consent that the Subcommittee on Patents, Copyrights and Trademarks, of the Committee on the Judiciary, be authorized to meet during the session of the Senate on Thursday, May 12, at 2:30 p.m., to hold a hearing to consider computerized criminal history.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

THE HIGHWAY BEAUTIFICATION ACT

● Mr. STAFFORD. Mr. President, the original purpose of the Highway Beautification Act was a commendable one—to preserve the scenic beauty of this country for the motoring public. Changes over the years have undermined the original purposes of this act until it has become a vehicle for the protection of the industry it was charged with regulating.

Dr. Charles Floyd, a professor in the Department of Real Estate and Legal Studies at the University of Georgia, has followed the Highway Beautification Act since it was first passed. Dr. Floyd is a recognized expert on this subject. He has coauthored a book on highway beautification, published a number of articles, and served as a member of the National Advisory Committee on Outdoor Advertising and Motorists Information.

Dr. Floyd has written two articles which I want to bring to the attention of my distinguished colleagues. The first article, "Requiem for the Highway Beautification Act" documents the history of the act and what has gone wrong in its implementation. The second article, "Should Billboards Be Subject to Road User Fees?" outlines an innovative approach and offers a persuasive argument for treating billboards as a use of the road. All other users of the highway pay certain user fees for that privilege—why should not billboards do the same?

I ask that the two articles by Dr. Floyd be printed in the RECORD.

[From the APA Journal, Autumn 1982]

REQUIEM FOR THE HIGHWAY BEAUTIFICATION ACT

(By Charles F. Floyd)

The Highway Beautification Act is a failure. Passed with much fanfare in 1965, the act was supposed to result in the removal of existing billboard clutter from our rural roadsides and the prevention of its future spread.[1] It has accomplished neither objective.

An earlier article in this journal detailed the history of the beautification program and enumerated some of the reasons for the act's lack of success (Floyd 1979a). Those who read that sad tale of environmental regulatory failure may have gained some solace from the sentiment that "Well—at least it can't get any worse." You were wrong! In the past several years the act has been almost totally transformed into a sign industry dominated program that is actually enriching and subsidizing the industry it was meant to regulate, and is serving as a protective umbrella to shield the industry from state and local governments that desire to effectively control billboard blight. Indeed, legislative proposals to repeal the act have led to the ironic situation in which environmental organizations that originally fought for the passage of the act have been supporting its repeal, while the billboard industry has become the act's vigorous champion.

THE HIGHWAY BEAUTIFICATION ACT

The Highway Beautification Act made billboard control mandatory in all states along the federally funded interstate and primary systems (most U.S.-numbered routes). States not complying with the act's provisions could lose 10 percent of their federal highway funds. The seeds of failure were already planted in the act, however—particularly in the provision permitting new billboards in any area zoned commercial or industrial, and in the requirement that cash compensation be paid for the removal of any nonconforming sign. The first provision has meant that new signboards have gone up in areas where they are totally inharmonious, while the second has meant that very few signs have actually been removed under the act. On the contrary, denying the states and local governments the traditional right to remove nonconforming signs under their police powers after a reasonable amortization period has prevented many communities from forcing the removal of unsightly nonconforming billboards.

CONTROL OF NEW SIGNS

The Highway Beautification Act has been very ineffective in controlling the erection of billboards along rural roadsides. New signs were supposed to be erected only in areas of commercial or industrial use and were made subject to size, spacing, and lighting criteria. Unfortunately for the stated objectives of the act, the Secretary of Transportation was not allowed to set any national standards, but was to enter into agreements with the states based on customary use. "Customary use" was defined in a rather curious way.

SIZE AND SPACING STANDARDS

The federal government first proposed a maximum size of 400 square feet for new signs but later changed this to 650 square feet, even though a national inventory showed that size to be larger than all but 1.85 percent of existing billboards (U.S. Congress, House 1967, p. 961). Finally, the Federal Highway Administration developed a model agreement in cooperation with the Outdoor Advertising Association of America which was adopted by thirty-two states (Brennan 1979). The model agreement set a maximum size limitation of 1200 square feet, equal to the floor area of a medium-sized three bedroom house and approximately twice the size of the largest billboards normally erected along the interstate system. George McInturff, who served as chief negotiator of the agreements as head of the Scenic Enhancement Division of the Federal Highway Administration and who now is employed by the Outdoor Advertising Association of America as an environmental consultant, later testified:

"That size limit is the outer limit of what is used by the industry in major urban areas within the United States. . . . I doubt greatly that more than one sign out of 2,000 now erected, or erected since those controls were established, even approaches that 1,200 square feet."[2]

"Customary spacing" in the guidelines, and in most of the states, was defined as every five hundred feet on the interstate system, and every one hundred feet on the primary system within municipalities. Under the spacing requirements it is possible to have 10.5 billboard sites per mile on each side of the road along an interstate highway, a total of 21 sites on both sides. Since two faces are permitted at each site, 42 billboards per mile are allowed along any portion of the interstate system that is zoned commercial or industrial. On the primary system the comparable figures are 35 sites and 70 faces per mile. Within municipalities the allowable sites reach the somewhat absurd level of 106 per mile with 212 possible sign faces. If each of these signs were of the maximum allowable size (1200 square feet per site), the total area of the sign faces would be equal to approximately three football fields for each mile of roadway (Brennan 1979). It is obvious, therefore, that the size and spacing requirements do not serve as any effective control of new billboards.

COMMERCIAL AND INDUSTRIAL ZONES

Since the size and spacing requirements contained in most of the agreements amount to virtually no control of outdoor advertising, the designation of commercial and industrial areas becomes all important. Unfortunately, local zoning authorities often do not place great importance on providing an uncluttered view for the interstate motorist. The real or imagined benefits to be derived for local businesses through billboard advertising usually assume a much greater priority. In practice, many local communities, and particularly rural counties, have attempted to circumvent the Highway Beautification Act by zoning long stretches of rural highways as commercial and industrial areas. The absence of any requirement that such areas actually contain commercial or industrial land uses, and the acceptance by the Federal Highway Administration of such "phony" zoning makes this provision perhaps the largest loophole in the entire Highway Beautification Act.

"PHONY" COMMERCIAL AND INDUSTRIAL ZONING

Until recently, the Federal Highway Administration took the position that zoning created primarily to permit new outdoor advertising structures would not be recognized for purposes of the Highway Beautification Act (U.S. Department of Transportation 1975). This position was upheld in South Dakota, whose legislature had zoned virtually all land bordering federal numbered highways in the state as commercial. The court noted, for example, that billboards would have been permitted on all but four miles of the over four hundred miles of I-90 in South Dakota, and concluded: "Congress never intended to subvert the Act's stated

Footnotes at end of article.

purpose to arbitrary actions taken by the individual state legislatures." [3]

Despite this favorable ruling from the courts, a clear legislative history rejecting phony zoning to permit new billboards (Floyd and Shedd 1979, pp. 84-86), and the opinion of their own Chief Counsel supporting this position (Federal Highway Administration 1976), the Federal Highway Administration (FHWA) has almost never sought to enforce the law against phony zoning in recent years no matter how flagrant the abuse.

For example, following the earlier court decision against the state, several South Dakota counties zoned long strips of rural land along federal highways as commercial. Lyman County, with a declining population of approximately four thousand and slightly over two hundred people employed in wholesale and retail trade, zoned twenty-nine of fifty-two miles of I-90 for commercial use in bands three hundred feet wide on each side of the road. Some of these strips extended more than three miles from any access to the highway at an interchange. The Town of Lyman, which had a population of approximately fifty and not even a single commercial enterprise, zoned four miles of I-90 as commercial (Fifth District Planning and Development Commission 1976).

A field investigation by the FHWA revealed that Lyman County had no comprehensive plan—requirement by state law before any permanent zoning ordinance can be adopted. County officials were unable to even find the zoning maps during the visit, but finally located them several months later. Despite the FHWA official's conclusions that "there is no obvious justification for the designation of such large commercial districts based upon existing or projected needs" and "the only justification [offered by county officials] for the [zoning] change was that the billboard people wanted it," the Federal Highway Administration has refused to take any action to correct this obvious abuse of the beautification act.[4]

Deming, New Mexico, a community with a 1970 population of about 8,300, zoned 35 square miles of its extraterritorial area in 1978. The new zoning included 3,342 acres as industrial and 3,065 acres as commercial, most of the latter being in narrow strips on both sides of I-10 and other federally funded highways in the area. The FHWA Division Administrator observed that:

"Most of the land zoned commercial is vacant and apparently being used for grazing and farming. It is difficult to envision the type of expanison Deming would have to undergo to actually have such a large commercial area under development in the foreseeable future. There is little doubt that these commercially zoned areas would become lined with billboards long before they were commercially developed." [5]

Despite these findings and his own conclusions that "this zoning action and ensuing erection of billboards along the Interstate appear contrary to the Highway Beautification Act," the Associate Federal Highway Administrator for Right-of-Way and Environment acquiesed to this blatant example of phony zoning.[6]

Clark County, Nevada (Las Vegas) reclassified its H-2 (General Highway Frontage District)—which permitted commercial uses only upon issuance of a conditional use permit—as a commercial zone in 1976. The county also expanded the zone to extend 660 feet on each side of the centerline of 137 miles of I-15 and US-95. Not only did this enable the state to permit a number of existing non-conforming signs, if fully utilized it could have resulted in the potential erection of 11,568 new signs.[7] This was a little blatant even for the Federal Highway Administration, and they requested that the state rescind their recognition of the zone as commercial for purposes of permitting new billboards, an action that was finally accomplished following a determination by the Nevada Supreme Court that the extensive use of the H-2 zone violated the intent of the beautification act.[8] Despite this ruling, Clark County has continued to rezone rural areas as commercial to permit billboards. For example, one parcel located approximately one-half mile from any existing commercial use was zoned commercial to permit "a one space parking lot" and a billboard.[9]

Following the construction of I-95, the Town of Hardeeville, South Carolina passed a zoning ordinance in 1977 (Town of Hardeeville 1977). Under this ordinance several areas along I-95 were zoned as commercial which had no potential for commercial development—except for billboards. One parcel had no public access except through a park; two had no public access at all. Two parcels were zoned "Traveler Commercial" even though they were located approximately two miles from any interchange with I-95; one of these had no public access. The ordinance also permitted one hundred foot spacing for billboards, a violation of South Carolina's outdoor advertising control agreement with the Secretary of Transportation.

An inspection conducted in early 1981 by a Federal Highway Administration review team found that the Hardeeville zoning was not accomplished in accordance with the South Carolina Code. They concluded:

"The zoning of these five areas does not stand the test of reasonableness. Each is either poorly served by public access or has none at all. None are directly (physically) supported by compatible adjacent land uses. None are commercially developed, other than with outdoor advertising devices." [10]

Despite these findings, the Federal Highway Administration has refused to take any action regarding either the Hardeeville phony zoning or the violation of the spacing requirements.[11] In fact, the FHWA has recently taken the position that monitoring of local zoning "will be limited to assuring that a comprehensive plan was adopted pursuant to State codes." [12]

UNZONED COMMERCIAL AND INDUSTRIAL AREAS

The designation of "unzoned commercial and industrial areas" is another huge loophole permitting billboards along predominantly rural roadsides. The original idea was that this designation would encompass areas that were easily recognizable to the average motorist as genuine commercial and industrial areas, but which were located in jurisdictions which lacked comprehensive zoning. It hasn't quite turned out that way. The draft agreement that was proposed in 1966 would have defined such areas as two industrial or commercial activities located within a radius of three hundred feet, and this concept was even endorsed by the Outdoor Advertising Association of America (U.S. Congress, Senate 1965). In the final agreements, however, the unzoned commercial or industrial area was defined in most states as eight hundred feet each side of only one such activity (Floyd and Shedd 1979, pp. 99-104). In practice, even the most obscure commercial or industrial use will often serve to permit several new signs.

Consider, for example, the three billboards in photo 3 on I-85 in a rural residential area of South Carolina. If one looks carefully through the supports of the nearest sign he can see a small auto repair service located on the nearby secondary road. This obscure business serves to designate this area as an "unzoned commercial area," despite the fact that South Carolina's agreement with the Secretary states that such a classification is not permitted in an area that is primarily residential in character. The FHWA's recent review agreed with this assessment, but the agency refused to take any corrective action.[13]

[Photos not printed in the RECORD.]

Of course, if an advertiser cannot find some existing obscure commercial or industrial use, one can be created. The billboards in photo 4, and another just off to the right, are located on I-95 in South Carolina. Below the McDonald's sign is a small building with a painted sign across the back wall proclaiming the structure to be the "McDonald's District Office and Warehouse Facility."

No matter how obscure, at least these buildings can be seen from the roadway. Often, however, qualifying activities are not even visible, at least not in the normally accepted sense of the word. Consider, for example, the Rodeway Inn billboard (photo 6) located next to a residence on I-40 near Asheville, North Carolina. Photograph 5 looks slightly left of the sign toward a residential area. The arrow points out Parkway Auto Service, a small establishment located about seven hundred feet from the road behind eight homes.

The three signs shown in photograph 7 are located nearby in another area which appears to consist entirely of agricultural and residential land uses. Ah—but you have not looked carefully enough. Nestled under those trees. past the grazing cows and peaceful homes, is a small knitting plant located over eight hundred feet from the roadway (photo 8).

Although it is doubtful that 1 out of 100,000 motorists unfamilar with the area could locate these "commerical and industrial" activities, they were used by the North Carolina Department of Transportation to justify permitting these billboards on a newly constructed interstate highway. Here again, the Federal Highway Administration refused to take any corrective action, contending that the signs "were erected in accordance with State and Federal regulations." [14]

REMOVAL OF NONCONFORMING SIGNS

Communities have traditionally eliminated nonconforming signs through amortization under the police power (Floyd and Shedd 1979, Chapter 4; Williams 1974-1975, Chap. 116; and Floyd 1982a). Despite the fact that twenty-two states were already removing nonconforming billboards under the earlier Bonus Act through their use of the police power, the 1965 Act required the payment of cash compensation to both the sign owner and owner of the land on which the sign was located.[15] Congress justified this change in policy on the basis that controls were being extended to the primary system where outdoor advertising was long established. There is considerable evidence, however, that the Congress did not fully understand the implication of this action. For example, during the debate Senator Muskie emphasized that "under the bill all that can be compensated for is whatever remains of the leaseholds or the unamortized values, so

that if, in fact, the billboard has been completely amortized or the leasehold has expired, no compenstion will be paid under the bill." [16] This, of course, is an almost exact description of the amortization principle which was being outlawed by the act.

This triumph for the billboard lobby was made very clear in 1972 when the Secretary of Transportation made a determination that Vermont's policy of not paying cash compensation for the removal of nonconforming billboards did not consititute "effective control" under the meaning of the Highway Beautification Act. The state challenged this mandatory compensation provision on the basis that (1) such action was not authorized under a proper construction of the act, and (2) the provision violated the Tenth Amendment to the U.S. Constitution. The court ruled against Vermont, and the state was forced to pay cash compensation.[17]

Subsequent experience has proven that the Congress' belief that the value of nonconforming signs would generally decrease over time was not justified. To the contrary, the average compensation paid for the signboards has continually risen, even though the outdoor advertising industry has generally depreciated billboards over a period of eight years or less for tax purposes. Lenient regulations regarding repair and refurbishment have allowed the sign companies to continually rebuild and repair the nonconforming signs and, in effect, to give them eternal life. Combined with unrealistically high sign appraisals, this has resulted in a continual increase in sign removal costs. A General Accounting Office report estimated future increases at 6 percent annually (Controller General of the United States 1978). Experience has shown that this estimate is much too low, with the actual average cost of signs acquired under the program rising almost 13 percent annually between fiscal years 1976 and 1980.

Congress made compensation mandatory for the removal of nonconforming signs, and declared in a 1968 amendment that no signs are required to be removed unless the federal share of compensation is available, but has since failed to appropriate the funds necessary to complete the program within any reasonable time. The first sign removed under the beautification program was acquired in May 1971, nearly a year after the "final compliance date" of July 1, 1970, that was originally set in the act for the removal of all nonconforming signs. Since 1971 approximately 107,000 nonconforming signs have been removed under the act at a cost in excess of $150 million. Over 133,000 nonconforming billboards remain, along with approximately 54,000 illegal signs.[18]

Although according to the Federal Highway Administration approximately 46 percent of the noncomforming signs have been removed, this figure gives a totally false impression regarding the status of the acquisition program. Most of the billboards removed have been small and obsolete signs of little value. Most of the larger and more valuable signs remain.

Public projects are normally planned so as to maximize the benefit-to-cost ratio; the billboard removal program has been designed to minimize the benefit-to-cost ratio. In 1976 Congress directed that the first priority for removal be signs voluntarily offered by the billboard companies, while other nonconforming signs along heavily traveled rural highways be the last removed. The result of this strategy is that the very limited funds appropriated for highway beautification have been dissipated with little benefit except to the outdoor advertising firms.

Furthermore, the FHWA has ruled that beautification funds can be used to remove signs that were being acquired to make way for new construction. In other words, the meager monies available for beautification have been used to remove signs that would have otherwise been acquired with construction funds. In some states over half of the beautification monies have been utilized in this way—to no benefit to the stated purposes of the Highway Beautification Act.

The FHWA recently estimated that completion of the beautification program would require an additional expenditure of approximately $995 million in 1980 dollars. With a 7 percent rate of inflation the estimated cost to complete the program in ten years would be $1.3 billion; a twenty year program was estimated to cost $1.9 billion. At a more realistic inflation rate of 13 percent, the comparable figures were $1.8 billion and $3.7 billion.[19] Even these estimates are too low, however, since they are based on an average cost of $1808 per sign, less than recent acquisition costs and far less than required for the more valuable signs to be acquired.

For fiscal year 1981 the Congress appropriated $8.5 million for the sign program. Of this amount, $7.7 million was required for payments contractually obligated under the Bonus Act, leaving only $800,000 for sign removal. The fiscal 1982 appropriation allocated only $500,000 for the beautification program, approximately $7.2 million less than required just for bonus payments.[20] If one makes the totally unrealistic and totally incorrect favorable assumptions that (1) the entire $500,000 could be used to acquire nonconforming signs, (2) the Federal Highway Administration's estimates of the cost to complete the program are correct, and (3) there will be no further inflation, then this level of appropriations would fund the removal of all the currently nonconforming signs in slightly less than two thousand years.

The 1982 Department of Transportation appropriations act also contained a rather obscure clause that was added in the conference committee by Senator Andrews of North Dakota: "notwithstanding any other provision of law, any determination as to whether any outdoor advertising sign, display, or device is or has been lawfully erected under State law or is entitled to compensation shall not be affected by any waiver of compensation." [21]

This provision appears to have had major benefits for one sign company. The state of North Dakota issued conditional sign permits after the passage of the 1965 Beautification Act in which the applicant waived the right to compensation if the law was subsequently changed to make the sign nonconforming. The Newman Sign Company received 141 of these conditional permits. After the state passed a law complying with the act in 1972, it sought to remove the signs as specified in these conditional permits. Newman and other sign companies challenged the state's action, but the North Dakota Supreme Court upheld the state, as did the U.S. Supreme Court.[22] Even so, the signs will now remain, as acknowledged by Secretary of Transportation Drew Lewis in a letter to Senator Andrews.[23] The cost to the taxpayers of making these illegal signs subject to compensation was far in excess of the entire appropriation for beautification in the appropriations act. Of course, with no money to remove the signs, they undoubtedly will remain, providing a windfall profit to their owners.

THE 1978 AMENDMENTS

In response to lobbying from the outdoor advertising industry, the act was amended in 1978 to require that compensation be paid whenever a nonconforming sign is removed under any state or local land use control, environmental, or zoning law.[24] Previously, compensation was required only where signs were removed because of the act; it was not required where signs were removed because they were nonconforming under other state conservation or environmental laws, or under local comprehensive zoning ordinances. The amendment represents an unprecedented limitation on local zoning authorities and a victory by the industry in its long-standing campaign to deny state and local governments the traditional right to remove nonconforming signs through the use of the police power.

This triumph of the billboard lobby, which has added an estimated 38,000 signs and $259 million to the cost of the removal program,[25] was made even more costly to the taxpayers when the Federal Highway Administrator succumbed to industry pressure and ruled that the amendment would apply to signs that were still in litigation even though they had already been removed by the effective date of the amendment (Arieff 1979). Even more significantly, the amendment has been used by the outdoor advertising industry as the basis for passage of laws in many states requiring the payment of compensation for any off-premise sign wherever located. Thus, the beautification act has been used as a vehicle to block local billboard removal programs, long one of the outdoor advertising industry's most cherished objectives.

For example, in 1977 New York's highest court ruled that the state could require the removal of approximately one hundred billboards in their Catskill Park without the payment of cash compensation after a six-and-a-half-year amortization period.[26] Following the passage of the 1978 amendment and the subsequent ruling by the Federal Highway Administrator requiring payment even where property rights had already been extinguished under law, the state was forced to allow the signs to remain under the threat of a loss of 10 percent of their federal aid highway funds (Signs of the Times 1980).

Seattle passed a sign control ordinance in 1968 which provided for the removal of nonconforming signs without cash compensation after the expiration of a ten year amortization period. Among these nonconforming signs were several located adjacent to the Alaska Skyway. In 1977 the city notified the billboard company that the signs were in violation of the ordinance and would have to be removed. The Supreme Court of Washington ruled that the billboard company must remove the signs and that it would be an unconstitutional gift of public funds for the city or state to pay cash compensation.[27] Even so, upon the request of the Outdoor Advertising Association of America the Federal Highway Administrator sent an official warning letter to the state, notifying them that penalty proceedings would be initiated within forty-five days unless they violated the order of their own Supreme Court and paid compensation for the signs in question. This is the only warning letter that has ever been sent to a state solely for operational deficiencies. A copy of the warning

letter was also sent to the outdoor advertising industry's attorney thanking him "for your interest in the Highway Beautification Program." [28]

A somewhat similar situation ocurred in San Diego. The California Supreme court, after upholding an ordinance completely banning billboards within San Diego and requiring their removal after an amortization period, modified their opinion to require cash compensation for signs on federally funded highways as a result of the 1978 amendment.[29] This case also provided a major test for the right of communities to control or prohibit billboards. The U.S. Supreme Court struck down the San Diego ordinance on the grounds that it too severely limited non-commercial speech. However, the court overwhelmingly upheld the right of a city to enact a total ban on commeracial billboards.[30]

VEGETATION DESTRUCTION

Perhaps the ultimate perversion of the beautification law has been as justification for the destruction of vegetation located on the right of way in front of billboards. Illegal tree cutting, euphemistically called vegetation control by the sign industry, has long been a serious problem in many states. Under the urgings of the outdoor advertising industry, the Federal Highway Administration "solved" the problem by legalizing this illegal activity, allowing the companies to cut trees and other vegetation owned by the public under the guise of maintenance.[31] This legalized vandalism is now being permitted in a number of states, despite favorable court decisions which clearly establish that billboard owners have no inherent right to be seen from the roadway.[32]

What follows is an example of how this policy has worked in actual practice. The South Carolina Department of Highways justified the issuance of a permit for the Dairy Queen sign in photo 9 on the basis that a small business was located close to the highway off a nearby secondary road. The building was not readily visible from the roadway as a business, particularly since it was hidden by a grove of hardwood trees. Even so, after the permit was issued, over one hundred trees on the right of way were destroyed under a "vegetation maintenance" agreement in order to clear the site for the billboard.[33]

THE STAFFORD REPEAL BILLS

Many felt the 1978 amendments were the "last straw" in the perversion of the Highway Beautification Act. Among these was Senator Robert T. Stafford of Vermont, long one of the strongest supporters of billboard control. Referring to the act as the "Billboard Retention and Relief Act of 1965," Senator Stafford introduced a bill, The Federal Highway Beautification Assistance Act of 1979, that would have made the program voluntary with the states—including the payment of cash compensation for non-conforming signs.[34] In explaining his reasons for introducing the bill to repeal the mandatory features of the original act, Senator Stafford explained:

"I believe that more productive anti-billboard battles can and will take place at State and local levels, once Federal obstacles are removed. Where there is strong sentiment to preserve a State's natural beauty, strong measures will be taken. Where no such sentiment exits, roadsides will, as at present, remain ugly. But we will not be spending taxpayers money to keep them that way.[35]

The hearings of the Stafford bill produced some quite ironic testimony to those unfamilar with the history of the federal beautification program. Generally, state highway officials, local government officials, and environmental groups supported repeal, while the existing act received staunch support from the billboard industry (U.S. Congress, Senate 1979a). The bill failed in committee by a 6-6 vote when two of its co-sponsors, Senators Howard H. Baker and Pete V. Domenici, "took a walk" under billboard industry pressure and failed to vote on the measure (U.S. Congress, Senate 1979b).

In 1981 Senator Stafford, then Chairman of the Senate Committee on Environment and Public Works, offered another bill, the Billboard Deregulation Act of 1981.[36] This bill, which proposed to simply repeal the 1965 act, was again strongly opposed by the outdoor advertising industry, and it quietly died without a hearing or a committee vote.

The outdoor advertising industry offered their own deregulation bill as part of the Surface Transportation Assistance Act of 1982.[37] Among other things, the bill would:

1. Change the purpose of the act from one of protecting scenic beauty to one of preserving "communications through the outdoor medium,"

2. Destroy any effective federal regulation over the erection of new billboards,

3. Abolish the traditional use of the police power to remove nonconforming billboards in all states and local areas, and

4. Require that cash compensation be paid "upon the removal or *upon the substantial impairment of the customary use or maintenance*" of a billboard, which means that all trees on the public right-of-way blocking a clear view of billboards would have to be cut down unless the state or local community paid for the billboard (emphasis added).

This proposal would constitute perhaps the ultimate in perversion of environmental regulation; the only purpose of the regulation would then be to protect the regulated industry from effective regulation.

At this writing the bill's disposition is still at issue.

THE NATIONAL ADVISORY COMMITTEE

The Secretary of Transportation appointed a twenty-four member National Advisory Committee on Outdoor Advertising and Motorist Information in 1980 whose task was to examine the highway beautification program and make recommendations for administrative and legislative changes. The committee was very evenly divided between pro-scenic beauty and pro-billboard groups. The faction composed of representatives from the outdoor advertising industry, tourist related groups, and public officials sympathetic to the outdoor industry position sought changes that would have further perverted the act. For example, this group recommended that:

1. Removal of nonconforming signs be made optional with the states—but payment of compensation remain mandatory,

2. Up to two "directional" billboards per mile be permitted in rural areas, regardless of zoning or actual land use,

3. Each state be required to adopt a policy of permitting sign companies to cut trees on the right of way in front of billboards, and

4. There be no review of local "phony" zoning actions to permit billboards, or any requirement that new billboards be located in areas of actual commercial or industrial use (FHWA 1981b).

Members of the committee who desired an effective beautification program made a number of recommendations for administrative and legislative changes. These included:

1. Using the available beautification funds to achieve the maximum aesthetic improvement by ending the practices of (1) removing the signs first that have been voluntarily offered by their owners, and (2) allowing beautification funds to be used to acquire signs for right of way projects;

2. Leving a user tax on billboards to generate the funds needed to pay cash compensation for the removal of nonconforming signs;

3. Restricting new sign permits to sites in commercial or industrially zoned areas that are also located within three hundred feet of an actual commercial or industrial structure which is clearly identifiable as such from the traveled roadway;

4. Changing the definition of an "unzoned commerical or industrial area" to require two or more commerical businesses located within four hundred feet of each other; and

5. Reducing the scope of the program by (1) deregulating highways in urban areas, and (2) deregulating most of the primary system.

THE HIGHWAY BEAUTIFICATION ACT: ASSESSMENT AND POLICY ALTERNATIVES

The Highway Beautification Act has been a failure in meeting its original objective of protecting scenic beauty along rural roadsides. Perhaps the most convincing proof of this contention has been provided by the outdoor advertising industry itself. The industry has been pleased with the program. The president of the Outdoor Advertising Association of America testified that the industry spent over a quarter of a million dollars defending the act in hearings that were held by the Federal Highway Administration during 1979 (FHWA 1979c); they vigorously fought Senator Stafford's attempts at repeal; and the only members of the National Advisory Committee who were in favor of continuing the program without major legislative revisions were those associated with the outdoor advertising industry.[38]

In view of the ineffectiveness of the current program, what are the policy alternatives? The first is to admit that the noble experiment has failed and return the responsibility for the program to the state and local governments as Senator Stafford proposed. Although repeal is certainly an admission of failure, many feel that it would be far preferable to the current travesty. Repeal would undoubtedly mean more signboards in those states that care little for their scenic beauty, but it would also remove restrictions on state and local governments that genuinely desire to control billboard blight. Ironically, therefore, complete repeal of the Highway Beautification Act offers at least some hope for achievement of the original aims of the highway beautification program.

The other alternative would be to make extensive administrative and legislative changes in the act to enable it to be effective. The dismal record of the Federal Highway Administration in enforcing the act offers little encouragement for the initiation of effective administrative changes in the near future.[39] To the contrary, the recent direction has been toward *no* federal enforcement of the act.

It is also clear that a reduction in the legislative scope of the program offers the only reasonable hope for continuation of a national highway beautification act. Essential elements of such a program would be an immediate imposition of a moratorium on new billboards along federal highways in rural areas, exemption of larger urban areas, and

imposition of a user tax on all billboards subject to the beautification act to fund implementation and enforcement of the program.

The reduced scope would make the act more manageable and concentrate efforts in rural areas where they can be more effective. By and large, cities over 25,000 and urban counties now have in place effective local programs of billboard control that are actually hindered by the current act, and exemption would enable their own programs to be more effective. The imposition of the user fee would provide the funds necessary to remove nonconforming billboards and to provide enforcement (Floyd 1982a).

The Highway Beautification Act was one of the first major pieces of national environmental legislation. It may also be the first to be completely converted into legislation that does nothing but protect the supposedly regulated industry. With most environmental organizations having abandoned the act to the outdoor advertising industry, its future appears bleak—unless scenic beauty again becomes a priority objective of those who are concerned about the environment.

Should Billboards Be Subject to Road User Fees?

(By Charles F. Floyd)

Road user fees are a well established concept in the United States, with almost $23 billion being collected by federal, state, and local governmental units for this purpose in 1979.[1] One major type of road user, however, has escaped road user fees. This is the off-premise highway billboard, a type of advertising that derives its value solely from the public's investment in roads and highways. This article examines a possible basis for a road user fee on these signs, suggests a rationale for the imposition of the road user fee, and suggests ways it can be implemented.

THE NATURE OF THE OUTDOOR ADVERTISING BUSINESS

In order to understand billboards as a direct use of the road it is first necessary to understand the nature of the outdoor advertising business. Billboards, more properly referred to as off-premise outdoor advertising signs, must be distinguished from on-premise signs. The on-premise sign is an integral part of the business it identifies and serves to index the business environment, that is, to inform people where they can find various goods and services. The off-premise advertising sign, on the other hand, is designed to use the roadside environment to advertise a good or service found at some other location.

Off-premise signs can be subdivided in several different categories. Some billboards provide directional information to motorists while others feature product advertising. Product advertising is of many types, with cigarette and liquor manufacturers being the largest advertisers.[2] Directional signs are located primarily in rural areas and on urban highways with large volumes of long-distance travelers, while billboards featuring product advertising are located primarily in urban areas.

Off-premise signs can also be subdivided into standardized and nonstandardized industry. The latter consists primarily of advertiser-owned billboards giving information regarding tourist and other highway related services. These nonstandardized signs come in a great variety of sizes, but are generally smaller than those erected by the "standardized" industry. The firms comprising the standardized industry own outdoor advertising structures and lease space to advertisers. They employ two basic types of signs, the poster panel and the painted bulletin. The poster panel is designed for the posting of paper "bills"—hence the name "billboards" that is now commonly applied to all off-premise outdoor advertising signs. The standardized poster panel is 300 square feet in size, although the industry also uses a smaller poster panel of 72 square feet, appropriately called a "junior" panel. The second type of standardized industry sign is the painted bulletin usually measuring 14 feet by 48 feet (672 square feet), but sometimes ranging to 2,500 square feet or even larger.[3]

BILLBOARDS AS A DIRECT USE OF THE ROAD

Although off-premise outdoor advertising signs are located on private property, they clearly derive their value solely from their direct use of the road. The only "use" of a billboard occurs where the reflected image meets the eye—on the road; no good or service is provided at the location of the sign. As an official of the Outdoor Advertising Association of America testified: "The Outdoor Advertising Association members do not sell signs; they sell circulation."[4] The sign companies do nothing to create this "circulation;" it comes from the public's investment in roads and highways.

View from the Courts

The courts have long recognized that billboards represent a use of the roads rather than a use of private property. This doctrine was first held over 60 years ago in the case of *Churchill and Tait* v. *Rafferty.*[5]

"The success of billboard advertising depends not so much upon the use of private property as it does upon the use of the channels of travel used by the general public. Suppose that the owner of private property, who so vigorously objects to the restriction of this form of advertising, should require the advertiser to paste his posters upon the billboards so that they would fact the interior of the property instead of the exterior. Billboard advertising would die a natural death if this were done, and its real dependency not upon the unrestricted use of private property but upon the unrestricted use of the public highways is at once apparent. Ostensibly located on private property, the real and sole value of the billboard is its proximity to the public thoroughfares. Hence, we conceive that the regulation of billboards and their restriction is not so much a regulation of private property as it is a regulation of the use of the streets and other public thoroughfares."

this view has been reaffirmed many times in the intervening years, including the classic case *General Outdoor Advertising Company* v. *Department of Public Works.*[6]

"Outdoor advertising signs) constitute a franchise upon the public highways. . . (The billboard interests) are not asserting a natural right. . . They are seizing for private benefit an opportunity created for quite a different purpose by the expenditure of public monies."

In a recent case, *Modjeska Sign Studios, Inc.* v. *Berle,* the court stated.[7]

"Billboards and advertising signs are of little value and small use unless great highways bring the traveling public within view of them, and their enhanced value when they are seen by a large number of people was created by the State in the construction of the roads and not by the signs' owners."

Sign Industry Pricing Practices

Lease rates for off-premise outdoor advertising signs reflect this dependence on public streets and highways. For example, one large outdoor advertising company priced its 672 square foot painted signs in Chicago at $1,960 per month in 1981. These signs are "rotated" to a different location every 60 days and the company guaranteed an average monthly "circulation" of 1,236,000, or approximately 41,200 daily.[8] The same company offered the same size sign in the New York market for $2,700 monthly, while in San Antonio it was offered for $900 monthly. The differences in price were accounted for mostly by differences in circulation, that is, by the number of people travelling by the sign on public roads.

Another major company now prices their signs solely on the basis of traffic volumes, charging $1 per thousand monthly circulation for the 672 square foot painted bulletin.[9] The circulation figures are derived from traffic counts gathered by state and local governments.

Direct or Indirect Uses of the Roadways

Billboard owners and users usually contend that billboards benefit from the roads in the same fashion as do all highway-oriented businesses such as motels, restaurants, and gas stations—or even as businesses in general. This argument completely ignores the difference between direct and indirect uses of the roads.

Many types of businesses gain advantages from their close proximity to major highway, and particularly from nearness to important roadway junctions or interchanges. These considerations are a major factor in locational decisions—either because firms depend on motorists for their clientele or because they need easy access to roads for the transportation of goods. While quite important to many firms, these benefits are still indirectly derived and are almost impossible to measure with any degree of accuracy. The highway billboard, on the other hand, benefits directly and solely from its use of the roadway, and in direct relationship to the volume of traffic on the road. The outdoor advertising industry itself recognizes this direct relationship in its pricing policies.

THE NEED FOR A ROAD USER FEE ON BILLBOARDS

A national road user fee on billboards could provide a highway beautification fund to landscape roadsides, install and maintain motorist information systems, and to acquire billboards that are nonconforming under the Highway Beautification Act. Such a tax appears to hold the only hope for ever completing this removal program.

The Highway Beautification Act

Passed with much fanfare in 1965, the Highway Beautification Act was supposed to result in the removal of existing billboard clutter from rural roadsides and the prevention of its future spread.[10] It has accomplished neither objective.

Control of New Signs: The Act has been very ineffective in controlling the erection of new billboards along the Nation's rural roadsides. New signs were supposed to be erected only in areas of commercial or industrial use and were made subject to size, spacing and lighting criteria. Unfortunately for the stated objectives of the Act, the Secretary of Transportation was not allowed to set any national standards for size and spacing, but was to enter into agreements with the states based on "customary use." This has been defined in a rather curious way.

The Bureau of Public Roads first proposed a maximum size of 400 square feet for new signs, but later changed this to 650 square feet even though a national inventory showed that size larger than all but 1.85 percent of existing billboards.[11] Finally, the Federal Highway Administration developed a "model agreement" in cooperation with the Outdoor Advertising Association of America that was adopted by 32 states.[12] The "model agreement" set a maximum size limitation of 1,200 square feet, equal to the floor area of a medium-sized three bedroom house and approximately twice the size of the largest billboards normally erected along the Interstate system. The chief negotiator of the agreements and head of the Scenic Enhancement Division of the Federal Highway Administration, and who now is employed by the Outdoor Advertising Association of America as an "environmental consultant," later testified.[13]

"That size limit is the outer limit of what is used by the industry in major urban areas within the United States. . . . I doubt great-

Footnotes at end of article.

ly that more than one sign out of 2,000 now erected, or erected since those controls were established, even approaches that 1,200 square feet limit."

"Customary spacing" in the guidelines, and in most of the states, was defined as every 500 feet on the Interstate system, and every 300 feet on the primary system outside of municipalities, and every 100 feet on the primary system within municipalities. Under the spacing criteria it is possible to have 10.5 billboard sites per mile on each side of the road along an Interstate highway, a total of 21 sites on both sides. Since two faces are permitted at each site, 42 billboards per mile are allowed along any portion of the Interstate system that is zoned commercial or industrial. On the primary system the comparable figures are 35 sites and 70 faces per mile. Within municipalities the allowable sites reach the somewhat absurd level of 106 per mile with 212 possible sign faces. If each of these signs were of the maximum allowable size (1,200 square feet per site), the total area of the sign faces would be equal to approximately three football fields for each mile of roadway.[14] To contend that the size and spacing requirements serve as any effective control of signboards is obviously absurd.

Since the size and spacing requirements contained in most of the agreements amount to virtually no control of outdoor advertising, the designation of commercial and industrial areas becomes all important. Unfortunately, local zoning authorities often do not place great importance on providing an uncluttered view for the Interstate motorist. The real or imagined benefits to be derived for local business through billboard advertising usually assume a greater priority. In practice, therefore, many local communities, and particularly rural counties, have attempted to circumvent the Highway Beautification Act by zoning long stretches of rural highways as commercial and industrial areas. The absence of any requirement that such areas actually contain commercial or industrial land uses, and the acceptance by the Federal Highway Administration of such zoning makes this provision perhaps the largest loophole in the entire Highway Beautification Act.[15]

The designation of "unzoned commercial and industrial areas" is another huge loophole permitting billboards along predominantly rural roadsides. The original idea was that this designation would encompass areas that were easily recognizable to the average motorist as genuine commercial and industrial areas, but that were located in jurisdictions lacking comprehensive zoning. It has not turned out that way. A draft agreement proposed in 1966 would have defined such areas as two industrial or commercial activities located within a radius of 300 feet, and this concept was even endorsed by the Outdoor Advertising Association of America.[16] In the final agreements, however, the unzoned commercial or industrial area was usually defined as 800 feet each side of only one such activity.[17] In practice, even the most obscure commercial or industrial use will often serve to permit several new signs.

Removal of Nonconforming Signs: Communities have traditionally eliminated nonconforming signs through amortization under their police powers, that is, their powers of regulation.[18] Despite the fact that 22 states were already removing nonconforming billboards under the earlier Bonus Law through their use of the police power, the 1965 Act required payment of cash compensation to both the sign owner and owner of the land on which the sign was located. Congress justified this change in policy on the basis that controls were being extended to the primary system where outdoor advertising was long established. There is also considerable evidence, however, that the Congress did not fully understand the implication of this action. For example, during the debate Senator Muskie emphasized that:[19]

"Under the bill all that can be compensated for is whatever remains of the leaseholds or the unamortized values, so that if, in fact, the billboard has been completely amortized or the leasehold has expired, no compensation will be paid under the bill."

This, of course, is an exact description of the amortization principle that was being outlawed by the Act.

Subsequent experience has proven that Congress's belief that the value of nonconforming signs would generally decrease over time was not justified. To the contrary, the average compensation paid for the signboards has continually risen, even though the outdoor advertising industry has generally depreciated billboards over a period of 8 years or less for tax purposes. Lenient regulations regarding repair and refurbishment have allowed sign companies to continually rebuild and repair nonconforming signs and, in effect, perpetuate their life. Combined with unrealistically high sign appraisals, this has resulted in a continual increase in sign removal costs. A General Accounting Office report estimated future increases at 6 percent annually.[20] Experience has shown that this estimate is much too low, with the actual average costs of signs acquired under the program rising almost 13 percent annually between fiscal years 1976 and 1980.[21]

Congress made compensation mandatory for the removal of nonconforming signs, declared in a 1968 amendment that no signs are required to be removed unless the federal share of compensation is available, but has since failed to appropriate the funds necessary to complete the program within any reasonable time. The first sign removed under the beautification program was acquired in May 1971, nearly a year after the "final compliance date" of July 1, 1970, that was originally set in the Act for the removal of *all* nonconforming signs. Since 1971, approximately 107,000 nonconforming signs have been removed under the Act at a cost in excess of $150 million. Over 133,000 nonconforming billboards remain, along with approximately 54,000 illegal signs.[22]

Although according to the Federal Highway Administration, approximately 46 percent of the nonconforming signs have been removed, this figure gives a false impression regarding the status of the acquisition program. Most of the billboards removed have been small and obsolete signs of little value. Most of the larger and more valuable signs remain.

Public projects are normally planned so as to *maximize* the benefit-to-cost ratio; the billboard removal program *minimizes* the benefit-to-cost ratio. In 1976 Congress directed that the first priority for removal be signs voluntarily offered by the billboard companies, while other nonconforming signs along heavily traveled rural highways be the last removed. This strategy has resulted in the very limited funds that have been appropriated for highway beautification being dissipated to little benefit except to the outdoor advertising firms.

Furthermore, the Federal Highway Administration has ruled that beautification funds can be used to remove signs that are being acquired to make way for new construction. In other words, the meager monies available for beautification have been used to remove signs that would have otherwise been acquired with construction funds. In some states, over half of the "beautification" monies have been used in this way.

The FHWA recently estimated that completion of the beautification program would require an additional expenditure of approximately $995 million in 1980 dollars. With a 7 percent rate of inflation, the estimated cost to complete the program in 10 years would be $1.3 billion; a 20 year program was estimated to cost $1.9 billion. At a more realistic inflation rate of 13 percent, the comparable figures were $1.8 billion and $3.7 billion.[23] Even these estimates are too low, however, since they are based on an average cost of $1,808 per sign, less than recent acquisition costs and far less than required for the more valuable signs still to be acquired.

For fiscal year 1981 Congress appropriated $8.5 million for the sign program. Of this amount, $7.7 million was required for payments contractually obligated under the Bonus Act, leaving only $800,000 for sign removal. The F.Y. 1982 appropriation allocated only $500,000 for the beautification program, approximately $7.2 million less than required just for bonus payments. If the unrealistic and incorrect favorable assumptions are made that (1) the entire $500,000 could be used to acquire nonconforming signs, (2) the Federal Highway Administration's estimates of the cost to complete the program are correct, and (3) there will be no further inflation—in other words, make the most favorable possible assumptions—then this level of appropriations would fund the removal of all the currently nonconforming signs in slightly less than 2,000 years.

Even if the scope of the highway beautification program were significantly reduced by deregulating urban areas and much of the primary system, the cost of removing nonconforming billboards would still be far greater than the funds that Congress is likely to appropriate for this purpose. An alternative source of funding must be developed, therfore, if the program is ever to be completed. A road user fee on billboards can provide this financing source. Alternatively, or perhaps in conjunction with the national beautification program, state and local road user fees on billboards could provide a new source of revenue for these governmental units.[24]

IMPLEMENTATION

Unlike many proposed user fees or taxes, a road user fee on billboards would be relatively easy to implement. Almost all states issue billboard permits as part of their highway beautification programs, and this permitting system could easily be expanded to encompass all signs covered by the user fee. The fee itself would be based on the same two elements that the outdoor advertising industry uses to price their sign leases, (1) size of the sign, and (2) average daily traffic on the road by which the sign is located. Both data elements are quite easy to obtain. The size of signs can be determined from sign permits or simple measurement. Traffic data are collected regularly by state and local governments and are usually readily available for streets and highways on which billboards are likely to be located.

To see how this fee might be implemented, suppose a user fee is enacted equal to approximately 10 percent of gross revenues

where the standard painted bulletin of 672 square feet leases of $1 per 1,000 circulation daily. This means that the sign would lease for $365 annually ($0.543 per square foot) times the average daily traffic. Thus, a tax of $0.0543 per square foot per 1,000 average daily traffic (ADT) would constitute a tax of approximately 10 percent of gross revenue. Suppose further that this sign were located on a freeway with an ADT of 50,000. Under these assumptions the sign would lease for $18,250 annually and the road user fee would be calculated as follows:

(size of sign) × (ADT in 1000s) × (5.43¢) = (672) × (50) × (5.43¢) = $1,825.

For a second example, suppose that a standard poster panel of 300 square feet were located on a city street carrying 20,000 vehicles per day. If the lease rate was the same as above, the road user fee on this sign would be $326, calculated as follows:

(300) × (20) × (5.43¢) = $326.

TABLE I—NUMBER OF BILLBOARDS ON INTERSTATE AND PRIMARY SYSTEMS, NATIONWIDE TOTALS—1980

[Thousands]

	Total	Interstate	Primary
Conforming	209.6	32.5	177.1
Nonconforming	143.7	34.3	109.4
Total	353.3	66.8	286.5

Source: Federal Highway Administration, Nationwide Summary, Outdoor Advertising Controls—National Reassessment Data, September 1980.

TABLE II—ESTIMATED ANNUAL REVENUES FROM ROAD USER FEE

[Millions]

	Total	Interstate	Primary
Conforming	$66.3	$35.3	$31.0
Nonconforming	31.8	22.3	9.5
Total	98.1	57.6	40.5

A fee based on a percentage of gross lease revenues has some appeal, but would be much harder to implement than a fixed rate. The fixed rate eliminates the necessity for gathering sales data and also eliminates the problem of setting rates for advertiser-owned signs.

Estimation of Expected Revenues

It is not possible to accurately estimate potential revenues from a national user fee on billboards with currently available data. A rough estimate can be made from data gathered by the FHWA during their recent reassessment of the highway beautification program. These data, shown in Table I, indicate there were approximately 209.6 thousand conforming billboards on the Interstate and primary systems in 1980, along with 143.7 thousand nonconforming signs.

In order to make any estimate of potential revenues from the billboard user fee it is necessary to make assumptions regarding the size of these signs and the average daily traffic for the roads on which they are located. Assume the average conforming sign on the Interstate system is 500 square feet in size, and the average size on the primary system is 400 square feet. For noncomforming signs the comparable assumed sizes are 300 and 200 square feet. Further, assume that Interstate highways on which these signs are located carry an average of 40,000 vehicles per day and comparable primary highways 8,000.[25] Using these assumptions and the "example" rate of $0.0543 annually per square foot per 1,000 ADT, the estimated annual revenues from the user fee, as shown in Table II, total $98.1 million.

These estimates involve somewhat heroic assumptions based on inadequate data, but are still probably of reasonable accuracy. The $0.0543 rate used in making the estimate is an example and not a recommended rate. A user fee in the range of $0.05 and $0.10 per square foot per 1,000 ADT would probably represent a 10 to 13 percent tax on gross revenues from the billboards.

SUMMARY

Off premise outdoor advertising signs (billboards) derive their economic value solely from their direct use of the public streets and highways. They are also the major direct users of the road that have escaped road user fees. A road user fee on billboards based on size of sign and average daily traffic on the road along which the billboard is located would be relatively easy to administer, and such a fee could generate the monies necessary to fund the highway beautification program. Alternatively, the user fee could be used for other transportation or general governmental purposes.

THE SOVIET-CUBAN MILITARY THREAT TO THE SOUTH

● Mr. EAST. Mr. President, the continuing controversy over our policy of support for the elected Government of El Salvador against the Communist terrorists armed and trained by Cuba and the Soviet Union and controlled by Nicaragua has a dimension that is of direct importance to the United States. That dimension does not concern the security of Central America, as vital as that is to our own borders and security, but rather the safety of our own, mainland cities within the United States itself.

The Communist war for Central America and the Caribbean region is clearly related to the Soviet and Cuban designs against the United States. Once the Communists have toppled our neighbors to the South, they will be in a position for direct action against North America under an umbrella of a nuclear threat by proxy.

In today's Washington Times, Virginia Prewett, one of America's most experienced and knowledgeable journalists and Latin American experts, discusses the growing Soviet military presence in Cuba and the adjacent regions—Grenada, Suriname, Guyana, and Nicaragua. Miss Prewett demonstrates that the supply of advanced military weapons systems to Cuba presents an almost insuperable threat to the United States itself, due to the lack of time available to our own defense systems to protect against a surprise attack from Cuba or neighboring areas.

Mr. President, the threat in Central America has now gone beyond our humane concern for the free peoples of El Salvador and the victims of Communist tyranny in Nicaragua. Those concerns are legitimate, but the threat now and in the future will be our own cities and peoples. Regardless of whether the Cubans and their Soviet masters actually use the advance weapons systems being introduced in the Caribbean, their very presence in

the region will serve to intimidate our policymakers and the American people and to induce in us the fear and spirit of appeasement that now weakens our allies in Western Europe.

Mr. President, I commend Virginia Prewett's column to my colleagues, and I ask that it be printed in the CONGRESSIONAL RECORD.

The column follows:

[From the Washington Times, Mar. 6, 1983]

THE SOVIET-CUBAN MILITARY THREAT TO THE SOUTH

(By Virginia Prewett)

As if to underline recent Soviet threats to "surprise" the United States in its own New World neighborhood. Moscow, is sending Castro four new submarines, tripling his present fleet of two, according to authoritative leaks. U.S. Senate sources recently confirmed that Castro will also get other major offensive weapons—four 5,100 mile TU-95 Bear reconnaissance/bomber jets.

Both gifts dramatically increase Cuba's arsenal of offensive Soviet-made Weapons, all of which violate the 1962 Kennedy-Khrushchev agreement binding Russia never to send Castro offensive weapons.

Castro already has MiG-23s that can be modified to carry the Kitchen missile, which has a nuclear warhead 10 times more powerful than the Hiroshima bomb and which can reach a target up to 480 miles away at about 3,000 miles an hour. But the MiG-23's combat loaded radius is only 240 miles, and this does not make it an impressive chip in Moscow's game of nuclear threat. Nevertheless, even without the kitchen, MiG-23s are offensive weapons and with the two Foxtrot attack submarines already given to Castro grossly violate the Kennedy-Khrushchev agreement.

But if TU-95s duly appear in the New World with Castro's colors, or if the submarines on the way are missile subs—say Echo IIs—then the U.S. mainland will be in unprecedented jeopardy.

A TU-95 or an Echo II can easily be equipped in Cuba with weapons with 800-kiloton nuclear warheads, each four times as powerful as the Kitchen and 40 times as destructive as the Hiroshima bomb. Either the plane or the sub can launch its missile from a position so close to a U.S. target that our defenders would have no time to knock it down. Jimmy Carter, for "economy," had our last quick-acting close-in defense system, which was in Florida, dismantled in 1978 and 1979.

U.S. defense against Russia's very-long-range or intercontinental ballistic missiles depend on our stated policy of answering a Russian nuclear attack with a shower of our own ICBMs on their population. We reinforce this stand-off with systems to spot, identify, attack and destroy their ICBMs on their long journey toward our cities.

But a TU-95 in Cuba fitted overnight with the deadly, if short-range (385-mile), Kangaroo missile, or an Echo II sub surreptitiously loaded at its Cuban base with Shaddock missiles with the same warhead, can slip into a position to incinerate a U.S. city before our interceptors can scramble, confirm the firing of a missile, and catch it and knock it down.

It takes five minutes for the scramble alone. The Kangaroo can travel 175 miles from its launching point in that time. A TU-95 can easily carry a Kangaroo from Cuba to menace Washington, D.C., or any seaboard city from Galveston to Eastport, Maine.

But let's concede a slim chance that our interceptors might get lucky once. Suppose a TU-95 with its Kangaroo missile threatens Norfolk, Charleston or Boston, but by a miracle both plane and missile get knocked down. Then an Echo II sub with its Shaddock, as powerful as the Kangaroo but with more range—540 miles—can pop its nuke to destroy Key West in less than five minutes, slide back into its "hardened" man-made cave at Cienfuegos, Cuba—and celebrate.

If the United States then blasts Cuba, a Cuban Kangaroo-bearing TU-95 fortuitiously visiting friendly Nicaragua or on a "show-and-tell" visit to Mexico City, can divert to the Rio Grande, launch its missile to level Galveston, and flee south. The United States certainly would not knock it down preventively over Mexican territory.

The preceding is the essence of the "five-minute threat" against us to retain the edge in menace or psychological terror in Western Europe that Russia has gained by aiming intermediate-range ballistic missiles at Europe. Moscow is trying to browbeat us and our population into not supplying our Western European allies with IRBMs and cruise missiles to balance the Soviet threats. Our allies have asked for and Reagan has promised to deploy the answering missiles this year.

A central fact in this chess game of threat is that Moscow can send TU-95s or Echo IIs to visit Cuba, as it often has, and then turn them over to Castro with a penstroke. (Six TU-95s are making back-to-back visits to Cuba this year.) Castro can paint his emblem on the offensive bombers overnight, while fitters rig the big planes to deliver Kangaroos, and order already-trained Cubans to arm shaddock missiles on the subs. And at dawn, many U.S. cities will face a nuclear threat against which we have no defense.

Neglect of our New World defense for 20 years by both Democrats and Republicans, plus tolerance of Moscow's military buildups in Cuba, have in practical terms deprived us of an advantage our population has enjoyed above all major nations: invulnerability to major attacks from enemies nearby.

The Soviets and Castro are ringing the United States on the south just as the Soviets and the Warsaw Pact satellite nations have ringed Western Europe on the east. In Cuba alone, the Soviet-Cuban axis has built 10 major military airbases and four significant naval installations.

One underground airbase near Havana is "hardened," as are underwater submarine pens at Cienfuegos. "Hardened" means protected by layers of reinforced concrete so thick that it would take a nuclear "pulse"—barrage—to neutralize the facility.

And the Soviet-Cuban axis has built or is building 26 military bases in Nicaragua, improving two ports and three big airstrips there for military use. On Grenada, Cubans are completing two airstrips side by side—one long, the other short—while militarizing a shipping haven.

In early 1982, this writer saw aerial photos of 10 military-type airstrips being built in the wilds of backland Guyana, Venezuela's leftist neighbor. Hemisphere intelligence services have confirmed their construction.

Thus, since 1959, when Castro took power, "Little Cuba," as Moscow's ally, has penetrated the New World with at least 58 new military installations in four nearby nations, all of which today reinforce overt Soviet military threats against our population.

And as Deputy Assistant Secretary of Defense Nestor Sanchez said in a recent speech, Castro also has projected his military aid and other assistance into "Libya, Iraq, South Yemen, Angola, Ethiopia, the Congo, Mozambique and Vietnam, among others."●

THE MYTH OF SMOOT-HAWLEY

● Mr. HEINZ. Mr. President, every time someone in the administration or the Congress gives a speech about a more aggressive trade policy or the need to confront our trading partners with their subsidies, barriers to imports and other unfair practices, others, often in the academic community or in the Congress immediately react with speeches on the return of Smoot-Hawley and the dark days of blatant protectionism. "Smoot-Hawley," for those uninitiated in this arcane field, is the Tariff Act of 1930 (Public Law 71-361) which among other things imposed significant increases on a large number of items in the Tariff Schedules. The act has also been, for a number of years, the basis of our countervailing duty law and a number of other provisions relating to unfair trade practices, a fact that tends to be ignored when people talk about the evils of Smoot-Hawley.

A return to Smoot-Hawley, of course, is intended to mean a return to depression, unemployment, poverty, misery, and even war, all of which, apparently were directly caused by this awful piece of legislation. Smoot-Hawley has thus become a code word for protectionism, and in turn a code word for depression and major economic disaster. Those who sometimes wonder at the ability of Congress to change the country's direction through legislation must marvel at the sea change in our economy apparently wrought by this single bill in 1930.

Historians and economists, who usually view these things objectively, realize that the truth is a good deal more complicated, that the causes of the depression were far deeper, and that the link between high tariffs and economic disaster is much more tenuous than is implied by this simplistic linkage. Now, however, someone has dared to explode this myth publicly through an economic analysis of the actual tariff increases in the act and their effects in the early years of the depression. The study points out that the increases in question affected only 231 million dollars' worth of products in the second half of 1930, significantly less than 1 percent of world trade; that in 1930-32 duty-free imports into the United States dropped at virtually the same percentage rate as dutiable imports; and that a 13.5 percent drop in GNP in 1930 can hardly be blamed on a single piece of legislation that was not even enacted until midyear.

This, of course, is not to suggest that high tariffs are good or that Smoot-Hawley was a wise piece of legislation. It was not. But it was also clearly not responsible for all the ills of the 1930's that are habitually blamed on it by those who fancy themselves defenders of free trade. While I believe this study does have some policy implications, which I may want to discuss at some future time, one of the most useful things it may do is help us all clean up our rhetoric and reflect a more sophisticated—and accurate—view of economic history.

Mr. President, I ask that the study, by Don Bedell of Bedell Associates, be printed in the RECORD.

The study follows:

BEDELL ASSOCIATES,
Palm Desert, Calif., April 1983.

TARIFFS MISCAST AS VILLAIN IN BEARING BLAME FOR GREAT DEPRESSION—SMOOT/HAWLEY EXONERATED

(By Donald W. Bedell)

SMOOT/HAWLEY, DEPRESSION AND WORLD REVOLUTION

It has recently become fashionable for media reporters, editorial writers here and abroad, economists, Members of Congress, members of foreign governments, UN organizations and a wide variety of scholars to express the conviction that the United States, by the single act of causing the Tariff Act of 1930 to become law (Public Law 361 of the 71st Congress) plunged the world into an eonomic depression, may well have prolonged it, led to Hitler and World War II.

Smoot/Hawley lifted import tariffs into the U.S. for a cross section of products beginning mid-year 1930, or more than 8 months following the 1929 financial collapse. Many observers are tempted simply to repeat "free trade" economic doctrine by claiming that this relatively insignificant statute contained an inherent trigger mechanism which upset a neatly functioning world trading system based squarely on the theory of comparative economics, and which propelled the world into a cataclysm of unmeasurable proportions.

We believe that sound policy development in international trade must be based solidly on facts as opposed to suspicions, political or national bias, or "off-the-cuff" impressions 50 to 60 years later of how certain events may have occurred.

When pertinent economic, statistical and trade data are carefully examined will they show, on the basis of preponderance of fact, that passage of the Act did in fact trigger or prolong the Great Depression of the Thirties, that it had nothing to do with the Great Depression, or that it represented a minor response of a desperate nation to a giant world-wide economic collapse already underway?

It should be recalled that by the time Smoot/Hawley was passed 6 months had elapsed of 1930 and 8 months had gone by since the economic collapse in October, 1929. Manufacturing plants were already absorbing losses, agriculture surpluses began to accumulate, the spectre of homes being foreclosed appeared, and unemployment showed ominous signs of a precipitous rise.

The country was stunned, as was the rest of the world. All nations sought very elusive solutions. Even by 1932, and the Roosevelt election, improvisation and experiment described government response and the technique of the New Deal, in the words of Arthur Schlesinger, Jr. in a New York Times article on April 10, 1983. President Roosevelt himself is quoted in the article as saying in the 1932 campaign, "It is common sense to take a method and try it. If it fails, admit it frankly and try another. But above all, try something."

The facts are that, rightly or wrongly, there were no major Roosevelt Administration initiatives regarding foreign trade until well into his Administration; thus clearly suggesting that initiatives in that sector were not thought to be any more important than the Hoover Administration thought them. However, when all the numbers are examined we believe neither President Hoover nor President Roosevelt can be faulted for placing international trade's role in world economy near the end of a long list of sectors of the economy that had caused chaos and suffering and therefore needed major corrective legislation.

How important was international trade to the U.S.? How important was U.S. trade to its partners in the Twenties and Thirties?

In 1919, 66 percent of U.S. imports were duty free, or $2.9 Billion of a total of $4.3 Billion. Exports amounted to $5.2 Billion in that year making a total trade number of $9.6 Billion or about 14 percent of the world's total. See Chart I below.

CHART I.—U.S. GROSS NATIONAL PRODUCT, 1929–33

[Dollar amounts in billions]

	1929	1930	1931	1932	1933
GNP	$103.4	$89.5	$76.3	$56.8	$55.4
U.S. international trade	$9.6	$6.8	$4.5	$2.9	$3.2
U.S. international trade percent of GNP	9.3	7.6	5.9	5.1	[1] 5.6

[1] Series U., Department of Commerce of the United States, Bureau of Economic Analysis.

Using the numbers in that same Chart I it can be seen that U.S. imports amounted to $4.3 Billion or just slightly above 12 percent of total world trade. When account is taken of the fact that only 33 percent, or $1.5 Billion, of U.S. imports was in the Dutiable category, the entire impact of Smoot/Hawley has to be focused on the $1.5 Billion number which is barely 1.5 percent of U.S. GNP and 4 percent of world imports.

What was the impact? In dollars Dutiable imports fell by $462 Million, or from $1.5 Billion to $1.0 Billion, during 1930. It's difficult to determine how much of that small number occurred in the second half of 1930 but the probability is that it was less than 50 percent. In any case, the total impact of Smoot/Hawley in 1930 was limited to a "damage" number of $231 Million; spread over several hundred products and several hundred countries!

A further analysis of imports into the U.S. discloses that all European countries accounted for 30 percent or $1.3 Billion in 1929 divided as follows: U.K. at $330 Million or 7½ percent, France at $171 Million or 3.9 percent, Germany at $255 Million or 5.9 percent, and some 15 other nations accounting for $578 Million or 13.1 percent for an average of 1 percent.

These numbers suggest that U.S. imports were spread broadly over a great array of products and countries, so that any tariff action would by definition have only a quite modest impact in any given year or could be projected to have any important cumulative effect.

This same phenomenon is apparent for Asian countries which accounted for 29 percent of U.S. imports divided as follows: China at 3.8 percent, Japan at $432 Million and 9.8 percent, and with some 20 other countries sharing in 15 percent or less than 1 percent on average.

Australia's share was 1.3 percent and all African countries sold 2.5 percent of U.S. imports.

Western Hemisphere countries provided some 37 percent of U.S. imports with Canada at 11.4 percent, Cuba at 4.7 percent, Mexico at 2.7 percent, Brazil at 4.7 percent and all others accounting for 13.3 percent or about 1 percent each.

The conclusion appears inescapable on the basis of these numbers; a potential adverse impact of $231 Million spread over the great array of imported products which were Dutiable in 1929 could not realistically have had any measurable impact on America's trading partners.

Meanwhile, the Gross National Product (GNP) in the United States had dropped an unprecedented 13.5 percent in 1930 alone, from $103.4 Billion in 1929 to $89 Billion by the end of 1930. It is unrealistic to expect that a shift in U.S. international imports of just 0.2 percent of U.S. GNP in 1930 for example ($231 Million on $14.4 Billion) could be viewed as establishing a "precedent" for America's trading partners to follow, or represented a "model" to follow.

Even more to the point an impact of just 0.2 percent could not reasonably be expected to have any measurable effect on the economic health of America's trading partners.

Note should be taken of the claim by those who repeat the Smoot/Hawley "villain" theory that it set off a "chain" reaction around the world. While there is some evidence that certain of America's trading partners retaliated against the U.S. there can be no reliance placed on the assertion that those same trading partners retaliated against each other by way of showing anger and frustration with the U.S. Self-interest alone would dictate otherwise, common sense would intercede on the side of avoidance of "shooting oneself in the foot," and the facts disclose that world trade declined by 18 percent by the end of 1930 while U.S. trade declined by some 10 percent more or 28 percent. U.S. foreign trade continued to decline by 10 percent more through 1931, or 53 percent versus 43 percent for world-wide trade, but U.S. share of world trade declined by only 18 percent from 14 percent to 11.3 percent by the end of 1931.

Reference was made earlier to the Duty Free category of U.S. imports. What is especially significant about those import numbers is the fact that they dropped in dollars by an almost identical percentage as did Dutiable goods through 1931 and beyond: Duty Free imports declined by 29 percent in 1930 versus 27 percent for Dutiable goods, and by the end of 1931 the numbers were 52 percent versus 51 percent respectively.

The only rational explanation for this phenomenon is that Americans were buying less and prices were falling. No basis exists for any claim that Smoot/Hawley had a distinctively devastating effect on imports beyond and separate from the economic impact of the economic collapse in 1929.

Based on the numbers examined so far, Smoot/Hawley is clearly a mis-cast villain. Further, the numbers suggest the clear possibility that when compared to the enormity of the developing international economic crisis Smoot/Hawley had only a minimal impact and and international trade was a victim of the Great Depression.

This possibility will become clear when the course of the Gross National Product (GNP) during 1929–1933 is examined and when price behaviour world-wide is reviewed, and when particular Tariff Schedules of Manufacturers outline in the legislation are analyzed.

Before getting to that point another curious aspect of the "villain" theory is worthy of note. Without careful recollection it is tempting to view a period of our history some 50–60 years ago in terms of our present world. Such a superficial view not only makes no contribution to constructive policy-making. It overlooks several vital considerations which characterized the Twenties and Thirties:

1. The international trading system of the Twenties bears no relation to the interdependent world of the Eighties commercially, industrially and financially in size or complexity.

2. No effective international organization existed, similar to the General Agreement for Tariffs and Trade (GATT) for example for resolution of disputes. There were no trade "leaders" among the world's nations in part because most mercantile nations felt more comfortable without dispute settlement bodies.

3. Except for a few critical products foreign trade was not generally viewed in the "economy-critical" context as currently in the U.S. As indicated earlier neither President Hoover nor President Roosevelt viewed foreign trade as crucial to the economy in general or recovery in particular.

4. U.S. foreign trade was relatively an amorphous phenomenon quite unlike the highly structured system of the Eighties; characterized largely then by "caveat emptor" and a broadly laissez-faire philosophy generally unacceptable presently.

These characteristics, together with the fact that 66 percent of U.S. imports were Duty Free in 1929 and beyond, placed overall international trade for Americans in the Twenties and Thirties on a very low level of priority especially against the backdrop of world-wide depression. Americans in the Twenties and Thirties could no more visualize the world of the Eighties than we in the Eighties can legitimately hold them responsible for failure by viewing their world in other than the most pragmatic and realistic way given those circumstances.

For those Americans then, and for us now, the numbers remain the same. On the basis of sheer order of magnitude of the numbers illustrated so far, the "villian" theory often attributed to Smoot/Hawley is an incorrect reading of history and a misunderstanding of the basic and incontrovertible law of cause and effect.

It should also now be recalled that, despite heroic efforts by U.S. policy-makers its GNP continued to slump year-by-year and reached a total of just $55.4 billion in 1933 for a total decline from 1929 levels of 46 percent. The financial collapse of October, 1929 had indeed left its mark.

By 1933 the 1929 collapse had prompted formation in the U.S. of the Reconstruction Finance Corporation, Federal Home Loan Bank Board, brought in a Democrat President with a program to take control of banking, provide credit to property owners and corporations in financial difficulties, relief to farmers, regulation a stimulation of business, new labor laws and social security legislation.[2]

[2] Beard, Charles and Mary, New Basic History of the United States.

So concerned were American citizens about domestic economic affairs, including the Roosevelt Administration and the Congress, that scant attention was paid to the solitary figure of Secretary of State Cordell Hull. He, alone among the Cabinet, was conviced that international trade had material relevance to lifting the country back from depression. His efforts to liberalize trade in general and to find markets abroad for U.S. products in particular from among representatives of economically stricken Europe, Asia and Latin America were abruptly ended by the President and the 1933 London Economic Conference collapsed without result.

The Secretary did manage to make modest contributions to eventual trade recovery through the Most Favored Nation (MFN) concept. But it would be left for the United States at the end of World War II to undertake an economic and political role of leadership in the world; a role which in the Twenties and Thirties Americans in and out of government felt no need to assume, and did not assume. Evidence that conditions in the trade world would have been better, or even different, had the U.S. attempted some leadership role can not responsibly be assembled. Changing the course of past history has always been less fruitful than applying perceptively history's lessons.

The most frequently used members thrown out about Smoot/Hawley's impact by those who believe in the "villain" theory are those which clearly establish that U.S. dollar decline in foreign trade plummeted by 66 percent by the end of 1933 from 1929 levels, $9.6 billion to $3.2 billion annually.

Much is made of the co-incidence that world-wide trade also sank about 66 percent for the period. Chart II summarizes the numbers.

CHART II.—UNITED STATES AND WORLD TRADE, 1929–33

[In billions of U.S. dollars]

	1929	1930	1931	1932	1933
United States:					
Exports	5.2	3.8	2.4	1.6	1.7
Imports	4.4	3.0	2.1	1.3	1.5
Worldwide:					
Exports	33.0	26.5	18.9	12.9	11.7
Imports	35.6	29.1	20.8	14.0	[a] 12.5

[a] Series U. Department of Commerce of the United States, League of Nations, and International Monetary Fund.

The inference is that since Smoot/Hawley was the first "protectionist" legislation of the Twenties, and the end of 1933 saw an equal drop in trade that Smoot/Hawley must have caused it. Even the data already presented suggest the relative irrelevance of the tariff-raising Act on a strictly trade numbers basis. When we examine the role of a world wide price decline in the trade figures for almost every product made or commodity grown the "villain" Smoot/Hawley's impact will not be measurable.

It may be relevant to note here that the world's trading "system" paid as little attention to America's revival of foreign trade beginning in 1934 as it did to American trade policy in the early Thirties. From 1934 through 1939 U.S. foreign trade rose in dollars by 80% compared to world-wide growth of 15%. Imports grew by 68% and exports climbed by a stunning 93%. U.S. GNP by 1939 had developed to $91 Billion, to within 88% of its 1929 level.

Perhaps this suggests that America's trading partners were more vulnerable to an economic collapse and thus much less resilient than was the U.S. In any case the international trade decline beginning as a result of the 1929 economic collapse, and the subsequent return by the U.S. beginning in 1934 appear clearly to have been wholly unrelated to Smoot/Hawley.

As we begin to analyze certain specific Schedules appearing in the Tariff Act of 1930 it should be noted that sharp erosion of prices world-wide caused dollar volumes in trade statistics to drop rather more than unit volume thus emphasizing the decline value. In addition, it must be remembered that as the Great Depression wore on, people simply bought less of everything increasing further price pressure downward. All this wholly apart from Smoot/Hawley.

When considering specific Schedules, No. 5 which includes Sugar, Molasses, and Manufactures Of, maple sugar cane, sirups, adonite, dulcite, galactose, inulin, lactose and sugar candy. Between 1929 and 1933 import volume into the U.S. declined by about 40% in dollars. In price on a world basis producers suffered a stunning 60% drop. Volume of sugar imports declined by only 42% into the U.S. in tons. All these changes lend no credibility to the "villain" theory unless one assumes, erroneously, that the world price of sugar was so delicately balanced that a 28% drop in sugar imports by tons into the U.S. in 1930 destroyed the price structure and that the decline was caused by tariffs and not at least shared by decreased purchases by consumers in the U.S. and around the world.

Schedule 4 describes Wood and Manufactures Of, timber hewn, maple, brier root, cedar from Spain, wood veneer, hubs for wheels, casks, boxes, reed and rattan, toothpicks, porch furniture, blinds and clothespins among a great variety of product categories. Dollar imports into the U.S. slipped by 52% from 1929 to 1933. By applying our own GNP as a reasonable index of prices both at home and overseas, unit volume decreased only 6% since GNP had dropped by 46% in 1933. The world-wide price decline did not help profitability of wood product makers, but to tie that modest decline in volume to a law affecting only 6½% of U.S. imports in 1929 puts great stress on credibility, in terms of harm done to any one country or group of countries.

Schedule 9, Cotton Manufactures, a decline of 54% in dollars is registered for the period, against a drop of 46% in price as reflected in the GNP number. On the assumption that U.S. GNP constituted a rough comparison to world prices, and the fact that U.S. imports of these products was infinitesimal. Smoot/Hawley was irrelevant. Further, the price of raw cotton in the world plunged 50% from 1929 to 1933. U.S. growers had to suffer the consequences of that low price but the price itself was set by world market prices, and was totally unaffected by any tariff action by the U.S.

Schedule 12 deals with Silk Manufactures, a category which decreased by some 60% in dollars. While the decrease amounted to 14% more than the GNP drop, volume of product remained nearly the same during the period. Assigning responsibility to Smoot/Hawley for this very large decrease in price beginning in 1930 stretches credibility beyond the breaking point.

Several additional examples of price behaviour are relevant.

One is Schedule 2 products which include brick and tile. Another is Schedule 3 iron and steel products. One outstanding casualty of the financial collapse in October, 1929 was the Gross Private Investment number. From $16.2 Billion annually in 1929 by 1933

it has fallen by 91% to just $1.4 Billion. No tariff policy, in all candor, could have so devastated an industry as did the economic collapse of 1929. For all intents and purposes construction came to a halt and markets for glass, brick and steel products with it.

Another example of price degradation world-wide completely unrelated to tariff policy is Petroleum products. By 1933 these products had decreased in world price by 82% but Smoot/Hawley had no Petroleum Schedule. The world market place set the price.

Another example of price erosion in world market is contained in the history of exported cotton goods from the United States. Between 1929 and 1933 the volume of exported goods actually increased by 13.5% while the dollar value dropped 48%. This result was wholly unrelated to the tariff policy of any country.

While these examples do not include all Schedules of Smoot/Hawley they clearly suggest that overwhelming economic and financial forces were at work affecting supply and demand and hence on prices of all products and commodities and that these forces simply obscured and measurable impact the Tariff Act of 1930 might possibly have had under conditions of several years earlier.

To assert otherwise puts on those proponents of the Smoot/Hawley "villian" theory a formidable challenge to explain the following questions:

1. What was the nature of the "trigger" mechanism in the Act that set off the alleged domino phenomenon in 1930 that began or prolonged the Great Depression when implementation of the Act did not begin until mid-year?

2. In what ways was the size and nature of U.S. foreign trade in 1929 so significant and critical to the world economy's health that a less than 4% swing in U.S. imports could be termed a crushing and devastating blow?

3. On the basis of what economic theory can the Act be said to have caused a GNP drop of an astounding drop of 13.5% in 1930 when the Act was only passed in mid-1930? Did the entire decline take place in the second half of 1930? Did world-wide trade begin its decline of some $13 Billion only in the second half of 1930?

3. Does the fact that duty free imports into the U.S. dropped in 1930 and 1931 and in 1932 at the same percentage rate as dutiable imports support the view that Smoot/Hawley was the cause of the decline in U.S. imports?

4. Is the fact that world-wide trade declined less rapidly than did U.S. foreign trade prove the assertion that American trading partners retaliated against each other as well as against the U.S. because and subsequently held the U.S. accountable for starting an international trade war?

5. Was the international trading system of the Twenties so delicately balanced that a single hastily drawn tariff increase bill affecting just $231 Million of dutiable products in the second half of 1930 began a chain reaction that scuttled the entire system? Percentage-wise $231 Million is but 0.65% of all of 1929 world-wide trade and just half that of world-wide imports:

The preponderance of history and facts of economic life in the international area make an affirmative response by the "villain" proponents an intolerable burden.

It must be said that the U.S. does offer a tempting target for Americans who incessantly cry "mea culpa" over all the world's problems, and for many among our trading partners to explain their problems in terms of perceived American inability to solve those problems.

In the world of the Eighties U.S. has indeed very serious and perhaps grave responsibility to assume leadership in international trade and finance, and in politics as well.

On the record, the United States has met that challenge beginning shortly after World War II.

The U.S. role in structuring the United Nations, the General Agreement on Tariffs and Trade (GATT), the International Monetary Fund, the Bretton Woods and Dumbarton Oaks Conferences on monetary policy, the World Bank and various Regional Development Banks, for example, is a record unparalleled in the history of mankind.

But in the Twenties and Thirties there was no acknowledged leader in international affairs. On the contrary, evidence abounds that most nations preferred the centuries-old patterns of international trade which emphasized pure competition free from interference by any effective international supervisory body such as GATT.

Even in the Eighties examples abound of trading nations succumbing to nationalistic tendencies and ignoring signed trade agreements. Yet the United States continues as the bulwark in trade liberalization proposals within the GATT. It does so not because it could not defend itself against any kind of retaliation in a worst case scenario but because no other nation is strong enough to support them successfully without the United States.

The basic rules of GATT are primarily for all those countries who can't protect themselves in the world of the Eighties and beyond without rule of conduct and discipline.

The attempt to assign responsibility to the U.S. in the Thirties for passing the Smoot/Hawley tariff act and thus set off a chain reaction of international depression and war is, on the basis of a preponderance of fact, a serious mis-reading of history, a repeal of the basic concept of cause and effect and a disregard for the principle of proportion of numbers.

It may constitute a fascinating theory for political mischief-making but it is a cruel hoax on all those responsible for developing new and imaginative measures designed to liberalize international trade.

Such constructive development and growth is severely impeded by perpetuating what is no more than a symbolic economic myth.

Nothing is less worthwhile than attempting to re-write history, not learning from it. Nothing is more worthwhile than making careful and perceptive and objective analysis in the hope that it may lead to an improved and liberalized international trading system.●

THE THIRD WORLD DEBT

Mr. EAST. Mr. President, as the Congress of the United States is drawing closer to the date when we will decide whether to increase our support for the IMF by $8½ billion, I believe that we need to keep the facts of the situation in mind. There is an article in the Washington Times of May 6, 1983, that provides an excellent outline of the matter. It describes the explosive growth of the debt of the Third World nations, the efforts of those who demand that the West compound the problem by handing over more of our wealth to those less developed countries that have proven to be incapable of managing their economies, and the smooth arguments of the banking industry that all will be well if we will only put our trust in the industry that all will be well if we will only put our trust in the experts who got us into this mess. The article then proceeds to refute this sophistry by explaining some facts that many have ignored. The IMF is sitting on a pile of gold that is worth more than the total proposed increase in contributions, the problems of those LDC's that are in trouble is due to socialism and fiscal irresponsibility, and the Western banks that are overextended must take their chances in the marketplace.

Mr. President, I ask that the article entitled "West presses efforts to halt 'time bomb' of Third World debt" be printed in the Record following my comments.

WEST PRESSES EFFORTS TO HALT "TIME BOMB" OF THIRD WORLD DEBT

(By Steven K. Beckner)

Convinced that a Third World debt bomb threatens to devastate the international banking system and the global economy, Western governments are trying to defuse it.

The industrial countries' current strategy relies primarily on resource transfers to the Less Developed Countries (LDCs)—an approach influenced heavily by the Brandt Commission, a group of present and former government officials led by Willy Brandt, ex-chancellor of West Germany and chairman of its Social Democratic Party.

In a February manifesto, the commission warned that Third World financial woes threaten to plunge the planet into "a depression comparable only to the crisis of half a century ago." It recommended a concerted reflation of the world economy, a massive transfusion of aid to developing countries and expansion of the International Monetary Fund.

Not only should the IMF's capital base be doubled, but it should act as the world's central bank with an expansionary global monetary policy, the commission contends. As a step in this direction, the report says, the IMF should allocate annually up to 12 billion Special Drawing Rights—its basket currency creation.

The commission also recommends expanded long-term, concessionary lending by the World Bank to supplement the IMF's short-term balance of payments loans. It encourages Western central banks, in cooperation with international agencies, to provide bridge loans and to coordinate continued commercial bank lending.

The Brandt Commission theme, which closely resembles the Third World's agenda, has been echoed repeatedly. Washington's Institute for International Economics has called on the IMF to lend on a substantial scale and to undertake a "resumption of SDR allocations." The institute, headed by former Assistant Treasury Secretary C. Fred Bergsten, suggests "a sharp increase in the structual adjustment leading of the World Bank" and urges commercial banks to "increase their net lending to developing countries by some 5-10 percent overall over

the past 12 months." Much of this program already is being carried out. In February, the United States and other nations voted a 47.5 percent increase in their quota contributions to the IMF (to about $99 billion) and approved a tripling of a special fund, the General Agreements to Borrow.

An SDR allocation could be in the works. Unlike IMF quotas, which are pledges of currenty that the 146 members nations make to the fund, SDRs are monetary units which the IMF creates and distributes to its members. To date, 21.4 billion SDRs, worth about $23.5 billion, have been created.

Third World leaders have long clammored for large new allocations of SDRs, which they could exchange for hard currencies or borrow against to pay their debts. In the past, this has been opposed as an inflationary increase in world liquidity. But in the present mood, some amount of SDR allocations is likely to be approved. An 85 percent majority on the IMF board of governors is required, so the United States with its 19.52 percent voting shares can veto any allocation.

A knowlegeable IMF official said there is no plan for an SDR allocation, adding the question is under constant review and has considerable support from a lot of quarters. The sourse said the IMF's research department is preparing a study for presentation at the IMF's annual meeting in September.

Meanwhile, the capital of the World Bank is being doubled to an estimated $85 billion to $90 billion by 1986. Last week, bank President A. W. Clausen, former president of the Bank of America, endorsed a further $40 billion ordinary capital increase in 1986, and suggested a $20 billion selective capital boost to tide the agency over until then. Negotiations also are underway to raise the funding of the International Development Association, a soft loan affiliate of the World Bank.

The U.S. Treasury and Federal Reserve together with foreign central banks last fall provided more than $6 billion in short-term credits to Brazil and Mexico while they were negotiation loan packages with the IMF and commercial banks.

Finance ministers from the developing countries meeting in Washington last week asserted in a communique that these efforts are inadequate.

But another school of thought holds that the debt bomb doesn't have as much megatonnage as many fear and that, in any case, the best way of disarming it is not a barrage of aid dollars. This school maintains that the developing countries themselves are largely responsible for their economic predicament.

There is a growing recognition that the LDCs must adjust their economic policies. "The longer countries postpone adjustment, the greater the deterioriation in their economic situation becomes and, hence, the more difficult it is to turn their external payments position around," said IMF Managing Director Jacques de Larosiere in a March speech.

Central to the IMF's role are its loan conditions, which typically ask debtor countries to curtail excessive monetary expansion and budget deficits, set their currency exchange rates at realistic levels and avoid uneconomic price and interest rate policies. Proponents of heightened aid charge that the IMF is too restrictive and promote a shift toward more unconditional and concessionary financing by the World Bank and regional development banks.

Others assert that even the relatively conservative IMF is unworthy of increased support. "The IMF already has substantial unused financial resources and the power to create and raise additional billions of dollars," writes Robert E. Weintraub, senior economist for the Joint Economic Committee in a newly published study. With 100 million ounces of gold, $8 billion in cash, as well as its power to borrow and create new SDRs, the IMF "has a formidable package of 'last-resort' financial resources and powers," he argues.

Looking at the other elements of a five-point program enunciated by Treasury Secretary Donald T. Regan, Weintraub observes that central banks already have ample powers to extend emergency credits and warns that "policies to promote economic growth" could promote inflation. And he decries Regan's exhortation to banks to keep lending abroad. "Doubtless banks would feel more secure lending to LDCs if their governments see the IMF as an elastic conduit for helping debtor nations," he observes. "However, continued lending could lead to a magnification of the same imprudent lending practices that helped create the present debt crisis."

Weintraub's proposed solutions include "resumption of economic growth by the United States and other developed countries." But he emphasizes they "must be careful to prevent new inflationary surges from accompanying or closely following their recoveries and the corollary growth of developing nations' exports."

Secondly, Weintraub says debtor nations must act to "increase their exports and the investment of foreigners in their plant and equipment, decrease their imports and constrain their consumption." To do this they must "allow their exchange rates to float downward or devalue them realistically." For their part, the United States and other industrialized countries must avoid protectionist measures.

The idea of encouraging investment is beginning to take root in the Third World camp, although those countries frequently have discouraged foreign capital. Mauricio Herman, chief of the Inter-American Development Bank's Development Division, recently suggested creation of development equity—securities that would reduce LDCs' interest costs and shift some of the risks to investors in the developed countries.

Noting that the relative importance of direct investment in Latin America has declined from 25 to 17 percent of total external financing, the Peruvian said, "This increased leveraging means that interest rates must be paid regardless of the return on the investment financed by these funds." By contrast, with investment, "Dividends paid—and remitted abroad—depend on the yield of the investment."

In town recently, Pakistan's minister for planning and development, Mahbubul Haq, said his country is dismantling administrative controls in an effort to unleash private enterprise. He said Pakistan is inviting American investors to help develop its energy and agricultural resources.

Under the auspices of the liberal Brookings Institution, a group of former government officials from the United States, France, Germany and Japan issued a statement observing, "Under most circumstances, the best way to transfer resources and skills to developing countries is through private investment. The developing countries can contribute to its continuation by policies which create a congenial climate."

The final element in solving the debt dilemma is a "willingness of bank creditors to reschedule maturing loans and extend additional credits," according to Weintraub, but he stresses that banks "cannot and should not be pushed or tempted" to do so.

Stretching out loan payments, extending new credits, renegotiating interest rates and stipulating economic policy changes "is the alternative to default," Weintraub says. "Rescheduling produces basic benefits for both banks and debtors. Banks do not have to write down problem loans. Debtor nations avoid the onus of default."

Massive, coordinated repudiation of the Third World's $265 billion in commercial bank debts is extremely unlikely, Weintraub concludes, but even if it happens, federal bank regulators can defuse the debt bomb by allowing the affected banks time to write down the defaulted loans to zero.●

ROSS ADAIR, A DISTINGUISHED HOOSIER AND GREAT AMERICAN

● Mr. QUAYLE. Mr. President, it is with a deep sense of personal loss that I rise today to pay tribute to former Congressman E. Ross Adair who died Saturday, May 7, in Fort Wayne.

Ross Adair served the people of Indiana for 20 years as Congressman from the Fourth Congressional District from 1950 to 1970. He became one of the articulate leaders on the House Committee on Foreign Affairs, and was ranking Republican member of the committee when he left the Congress. He also served on the Veterans' Affairs Committee and continued his interest in veterans activities even after he left Congress.

Even though he was defeated in 1970 after a close election and redistricting, Ross continued to serve our country as Ambassador to Ethiopia from 1971 until 1974. Upon resigning as Ambassador, he returned to Fort Wayne where he practiced law.

I was fortunate to count Ross Adair as a good friend and mentor. He was always available to provide valuable counsel when I first came to the House of Representatives as Fourth District Congressman in 1977.

He was helpful to me in serving the people of the Fourth District because he had long demonstrated his concerns and expertise in working for what was good for Indiana and our Nation.

I shall always remember the friendly visits we had about the work of the Congress in Indiana and in Washington whenever he would stop by.

Marilyn and I join with our colleagues from Indiana, as well as those colleagues in both bodies, who had the honor and pleasure to know Ross Adair. He has left a lasting and distinguished mark of service to Indiana and to America. Our heartfelt sympathy goes out to his beloved and talented wife, Marian, and to his son, Steve, and daughter, Caroline.

Daniel Webster stated: "Whatever makes men good Christians, makes them good citizens."

Ross Adair was such a man—a good Christian and a good citizen.●

NEW YORK'S CONVERSION TO GAAP

● Mr. D'AMATO. Mr. President, I would like to draw your attention to a major effort in New York State to impose fiscal discipline on the State's budgetary process. New York State has converted its accounting techniques to conform with generally accepted accounting principles (GAAP). The use of GAAP is the unquestioned norm in the private sector, but is often shunned by State and local government. The use of GAAP brings a sense of order to the State's financial operations. More importantly, the public is presented with a more accurate portrayal of how its tax dollars are spent. Of course, efforts such as this would improve efficiency in government operations, lead to the highest bond ratings available, and thus reduce the burden on the taxpayer.

The conversion to GAAP in New York State was accomplished through the dedication and hard work of my close personal friend, Mr. Edward V. Regan, comptroller of the State of New York. His efforts have greatly improved the State's budgeting process. It is my hope that State and local government around the Nation will emulate New York State's action.

Mr. President, I ask that a speech by Mr. Regan before the National Association of Comptrollers on New York's conversion to GAAP be included in the RECORD.

The speech follows:

REMARKS BY HON. EDWARD V. REGAN

I've been asked to speak this morning on New York State's conversion to Generally Accepted Accounting Principles.

I have no quarrel with that Assignment, for a large part of my life during the past four years has been dedicated to precisely that conversion. But the time, and the effort involved, have been worth it. For with GAAP we have given our state a modern basis for accurate, comprehensive and progressive management of its fiscal affairs.

Well, you might ask, if GAAP is that good, why doesn't everybody use it? Or, closer to home, why did it take New York so long to convert to GAAP?

My one-line answer to the first question is that outside of government, just about every organization does use GAAP. It will take me longer to explain why New York State didn't adopt it earlier, but I'll begin with another terse answer:

New York was late coming to GAAP because most of the politicians in New York didn't want GAAP. Permit me to explain why:

New York State has led the nation in many respects. It has long been—among other things—the communications, financial, publishing and theatrical capital of the country.

New York politicians also led America in several forms of creative accounting—some of them still practice in governments around the country.

One of them is the rollover. For decades, the Governors and legislators of New York routinely slipped the fiscal year's expenses into the new fiscal year's budget. Aid to local school districts was the principal object of the rollover technique.

For with education aid, the State could award the schools their assistance in the current fiscal year ending on March 31. But the cost would not be recorded until the following year.

What that meant to our politicans was that in election years, they could vote for generous increases in public school funding, thus gathering the support of teachers unions and other education groups for the fall elections. But the tax consequences of the politicans' generosity could be ignored until almost a year later—when a new budget had to finance the augmented school aid through higher taxes, or at the expense of other State activities.

Higher taxes followed the increased aid, but short memories of the voters allowed the process to be repeated year after year. As a result, New York State will float 4 billion dollars in short-term notes this spring. By far the largest portion of the borrowed money is designated for education aid that has been rolled over from one fiscal year to the next.

Another handy device for State officials was the ability to juggle New York State Income Tax refunds. Since our fiscal year ends and begins in the same period that the State income tax returns are due, it provides a shining opportunity for politicians to play games with the refund checks.

For if we want to reduce a potential year-end surplus, we can pay the refunds to the fullest extent possible before our fiscal year ends on March 31st. But if we want to reduce a potential deficit, we can delay the bulk of the refunds until after March, when a new fiscal year is in effect.

For example, New York State has paid out as little as $4 million or as much as $516 million in refunds before April 1. That is a $512 million spread—and a forceful indication of how much a given year's financial statements can be altered by manipulating the income tax refunds.

By converting to GAAP, we have not been able to eliminate all of the fiscal gimmicks that have been practiced in New York State for so long. But we have been able to minimize them—or at least make it more difficult for them to escape public attention.

For as we record revenues as earned and liabilities as they are incurred, we impose a healthy realism on state finances. We spotlight rollovers. And we call attention to revenue maneuvers involving tax refund payments.

Before getting into a fuller description of the benefits that GAAP has brought to our financial system, I want to take a few minutes to tell you how we came to convert to GAAP in the first place:

The conversion was set in motion by my distinguished predecessor as New York State Comptroller, the late Arthur Levitt. Mister Levitt had endosed the adoption of GAAP for several years, and when I succeeded him in 1979, I continued that support.

We began by issuing GAAP prototype financial statements, and in fact presented the '81 fiscal year financial statements on an official GAAP basis. Working with our staff, members of the legislature pushed through a "GAAP bill" that actually was a major financial reform bill. It was designed to modernize the system of budgeting, accounting and financial reporting that had been in effect in our state for a half-century.

Certainly, by way of background, the time for fiscal reform was long overdue;

The operating budget in New York State was $10 billion in 1971 and has grown to some $18 billion for fiscal 1984.

The number of state-funded programs has grown in the same time period from about 250 to more than 1,000.

The processing demands in the State Comptroller's Office grew from 1.6 million vendor vouchers and 2.4 million checks in 1971 to 2.5 million vendor vouchers and 3 million checks 10 years later.

Clearly, the time was right for the State to modernize its financial accounting and reporting systems from a system resembling a household checkbook—filled with six and 10 digit entries—to a system that had been tried and proved in all of the largest businesses in American and many of the smaller ones.

We knew the need. So did the financial community. In 1980, Standard and Poor's announced they expected all financial statements presented to S and P for a bond sale rating request to be prepared in accordance with Generally Accepted Accounting Principles.

S and P said the lack of GAAP financial reporting would be noted in its review, and could lead to a downgrading of the State's credit rating.

In addition to bringing fiscal discipline to our financial structure, we sought several other advances from GAAP. Among them were the production of general purpose financial statements . . . more timely and accurate interim reports . . . management reports on both organizational and programmatic lines.

Here's how we pursued those objectives.

The first thing we did was to select the consultant we thought could do the best job. We told the consultants we interviewed that we wanted the conversion to be completed within 15 months. Some consultants said that deadline was impossible. Others simply dropped out of the running. We eventually selected Arthur Andersen and Company for the job.

I hope you won't repeat this to anyone connected with Arthur Andersen, but we knew the 15 months deadline was unrealistic. But we bet the job could be accomplished within that time frame, and we won. GAAP went into effect in New York State Government on April 1, 1982.

To meet that deadline, however, we spend more than 25 thousand works days of efforts. We had 150 people working on the project, about 90 of them from Arthur Andersen, and the remainder from my own staff.

At the peak of our efforts, we were working two 12-hour shifts, five and six days a week. The consultants said they were used to this, but our own people got so involved in the conversion that they worked just as long as the consultants.

We also devoted more than 1,500 work days to training some 8,300 users of the system—all the way from the Governor and his cabinet to data entry operators and account clerks. We issued about 4,000 pages of new procedures.

It was not all smooth sailing in converting to GAAP. So I want to summarize some of the difficulties we encountered:

One: The entity question gave us the most trouble. A major barrier to quick and easy decision-making on this question was the scope and complexity of New York State government. We have as many as 47 public authorities, for example, each with its own funding and programs. Our eventual decision was to include almost all of the authorities in the State's financial statements. In other respects, however, the entity issue presents continuing questions of definitions.

Two: It took some time to develop a rule governing the handling of revenues that are due the State, but are either wholly or in part uncollectible. Should they be accrued, or not? On what basis? We eventually decided to accrue them if they are—and I quote—"measurable and available."

Three: A major problem in accruing liabilities is presented by the huge Medicaid program. As you know, Medicaid accounting involves not only a patient, but often a physician, a pharmacist, a clinic and possibly a hospital. All of the bills for a patient may not even be submitted until well after the audit period. How do we establish that liability? To which reporting period do we attribute it? At what point do we separate one reporting period from another? And is one policy suitable for all of the millions of vouchers processed under Medicaid each year?

Four: Fixed Asset Accounting. It's a monumental job, but it's one we're working on. Obviously, the larger the State, the more complex the job. If you have found any method of accomplishing this task efficiently and economically, I'd certainly like to hear about it in the discussion period.

Five: It costs plenty.

As most of you have already discovered, GAAP may save you State money on a permanent basis, but getting GAAP in place does not come cheap.

We estimate that in the 15 months of conversion, the cost of installing GAAP in our State was about $10 million. That includes both new computer technology, and the payment of the consultant's contract.

Even at that cost, we consider it a bargain.

During the panel discussion that follows, Kevin O'Donoghue of my office and Mel Bergstein of Arthur Andersen will describe our experiences in this and other areas in greater detail.

Having reviewed the problems with GAAP, I now want to discuss the benefits. As I just indicated, one of the principal benefits we will derive from GAAP is that it can save money and in our case that involves the credit ratings on our notes and bonds.

As many of you know, our bonds were downgraded by Standard and Poors last December. That took place despite GAAP, for it was almost exclusively based on the difficulty the Executive and Legislative branches of our government were having in agreeing to a budget. Rating services don't like to have unbalanced budgets hanging fire after a new fiscal year begins, and I don't much blame them.

But with GAAP firmly in place, I believe we have the kind of accounting and reporting system that will give an entirely accurate and candid portrayal of the State's financial condition, and thus present our best case for a high credit rating.

The importance of a single notch in a credit rating is not to be underestimated in a large State. As I mentioned, this Spring I will sell about $4 billion in short term securities.

Let's say that discipline derived from a GAAP based FMS eventually will improve our credit standing so that we can sell those notes at an interest rate of 5.5 percent rather than 5.8 percent. The savings in the interest New York State would have to pay would be about 10 million. That is enough to pay the entire cost of switching to GAAP.

We are also pleased with our GAAP conversion for several other reasons, among them:

1. GAAP gives us an Accounting and Financial Reporting System that can provide timely and accurate information, not only to officials of State Government, but to the financial community and taxpayers throughout the State.

With GAAP, we can generate truly meaningful annual financial reports within a few months after the close of our fiscal year. We have better asset and liability controls. We can produce periodic financial reports and fund management statements without major upheavals in our routines.

2. GAAP is sufficiently flexible to accommodate new and changing requirements as government becomes more sophisticated. To keep all involved personnel up to date, we have printed an accounting manual that describes such matters as accrual policies, and closing procedures. It is updated regularly.

3. When GAAP went into force on April 1st, we established an executive and legislative budgetary reporting system, capable of providing timely and accurate revenue and expenditure information when it is most needed.

4. As part of the GAAP conversion, we are implementing an in-depth management information system that by mid-summer can report on projects cutting across agency and department lines. For the system to give us a better analysis of program results, cooperation from the agencies is of course essential. Our terminal network has increased our capacity by 60 percent, and now enables us to procees both vendor claims and payments through an automated system.

5. One of the first beneficiaries of GAAP—perhaps you had the same experience in your own states—has been our own office. The GAAP experience has enabled the Comptroller's Office to improve its systems processing capabilities, as well as accounting procedures and policies.

We are getting information faster, and we now have far better access to other agencies whose financial results effect our records and statements. We have improved our own internal accounting skills.

Finally, we are preparing our audit staff for a major role in the independent audit of State Government scheduled to get underway in our next fiscal year.

Although many States have converted to GAAP, few have subjected themselves to an independent audit. We're doing it for the first time in New York Stste, and I'm anxious to see both how it operates, and what the results will be. The assistance that GAAP reporting can give this audit is not to be underestimated. If I had the time, I would describe more fully what the audit will cover, who is doing it, and what it will cost.

But now it's time for me to wrap up my report.

In summary, let me say that our experience has been that converting to GAAP is difficult. It will take a long time to implement it unless you set firm deadlines at the start.

We found that we needed to train personnel on an ongoing basis to handle GAAP. We needed to integrate our system with other departments and agencies of the State. And finally, we had to overcome fears and sometimes resentments of the new system to obtain the cooperation needed for a successful transition.

For us, adopting GAAP has been a key step in restoring the chain of responsibility between spending and taxing. For GAAP can require that any new spending program announcement carry with it a full recording of the tax consequences—in other words, a statement of where the money is going to come from.

GAAP further provides the public, the press, and other monitors of government activity with the facts they need to judge the merits of what their government is doing. By shedding the light of modern accounting on the activities of government, I think we are preventing a substantial amount of unwise and unnecessary gevernment spending.

My final word is that once we made the conversion to GAAP, we've never considered going back. Our experience has been that comparing GAAP to cash basis accounting is like comparing a modern word processor to a manual typewriter.

Once you get the hang of it, you'll forget all about the old way.

Thank you.●

ROY ROGERS AND THE SPECIAL OLYMPICS

● Mr. WILSON. Mr. President, today I wish to enter into the record an all-too-brief recognition of a very special American, Mr. Roy Rogers.

Just as the space age E. T. captured the imagination of moviegoers and Americans of all ages this year, so did a down-to-earth and equally lovable Roy Rogers some 45 years ago and he, along with his wonderful leading lady, Dale Evans, have continued to do so year after year, in the movies, on records, on stage, on any number of forms of entertainment.

Unlike so many of our modern day fad heros, who come and go on center-stage like fast-moving comets, Roy Rogers has had the staying power that is maintained because of the love his audiences hold for him.

His secret, Mr. President?

The answer is rather simple, really. Because Roy Rogers has not been a taker, Roy Rogers has been a giver.

Let me recite just a few of the remarkable accomplishments of this giving, loving man who truly is not just a screen hero but a hero in real life.

With Dale, he has been honored by the Freedoms Foundation of Valley Forge for humanitarian contributions to America and received an honorary doctor of humanics from Bethany College in West Virginia.

In 1980, the Rogers' were named co-chairmen of the National Committee for Prevention of Child Abuse. They received the Humanitarian Award from the National Film Society, the USO Liberty Bell Award, the Kiwanis Decency Award, the National Amvets

Auxiliary Award for their many appearances for American veterans of foreign wars.

The Rogers family is well known for their adoption of orphans and for more than 6,000 charitable appearances. They are the only show business couple to receive a national citation from the American Legion.

In my own home State, Roy and Dale have served as grand marshals for the world famous Rose Parade. And just 2 years ago they came to the Nation's Capital, right here along these hallowed Halls, to serve as grand marshals for the National Cherry Blossom Festival Parade.

I could go on, too long, for this august body to tell you about the multitude of accomplishments of this singing cowboy who has found a lasting, grateful spot in the hearts of grateful Americans.

I will just leave you with this final citation, Mr. President, because it tells you and my colleagues and this country about yet another happy trail Roy Rogers has embarked on for America and some very special American kids.

Roy will be in Washington on Monday and Tuesday (9-10) on behalf of the Special Olympics chapters of the District of Columbia, Maryland, and Virginia. He will be participating in a very unique project, a partnership between an enlightened business and a wonderful charity. It is called "Special Sundaes for Special Kids." All of the restaurants that today carry the Roy Rogers name will for the entire month of May be raising funds through the donation of a portion of ice cream sundae sales for the Special Olympics.

The Special Olympics are very special. It provides a year-round sports program for the physically or mentally handicapped child. It helps finance an international summer games for Special Olympics in Baton Rouge, La., during July.

These are extraordinary children. These are extraordinary games. This is an extraordinary promotion being put together by an extraordinary human being.

Roy and Dale are very special people, very special Americans. I applaud their commitments, dedication, and their willingness and ability to share their bounty with those less fortunate.

The Roy Rogers message is an important message to all Americans, one we can learn from, one we must emulate, one we can hold up as a shining example of what we all could give and contribute.

I urge our support for Roy and Dale and the very beautiful cause for which they fight.●

PROPOSAL TO INCORPORATE THE SMALL BUSINESS COMMITTEE INTO THE BANKING, HOUSING AND URBAN AFFAIRS COMMITTEE

● Mr. D'AMATO. Mr. President, during this week in which we pay a well justified tribute to the contribution of small business, I am distressed that a recent study has recommended that the Committee on Small Business be dissolved.

As you know, the study on Senate procedure by former Senators James B. Pearson and Abraham A. Ribicoff has been submitted to the Committee on Rules and Administration. I commend these gentlemen on the fine recommendations they made to better the Senate in the areas of agenda, debate, and the budget process. I do take issue, however, with their proposal to disband the Committee on Small Business and incorporate it into the Committee on Banking, Housing and Urban Affairs.

Big businesses, which constitute only a small percentage of total U.S. business establishments, get the press, the representation and the legislation they need to operate successfully. Small businesses are not as fortunate. They are overlooked, underrepresented, and underrated. Small businesses look to the Small Business Committee to champion their causes in Congress. If this committee were to be dissolved, millions of businessmen would be cheated of the representation to which they were entitled.

Numerous statistics show that small businesses are the commercial backbone of this country. Over 99 percent of all businesses employ fewer than 500 people; almost 85 percent fewer than 20 people. Small firms generate innovation at a rate 2½ times faster per employee than large corporations. More than half of the private work force is involved with small business.

Since its elevation from a select committee at the start of the 97th Congress, the Senate standing Committee on Small Business has been an effective voice for the small business community under the able leadership of my distinguished colleague from Connecticut, LOWELL WEICKER. During the 97th Congress, the Committee initiated and guided to eventual enactment several pieces of legislation important to small business. The Delinquency Payments Act, the Small Business Innovation Development Act, and an amendment to the Small Business Patent Procedure Acts exemplify these achievements; each represented major gains for small business.

The problems of small businesses, however, are greater now than ever before. The recession has had a devastating effect on them. The responsibility of the Small Business Committee is to prove the leadership necessary to find solutions to the economic difficulties of the Nation's small businesses. This is essential if these businesses are going to help lead our country out of the recession.

Another important duty of this committee is its oversight of the Small Business Administration (SBA). The Small Business Committee must watch the SBA to determine if they are sufficiently representing the view of the small businessman, if they are enforcing legislation properly, and if they are using the taxpayer's money efficiently and expeditiously.

If the Committee on Small Business were to be incorporated into the Committee in Banking, Housing and Urban Affairs, an effective advocate of small business would be silenced. Senators Pearson and Ribicoff have made excellent suggestions to improve the legislative capacity of the Senate, but I strongly believe they were misguided in recommending the end of the Small Business Committee.

I urge my colleagues not to forget that during the last Congress we made the Small Business Committee a standing committee; I urge my colleagues not to forget the multitudes of small businesses in their own States; and I urge my colleagues not to forget the needs of the small businessman.●

CUTBACK IN APPAREL IMPORT QUOTAS

● Mr. SASSER. Mr. President, I am today joining in sponsoring Senate Resolution 122, which calls for a cutback in import quotas for apparel.

For anyone who is and has been concerned about the quantity and quality of the products Americans wear, the reasons for Senate Resolution 122 are obvious.

The American economy, in a state of siege for the past several years, has made the American apparel manufacturer and worker especially vulnerable to imports.

Jobs have been lost. Imports have increased. And the conforting assurances that the product you are buying is authentic—and American—is becoming less and less apparent.

Specifically, consider the following.

Employment in the American apparel industry stood at 1.6 million 25 years ago. Today it stands at 950,000, a 40-percent drop.

Unemployment in the industry currently runs at 12 percent, well above the nationwide unemployment rate of 10.2 percent.

Last week, the American Textile Manufacturers Association released some more astounding figures. Based on the data for the first quarter of 1983, apparel imports could be 1 billion square yards above the level for 1982, an 18-percent increase.

In my home State of Tennessee, graphic evidence of the impact of bal-

looning apparel imports came in the form of a plea to me from the makers of Weather Tamer jackets.

Weather Tamer is the only child's jacket manufacturer left in the United States and it employs some 700 people in Columbia and Lewisburg, Tenn.

"Unless imports are cut back to some degree," the president of Weather Tamer tells me, "there will be another 700 people in Tennessee without jobs."

It is unfortunate that the apparel industry in Tennessee and across the Nation is suffering in such fashion at the very time the spirit of buy American is strong in American public opinion.

According to the American Textile Manufacturers Institute, a 1981 survey showed that two-thirds of those interviewed would rather buy U.S.-made apparel than apparel made overseas, and over 70 percent rated U.S.-made apparel either equal to or superior to foreign-made goods.

Senate Resolution 122 calls for sensible levels of apparel imports, levels that will give the industry in America some much-needed breathing room, levels that will allow our industry to improve its standing during any economic recovery that might take place in the next several years, and one that will allow the American people to do what most of them really want to do when it comes to apparel—buy American.

The letter and article is as follows:

WEATHER TAMER, INC.,
Chicago Ill., April 25, 1983.

Hon. JIM SASSER,
U.S. Senate, Washington, D.C.

DEAR SENATOR SASSER: The attached copy of an article which appeared in Women's Wear Daily on April 5th is self-explanatory.

We have factories in Columbia, Tennessee and Lewisburg, Tennessee, employing approximately 700 people. We are the only children's jacket manufacturer left in the United States, and the future of our existence is highly questionable. Unless imports are cut back to some degree, there will be another 700 people in Tennessee without jobs.

I want to call your attention to a bill, SR 122, being introduced in the Senate by Senator Moynihan, asking for a cut-back in import quotas. It is important to the American way of life and the protection of American jobs that we do something about this run-away import situation. I am not asking for high tariffs nor am I asking to eliminate imports; however, there must be some moderation, and I am asking you to support and help this bill pass the Senate.

Thanking you for your consideration, I am

Very truly yours,

AVERS WEXLER,
President.

[From Women's Wear Daily, Tuesday, Apr. 5, 1983]

TEXTILE-APPAREL TRADE ERODES 36.5 PERCENT IN FEBRUARY TO $651.9 MILLION DEFICIT

WASHINGTON (FNS)—The nation's trade balance in textiles and apparel deteriorated sharply in February, registering a deficit of $651,900,000, 36.5 percent larger than in the same month last year, the American Textile Manufacturers Institute reported Monday.

Sparked by substantial increases in imports and export declines, the setback hit both industries with major impact. In apparel, last February's deficit of $506,600,000 jumped 18.2 percent to $598,900,000; in the textile area, a modest $29,100,000 surplus was turned into a deficit of $53 million.

Basing its estimates on preliminary government data, ATMI calculated that the textile-apparel trade deficit in the first two months of this year leaped 31.5 percent over January to February 1982, from $1,073,200,000 to $1,410,900,000.

During the two-month period, the red-ink balance in apparel items climbed 23.6 percent, from $1,056,600,000 to $1,306,300,000 while the deficit for textiles skyrocketed 530.1 percent, from $16,600,000 to $104,600,000.

A statistical breakdown between imports and exports during February echoed a trend that dominated the trade scene through most of last year.

During the month, imports of apparel rose 12 percent from February 1982, from $592,400,000 to $663,700,000. Imports of textile mill products were up 7.3 percent, from $214,700,000 to $230,400,000.

By contrast, exports of apparel in February plunged 24.5 percent compared with February last year, from $85,800,000 to $64,800,000. Exports in the textile segment fell an even steeper 27.2 percent, from $2,43,800,000 to $177,400,000.

Cumulatively, apparel imports in January to February amounted to $1,432,200,000, up 18 percent from the same 1982 period. Imports of textiles rose marginally, from $480,600,000 to $483,000,000. In the export market, both industry segments were casualties: Textile exports in the two-month period declined 18.5 percent to $378,400,000; apparel exports in the same period were off 19.9 percent, to $125,900,000.●

END MANDATORY RETIREMENT

● Mr. D'AMATO. Mr. President, I am very pleased today to join as a cosponsor of S. 832, a bill which would put an end to mandatory retirement in this Nation.

The Age Discrimination in Employment Act, enacted in 1967, prohibits discrimination in employment because of age in such matters as hiring, job retention, compensation, and other terms and conditions of employment. Originally, this act protected workers aged 40 to 65. In 1978, the ADEA was amended to eliminate mandatory retirement for nearly all Federal workers and to increase to 70 the age at which non-Federal workers could be forcibly retired. Mr. President, it is high time that the Congress do the responsible thing and remove the upper age limit of 70.

There are many reasons to put an end to mandatory retirement. Presently there are 1.2 million Americans over the age of 70 in our work force. These individuals are productive citizens who contribute greatly to our society. It simply makes no sense to force these people to retire if they desire to keep on working.

Increasing the labor force participation rates of older Americans would have a beneficial effect on the economy, social security and Government revenues. The demographics of this Nation are such that in the not too distant future this Nation will need these older citizens in the labor force. Moreover, figures from the Social Security Administration reveal that the savings to the social security trust fund from prohibiting mandatory retirement will be $700 million in the year 2000 and $4 billion in the year 2020.

This bill therefore provides a simple manner of reducing the strain on this vital trust fund from which social security benefits are paid.

Mr. President, the benefits will be great to those workers over 70 who, after passage of this measure, will be given the opportunity to continue working. Many of these citizens have financial obligations and are not able to retire on a fixed income. Many simply feel a sense of accomplishment and an improved sense of well-being, both mental and physical, from putting in a day's work. Whatever the reason, they certainly should not be deprived of the choice to work.

Public opinion in this country clearly is behind the move to end mandatory retirement. A recent Harris poll found that by a 9-to-1 margin, Americans feel that "nobody should be forced to retire because of age." Similarly, 9 out 10 employers believe that older workers perform as well on the job as younger workers.

Some have expressed a concern that this measure would negatively impact the youth, minorities, and women in the work force. A recent Department of Labor study found abolishing mandatory retirement would have no measurable adverse impact on women, minority, or youths with respect to the issue of youth employment, the fact is that older workers do not compete for the same jobs as younger workers.

Mr. President, the month of May has historically been proclaimed "Older Americans Month." Just 2 days ago the Senate passed a resolution, Senate Joint Resolution 83, which proclaimed the second week in May as "Senior Center Week" which would recognize the hard work which the over 8,000 senior citizen centers do thoughout the Nation. As the Congress recognizes this month, I urge it to pass S. 832 and put a total end to discrimination based on age.

The passage of this bill will send an important message to the American public which is that an individual is to be judged on ability, not age. In closing, Mr. President, I might only mention that some of our greatest Americans made important contributions to society when they were over age 70. At age 81, Benjamin Franklin forged the

compromise which led to the adoption of the U.S. Constitution. At age 80, George Burns won his first Academy Award. I urge the Senate to expeditiously act on this important measure.●

CHILE AND THE IMF

● Mr. HUMPHREY. Mr. President, today's edition of the New York Times reports that the Government of Chile is unable to meet the repayment conditions of its most recent loan from the International Monetary Fund, and that more lending from private sources will be sought in an attempt to overcome this hurdle.

Mr. President, this isolated episode is a reflection of the broader problems facing less developed nations as they attempt to manage their excessive external indebtedness and of the helpless position in which the IMF can find itself when its widely touted "austerity programs" do not achieve their objectives. Despite the extension of $858 million in IMF assistance this year—$318 million of which was approved without conditions—Chile will still need to ask private bankers to reschedule payments on outstanding borrowings and to extend new credit.

This is precisely the mechanism through which the IMF perpetuates the myth that these bad loans will some day become good ones, and that the only way to deal with the skyrocketing debt of troubled borrowers is to lend them still more money. I reject both of these claims, Mr. President, and I sincerely hope that the majority of my colleagues will do the same when we are asked to approve an additional $8.4 billion contribution to the IMF.

Throwing good money after bad, which the Third World and the IMF are pressuring the banks to do in ever-increasing proportions, will serve only to worsen an already staggering debt burden and to restrict the availability of funds to creditworthy borrowers, who could productively employ this credit in furtherance of the economic recovery which must lie at the heart of a true solution to the Third World debt burden.

I ask that the article appear in the RECORD.

I.M.F. EASING CHILE LOAN

WASHINGTON, May 8.—Chile, suffering from a deep recession, has failed to meet terms of a loan set by the International Monetary Fund in January and easier terms are being arranged, according to financial sources.

Chile's problems in meeting the I.M.F. terms are causing concern among private bankers who have been asked to extend further credit to the debt-laden Latin American country.

Chile's foreign debt, which resulted mainly from its heavily indebted private sector is estimated at $18 billion to $22 billion.

The I.M.F. loaned Chile about $540 million in January on easier terms than banks would give, but imposed several conditions. Those conditions included that Chile hold down loans within the country, increase its reserves and cut its budget deficit.

The fund loaned Chile another $318 million without conditions.

Financial sources, who asked not be be quoted by name, said Chile failed to meet the targets set by the I.M.F. for March 31. Under those circumstances, the funds normally would not pay out the next installment of its loan, due to be disbursed this month. Spokesmen for the I.M.F. refused to say whether the May installment would be paid or not. Sources said the question was not yet decided.

Chile, after negotiations with its bank advisory committee, has decided to ask private bankers for $1.3 billion in new loans and a stretchout of $2.1 billion in principal payments due this year and next.●

MILITARY AVOIDANCE

● Mr. GOLDWATER. Mr. President, the May 1983 issue of the Aircraft Owners and Pilots Association magazine, AOPA Pilot, contained an article concerning flight safety which I consider important enough to ask that it be inserted in the RECORD in its entirety following my remarks.

The article to which I refer, "Military Avoidance," by Mr. J. Jefferson Miller, described the substantial growth of air traffic in the United States as well as the potential involvment with all general aviation aircraft with military aircraft. As some of you know, we have struggled in the last few months with the prospect of a new airport at Apache Junction, Ariz., located in close proximity to the traffic pattern for Williams Air Force Base, Ariz. The Arizona airspace, particularly in the Phoenix vicinity, has become heavily saturated with air traffic of all types.

Commerical air carriers to Phoenix have increased in proportion to the population increase in the Phoneix metropolitan area. In addition, the general aviation community in Arizona has continued to expand for a variety of reasons. I would be remiss if I did not mention that one of the principal reasons is our very excellent flying weather. Unfortunately, this has its drawbacks.

Williams Air Force Base, located near Chandler, Ariz., is one of the Air Force's premium training locations. Not only do they enjoy excellent flying weather through the year, but they have also achieved, over the years, a substantial capacity for numbers of pilots that can be trained.

Air traffic congestion will be a problem in other areas of the country as well and, for that very reason, I commend to the reading of my colleagues the article which follows my remarks.

In an attempt to alleviate some of the air traffic congestion, the military services, in conjunction with the Federal Aviation Administration, have developed a variety of military areas which are designed to separate air traffic congestion. This article clearly describes these areas and the potential uses of the areas. It is important, particularly to the general aviation community, that these various military training areas and routes not only be understood but, and more importantly, be known by location.

The days when general aviation aircraft could navigate by simply following a road map designed for the automobile owner are, if not gone, few and far between. Throughout most of the populated areas of this Nation, air traffic is intense. It is my forecast that general and commercial aviation will continue to grow. Although military traffic may not increase, I do not expect it to diminish in the next decade. All of us must work together if we are to achieve reasonable safety goals with regard to air traffic all over this country. Again, I suggest that my colleagues read the article, "Military Avoidance" and I would further suggest that you distribute this article to aviation interests in your States. Mr. President, I ask that the article, "Military Avoidance" from the May 1983 issue of AOPA Pilot magazine be printed in the RECORD.

The article follows:

[From the AOPA Pilot, May 1983]

MILITARY AVOIDANCE

(By J. Jefferson Miller)

The Beechcraft Baron pilot had strayed off Amber Route 3, an overwater route from the Bahamas to Norfolk, Virginia, and may have been concerned about the heavy rainshowers through which he was flying. But one thing he probably was not worried about way out over the ocean was a midair collision.

He should have been. The Baron had shown up on North American Air Defense Command (Norad) radar screens as an unknown target. Two McDonnell Douglas F4Cs were scrambled to identify it. Before they reached the target, the Baron pilot contacted Washington Center and identified himself. The fighters continued to close, however, until the lead airplane collided with the Baron, sending it into the sea with the loss of all aboard. The F4 returned safely to Seymour Johnson Air Force Base in North Carolina with a damaged left wing. According to a preliminary report by the National Transportation Safety Board, the fighters were instructed to break off the intercept "at about the moment of the midair."

"The Baron pilot's big mistake," said an official from the Federal Aviation Administration's Southern Region, "was that he didn't activate his flight plan with Nassau radio. If he had, ATC would have known he was coming and there would have been no intercept."

For the past 12 years, such collisions have occurred at the rate of about one a year, accounting for about three percent of all midair accidents. The chances of being downed by the military, therefore, are slight. However, the risk increases considerably when pilots unwittingly or negligently fly into areas with substantial high-speed

military traffic, or, as in the case of the Baron pilot, one does not carefully adhere to procedures for entering an air defense identificaiton zone (ADIZ).

About two percent of the airspace above the continental United States is designated "special-use airspace," not all of which has been assigned to the military. (Special-use airspace is defined by the FAA as airspace wherein certain activities must be confined, or wherein aircraft not participating in the activities are subject to certain restrictions.) Additionally, much of the airspace over coastal waters is devoted to military training. Military traffic, however, does not confine itself entirely to these areas. Aircraft ranging from T-37 jet trainers to B-52 bombers practice navigation and low-level flying along military training routes (MTRs), which crisscross the country. In some of these areas and along the MTRs, military aircraft are permitted to exceed the 250-knot speed restriction they otherwise must obey below 10,000 feet. The speed restriction is waived for certain aircraft, such as an F-106 heavily laden with fuel and ordinance, because they do not handle well at speeds below 250 knots.

Special-use airspace can bedevil the general aviation pilot when a big chunk of it lies across his route of flight. But not all such areas should be considered impenetrable barriers to navigation. The following list defines the types of special-use airspace and the rules to fly by when considering a flight through one.

Restricted areas: These contain hazardous activity, such as artillery firing, aerial gunnery and guided missiles. Flight in a restricted area is not permitted without the permission of the using or controlling agency. Many restricted areas are joint-use airspace, meaning that civil aircraft are permitted into an area when it is not "hot" (in use by the military). To find out the status of a restricted area, call or radio a flight service station within 100 miles of the area. Also, air traffic control will know the status of a restricted area. If an IFR flight plan sends you on a dogleg around a restricted area, you may be able to cut the corner if the area is cold. Temporary restricted areas established for large-scale military exercises lasting no longer than two weeks may not be shown on a chart, but will be published in notices to airmen. Hours of use for restricted areas are listed in a table on sectional charts.

Military operations areas: MOAs are used by the military for training activities that include primary jet training, aerial combat maneuvering (dogfighting) and airdrops. The military long has used certain sections of the country's airspace for training purposes, but it was not until 1974 that the FAA started to depict MOAs on aeronautical charts in an effort to apprise pilots of the potential danger of flying in these areas.

MOAs used by the Air Force's Air Training Command (mainly found in Texas and the Southwest) may be divided into 20 different practice areas, and at certain times each of these divisions may be in use by an aircraft. Desert MOA, north of Nellis Air Force Base in Nevada, is used for large-scale air combat exercises that resemble a busy day during World War III.

Some southwestern cities, such as Phoenix, appear on sectional charts to be almost entirely surrounded by MOAs. However, many airways are outside the boundaries of the MOAs. Airways that run through MOAs must be available for IFR traffic more than half the time. Also, most MOAs do not extend all the way to the ground and are not in use all of the time. In the Phoenix area, the Williams 4 MOA extends from 14,000 feet up to but not including 18,000 feet, and the Sells 1 MOA extends from 10,000 feet up to but not including 18,000 feet. This information does not always appear inside the MOA on the sectional, but can be found in a table along the top of the chart.

The military provides nearby flight service stations with information on any planned activity in a MOA 24 hours in advance. Air traffic control also can provide information to VFR traffic on the status of a MOA and will authorize an IFR flight to pass through if it can guarantee traffic separation. An aircraft flying on an IFR flight plan to an airport with an instrument approach inside a MOA will be permitted into the area. However, there may be a delay while ATC clears the airspace of conflicting traffic.

Prohibited areas: These areas are not necessarily designated for military use. According to the Airman's Information Manual, they are established for "security or other reasons associated with the national welfare." Prohibited areas include the airspace over the White House, Camp David, the Reagan ranch in California, Jimmy Carter's home in Plains, Georgia, and a nuclear warhead assembly plant located in Amarillo, Texas. Aircraft are not permitted in prohibited areas at any time.

Alert areas: Some alert areas are used by the military for pilot training conducted at speeds less than 250 knots. Other alert areas, particularly in Florida, are used by various aeronautical institutes for training. Still others are used by aircraft manufacturers for test flying. Alert area 381 stretching along the Gulf of Mexico from Houston to New Orleans was established to alert pilots to the large amount of helicopter traffic flying between offshore oil rigs and the coast. Flight service stations do not receive reports about activities in alert areas, and since all pilot training in alert areas is conducted under visual flight rules, neither does air traffic control. There are no restrictions to flight in alert areas.

Warning areas: The same sorts of activities that occur in restricted areas take place in warning areas, which lie exclusively over water beyond the three-mile international limit. There are no restrictions to flight in warning areas because the FAA has no authority in airspace over international waters. However, air traffic control will not allow an IFR flight to fly an airway through a warning area unless the controller can provide separation. Flight service stations are not aware of the activity in warning areas. VFR aircraft should exercise extreme caution when flying into one.

Air Defense Identification Zone: ADIZs are not special-use airspace; they are boundary areas along our borders that are under constant radar surveillance. Originally established to scan the skies for enemy attack, coastal and border radars these days are more concerned with identifying and tracking drug smugglers. The distance at which a target will be picked up depends upon how far coastal and border radars can "see" and the altitude of the incoming aircraft. The first radar contact usually is made within the outer ADIZ line, which extends up to 200 miles off the coast.

Norad computers store flight plans for aircraft expected to cross into ADIZ. If an aircraft enters the ADIZ and is within its "correlation circle," it will be identified as friendly. To be within the correlation circle, an aircraft must be within 20 nautical miles of its expected flight path and five minutes of its expected time enroute. If an aircraft is not in correlation, it is put in a "pending status." When an aircraft is pending, Norad will take two minutes to identify it as friendly, hostile or unknown. Military controllers use a hot line to FAA centers in order to identify pending targets. If the aircraft cannot be identified within two minutes, the order to scramble is given. It takes two to three minutes for fighter pilots to climb into their aircraft, complete their preflight and take off. They can be on top of the unknown target within minutes after that.

The best way to avoid becoming an unknown target is to file a flight plan, open it after takeoff and stay in contact with air traffic control.

Military training routes: MTRs also are not considered by the FAA to be special-use airspace, although some specialized activities take place along them. MTRs are represented on sectional charts by faint gray lines and by light brown lines on the National Oceanic and Atmospheric Administration's IFR charts. Jeppesen IFR charts do not show MRTs. In recent years, the military has placed increasing importance on low-level flying proficiency to enable pilots to avoid detection by enemy radar and destruction by surface-to-air missiles. MTRs are flown mostly below 10,000 feet, with much of the flying being done at about 400 knots as close to the surface as possible, often at just a few hundred feet. There are 500 MTRs in the continental United States. Some are instrument routes (IRs), flown on IFR flight plans, and others are visual routes (VRs).

The greatest concentration of MTRs is in the Southwest between Tucson and Las Vegas—an area referred to by military pilots as the "spaghetti bowl" because of the great tangle of routes on the training charts. Many of the B-52 simulated bombing runs take place at the Strategic Training Range Complex, which encompasses most of Wyoming and great chunks of Idaho and Montana.

MTRs are located over sparsely populated areas all around the country, but often run through airspace that can have substantial general aviation traffic, such as desert areas just a few miles north of Phoenix. For a better idea of the MTRs in the part of the country in which you intend to fly, stop in at a flight service station and ask to see the area's AP/1B (commonly referred to in the military as the "green demon"). It is the chart military pilots use in planning their training flights. The green demon is revised every 56 days, so it contains information on MTRs that is more current than the information on sectional charts. Training routes on the green demon are shown in red (IRs) and blue (VRs) and give the altitude range at which each segment may be flown.

In addition to knowing where one is likely to encounter military traffic, a couple of common sense rules will help general aviation pilots avoid conflicts with military aircraft. First, always refer to a chart before a flight. A sightseeing flight around Martha's Vineyard that begins and ends at the island's main airport may not require a chart for navigation. But in neglecting the chart, one would fail to notice the restricted area just off the western tip of the island. Similarly, one must scrutinize the Phoenix sectional carefully to realize that flight is pro-

hibited between 2,000 feet and 5,500 feet msl east of the Buckeye VOR on Victor 16. Those altitudes are used by military jets on approach to Luke Air Force Base.

Second, one should stay alert for military traffic in terminal airspace. In many parts of the country, military and civil airports are located near each other, and in some cases, military and civil aircraft share the same airport. A high-speed jet fighter can pose more danger to slower moving general aviation aircraft in a busy terminal area than during a low-level run out over the desert. Of the 13 collisions between military and general aviation aircraft since 1970, five occurred just after one of the aircraft involved has taken off or was preparing to land. Four others occurred while one aircraft was climbing to cruise or descending.

Above all, heed a lesson drummed into all fighter pilots: "Keep your head on swivel!"●

U.S. SMALL BUSINESS WEEK

● Mr. D'AMATO. Mr. President, I am proud to support the resolution introduced by the Senator from Connecticut, Mr. WEICKER, declaring the week of May 8 to 14, 1983, as "U.S. Small Business Week" (S. Res. 132). This resolution reminds us of the integral role small business plays in the smooth functioning of the Nation's economy. The Fortune 1,000 companies receive more media attention than the small business sector, but the facts belie this coverage.

Over 99.6 percent of the more than 4.9 million business establishments in the United States employ fewer than 500 people; approximately 84 percent of these businesses hire fewer than 20 workers. In total, more than three out of every four workers are involved in small enterprises. These statistics change little from one business cycle to the next.

My point is that the small business sector is not accorded the central role in the media or the political process that it deserves. In a nutshell, the health of the Nation depends a great deal on the strength of small establishments. However, it is this segment of our economy that has the most difficulty acquiring the needed financial and physical resources to remain viable. As a result, new ideas do not become reality. Conversely a major corporation whose creditworthiness may be deteriorating has a much easier time raising capital because the banks cannot afford a major default. This situation strikes me as tragic.

Despite formidable obstacles, small firms generate innovations at a rate 2½ times faster per employee than large corporations. Once presented with a new idea, the small business can generally market the concept in less than 12 months. Large firms on average require over 1 year to market similar innovations.

With greater inherent efficiency small establishments generally fared better during 1982 than the economy as a whole. This success, in part, resulted from the prevalence of small businesses in industries that were least affected by the economic downturn. For instance, in 1982, large corporations accounted for 90 percent of the employment losses in the mining and manufacturing industries. In general, capital intensive businesses suffered more than service related industries where small firms dominate.

This is not to say that mere proximity to healthy segments of the economy is what protected small business in 1982. Time and again, there existed a direct correlation between business failure and debt structure. The firms that were overladen with debt lost financial flexibility and ultimately perished. In the manufacturing sector, as an example, firms with 1 to 19 employees maintained an average debt to equity ratio of between 36 percent and 65 percent while large firms averaged a 90 percent debt to equity ratio. Almost without exception, on an industry-by-industry basis, large firms maintained more debt than small businesses. Consequently, large companies were forced to reduce employment more frequently because of a lack of financial flexibility.

In short, the efficiency of small business helped absorb the negative impact of the recession on earnings. However, last year was a difficult year for all businesses and small firms shared in the suffering. In 1982, over 99 percent of all bankruptcies filed were by small businesses. In absolute figures, small business bankruptcies increased 38 percent on a year-to-year comparison. High nominal and real interest rates squeezed cash flow and damaged sales. Ultimately as banks absorbed loan losses, new loans for otherwise healthy small firms became more scarce. The cost of trade credit rose to higher levels than nominal sales growth further depleting cash flow. Many small firms could not operate with the pincer of falling sales and higher financing costs. Filing under chapter 11 of the Bankruptcy Code was the end result.

For a small establishment, chapter 11 means destruction not comfortable reorganization. Creditors claim the assets of the small business in default leaving nothing for the proprietors. This is a sad event for the individual or family that has spent a lifetime of hardwork and savings building a small enterprise. The luxury of a lengthy reorganization is rarely an option.

Commemorating U.S. Small Business Week should be more than a symbolic gesture. I have portrayed for you the state of small business as we begin to enter a period of economic recovery. All businesses have suffered during the past recession and small business has shared this burden. My contention is that small enterprises are best prepared to quickly capitalize in an expanding business climate, especially as interest rates continue to move downward. Small firms carry less debt than large businesses, and thus, will be better able to expand capital investment. The Fortune 1,000 companies, though, will continue a lengthy period of debt liquidation. Small firms will more quickly capitalize on new innovations since their overall financial health is stronger.

The small business community is poised to take advantage of the burgeoning recovery. This is the sector of the economy that is most likely to exhibit employment gains in the near term. Of course, since almost 75 percent of the private work force is involved in businesses with fewer than 500 people, it is logical that attention should be paid to improving employment in this sector.

Mr. President, what I am proposing is that U.S. Small Business Week be a kickoff to a concerted Federal Government effort to abet the small business recovery. I will continue to sponsor legislation designed to encourage capital formation in small business. This will primarily be accomplished through tax incentives. I believe that initial Treasury losses will give way to tremendous dividends later because the tax base will be expanded. I implore all my colleagues to support U.S. Small Business Week and the cause of small business in general. In this way, jobs creation will be effectuated and sustained recovery will be in the offing.●

AMERICAN DEFENSE EDUCATION ACT

● Mr. HART. Mr. President, the National Commission on Educational Excellence has issued its report entitled "A Nation at Risk: The Imperative for Educational Reform."

The Commission warned:

> The educational foundations of our society are presently eroded by a rising tide of mediocrity that threatens our very future as a nation and as a people. What was unimaginable a generation ago has begun to occur—others are matching and surpassing our educational attainments.

The members go on to say:

> We have even squandered the gains in student achievement made in the wake of the Sputnik challenge.

This discouraging and troubling report is bad news but not surprising. We have known for years that we have ignored critical education needs. There is no Sputnik to symbolize the challenges we face, but the successes of our competitors demonstrate our national neglect. We live in a nation whose economy is being transformed, a world grown more interdependent every day. This time of challenge demands a national commitment. Investment in education is vital—for our economic security and for our national security.

Unfortunately, this administration's response has been inadequate. This administration has defaulted on its obligation to public education. It is pursuing policies which will rob our children of the future they deserve. It considers education a luxury rather than a necessity. A misuse of public funds rather than a good investment.

The responsibility for our children's education is a shared one that rests on families and our communities. But it also requires strong and positive leadership from the Government.

We must restore funding for education programs which this administration has cut by about 10 percent since 1980. We must strengthen not abolish the Department of Education, the very symbol of our commitment to education. And, we must modernize our education system.

Only a modern education system can prepare our children for the world they will inherit. They must leave school not only literate in the traditional sense—they must be scientifically and technically literate as well. Unless they have these skills, they will not be able to lead productive and rewarding lives in tomorrow's economy.

In February I reintroduced the American Defense Education Act which can help meet this important need. The ADEA provides that local school districts develop and implement programs in elementary and secondary schools to improve instruction and student achievement in mathematics, science, foreign languages, communication skills, and technology.

It also encourages institutions of higher education to coordinate efforts with local school districts for the training and retraining of teachers through workshops, summer institutes and in-service training.

Last, the ADEA authorizes funds through the National Institute of Education to support development of effective teaching and learning techniques in math, science, and these other vital subjects.

Mr. President, the ADEA establishes an incentive program which is necessary to give needed Federal impetus to enable our country to meet the demands placed on our educational system by the technological changes taking place. I ask that the full text of S. 553, the American Defense Education Act be reprinted in the RECORD.

S. 553

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, this Act may be cited as the "American Defense Education Act".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds that—

(1) it is in the national interest that local systems of elementary and secondary education, under local control, be maintained and operated in all of the States which provide a high quality of education and which strive toward excellence in achievement by all students;

(2) even though the States and local communities have, and should retain, control over, and primary responsibility for, elementary and secondary education, the Federal Government has an interest in providing assistance to local educational agencies for programs which are important to our national defense and our national economy; and

(3) in order to increase the productivity of the Nation's economy and ensure an adequate number of high school graduates qualified to serve in the Nation's defense, it is necessary to improve the quality of instruction and levels of achievement in mathematics, the sciences, foreign languages communication skills, and technology, and to improve guidance and counseling.

(b) It is therefore the purpose of this Act—

(1) to authorize a national program of incentives which would assist local educational agencies in improving the quality of instruction in the schools of the United States in the fields of mathematics, the sciences, the communication skills, foreign languages, and technology, and in improving guidance and counseling;

(2) to provide that all local educational agencies be eligible to participate in that program;

(3) to provide that, in carrying out this program, the policies of the United States regarding equality of educational opportunity be reaffirmed and renewed; and

(4) to provide for a sustained program of research in order to develop knowledge and information resources on the improvement of teaching and learning in mathematics, the sciences, foreign languages, and communications.

TITLE I—ELEMENTARY AND SECONDARY EDUCATION PROGRAMS

LOCAL PROGRAMS TO IMPROVE EDUCATION

SEC. 101. (a) Any local educational agency in any State which desires to participate in the national program to improve education shall develop and carry out a program for the improvement of instruction and student achievement. Such program shall include—

(1) an assessment of instruction and student achievement in the school district of such agency; and

(2) specific plans for improving instruction and achievement in mathematics, the sciences, the communication skills, foreign languages, and technology, and for improving guidance and counseling in such schools.

(b) Each local educational agency which develops a local program pursuant to subsection (a) shall—

(1) as part of the assessment carried out pursuant to clause (1) of subsection (a), determine specific educational problems in the school district of such agency and develop a means of addressing those problems through expanded, improved, or new educational methods or practices;

(2) establish local, specific, objectively measurable goals which are to be achieved through the program developed pursuant to subsection (a) and establish or select a local procedure for measuring, at least annually, the extent to which such goals are being achieved;

(3) develop such programs through a procedure which involves the active public participation of the administrators, teachers, parents, business and industry, and representatives from the community as a whole;

(4) provide for inservice training of teachers as a means of improving the quality of instruction; and

(5) make available to the public a written statement which describes—

(A) the assessment carried out pursuant to clause (1) of subsection (a),

(B) the educational problems determined pursuant to clause (1) of this subsection,

(C) the overall program developed and carried out under this section, and

(D) the goals and procedures required by clauses (2) and (3) of this subsection.

PAYMENTS

SEC. 102. (a) Each local educational agency which establishes a program to improve education under section 101 shall be eligible for a basic payment for each fiscal year during which it conducts such program. The amount of such basic payment shall be equal to 2 per centum of the payment rate established under subsection (c), multiplied by the number of children in average daily attendance in the school district of the local educational agency.

(b) Each local educational agency which conducts a program to improve education under section 101 during any fiscal year and demonstrates that the program substantially achieves the goals established for such year pursuant to clause (2) of section 101(b) shall, in addition to the payment for which it is eligible under subsection (a) for the succeeding fiscal year, be eligible for an incentive payment equal to 2 per centum of the payment rate established under subsection (c) for such succeeding fiscal year, multiplied by the number of children in average daily attendance in the school district of the local educational agency.

(c)(1) The payment rate for any local educational agency in any State for any fiscal year shall be equal to the average per pupil expenditure for that State, except that the payment rate for any local educational agency shall not be less than the average per pupil expenditure in the United States.

(2) For the purposes of paragraph (1), the term "average per pupil expenditure" in a State, or in the United States, shall be the aggregate current expenditures, during the second fiscal year preceding the fiscal year for which the computation is made (or if satisfactory data for that year are not available at the time of computation, then during the most recent preceding fiscal year for which satisfactory data are available), of all local educational agencies in the State, or in the United States (which for the purposes of this subsection means the fifty States, and the District of Columbia), as the case may be, plus any direct current expenditures by the State for operation of such agencies (without regard to the source of funds from which either of such expenditures are made), divided by the aggregate number of children in average daily attendance to whom such agencies provided free public education during such preceding year.

(3) For the purposes of paragraph (2), the term "current expenditures" means expenditures for free public education, including expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities, but not including expenditures for community services, capital outlay, and debt service.

(d)(1) Notwithstanding any other provision of this section, the amount which may

be appropriated for a fiscal year for payments under this section may not exceed the product of—

(A) the total number of children in average daily attendance in the schools of all the local educational agencies in the States, multiplied by

(B)(i) $50 for fiscal year 1985, or

(ii) $100 for each of the two succeeding fiscal years.

(2) If the total amount appropriated in accordance with paragraph (1) is less than the sum of the amounts for which all local educational agencies are eligible under this section, the amount paid to each local educational agency shall be ratably reduced to the extent necessary to bring such payments within the limits of the amount so appropriated. If additional funds become available for making payments under this section for that year, such reduced amounts shall be increased on the same basis that they were reduced.

APPLICATIONS FOR PAYMENTS

SEC. 103. (a) Each local educational agency which desires to receive the payment for which it is eligible for any fiscal year under section 102(a) shall notify the Secretary of its intention to establish a program under section 101 and, at such time and in such form and manner as the Secretary may require, submit an application therefor. Such application shall contain assurances that—

(1) the local educational agency has developed and is carrying out a local program meeting the requirements of section 101;

(2) the local educational agency will maintain a level of per pupil expenditures during that fiscal year which is at least equal to that maintained during the preceding fiscal year;

(3) adequate procedures for public participation in the development of the local program have been established and used and that such procedures include provisions for filing complaints concerning the operation of the local program and the resolution of problems arising from such complaints.

(4) the local educational agency has established a local program of inservice training for teachers in the schools of such agency, which program shall provide an adequate level of training for all teachers in need thereof and shall be operated under that supervision of the teachers in such schools; and

(5) the local educational education agency will not exclude an individual from participation in, deny an individual the benefits of, or subject an individual to discrimination under, a program or activity because of race, color, national origin, religion, or sex.

(b) Each local educational agency which desires to receive the payments for which it is eligible for any fiscal year under section 102(b) shall include in its application under subsection (a) for the succeeding year such evidence as may be necessary to show that it has met the requirements of section 102(b) for that year.

(c) The Secretary shall approve each application submitted for any fiscal year which meets the requirements of subsection (a) or subsection (b), as the case may be.

TITLE II—TEACHER TRAINING AND POSTSECONDARY PROGRAMS

TEACHER TRAINING INITIATIVES

SEC. 201. (a) The Secretary is authorized to establish a program of grants to institutions of higher education for the purpose of encouraging coordination between such institutions and local educational agencies in the improvement of science and mathematics education. No grant to any such institution for any fiscal year shall exceed $200,000. In making such grants, the Secretary shall ensure an equitable geographic distribution of the funds available therefor. Proposals for such grants shall be evaluated through a peer review process, including practitioners from the elementary, secondary, and postsecondary education communities. Such proposals shall be developed by the recipient institution in collaboration with one or more public schools or school districts and other appropriate agencies or councils.

(b) In making grants under this section, the Secretary shall give priority to those proposals which include any of the following activities:

(1) summer institutes and workshops and a parallel program of in-service education, conducted by higher education institutions to provide practicing teachers and supervisors with up-to-date science and mathematics information and pedagogical concepts;

(2) projects to enhance the capacity of institutions of higher education to meet the professional needs of both new and practicing teachers, including faculty development activities; and

(3) support for exemplary State, local, and institutional efforts to attract, retain, and motivate teachers to pursue careers in precollege mathematics and science education, as well as identification of exemplary teacher training projects, and the dissemination of information about these projects.

(c) For the purposes of this section, the term "institution of higher education" has the meaning given such term by section 1201(a) of the Higher Education Act of 1965.

(d) There are authorized to be appropriated to carry out this section $25,000,000 for fiscal year 1985, $30,000,000 for fiscal year 1986, and $20,000,000 for fiscal year 1987.

TITLE III—RESEARCH TO IMPROVE INSTRUCTION

EDUCATIONAL RESEARCH PROGRAM

SEC. 301. (a) The Secretary shall administer through the National Institute of Education, in consultation with appropriate Federal agencies, a program to support research and development into effective education in mathematics, the sciences, foreign languages, and technology. Research projects and programs supported by this section shall include one or more of the following:

(1) research on teaching and learning in mathematics, science, foreign languages, and the instructional uses of information technologies;

(2) the application of such research to the improvement of instructional materials and teacher training programs;

(3) research on the effects of secondary school organization and operation on student learning in mathematics, science, foreign languages, and technology;

(4) student achievement in advanced academic skills needed for work and further learning, including computer and technological literacy; and

(5) analysis of local and institutional policies enhancing or inhibiting the recruitment, retention, and instructional improvement in mathematics and science teachers.

(b) There are authorized to be appropriated in the Department of Education and made available to the National Institute of Education to carry out this section $15,000,000 for fiscal year 1985, $20,000,000 for fiscal year 1986, and $25,000,000 for fiscal year 1987.

TITLE IV—GENERAL PROVISIONS

ADMINISTRATION

SEC. 401. (a) The Secretary of Education shall be responsible for the administration of the program authorized by this Act.

(b) The Secretary shall pay to each local educational agency which has an application approved under section 103 for any fiscal year the amount for which that agency is eligible for that fiscal year.

DEFINITIONS

SEC. 402. For the purposes of this Act—

(1) the term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public, elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary and secondary schools;

(2) the term "State" means a State, the Distict of Columbia, Puerto Rico, Guam, American Samoa, the Northern Marianas, the Trust Territory of the Pacific Islands, or the Virgin Islands; and

(3) the term "Secretary" means the Secretary of Education.

JOINT SURVEY AND REPORT BY THE SECRETARIES OF DEFENSE AND EDUCATION

SEC. 403. (a) The Secretary of Education shall conduct a survey of the levels of academic achievement of eighteen-year-old persons in the United States each year beginning in 1984 and continuing for the succeeding three years in order to determine the extent to which the need for qualified personnel in the Armed Services can be satisfied without remedial education. Furthermore, the Secretary of Defense shall conduct a study projecting the personnel training needs of the Armed Forces for the next four years. The Secretary of Education shall prepare in conjunction with the Secretary of Defense and local educational agencies an analysis of educational needs of the Department of Defense to assist in efficient personnel development.

(b) Not later than October 1 of each year during which the surveys are being conducted pursuant to subsection (a), the Secretary of Defense and the Secretary of Education shall submit a joint report of their findings from such survey to the Congress. Such report shall include—

(1) a statement of findings by the two Secretaries with respect to the results of such survey;

(2) an estimate of the number of persons surveyed who qualify for entry into the Armed Aervices without remedial education and the number who do not qualify by reason of failure in academic achievement;

(3) a statement regarding the extent of which the estimated number of qualified persons meets the estimated personnel needs of the Armed Services; and

(4) recommendations for improving the quality of instruction in secondary schools with a view toward raising levels of academic achievement among eighteen-year-old persons.●

BIPARTISAN COMMISSION FOR DEFENSE

● Mr. GOLDWATER. Mr. President, in a speech on May 7, 1983, before the

American business press, I announced that I am urging President Reagan to create a Bipartisan Commission for Defense so that we can unite America toward common goals. I ask that the following speech be printed in the RECORD.

The speech follows:

ADDRESS BEFORE THE AMERICAN BUSINESS PRESS ON MAY 7, 1983

We Americans have always had an extraordinary capacity for rising together to deal with crises, whether domestic or foreign. There are some who mark the history of this Nation by disasters—wars, scandals, assassinations, and economic upheavals. I prefer to look at American history in terms of how the people in this remarkable republic have managed, time and again, to face problems head on and solve them.

Well, we are facing some problems today that are fundamental in deciding our future and in preserving liberty in this Nation. These are not direct challenges, like wars and depressions. But they are just as important to our survival as a free society.

You know, Americans sometimes get the notion that liberty is a God-given state of affairs to which citizens of the United States are automatically entitled. But liberty is a privilege. We have a definite duty to work diligently and continuously to maintain our freedom.

Our liberty depends in part on our ability to devise coherent strategies for our economic system and for the defense of our country. We need a guiding vision, a basic set of principles, that will generate sustained, bipartisan support from a majority of the American people.

We've got to make some decisions about two areas of public policy and we've got to make them soon. We need to arrive at some national consensus on how we are going to cope with the reality of a welfare state. And we need to develop a clear strategy—indeed, a grand strategy—for our national defense. This strategy must be realistic and must be presented to the American people in terms so clear as to command their attention and win their approval.

Let us turn our attention first to the domestic front. Let us recognize, first of all, that the welfare state is here to stay. As a lifelong conservative, this is not an easy thing to say.

We have always believed that the best that Government can do was to insure equality of opportunity to the extent it could do so without infringing on personal liberty. Then, the conservative doctrine has held, Government should stay out of the way.

I have said in the past that the only absolutely legitimate functions of Government are maintaining national security and domestic order, and administering the national currency. The political system should not dominate the social or economic aspects of society.

For most of our history, our system thrived with little Goverment involvement in the day-to-day lives of the people. If someone had a problem, he or she would turn to members of the family, the local church, someone in the neighborhood, or other familiar faces. When they were sick, they got hot soup and tender care from mama. When they grew old, their families would provide for them.

Private institutions were the backbone of our society. Listen to what Tocqueville wrote about this country: "I have often seen Americans make really great sacrifices for the common good, and I have noticed a hundred cases in which, when help was needed, they hardly ever failed to give each other trusty support. The free institutions of the United States and the political rights enjoyed there provide a thousand continual reminders to every citizen that he lives in society."

But the sense of self-dependence on which this country was built has been eroding for nearly 50 years, since the advent of the New Deal. This process has accelerated since the late 1960's. The welfare state has taken root.

There is no gain in trying to dispute the principle of Government support. What we need to do now—all of us, not just conservatives—is to recognize that our resources are finite and that we need a long-term strategy to cope with the realities of the welfare state.

How can we, as a society, meet the needs of those who depend on Government assistance without making the majority of our people dependent? And how can we accomplish this without having revolt by taxpayers? How can we preserve incentives for self-help and for the continuing strength of private institutions? How can we cope with the fact that we are now a service society rather than a productive society?

These are questions we need to answer in the next few years. And we need to come to a better understanding of just what the welfare state is.

It is not just a matter of taking care of the poorest or most handicapped among us. In fact, most Federal social spending goes to programs designed to help predominantly middle-class people.

Did you know, for example, that one year's increase in social security costs more than all of the food stamps program, and much of the basic welfare program, aid to families with dependent children, combined?

The four major programs with middle-class clientele—social security, medicare, unemployment, and Federal employee pensions and disability—accounted for $251.4 billion in fiscal year 1982. In contrast, the programs designed for poverty-level recipients—food stamps, child nutrition, medicaid, aid to families with dependent children, and housing subsidies—totaled $49.6 billion, about one-fifth of the other total.

So the constituencies behind an ever-expanding Government social service system are formidable. It is no longer just the inner-city or rural poor who turn first to Government for aid. We have middle-class families who are quite self-sufficient in most ways who place their parents in Government nursing homes and believe they have no financial responsibility for their care.

And as the society grows older, the cost of social security and medicare will continue to escalate, even with the recent reforms.

How many people really try immediately to find new employment when they lose their jobs? Aren't many people content to take their time and "collect" for awhile?

I don't mean to imply that everyone who uses these programs is abusing them. I use these examples only to illustrate a basic change in the prevailing state of mind among many Americans concerning the welfare state. Because these middle-class people have contributed to the social security or unemployment pool, or because they have paid taxes through the years, they consider these benefits to be fair returns on previous contributions. Because the poor have been supported by welfare programs for so long, they consider it a fundamental right to receive further Government support.

But as the number of recipients grows, the number of those supporting the system dwindles. When social security began, there were 11 people paying into the system for each recipient. Now there are about three people paying for each recipient.

Before this ratio, and that of other social programs, deteriorates any further, we need to develop a strategy for allocating the resources to be channeled through our social service system in the future.

While there is no way to back off from a welfare state, and it would not really be possible anyway, there must be a national consensus on exactly how much of a role Government should play in the lives of our people. And we need to figure out a way to fulfill that commitment without risking our liberty.

This risk was pointed out by one observer from another era: "And thus the frame of democracy was dissolved, and gave place to the rule of violence and force. For when once the people are accustomed to be fed without any cost or labour, and to derive all of the means of their subsistence from the wealth of our citizens . . . then commences the government of the multitude: Who run together in tumultuous assemblies and are hurried into every kind of violence . . . till, being reduced at last to a state of savage anarchy, they once more find a master and a monarch, and submit themselves to arbitrary sway."

This was Polybius, a Greek historian in the second century before Christ. We can't dismiss the possibility that the history we recounted can be repeated.

We are fortunate in the United States to have alternatives to an ever-expanding welfare state. We have a strong tradition of private sector involvement in the public good.

They don't have that in many of the European welfare states. Take France, for instance: Following the French Revolution of 1789, there was a period during which nearly all the private associations and local institutions throughout France were systematically abolished by those in power. These were seen as bastions of the old feudal system.

In their place, the French established departments of the central government. All of the societal structures between the individuals and the central government were wiped away. This was repeated in many countries. In these societies today, there is no alternative to government intervention. Where there is need, they have only one recourse—government assistance.

We, in this country, were lucky enough to escape this phenomenon. Throughout our history, private associations and institutions played a vital role in community life. Local and State governments retained a high degree of authority, providing layers of protection for the rights of our citizens.

There's been a lot of debate during the past 2 years about whether "private sector initiatives" can take the place of Government social programs. The consensus has been that they can't. But I would submit that this question misses the main point: That the private sector in this country is a healthy one with a long and glorious tradition.

Maybe it can't replace Government, but it can provide a great deal of help in controlling the growth of the welfare state and avoiding a condition under which a majority

of our people depend on a minority of taxpayers for their primary support.

We need to decide now whether we will continue to expand the welfare state with no clear idea of how to pay for it. We need to give thorough and realistic considerations to how we are going to shape Government's role in the future. And we need to work out a system that will protect future generations from the loss of liberty that's bound to accompany a loss of self-determination.

It was Thomas Paine who told our forefathers that "What we obtain too cheap, we esteem too lightly." For too many Americans, the unalienable rights of life, liberty, and the pursuit of happiness have come too cheap and been esteemed too lightly.

We've got to find a way to provide a vision of America that will inspire our people to work for themselves and thereby to work for American ideals like freedom and justice.

I don't know whether it should be done by our political leadership or by a mechanism outside Government, but we need to start making plans soon.

This brings me to the second major decision we face: The need for a military strategy that will insure our national security and still marshal the support of a majority of the American people.

Let us be clear about one thing: There is no more essential welfare program than an effective national defense.

We in the United States are blessed with enormous military resources, but this does not guarantee our national security. The sheer magnitude of global instability creates danger to U.S. interests in many areas of the world. And we must cope with the steady, unrelenting growth of Soviet military power.

We need a grand strategy and we need it now. It must be coherent. It must be realistic. It must be sufficient to deter our enemies and protect our friends. And it must be understood by the American people and have their support.

The understanding and support of the people is crucial. We are an intelligent people. We will listen to reason. Surely there is a way to make the public aware of the importance of a strong national defense. Surely if we can agree on a military strategy that will secure our national defense, one that illustrates the need for increased military spending, it will gain the support of the majority.

Too often debates on the budget come down to one party saying that an entire welfare program can be funded with the cost of one nuclear submarine, or one B-1 bomber. What a short-sighted view. This is similar to the mother who neglects getting medical care for her child because she wants to use that money for food or clothing. Regardless whether the food or clothing is necessary, they are not going to do the child much good if he becomes seriously ill. They will do no good if he dies.

Defense spending should not be a budget item that's debated alongside school lunches or food stamps. Each should be debated on its own merits. Let us remember, after all, that we are not even in the position of the mother who must choose between food and medical care. We are a rich society. We are growing richer all the time. We spend billions on sporting events, video games, and other diversions.

Our total output devoted to nondefense uses last year was 25 percent higher than it was 10 years ago. Private consumption was almost 30 percent higher. Defense spending in recent years has been lower as a percentage of Federal spending than at any time in the past three decades. While our defense expenditures totaled 5.6 percent of our gross national product in 1981, Soviet defense expenditures were more than 15 percent of GNP.

The evidence is overwhelming that we can afford all the defense we need. Why then do so many believe that we need so little?

This is generally attributed to the cynicism resulting from the Vietnam experience. There seems to be a feeling that if we have too much military capability, we will be more apt to use it. This has been mixed in recent years with growing concern over nuclear weapons, particularly the idea that a limited nuclear war might be waged in Europe under certain circumstances. Added to this is the fear raised by the spread of nuclear weapons and technology to many unstable or unfriendly countries.

But all of this does not explain the utter lack of regard by Americans for the dangers facing us around the globe.

The number one danger, of course, is presented by the Soviet Union. Taken by itself, the massive buildup in both nuclear and conventional arms over the past decade is frightening enough. The Soviet leadership has chosen to squeeze the people to undertake this buildup. They have forsaken domestic programs for military might, major investment in research and production over the past decade, which have been accomplished with relatively low labor costs, have enabled the Soviets to assemble the largest military force of modern times.

Making this even more dangerous is the fact that U.S. forces had deteriorated rapidly during the mid-1970's.

Since 1974, the Soviet Union has produced 2,000 intercontinental ballistic missiles to our 350; 54,000 tanks and other armored vehicles to our 11,000; 6,000 tactical combat aircraft to our 3,000; 85 surface warships compared to our 72; and 61 attack submarines to our 27.

While there has been improvement in recent years, we still find ourselves at a disadvantage in some areas, particularly in some aspects of conventional readiness. Another danger is that the Soviets control major portions of the world's supply of strategic minerals, such as manganese, platinum group metals, and cobalt. Much of the rest is in southern Africa or other unstable regions.

This situation becomes an outright emergency when one looks at the recent activities of the Soviets and their puppets around the world. With the help of the Cubans, Nicaraguans, and Libyans, they are trying to take control of Central America, a region of enormous strategic importance to the United States. Their adventurism in Poland and Afghanistan is well documented. With the Vietnamese, they have created havoc in Southeast Asia. And they are creeping slowly back into the Middle East, while maintaining a stranglehold in Angola with Cuban assistance.

The build-up by the Soviets has been accompanied by a hugh expansion of military capabilities throughout the Third World, particularly Soviet-controlled countries. Soviet influence is almost totally based on military assistance. Rarely does Soviet aid include non-military assistance. Rarely does Soviet aid include non-military materials. I might add, however, that this has begun to backfire, as evidenced by the softer line taken in the most recent meeting of nonaligned nations. They recognize that friends of the U.S. get some guns and a lot of butter. Friends of the Soviets get a lot of guns and no butter.

But this does not lessen the Soviet threat for now. Nor does it reduce the dangers posed by the likes of Libya, Vietnam, or Nicaragua.

For many years, military strategy was based on the premise that we could fight "two-and-a-half wars." That is, that we could handle two fronts at one time and still deal with a minor flareup elsewhere. As defense spending was reduced in the early 1970's, our strategy was shifted to that of "one-and-a-half-wars." The idea was that we would depend more heavily on intelligence and communications to allow us to spot potential threats.

Our strategy now seems to be based on the possibility of many fronts, and our aim is to be able to deal with many potential threats swiftly. Now, as always, the basic premise of our strategy is that it is defensive, that we would not instigate a war.

But our grand strategy needs to be more clearly defined and it needs support from a much broader constituency. The problems in the present situation are all too clear from the results in the Republican-controlled Senate Budget Committee, which defied a Republican President and cut his defense request in half. Clearly, even a very informed and well-intentioned group has not been convinced that the current strategy is well defined and sound. I'm not sure most of them even know what it is.

In the heated partisan atmosphere now dominating Washington, and the promise of even more partisan posturing in the coming election year, we need a mechanism outside the system to deal with this vital point.

We used just such a mechanism to resolve the deadlock over social security: a bipartisan commission that reports directly to the President and develops practical options that are designed to appeal to a majority in Congress.

I am tonight urging President Reagan to name such a commission to develop a grand military strategy both for the immediate future and for the long run. This group should include all available former high-ranking military commanders, distinguished military scholars, and a few key policymakers from each party. This body should not be dominated by any one school of thought or any one ideological strain.

They should suggest both an overall design and specific strategies for outbreaks in various parts of the world.

As a member of the Armed Services Committee and chairman of the Intelligence Committee, I have had many an occasion to speak with members of the Joint Chiefs of Staff and other military experts. It's hard to find one who doesn't feel we are naked, when it comes to military strategy. The need for a clear vision of our national defense needs has never been greater. Let's try to get all Americans going in the same direction when it comes to national defense. We need to do more than just point the way. We need to assure them that somebody knows what we'll find when we get there.

Thank you.●

MISSOURI K.I.D.S.

● Mr. DANFORTH. Mr. President, Missouri K.I.D.S. provides counseling, equipment, and home modifications to student athletes who suffer catastrophic injuries while playing their

sports. Certainly, increasing national awareness of these injuries and efforts to reduce their incidence is vital.

The objective of K.I.D.S.—Missourians who Kare for Injured and Disabled Students—is to provide help and support to young people striving to cope with serious injury. On March 11 and 12, thousands of students from more than 50 secondary schools in St. Louis City, St. Louis County, St. Charles County, and Jefferson County joined forces to raise more than $25,000 for K.I.D.S. The Gateway District of the Missouri Association of Student Councils sponsored the fundraising drive as its principal community service project.

It is an honor to recognize the wonderful sense of purpose and service demonstrated by so many young Missourians.●

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. TOWER. Madam President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. on Tuesday, May 10, 1983.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

PROGRAM FOR TUESDAY

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. TOWER. Madam President, I ask unanimous consent that on tomorrow, following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business, not to exceed 10:30 a.m., with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION OF CONSIDERATION OF SENATE CONCURRENT RESOLUTION 27, THE BUDGET RESOLUTION

Mr. TOWER. Madam President, further, I ask unanimous consent that at no later than 10:30 a.m. the Senate resume the unfinished business, Senate Concurrent Resolution 27, the budget resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS BETWEEN 12 NOON AND 2 P.M. ON TOMORROW

Mr. TOWER. Madam President, finally I ask unanimous consent that the Senate stand in recess between the hour of 12 noon and 2 p.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE SEQUENCE TOMORROW

Mr. TOWER. Madam President, I believe that all bases have been touched and all principal parties concur that at the hour of 2 p.m. tomorrow there will be three rollcall votes in sequence with 5 minutes of debate to be equally divided between each vote.

Has that been agreed to?

The PRESIDING OFFICER. Under the previous order that has been agreed to.

Mr. BYRD. That has been covered under a previous order.

Mr. TOWER. I think that was covered under a previous order. I think what was not covered was the number of votes to be had.

So, there will be three rollcall votes beginning at 2 p.m.

Mr. PRYOR. Madam President, will the distinguished acting majority leader yield?

Mr. TOWER. I yield.

Mr. PRYOR. What are those three votes? Do we have that list handy?

Mr. TOWER. The three votes on which we have the yeas and nays ordered are the Pryor amendment No. 1, the Pryor amendment No. 2, and the Nunn-Jackson amendment.

May I suggest to my friend from Arkansas we will return to the consideration of the resolution at 10:30 a.m., and do not go into recess until 12 noon. There will be an hour-and-a-half for debate prior to the time we reconvene after recess at 2 p.m. at which time the votes are stacked.

It is my understanding that on the Pryor amendment No. 1 there are 66 minutes remaining and under the Pryor amendment No. 2 there are 80 minutes remaining.

Obviously, 1½ hours will not accommodate all of that time which means that in a fortunate way the time could be reduced in that timeframe. That is my understanding.

Mr. PRYOR. I wish to say to both the distinguished acting majority leader and the minority leader that I have no intention of taking all that time for all those amendments. I assume most of the time on those amendments will be taken perhaps in answering questions from collegues on the floor in trying to explain the points. As far as making a speech about or in behalf of those two amendments, I have already made the speeches.

Mr. TOWER. The first vote will be on the Nunn-Jackson amendment, and there is provision that there will be 5 minutes intervening between the other votes that are stacked in that post-2 p.m. period. So there is a short period for debate.

RECESS UNTIL 10 A.M. TOMORROW

Mr. TOWER. Madam President, I ask unanimous consent that the Senate now stand in recess pursuant to the previous order.

There being no objection, the Senate, at 6:22 p.m., recessed until 10 a.m., Tuesday, May 10, 1983.

NOMINATIONS

Executive nominations received by the Senate May 9, 1983:

DEPARTMENT OF STATE

Richard B. Stone, of the District of Columbia, to be Ambassador at Large.

DEPARTMENT OF JUSTICE

D. Lowell Jensen, of Virginia, to be Associate Attorney General, vice Rudolph Giuliani.

DEPARTMENT OF LABOR

Ford Barney Ford, of California, to be Under Secretary of Labor, vice Malcolm R. Lovell, Jr., resigned.

INTERSTATE COMMERCE COMMISSION

Jane E. M. Holt, of the District of Columbia, to be a member of the Interstate Commerce Commission for a term expiring December 31, 1985, vice Reginald E. Gilliam, Jr., resigned.

FARM CREDIT ADMINISTRATION

Paul I. Enns, of California, to be a member of the Federal Farm Credit Board, Farm Credit Administration, for a term expiring March 31, 1989, vice Edgar C. Rutherford, term expired.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Herman O. Thomason, xxx-xx-x... xxx-... FR, U.S. Air Force.

EXTENSIONS OF REMARKS

VOCATIONAL EDUCATION CONSOLIDATION

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. ERLENBORN. Mr. Speaker, today, along with two of my colleagues, I am introducing the administration's bill to consolidate existing Federal programs for vocational and adult education into a single, modified block grant to the States. As Senator HATCH noted when he introduced this legislation (S. 1039) in the other body, this bill can be considered a modified block grant:

Because while it consolidates the funding of two separate programs into a single authorization, complete discretion as to how much money will go into these programs is not left entirely with the States as would be the case were this legislation to be a block grant in the true sense of the term.

In addition, the adult education component still maintains its basic identity as an adult literacy program rather than a skill development or job-training program. The bill would, however, consolidate the administration of, and advisory boards for, vocational education and adult education at the national, State, and local levels.

Except for changes in style and format the only major difference between this bill and the one that Senator HATCH introduced is that my bill applies section 431 of the General Education Provisions Act—providing for the right of congressional review and disapproval of Education Department regulations—to this new program.

As our colleagues must know, the current vocational and adult education laws and regulations have been characterized as extremely complicated, intrustive, and burdensome to State and local officials. The bill I am introducing today would vastly simplify the current laws while sharpening the Federal focus on such priorities as economic development and adult retraining. The provision in this bill for economic development and skilled work force training is in keeping with the needs and trends of the 1980's and is designed, I feel, to compliment the Job Training Partnership Act signed into law last October by President Reagan.

I think the legislation also provides an appropriate balance between specificity and flexibility. While the bill earmarks funds for certain national priorities such as programs for the handicapped, it also permits States the discretion to shift 22 percent of the funds among the targeted State programs—economic development and skilled work force training; strengthening State and local systems of vocational education; and adult basic education.

While I laud the administration for coming forward with such a creative, positive, and serious proposal which vastly improves on the version proposed to the last Congress, I do have several concerns which I feel should be addressed during the hearings on this legislation. For example, certain of the proposed conforming amendments made to the Job Training Partnership Act (JTPA) may have the unintended effect of hampering rather than facilitating the coordination of all training programs through the statewide coordinating mechanism established under JTPA. This aspect of the bill will have to be thoroughly reviewed by the House Education and Labor Committee.

Another example of a legitimate concern is, I feel, the dangerous precedent of placing vocational education State advisory councils at the mercy of the very State education agencies they are designed to monitor and evaluate. One can easily envision how such an advisory council would lose its independence if its funding were to depend solely on a decision by the State education agency.

I will also be interested in hearing from witnesses representing organizations and individuals currently protected by the series of earmarked funding provisions in the Vocational Education Act. My question is whether we can ever reconcile the need for reasonable legislative flexibility with the demand for specifically designating funds for certain Federal priorities.

I look forward to prompt and fruitful hearings on this bill. It is a serious proposal and one that is worthy of careful consideration by the Education and Labor Committee as it grapples with the task of stengthening vocational and adult education so that they can play an enhanced role in the economic revitalization of the United States.

A section-by-section analysis of the bill follows:

VOCATIONAL AND ADULT EDUCATION CONSOLIDATION ACT SECTION-BY-SECTION ANALYSIS

PART A—GENERAL PURPOSES

Section 101 establishes the purpose of the Act as the authorization of State and national programs which will promote economic development by addressing the needs of youth and adults in all communities for vocational education, strengthening State and local systems of vocational education, enhancing equal opportunities in vocational education for all students, overcoming sex stereotyping and sex bias in vocational education, addressing the national need of employers for a skilled and literate workforce, addressing the training needs of displaced workers, assisting adults to acquire basic skills needed to function in society, and assisting adults to continue their education to at least the level of completion of secondary school. An additional intention is that States participating in programs under the Act be afforded broad discretionary authority in planning, developing, administering, and operating these programs.

Section 102 authorizes for this Act such sums as are necessary for fiscal years 1984 through 1988. It further provides for expenditure of funds appropriated under the Smith-Hughes Act.

Section 103 authorizes the Secretary to set aside, for National Programs, up to 5 percent of the funds appropriated under the Act. Any funds set aside will be available for obligation and expenditure without regard to the fiscal year for which they are appropriated.

Section 104 prescribes a method for allotting funds to the States. Funds are to be allotted on the basis of population and number of unemployed persons in three age cohorts and inverse per capita income. No State may receive less than $100,000. (If funds are not available to satisfy this requirement, allotments to States shall be reduced proportionately.)

Section 105 describes the requirement of a Proposed Use Report that a State must submit to the Secretary in order to participate in programs funded under Part B. The report must designate a single State agency that is responsible for the administration or supervision of the administration of Part B programs. It will describe the goals the State will seek to achieve, the characteristics of the individuals to be served, how the Federal funds will be used, how the funds will be distributed within the State, and the anticipated results. It will further describe how the State will provide vocational education students with access to basic skills instruction, how equal opportunity in vocational education will be enhanced for all students, how the State will address sex stereotyping and sex bias in vocational education, and how the State job training coordinating councils and private industry councils or other private sector representatives will be involved in planning and carrying out vocational programs. The report will include assurances regarding proper administration, fiscal control, fund accounting, submission of reports, participation of private school students, and meeting the basic education needs of adults. Finally, the report will contain an assessment of programs and projects supported during the most recently completed program year. Prior to submission, the report will be made public in the State.

Section 106 provides for State audit of activities funded under Part B.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Section 107 requires that the Secretary submit an annual report to Congress on the status of vocational and adult education in the Nation.

Section 108 establishes a National Advisory Council on Vocational and Adult Education, with members appointed by the President.

Section 109 makes certain sections of the General Education Provisions Act applicable to programs conducted under this Act.

PART B—STATE PROGRAMS

Section 120 states that the Secretary shall make grants to the States (in accordance with Section 104) for establishing, expanding, and improving vocational education programs and for supporting adult education programs. A State may set aside that portion of the grant required for State administration. Of the remainder, at least 30 percent must be used for programs and projects under Subpart 1 (Economic Development and Skilled Workforce Training), at least 30 percent for programs and projects under Subpart 2 (Strengthening State and Local Systems of Vocational Education), and at least 13 percent for programs and projects under Subpart 3 (Adult Basic Education). Funds under this part may be used to pay for up to half of the administrative expenses at the local level. Funds may be used to pay for State or local advisory councils, but not for stipends or construction.

Section 121 provides that States may use funds under this part directly or to make grants or enter into contracts with other eligible recipients for the purpose of carrying out programs and projects under Part B.

Section 122 states the purpose of Subpart 1 as supporting Economic Development and Skilled Workforce Training programs and projects. Training conducted under this Subpart must correspond to specific State or local economic needs or plans.

Section 123 describes the types of activities that may be funded under Subpart 1, including retraining persons whose jobs have been lost or jeopardized by technological or economic change; training for skilled occupations needed to revitalize business and industries that are essential to State or local economic well-being; training for skilled occupations which are needed to attract the entry of new businesses into a State or community; related research, curriculum development, and instructor training; and training in entrepreneurship. In conducting these activities, recipients shall give careful consideration to the needs of persons who have lost their jobs or whose jobs are jeopardized by technological or economic change.

Section 124 states the purpose of Subpart 2 as supporting programs, projects, services, and activities for Strengthening State and Local Systems of Vocational Edcucation.

Section 125 requires each State, in using its Subpart 2 funds, to set aside at least 15 percent for the special needs of the handicapped and to give careful consideration to the needs of the disadvantaged and the limited-English-proficient. Allowable expenditures under this subpart include joint programs with business, industry, and labor; support services (except for stipends) for homemakers and single heads of households; programs designed to reduce sex stereotyping and sex bias in vocational education; cooperative and work-study programs; remedial instruction in basic skills; acquisition or replacement of equipment; consumer and homemaking education; and student organizations.

Section 126 states the purpose of Subpart 3 as supporting programs, projects, services, and activities in Adult Basic Education.

Section 127 describes the types of activities that may be supported under Subpart 3. These include programs for the institutionalized such as persons who are incarcerated or confined to treatment facilities, programs for adults in rural or urban areas with high rates of unemployment, and high school equivalency programs. States are to give particular consideration to the special needs of immigrants and other limited-English-proficient adults.

PART C—NATIONAL PROGRAMS

Section 130 authorizes and requires the Secretary to use funds reserved under Section 103(a) to support any or all activities authorized by sections 131, 132, 133, and 134.

Section 131 authorizes the Secretary to conduct research, develop programs, collect and disseminate information, and develop State and local leadership in vocational and adult education. The Secretary is also authorized to support a National Center for Research in Vocational and Adult education.

Section 132 authorizes the Secretary to make contracts, grants and cooperative agreements with Indian tribes and organizations for vocational and adult education programs and projects consistent with tribal economic development plans.

Section 133 authorizes support of the National Occupational Information Coordinating Committee established under the Job Training Partnership Act.

Section 134 authorizes activities of Program Improvement for Meeting National Skilled Workforce Needs. These may include exemplary job-training programs for persons who have lost their jobs or whose jobs are jeopardized by technological or economic change; demonstration programs designed to reduce sex stereotyping and sex bias in vocational education; model or demonstration training programs; collaborative programs, including employment and training programs, with business, industry, and labor and with other agencies of the Federal government; programs designed to expand the use of volunteers in providing vocational and adult education; activities in the areas of rural vocational and adult education and rural family education; and special training programs and projects designed to address critical shortages of skilled workers which the Nation requires.

PART D—DEFINITIONS

Section 140 provides definitions for a number of terms used in the Act.

PART E—CONFORMING AMENDMENTS REPEALS; EFFECTIVE DATE

Section 150 would make a number of conforming amendments to the Job Training Partnership Act.

Section 151 repeals the Adult Education Act (except Section 316) and the Vocational Education Act. The effective date of this Act is July 1, 1984.●

PERSONAL EXPLANATION

HON. DAN MARRIOTT

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. MARRIOTT. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Thursday, April 28, 1983, for roll call Nos. 72 and 74. Had I been present I would have voted "yea" on House Joint Resolution 13, calling for a mutual and verifiable freeze on and reductions in nuclear weapons; AuCoin's preferential motion, roll call No. 72; and "yea" on the amendment to call for the maintenance of essential equivalence in overall nuclear capabilities both now and in the future, roll call No. 74.●

THE SMALL BUSINESS PARTICIPATION ACT OF 1983

HON. LYNN MARTIN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mrs. MARTIN of Illinois. Mr. Speaker, the year 1982 was a trying year for small business. Statistics clearly indicate the effects of the recent recession. On a brighter note, however, 1982 was a legislatively good year for small business concerns. While some battles were lost, others were decided more favorably for entrepreneurs. Included within this legislative scorecard are:

The Small Business Innovation and Development Act of 1982—channels $45 million worth of Federal research and development to small hi-tech firms in fiscal year 1983 and about 10 times that amount through fiscal year 1987;

The Export Trading Company Act—enables small and medium sized firms to better compete in foreign markets;

The Prompt Payment Act—requires the Federal Government to pay its bills on time or face interest penalties, particularly helping small firms which do business with the Federal Government;

Tax Code reform for subchapter S corporations—makes it easier for new, small corporations to take advantage of limited personal liability for corporate debts while being subject to individual income tax.

The legislative wish list for small business concerns, nonetheless, continues in this session of Congress. I, for one, am well aware that the role of small business in economic recovery is too important to brush aside these concerns.

The national significance of small business is best understood in its function as an employer and as a producer: 14 million small and independent businesses employ 58 percent of all private sector jobs and support 100 million people; 97 percent of all businesses are small businesses; over 80 percent of new jobs created in the private sector are from small business; small firms produce 2.5 times as many innovations as large firms relative to the number

of people employed and they bring these products to market almost a year ahead of their larger counterpart.

The role of small business is just as important to Illinois' economy. Its contribution to Illinois mirrors that nationwide: Illinois ranks fourth among the top 10 States which together account for 55 percent of all U.S. business establishments; 99.4 percent of Illinois' businesses are small establishments; Illinois' 200,000 plus small businesses employ 83 percent of the State's work force; Illinois ranks first in agricultural exports and third in agricultural and manufacturing exports combined, a marketing avenue important to small business.

The voice of small business has been heard clearly both on the State and national levels. It, therefore, is fitting that the week of May 8 through May 14 be designated "Small Business Week." Even more appropriate is its slogan: "There's no business like small business." I proudly join in the song of small business.

In honor of the contribution of private enterprise to the economy, particularly small business, today I introduced the Small Business Participation Act of 1983. My legislation will reaffirm and strengthen the Federal Government's commitment to private enterprise through the purchase of goods and services.

For too long the Federal Government has assumed and retained functions that can be handled more efficiently by the private sector. While Federal procurement policy has supported reliance on the private sector for needed goods and services, Government practices time and time again have done otherwise. The Small Business Participation Act of 1983 will provide the now-lacking legislative mandate needed for a consistent and uniform effort.

At a time when small business is struggling, it is ludicrous for our Government to compete for the very business so important to small business. In fact, a 1980 Small Business Administration citizen task force stated that the biggest threat to small business in Government procurement was competition by the Government itself.

It is simply nonsensical not to efficiently utilize private enterprise. The Congressional Budget Office has estimated that a contracting out policy by the Federal Government could save $335 million in the first year and over $800 million in later years. An example of proven savings, ironically, is the U.S. Army which shifted 61 operations to private enterprise from 1979 to 1981, resulting in savings of $312.4 million. Had these operations been performed in-house, the cost to the taxpayer would have been 50 percent more. Not only can similar efforts save millions, they also create much needed tax revenue for all levels of government. For instance, a firm which employs 200 persons and grosses $10 million annually would return $1.17 million in taxes each year to the three government levels if its services were contracted by the Federal Government.

The time has come to question whether or not the 11,000 various commercial and industrial type functions performed by the Federal Government can be provided more effectively by the private sector. The time has come to strengthen our commitment to private enterprise and channel the estimated $2 billion in annual contract activity to the private sector. The time has come to halt inefficient Government activity and get a better value for our tax dollar.

I am confident the Small Business Participation Act of 1983 can go far in securing the proper role of private enterprise in the Government's use of goods and services. Following is the text of my private enterprise legislation:

H.J. RES. 262

To clarify and reaffirm that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services

Whereas it is the function of Government to establish Federal policies and manage Federal programs established by or pursuant to law;

Whereas it is the function of private enterprise system, which is the primary source of national economic strength, to provide goods and services needed in that endeavor;

Whereas optimum efficiency, economy, and productivity can be achieved if the Government relies on competitive procurements from private enterprise for its needed goods and services;

Whereas small business is a key element in the private enterprise system and should be heavily relied on for providing goods and services to the Government; and

Whereas in a democratic free enterprise system, the Government should not compete with its citizens: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That it is the general policy of the Government of the United States to rely on competitive private enterprise to supply the products and services it needs whenever competitive industry prices for such products and services are available. These policies shall be administered by the Director, Office of Management and Budget in coordination with the Administrator, Office of Federal Procurement Policy, and the Administrator, Small Business Administration.

SEC. 2. This resolution may be cited as the "Small Business Participation Act of 1983".●

PERSONAL EXPLANATION

HON. BEN ERDREICH

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. ERDREICH. Mr. Speaker, on May 9, 1983, during the initial votes taken by the House, I was en route from my district. Unfortunately, due to a meeting scheduled this morning in Birmingham, Ala., I was unable to cast a vote on four bills. Had I not been detained on district business I would have cast my votes as follows: "aye" for H.R. 2357, H.R. 2173, and S. 653.●

NUCLEAR WEAPONS FREEZE

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. WAXMAN. Mr. Speaker, illness forced me to be absent from the House on Wednesday, May 4, and thus I regrettably missed voting on House Joint Resolution 13, calling for a mutual and verifiable freeze on and reductions in nuclear weapons.

As a cosponsor of House Joint Resolution 13 this year, as well as a sponsor of the similar resolution in the last Congress, I would, of course, have voted for it had I been present and would have continued to vote against any amendments aimed at weakening the resolution.

The adoption of this resolution by the House may well come to be regarded as an epochal decision, Mr. Speaker. It tells the executive branch—as well as our friends and foes in other nations—that this House wants an end to the nuclear arms race and the elimination of the threat nuclear weapons pose to our existence.

Despite the significance of the vote, however, much more needs to be done both by us in the House and by the dedicated men and women throughout the United States who campaigned for House Joint Resolution 13.

We must recognize that the military spending recommendations by this administration greatly exceed what is necessary to protect our security. As Members of the House, we have opportunities to reduce those programs and we should do so. I hope, too, that the great numbers of Americans who campaigned for the freeze resolution will campaign equally hard for military spending reductions.

And, Mr. Speaker, we also must come to grips with the fact that our world becomes ever more dangerous the longer that American leaders and Soviet leaders fail to find common ground.

Not too many years ago, the Soviet Union and the United States were in a period of détente. We had arrived at many agreements and it appeared as though we would arrive at many more. There were exchanges at a cultural and political level, there was increasing trade and there were strong indications, exemplified by growing numbers of emigrants from the U.S.S.R., that some of the internal restraints by Soviet authorities were being eased.

Détente collapsed in December 1979 when Soviet troops marched into Afghanistan and we responded with a series of measures, including a decision to forgo ratification of the SALT II Treaty. Since the advent of the Reagan administration relations between the United States and the U.S.S.R. have worsened.

It is now time, Mr. Speaker, for this administration to stop its strident characterizations of the Government of the U.S.S.R. as evil incarnate. Instead, it must begin serious negotiations on a variety of issues and recognize that in order for the world to survive and prosper, the two most powerful nations in history must learn to exist peacefully and constructively with each other.●

NEWARK IS THE GOSPEL MUSIC CAPITAL OF NEW JERSEY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. RODINO. Mr. Speaker, it is with great pride that I recognize my home city of Newark as the gospel music capital of New Jersey. Tomorrow, May 10, Mayor Kenneth Gibson will issue this proclamation, and will also designate the week of June 14 to 21 as "Gospel Music Week."

As many of us are aware, gospel music represents the first truly American form of music. The orginal spirituals created by the slaves were a combination of African and European musical styles together with an originality that can only be called American. In addition, they incorporated symbolic lyrics as expressions of hope and a better day. Those beautiful songs have lasted and have been given new meaning throughout our history.

The city of Newark has been one of the great leaders in the promotion, study, and appreciation of gospel music. I would especially like to recognize Prof. Albert J. Lewis of Newark, who is the president and founder of the World Gospel Music Association. Professor Lewis has worked tirelessly to bring the joy of gospel music to the citizens of Newark and to the rest of the world. He is to be commended for his outstanding efforts in fostering worldwide appreciation of gospel music.

As we celebrate this event it is good to reflect on those wonderful spirituals and the symbols of freedom and hope that are so beautifully expressed.●

TRIBUTE TO ELIJAH ROGERS

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. FAUNTROY. Mr. Speaker, on May 13, the many friends of Elijah "Baby" Rogers will gather to honor and roast his 4 years of service as city administrator of the District of Columbia. He will be leaving public service on May 27.

Mr. Rogers, a native of Orlando, Fla., attended elementary and secondary schools in Orlando, Fla., Thereafter, he acquired a B.A. degree from South Carolina State College, Orangeburg, S.C. Mr. Rogers has earned a master's degree in social work and a master of arts degree with concentration in urban administration, both from Howard University.

Mr. Rogers was appointed city administrator of the District of Columbia on December 29, 1978. Since July 1976, Mr. Rogers served as city manager for the city of Berkeley, Calif., and was responsible for the supervision of 16 departments and preparation of the city's annual budget.

Mr. Rogers came to Berkeley in July 1974 as assistant city manager. Prior to coming to Berkeley, Mr. Rogers served as assistant city manager for administration and assistant to the city manager for general administration for the city of Richmond, Va. Prior to serving as Richmond's assistant to the city manager in January 1972, Mr. Rogers was chief of staff, city manager's office, Bowie, Md. Mr. Rogers served with the National Urban League as a field representative and assistant director of Federal progams. Mr. Rogers has also served as consultant to several national organizations. He is an author of several articles in the field of public administration.

Since his appointment as city administrator of the District of Columbia, Mr. Rogers has been recognized for his outstanding performance in managing on-going District finances and for bringing order to the formerly chaotic accounting records and practices of one of our Nation's major cities. In fiscal 1981, for example, his insistence upon stringent financial management made an added $68 million available for reducing an accumulated $377 million deficit to $309 million. This achievement is even more remarkable when one considers the difficult control systems and to constant vigilance in the fiscal arena has produced impressive benefits for District of Columbia citizens and taxpayers alike.

Mr. Rogers is a member of the International City Management Association and recently served as chairperson of the Alameda City-County Management Association. He was the recipient of the 1979 distinguished alumnus award at South Carolina State College, Orangeburg, S.C. He also received the 1981 community services award from Howard University School of Social Work. He served as chairperson of the International City Management Association's Minority Executive Placement Board of 1974–79, and is vice chairman of the Metropolitan Washington Council of Governments. Mr. Rogers also serves on the Board of Public Executive Institutes, Inc., Washington, D.C.

The citizens of the District of Columbia have been served well by Mr. Rogers. He will continue, however, to advise the mayor. Mr. Speaker, in a period of criticism of public servants, Mr. Rogers is another outstanding example of a committed and competent government employee. He will surely be missed.●

HAPPY BIRTHDAY, HENRY GONZALEZ

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 3, 1983

● Mr. MORRISON of Connecticut. Mr. Speaker, I am happy today to have the opportunity to wish the gentleman from Texas, the Honorable HENRY GONZALEZ, a happy birthday and to congratulate him for his many years of dedicated work.

Although the rewards of this office are great, few of our fellow citizens understand the many sacrifices that Members of Congress must make in carrying out their obligations. The gentleman has been making those sacrifices for the sake of the people of his district, the State of Texas, and this great country for more than two decades now and for that we all owe him our gratitude.

During his tenure, the gentleman from Texas has been a champion of minorities and the poor. He has fought for a decent standard of living for all and, in doing so, has made the American dream a reality for many of our fellow citizens. As chairman and longtime member of the Subcommittee on Housing and Urban Affairs, the gentleman has been a tireless leader and advocate for progressive policies designed to fulfill our goal of providing that all Americans have access to safe, decent, and affordable living accommodations.

Last, I want to thank the gentleman from Texas for the tremendous

amount of assistance and guidance that he has given me as a freshman Member of the House on its Housing Subcommittee. I have enjoyed working with him over the past 4 months and very much look forward to working with him in the future.

Happy birthday, HENRY.●

TRIBUTE TO FREDERICK C. HAMMER

HON. BOB TRAXLER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. TRAXLER. Mr. Speaker, I rise today to pay special tribute to a remarkable man who resides in my district, Mr. Frederick C. Hammer. Mr. Hammer is a native of Upland, Nebr., but since his move to Saginaw, Mich., in 1950, he has risen to a stature within our community of which few people can boast.

Today, as Fred Hammer prepares to retire as director of Public Relations for Central Foundry Division of General Motors, he is respected as our innovator in the profession of public relations and a champion of the free enterprise system.

Fred Hammer began his career in 1937 as a reporter and editor of the Tuscola County Pioneer Times in Vassar, Mich. He moved in 1941 to the position of staff correspondent and bureau chief for Booth Newspapers in Bay City and Saginaw, Mich. Shortly thereafter, Fred joined the U.S. Army Air Force and served over 2½ years in North Africa, India, Burma, and China. He received the Bronze Star for military service during World War II.

Upon his return from active duty in 1945, Hammer joined the Standard Products Co. in St. Clair, Mich. In 1950, he moved to Central Foundry Division as an employment interviewer in the Saginaw Malleable Iron Plant. Promotions followed, giving Fred the opportunity to hone his skills as suggestion plan supervisor, assistant supervisor of employment, and employee relations supervisor. He was transferred to Central Foundry Division offices and named director of public relations in 1957.

In the years that I have known Fred, he has always been a "can do man." He has asserted his effective and aggressive leadership not only in America's industrial realm, but in civic matters as well.

Fred Hammer's accomplishments are impressive and many. He has been the driving force behind Central Foundry's successful public relations and communications activities. He has been a champion of truth and objectivity when dealing with the media, and strives to give reporters the "straight story." Fred is also a strong advocate of keeping the employee well informed. He took on the added responsibilities of internal communications at Central Foundry in 1972, believing that employees who are treated respectfully and told the facts of the business are keys to improved productivity and quality. In this same vein, Fred implemented at CFD an economic information program—unique throughout all General Motors—designed to give all employees valuable and much needed instruction in the basic principles of business and our free enterprise system.

Fred is also active in many professional and civic organizations. He is an accredited member of the Public Relations Society of America and a member of the American Foundrymen's Society. Fred is past director of the Saginaw County Chamber of Commerce and a member of the Saginaw Manufacturers Association and the Saginaw Valley Press Club.

Mr. Speaker, having heard this list of outstanding contributions and accomplishments, I am sure that you and the members of this distinguished body will agree that Fred Hammer will be sorely missed when he retires as director of Public Relations of Central Foundry Division. I know that all those with whom he worked, and all who worked for him, will miss his leadership.

Fred Hammer is a truly outstanding man and a special friend. As his Congressman, I am proud to have this opportunity to pay him this special tribute. On behalf of the Saginaw community, I wish to extend our heartiest thanks and every best wish to Fred Hammer and his family on his retirement.●

MISS HAZEL

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. CHAPPELL. Mr. Speaker, we frequently gather together to offer salutatory remarks regarding individuals of note from all parts of the Nation and, in fact, the world.

However, for those of our colleagues who have worked in the Rayburn House Office Building, and found time to break bread together in the basement-level cafeteria, I am certain that we have, of late, missed a familiar hearty voice and kind spirit behind the service counter in that gathering place.

It is, of course, to Hazel Smith, the genial, courteous, and affable serving person and friend of many of us, who has left. Hazel has retired to her residence at 701 K Street NE., No. 302, here in Washington, D.C. 20002.

Not one of us who has ever had occasion to begin our workday with breakfast in the Rayburn Cafeteria could possibly have escaped the genuine laughter and sincerity of Hazel Smith. Hazel is an American among Americans. She is the epitome of the spirit that constitutes the goodness of this country.

I know, in this instance, that I speak for several hundred of my fellow colleagues in the Congress of the United States of America, when I say: "Well done, Hazel. May your retirement, which you so richly deserve, be one of happiness and joy. May you have many, many years ahead in which to enjoy the fruits of the labor which you accomplished with such diligence and with loving attention. You have served us well, Hazel Smith, and we of the Congress of the United States, salute you."

Be it therefore resolved that Hazel Smith, known to those of us who revere her as our "Miss Hazel" be declared this day and date and heretofore to be an honorary member of the Fourth Congressional District of Florida with all rights and privileges accruing thereto.●

TRIBUTE TO LEWIS E. BEANE

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. HUBBARD. Mr. Speaker, I speak today in tribute to and recognition of a longtime friend of mine and constituent, Lewis E. Beane, of Central City, Ky., who died on April 1 in Greenville, Ky., at the age of 54.

Beane, a native of Muhlenberg County, was president and chairman of the board of First Federal Savings & Loan Association of Central City. Beginning as a teller, he worked his way up from managing officer to president and chairman of the board during his 20-year career at First Federal, Central City.

During his rise at First Federal, Beane was instrumental in the continuing growth of the institution. Its assets reached to more than $100 million shortly before his death.

Beane served on the Kentucky Savings & Loan League's board of directors from 1973 to 1977 and was elected president of the statewide Savings & Loan Association in 1977. From 1978 to 1981, Beane was elected to the 13-member board of directors of the National Savings & Loan Foundation. Indeed, he was proudly recognized by the peers of his profession.

A U.S. Army veteran whose service to his country included the Korean war, Beane was a member of the First Baptist Church of Central City and a

great contributor to his local community.

Survivors include two daughters, Debbie Beane of Owensboro, Ky., and Mrs. Diane Strangi of Little Rock, Arkansas; his mother, Mrs. Elizabeth Beane, of Central City; and two brothers, Ronald Beane and Robert Beane, both of Central City.

I extend my sympathy to the survivors and friends of this outstanding Kentuckian who was truly an inspiration to those of us who knew and respected him.●

EMPLOYERS' HEALTH BENEFIT PLAN SHOULD REMAIN TAX EXEMPT

HON. DONALD JOSEPH ALBOSTA

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. ALBOSTA. Mr. Speaker, I rise today to introduce a House resolution which will express the sense of the House of Representatives that employee health benefit plans should remain tax exempt.

For the first time in history, we need a resolution like this becuase for the first time in history an administration has introduced legislation to tax employer-paid health insurance benefits. The administration claims taxing health benefits will slow escalating health care costs and increase revenues to reduce the Federal deficit. I contend that in both cases these objectives will not be achieved.

It is clear that taxing health benefits will not solve our health care cost containment problems. A recent Congressional Budget Office report shows this type of tax would be ineffective as a means of slowing the rising cost of hospital care. And as for raising revenues, cost-shifting and restructuring of benefit plans will prevent the projected revenues from being realized.

What this proposal will really do is add another tax to the already overburdened working American family. This tax does not encourage individuals to become more cost conscious. It only serves to attack the health coverage and preventive services such as dental care that working families need and depend upon. It discriminates and penalizes those who need health care the most—the older worker and those in hazardous, high-risk occupations. These people can least afford a higher tax because they are already paying high health insurance premiums.

Clearly, it is the millions of American workers who will be the real losers if we allow the administration to have its way. Not only will they be paying more taxes which, in my State of Michigan, could be devastating, but these workers will be losing essential health care services.

I encourage my colleagues in the House to join me and the joint coalition of over 20 business, labor, and health organizations in supporting this resolution opposing the taxation of health insurance benefits.●

THE FEDERAL ANTITAMPERING ACT

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. LIPINSKI. Mr. Speaker, I would like to take a moment to express my extremely strong support for the Federal Antitampering Act. Before last fall, it was inconceivable that someone could commit so terrible a crime as the poisoning of pain relievers. But it is a sad fact that someone could, indeed, perform such an act. I am delighted to see that the Government is taking some action to prevent similar tragedies in the future.

While there may be some question about the need for Federal involvement in this area of crime, the impact of the Tylenol case on Chicago, and consumers across the Nation mandates Federal action. I can speak firsthand of the trauma that Chicago suffered, and of the fear that swept the city. Not only would people not trust Tylenol, but people began to fear taking any commercially prepared product that could not be tested first. A great American city was seized with the fear that a secret killer was preparing to murder again, randomly and anonymously.

Following the Tylenol case, there was a rash of copy-cat crimes relating to product tampering. Some of the crimes were real, although most were false, but they all made an anxious nation hold its breath waiting for the next poisoned product to be revealed.

One of the most important roles that the Government performs is that of assuring consumers that the products that they purchase in stores are safe for consumption. Through no fault of anyone except a person with a twisted mind that confidence was eroded last fall.

The cooperative efforts of the Government and the manufacturers have given the American public the security of having the highest quality foods and drugs in the world. I am glad to say that with the Federal Antitampering Act, the Government has moved decisively to see that things will remain that way.●

TAX CREDITS FOR REMEDIAL EDUCATION

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. GARCIA. Mr. Speaker, today, along with 10 of our colleagues, I am introducing legislation to provide tax credits for employers who provide remedial education for their employees. The importance of this legislation to employability and productivity is significant if we consider:

One adult in five does not possess the functional competency to get along in this society; 57 million Americans do not have skills adequate to perform basic tasks.

Of the 54.3 million persons 16 and over in 1970 who were not enrolled in school and who had less than a high education, 75 percent earned less than $5,000 a year.

The proportion of persons on public assistance who completed fewer than 6 years of school is more than double those with 6 to 8 years and almost four times those with 9 to 11 years of school.

Those whose schooling stopped before the eighth grade have lifetime earnings about one-third of those with graduate study.

Without remedial education, these people, even if they are lucky enough to be in the work force, will continue to be a drag on productivity and the economy. The costs of educational services for adults rises in proportion to the degree of disadvantage of those served.

Most persons in our society who lack sufficient reading and writing skills to function effectively are poor people and racial and ethnic minorities. They are found in city ghettos and doing hard physical labor on unmechanized farms.

A major shift in national education policy is needed to serve the educational needs of disadvantaged adults. To meet this need, I am introducing this bill to provide employers a refundable tax credit for remedial education for new and existing employees. The tax credit would be for 50 percent of wages while learning and 50 percent of the costs of learning.

Contrary to popular belief, high tech jobs are not the fastest growing occupational group. According to the Bureau of Labor Statistics, service occupations—firefighters, janitors, cosmetologists, bartenders, et cetera—make up the fastest growing occupational group. Remedial education for the structurally unemployed will provide entry level positions in these occupations.

By making the tax credit refundable, small businesses which are not making

a profit—as most do not—can provide jobs. Of the 15 million businesses in the country, 99 percent are small businesses. In 1976, 80 percent of new jobs were provided by firms having 100 employees or less. Almost 66 percent of the new jobs were provided by businesses with fewer than 20 employees.

The problem is employability and productivity. All the job training programs in the world will do no good if people cannot learn. Similarly, businesses are not going to invest capital in human resources incapable of advancement. With this incentive we can encourage the investment in human capital to make our great country competitive and strong again.●

TRIBUTE TO THE HONORABLE HENRY B. GONZALEZ

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 3, 1983

● Mr. RODINO. Mr. Speaker, it gives me great pleasure to join with my colleagues in the House today to honor my longtime friend and colleague, HENRY GONZALEZ, on the occasion of the 30th anniversary of his first election to public office as well as in the celebration of his 67th birthday.

In his 30 years in public office HENRY has dedicated himself to work for the rights of the poor, the elderly, low-income families, small business people, and minorities.

As chairman of the Subcommittee on Housing and Community Development of the House Banking and Urban Affairs Committee, HENRY has fought hard to provide decent public housing and homeowners assistance for low- and middle-income families. His insight and commitment were instrumental in achieving United States participation in international development institutions such as the Inter-American Bank and the International Monetary Fund, among others. His work with the Hispanic Caucus is evidence of HENRY's commitment to work for the interests of the underprivileged and members of minority groups.

It is an honor and a pleasure to know and work with HENRY GONZALEZ. Congratulations and happy birthday, HENRY.●

WHERE DOES THE FUTURE OF FREE TV LIE?

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. MARKEY. Mr. Speaker, today I join many of my colleagues as a cosponsor of H.R. 2250, Mr. WAXMAN's bill to prevent the Federal Communications Commission from repealing the financial interest and syndication rules.

The rules, in place since 1970, have had nothing less than a revolutionary impact on the television broadcasting industry. Since their imposition we have seen an impressive increase in the number of independent television stations and the audience they reach, as well as the development of a made-for-syndication programing market. As a result, the diversity of programing available to the public on "free TV" has been expanded, while innovation and creativity in the production community have been encouraged.

These gains have been a boon to the American public. Yet even with these important changes in the industry, the program purchase market is not yet a competitive one. It remains primarily an oligopsony; a market where three firms control the gateway to reaching over 85 percent of the Nation's TV viewers. These market powers have come to us asking that we leave the FCC unfettered in its crusade to deregulate the program purchase and ownership business. Now, I have long advocated competition in the telecommunications industry—but I have also stood behind one central principle, one central concept in the deregulatory process: in considering regulatory reform, the FCC should not deregulate at a pace faster than real competition is growing in the area. By lifting the financial interest and syndication rules, the FCC would be doing just that; it would be opening the nascently competitive free TV programing market to the power and influence of those who could come to dominate that market.

Mr. Speaker, I am concerned about the arguments that the opponents of H.R. 2250 are raising. Principally, they tell us that the future of free, advertiser-supported television is at stake in this debate. They tell us that if we do not repeal the rules, the networks will find themselves lagging desperately behind the new technologies in revenues available to purchase programing, and the public will suffer. If this was the case—if repeal of the rules would foster a healthy free TV industry—the position I take today would be a very different one.

Yet this is not where the future of free TV lies.

If the rules are repealed, and the networks get the hundreds of millions of dollars in additional revenues they are asking for, what assurance does the public have that these moneys will be used to nurture the free TV production business? Or will CBS use their new millions to buy more cable systems, ABC to program its overnight pay-TV system, and NBC to produce more videodiscs for sale? The networks as corporations cannot be destroyed by the new technologies; they are the new technologies. The networks as networks may face changes at the hands of these entertainment innovations, but the revenues they receive as corporations from repeal will do little to mitigate the consequences of these bigger technological forces. Instead, they may well be used to fuel the fires which drive the networks toward the new technologies.

In the end, I have concluded that the future of free TV lies with this course, not the networks. By encouraging a healthy and independent production community, we provide needed support to those who will be creating the programs for the medium. By encouraging the development of independent television stations and syndication networks, we secure the future of an important outlet which brings these programs to millions of homes on free TV. The future of free TV lies with those who would bring "M*A*S*H" and other similiar programs to our sets not with network executives who—in one official's words—are made "uneasy" by this distribution.

Mr. Speaker, the financial interest and syndication rules have worked to serve the public and free TV over the past decade. That is why I am happy to join today as a cosponsor of H.R. 2250.●

CONCILIATION AND CONFRONTATION OVER NATIONAL SURVIVAL

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. GINGRICH. Mr. Speaker, two aspects of our national survival are being closely examined by the House and by the American public. The funding of our own military, and the level of commitment we are willing to make to defending freedom in this hemisphere, are both timely and important to our Nation's security.

As both a fiscal conservative and as a lover of freedom, I look for a balance which protects freedom while keeping our borders and our treasury intact. It is for that reason that I consider myself a cheap hawk. And with some fundamental reforms in the way we go about preserving peace, the United States can have a stronger military and a manageable Federal budget. We must seek those reforms.

But, at the same time, I am fully committed to doing whatever is necessary to protect freedom in Central America. The external dangers to freedom for our allies in that region must be met, and the failed liberal policies of the past must not hamstring us

from making the commitment needed to win.

I want my colleagues to read the following column which articulates those concerns and offers interesting solutions.

The article follows:

[From the Wall Street Journal, Apr. 28, 1983]

REAGAN MUST FIGHT CONGRESS ON CENTRAL AMERICA

(By Morton M. Kondracke)

(Mr. Kondracke is executive editor of the New Republic.)

Sometimes a president ought to conciliate in order to build a national consensus for his policies and sometimes he has to confront. I think President Reagan is missing an opportunity for conciliation on defense policy, but I'm afraid that a confrontation of sorts was the only way for him to go on Central America.

Actually, a national consensus is forming on how much to spend on defense, only President Reagan and his defense secretary aren't part of it. From the bipartisan appeal group headed by six former cabinet officers to the Center for National Policy to the Senate Republican leadership to the White House staff, there is an agreement that the U.S. should increase defense spending 5 percent to 7 percent per year over the next several years.

President Reagan and Secretary Weinberger are holding out for 10 percent. On the other side, House Democrats have voted for an increase nominally put at 4 percent, but estimated by some analysis to be just 2 percent.

A congressional compromise may come out at 5 percent or 6 percent, but that guarantees nothing about future budgets. If Congress votes defense cuts next year or the year after, the big-ticket weapons authorized last year will go forward, and savings will be sought once again by cutting training, maintenance and personnel, which need new money the most.

So as part of whatever deal he works out on the fiscal 1984 budget, the President ought to do as he did when Social Security and the MX missile were caught in a lethal political crossfire—appoint a bipartisan commission to draw up a long-term defense program that will survive the 1984 election.

The commission ought to be charged with studying not just how much to spend, but what to spend it on. It's widely agreed that the Weinberger strategy of preparing to fight simultaneous wars all over the world is unrealistic. The commission ought to look into returning to John F. Kennedy's "two-and-a-half war" doctrine, Sen. Sam Nunn's proposal of a strategy to attack Soviet military communication and transportation lines (rather than Soviet forces directly) and other alternatives.

The commission also ought to study the much-criticized defense procurement system, proposals to reform the top military command structure, allegations that U.S. weapons are over-technologized and recommendations that the U.S. switch from "static war" to "mobile war" doctrine. It also ought to draw up a believable assessment of the Soviet threat and recommend fair and realistic burden-sharing arrangements for America's allies.

With Sen. Howard Baker retiring from office and having little to do while preparing for the 1988 presidential race, I nominate him for chairman.

Commissions and conciliation won't work, however, with Central American policy. The President doesn't need to confront his opponents in the sense of blaming them or threatening them, but his views on the threat and the means of meeting it are so different from those of his liberal adversaries that only an intellectual and political squaring-off seems likely to resolve the dispute.

Whatever the effect of the President's speech last night, a speech did need to be delivered.

As a liberal, I hope Mr. Reagan succeeds in winning military aid increases for El Salvador and defeats efforts in Congress to cut off assistance to anti-Sandinista guerrillas in Nicaragua.

Opponents of U.S. efforts in Central America say they are trying to avoid "another Vietnam," but it is precisely the example of Vietnam which suggests that Mr. Reagan's policy is basically right. Eight years ago President Ford appealed to Congress for $700 million to save South Vietnam from collapse. It was just money, but it was refused.

We liberals cannot avert our eyes from what ensued: three million murders in Cambodia, total deprivation of human rights in Vietnam (and corruption at least as bad as in President Thieu's time) and a falling of dominoes. North Vietnam has taken over South Vietnam, Laos and Cambodia; now it is shelling Thailand.

It's now known—the legendary Gen. Vo Nguyen Giap revealed it on French television—that North Vietnam began planning to take over Indochina as early as 1959, long before American troops arrived on the scene and supposedly disrupted the region's history.

We are under warning about Central America now. The Sandinistas in Nicaragua openly proclaim that they are part of a "revolution without frontiers." In 1980, the late Salvadoran communist chief Cayetano Carpio asserted that "the revolutionary process in Central America is a single process. The triumphs of one are the triumphs of the other. Guatemala will have its hour. Honduras its. Costa Rica, too, will have its hour of glory. The first note was heard in Nicaragua."

Liberals should note the designs on democratic Costa Rica, a country without an army—and also note Costa Rica's recent expulsion of Nicaraguan diplomats identified by a terrorist as having furnished him bombs and money. Costa Rican officials have complained about armed incursions from Nicaragua, too.

Central America is more ethnically homogeneous than Indochina, so the dominoes there may fall faster.

And Central America is close to our borders. If many American communities objected to the arrival of Vietnamese refugees and if Florida became divided over the arrival of 125,000 Cubans in 1980, we might well quake at the consequences here if hundreds of thousands of Central Americans begin streaming toward the U.S.

If Mexico, too, becomes unstable, the numbers could be in the millions, resulting in an internal security-civil liberties nightmare, not to mention job competition and ethnic frictions. To defend a hostile southern border and a threatened Panama Canal and U.S. coastline would swell the defense budget, at a cost to domestic programs.

President Reagan is asking for only money for Central America, and it's worth spending to avoid the necessity of some day sending in U.S. troops. Direct American involvement didn't work 10,000 miles away in Vietnam, but it has worked before in Central America and is an option in the future if money fails.

Opponents of the Reagan policy object that our money is being spent the wrong way—that negotiation, economic development, human rights and reform are our only hope and that financing military solutions will fail as in Vietnam.

The opponents are right to the extent that the U.S. cannot succeed if its only policy is military, but Mr. Reagan is correct in saying that there can be no reform or democracy in Central America without U.S. military aid. There is also little hope of persuading Nicaragua to stop spreading communist revolution unless the U.S. aids groups applying pressure on the Sandinistas.

The possibility exists of building a national consensus around a policy that combines military aid, regional negotiations and internal reform, but such a consensus cannot form unless President Reagan wins his fight in Congress.

If he loses, and if Central America goes communist, it will be liberal values that lose the most.●

TRIBUTE TO THE JEFFERSON CITY CANTORIUM

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. SKELTON. Mr. Speaker, I ask my colleagues to join me in praising the Jefferson City Cantorium, who are presently in Cork, Ireland, at the 30th International Choral and Folk Dance Festival. There they will be competing with highly renowned choirs from all over the world, including West Germany, Poland, Belgium, and Italy. The Cantorium has performed many spectacular performances here in the United States, including performances with such groups as the Kansas City Philharmonic, the St. Louis Symphony, and the Collegium Musicum of the University of Missouri.

I wish the members of the Jefferson City Cantorium good luck in their competition, and I am glad that they are having the chance to be good will ambassadors from the United States. I add the praise of the House of Representatives to that of the Missouri House and Senate for their fine achievements in the past here in America, as well as their success abroad.●

A GREAT LADY IS HONORED

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. CHAPPELL. Mr. Speaker, I wish at this time to place into the

CONGRESSIONAL RECORD the saga of a wonderful constituent, a woman who has won the love and respect of all who have had the opportunity to feel the warmth and gentle consideration of her sincere interest in her fellow Americans.

Recently this marvelous 80-years-young lady was honored by one of the leading media in our Fourth Congressional District of Florida, the News and Observer of New Smyrna Beach, Fla.

I would like to further honor this great lady by having that news feature read into the CONGRESSIONAL RECORD at this time.

The article follows:

[From the News & Observer, Apr. 27, 1983]

NEVER TOO BUSY TO DO FOR OTHERS

(By Ed Ray)

Give to the world the best you have and the best will come back to you."

No one lives and teaches that philosophy better than Florence W. Settle, widow of the long-time New Smyrna Beach funeral director.

Mrs. Settle was honored last Wednesday night by the Turnbull Grange for her long and outstanding community service at a ceremony at Odd Fellows Hall. First recipient of the award in 1978 was Mrs. Allen C. (Dorothy) Winters. Mrs. William B. (Margaret) Hughes, T.C. Wilder, Jr., Joe Hintzen and Arthur Vos won the Grange distinction in the succeeding years.

Wilder says Mrs. Settle has been an inspiration to him ever since he was a boy. He knew her in Sunday School and delivered papers to her home. When he was graduated from New Smyrna Beach High School, Wilder became a trainee in the Settle Funeral Home and later became a partner in Settle-Wilder. When Mr. Settle retired, Wilder bought the firm, operated it until three years ago when he sold to Walter Johnson and went into semi-retirement.

"Mrs. Settle is a wonderful, kind, devout woman and has always thought of the welfare of others instead of her own," said Wilder. "She has worked hard all her life, but found time for service to others and the community, which owes her much."

In discussing her distinctive and varied lifestyle, Mrs. Settle said during an interview at her four-bedroom home at 318 Palmetto (corner of Palmetto and Lytle where the overpass going west begins):

"My first loves within the scope of my community activities have been my church, my volunteer work at Fish Memorial Hospital and my serving the sick and shut-ins."

Eighty years old last Nov. 15, Mrs. Settle shows no signs of slowing down her pace. The writer managed to visit with her for an hour late one day after she had made six calls at homes where people needed help.

Mrs. Settle and her identical twin sister, Florence Hans of South Daytona, were born on a farm near Lewisburg, Ky., daughters of Mr. and Mrs. George W. Wheeler. The Wheelers had four other daughters and one son.

The twins had to do all sorts of farm chores, but their hardest work came during two years of World War I when they had to replace hired help who went off to war.

"I learned to work as a child," said the charming, healthy and humorous Mrs. Settle. "My mother was one of the volunteers in our country community who went into homes when friends died and helped prepare bodies for burial. She took Florence and me with her many times and we learned what had to be done to bodies for burial. Our community hardly knew what a funeral home was. When my husband began his funeral home services here, I was no stranger to death. Because I learned in my teenage days to model with clay, I took the job as cosmetician (hair and face) for bodies awaiting burial."

Although she helped her husband in other funeral home work, and often sang solos at funeral services, Mrs. Settle's main job was as a teacher. Before moving to New Smyrna Beach in 1927 after her July 3 marriage to Mr. Settle in Jacksonville, Mrs. Settle attended Bethel Woman's College in Hopkinsville, Ky., and Western Kentucky Teachers' College at Bowling Green. She taught school in Kentucky for four years.

How did she become a New Smyrna Beach resident? She answered:

"My first trip to Florida was by train in December, 1924. My aunt, Sarah E. Wheeler, lived in Lakeland and she arranged for my visit for two weeks. I met my husband-to-be there. Willis was working at what is now Southeast Bank. I did not see him after my Lakeland visit until April, 1927, when he traveled to Louisville, Ky., to be with me while I attended Kentucky Educational Association's convention. He asked me to marry him and in May of 1927, I made plans to terminate Kentucky teaching. Willis and I met in Jacksonville and were married in the Methodist District parsonage there July 3, 1927."

The ceremony, she said, "was the beginning of a very busy and rewarding life for both of us."

Mr. Settle became interested in the funeral home business after discussing it with people at the Robinson-Tarver Home. He decided shortly after his marriage to go to the Cincinnati School of Embalming and two years later was licensed. He and Mrs. Settle decided to open a funeral home here. While traveling to purchase furnishings for the home, the Settles learned that a Kentucky bank which held their savings went broke.

"That was a blow, but we had good credit and we started the funeral home," Mrs. Settle said.

The Settles brought the first ambulance service to New Smyrna Beach after they opened the funeral home in 1931.

"Another of my jobs," said Mrs. Settle, "was to drive an ambulance in emergencies. I drove to bring in plane crash victims, many auto crash victims and others in accidents at home and elsewhere.

"The most nerve-wracking drive I had came when I had to substitute for a driver who was out when a call came for a pregnant woman at Oak Hill to be driven to Halifax Hospital.

"I didn't break the speed laws, but I knew I had to get the woman to the hospital because her labor pains had begun. When I finally drove to the Halifax emergency room entrance, I barely had won the battle to prevent childbirth in the ambulance. The child was born shortly after the mother got to the hospital."

The Settles continued their ambulance service until 1958.

"I taught private kindergarten for 10 years and, to make extra money, often baked and sold cookies," Mrs. Settle said.

From 1940 through 1949 she was a fourth and first grade teacher at Faulkner Street School. From 1957 to 1971 she was a first grade and kindergarten teacher at Oak Hill School, where she was president of the P.T.A. for the 1964-65 term. She served on the Volusia County Continuing of Education as well as the Volusia County Purchasing Committee. She retired from teaching in 1971. She still is a member of the Volusia County Educational Association, National Education Association and Rho Chapter-Delta Kappa Gamma Society International. She won another teaching degree attending classes part-time at Stetson in DeLand.

"My years of service in the First United Methodist Church have been most rewarding," said Mrs. Settle. "Willis and I had little money, but we gave the first pledge toward building the present church and we struggled to earn the money to pay it off. My husband never charged set fees for funeral services. He would study the financial situation of each bereaved family and charge accordingly. We never tried to get rich. We lived in an apartment above the funeral home until 1957 when we purchased and remodeled my present home."

Mrs. Settle taught Sunday School and sang in the church choir for 25 years. She was Sunday School superintendent for 10 years and was an active member of the administrative board for many years and presently is a member with honorary status. She has served 11 terms as president of the Wesleyan Service Guild, now known as Circle 6 of the United Methodist Women.

"The building or our present church sanctuary was a rich experience with my Lord," Mrs. Settle said. "Without Him, we could not have done it,"

Civic work never was neglected by Mrs. Settle. She was president of the New Smyrna Woman's Club for three years—1935-37. She served as Worthy Matron of the New Smyrna Chapter No. 3, Order of the Eastern Star. She was president of Elks Ladies B.P.O.E. 1557 in 1946. She was elected Regent of the Jane Sheldon Chapter, Daughters of the American Revolution in 1955-56-57. A charter member and president of Fish Memorial Hospital Auxiliary for 27 months (1954-57), she worked in the Auxiliary sewing department after retiring as a teacher.

No one observed the building of the Highway 44 overpass at U.S. 1 more constantly than Mrs. Settle. She has a hard hat with her name painted on it, given by the building superintendent for the construction company. The Department of Transportation took 12 feet off her property in order to build a passage under the overpass from Lytle to U.S. 1.

"It was a sad day when overpass construction men uprooted those beautiful palms on Lytle and took them to Disneyworld," Mrs. Settle said. "Because of so many people migrating to Florida, our state road department is desperately trying to provide roads and modes of transportation for inland people to get to and from our beach.

"This made it hard for those of us who have been caught in the way. I miss the beautiful two-way street which was Lytle with trees and flower beds in the middle from the railroad to Riverside Drive. The overpass has been called many things, but I call it Settle Hill because it separated me from my home and the Settle-Wilder Funeral Home."

Mrs. Settle can see and hear hundreds of cars pass close by her Florida room windows every day, but after looking at a condominium for sale, she decided she would stay on Palmetto Street and hire someone to live

with and take care of her should the need arise.

Mrs. Settle has white burglar bars, a burglar alarm system and "Police Care" to protect her. Under the "Police Care" system, participants call a police number between 8 and 12 each morning to say whether they are all right. If they don't call by noon, a police officer will check the residents of participants.

Mrs. Settle is an accomplished cook and it is from her kitchen many meals are prepared for shut-ins. She likes parties and recently prepared food for 40 in the "Police Care" program plus a number of police personnel.

She also cans and preserves food from her garden, once abundant but now limited. In her "orchard" are 13 fruit trees, two grapefruit, one fig, one lemon, one peach, one plum, one tangerine and one calomondin. "I give away most fruit I don't preserve," she said. She had a long fight with the road department about a pear tree which engineers wanted to remove for the overpass. She won her argument to save it, but concrete surrounding it caused it to die.

Mrs. Settle feels a helicopter landing area near Fish Hospital is an immediate city need. "We also need an entrance to the beach via Florida Shores and Edgewater, a high rise bridge of the convenience of boat passage at Riverside and Lytle and four-laning the South Causeway and Third Avenue to the ocean," she said in discussing the city's needs. She came here when only a few hundred persons were residents.

New Smyrna Beach churches, she said, "are doing a beautiful job for our Lord. Much love and care are being shown for spiritual guidance and well-being of the people they serve. If you don't have this feeling about our city, get right with God and keep your communication lines open. He is always ready to answer—just call Him and try Him out."●

A TRIBUTE TO SAUL AND SHIRLEY TURTELTAUB

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. LANTOS. Mr. Speaker, I want to take this opportunity to pay tribute today to Saul and Shirley Turteltaub, two people who have contributed much to their community in California, much to the happiness of the American people and much to the well-being of all people of good will.

Saul and Shirley have devoted countless hours of their time and effort to philanthropic and humanitarian causes. They are outstanding citizens in every sense of the word. Each has been a leader in a vast array of community organizations, from the United Jewish Welfare Fund, in which Saul plays a major role, to the Exceptional Children's Foundation, in which Shirley is a prominent figure.

But perhaps the most impressive characteristic of these two outstanding friends is that they have brought thousands of hours of joy to millions of people throughout the country for the last 20 years.

Saul Turteltaub is a major force in American television, in the best sense of what the medium has to offer us. When one thinks of some of the most honored, respected, and appreciated programs on television, it is truly remarkable how often Saul Turteltaub's name comes up in connection with them.

Saul began his career writing for Shari Lewis. Miss Lewis and her puppets helped to raise an entire generation of postwar children and set a level for children's programing that is still the envy of the industry.

We in Washington are particularly acute when politics are satirized. While performers and commentators come and go, one of Saul's efforts stands alone as perhaps the most excellent example of political satire. I am referring to a television show, "That Was the Week That Was." TW3, as it was called, is one of the brightest spots in television history. Saul was a writer on that show, working with a cast that included David Frost and Alan Alda.

Go down the list of performers with whom Saul has worked through the years, as writer, as producer, or in both capacities, and you will find names like Jackie Gleason, Carol Burnett, Redd Foxx, Marlo Thomas, and Mickey Rooney, to name just a few.

Mr. Speaker, it has been my pleasure to honor this giant of the entertainment industry, to pay tribute to two people who represent the best this country has to offer. We wish both Saul and Shirley Turteltaub health, success, and happiness in the future. Few people have been able to shape the attitudes of this country in such a positive sense as have Saul and Shirley Turteltaub, and we should be grateful for their presence and their good works.●

H.R. 2934—HEALTH PLANNING AMENDMENTS OF 1983

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. WAXMAN. Mr. Speaker, today I am pleased to introduce H.R. 2934, the Health Planning Amendments of 1983. This bill revises and extends through 1985 the authority for Federal support of State and local health planning agencies.

H.R. 2934 follows extensive work and compromise by the Subcommittee on Health and the Environment over the past year. The bill is virtually identical to the provisions of title II of H.R. 6458 which was passed by the House by unanimous consent last December.

H.R. 2934 is reasonable and balanced. On one hand, it maintains Federal support for State and local health planning agencies while on the other it gives States new flexibility in operating their planning programs.

The Federal Government has supported State and local health planning activities for more than 30 years. This support continues to be necessary because health planning agencies are vital to our efforts to restrain unnecessary, inflationary expansion of hospitals and other health facilities. The Federal Government, more than any other third-party payor, bears the costs of excessive hospital construction because medicare and medicaid now pay over 35 percent of hospital costs. To insure that Federal support for health planning activities continues, H.R. 2934 authorizes appropriations of "such sums as may be necessary" in fiscal years 1984 and 1985.

At the same time, H.R. 2934 includes two major provisions which will provide the States new flexibility to streamline their certificate-of-need (CON) review systems. First, the threshold for CON project review is increased from $600,000 to $1,000,000. This increase follows an increase from $200,000 in 1981. With this higher threshold, a large number of projects, about 70 percent, that would have been subject to review in 1980 may be exempt from the review process. Second, the States are given the authority to specify the role of HSA's in the review of CON applications. This change will allow States to tailor the CON process to their particular circumstances.

In addition to these major provisions, the bill also incorporates into the Public Health Service Act, on a permanent basis, a number of policies included in the 1983 continuing resolution.

There was broad agreement last December that the provisions of H.R. 2934 were a good health planning compromise. Representatives of health planning organizations, health insurers, employers, as well as hospitals, all expressed support for the provisions of this bill at that time. I believe that this approach remains a good compromise for 1983.

This is a particularly appropriate compromise, because under this bill the Congress will again consider health planning legislation in 1985. This timing is consistent with the provisions of the recently enacted social security reform bill, which provides for congressional consideration of hospital capital policies during 1985 following a report from the Department of Health and Human Services in October of 1984. This 1985 reconsideration will precede the implementation of new capital policies for medicare on October 1, 1986.

The Subcommittee on Health and the Environment held hearings on

health planning last Friday, May 6. I hope that health planning extension legislation can now be reported from the Committee on Energy and Commerce and adopted by the House in the near future.

SECTION-BY-SECTION ANALYSIS, HEALTH PLANNING AMENDMENTS OF 1983, H.R. 2934

Section 1. Provides that the short title of the bill is the "Health Planning Amendments of 1983." Specifies that the provisions of the bill amend the Public Health Service Act.

Section 2. Amends Section 1512(b)(2) (A) and (B) to reduce required Health Systems Agency staff from the lesser of five overall or one per hundred thousand residents of the area to the lesser of three overall or one per three hundred thousand residents of the area. This section codifies a policy currently in effect under the provisions of the Continuing Resolution for 1983.

Section 3. Amends subsection 1513(f) and 1523(a)(4) to provide that HSAs shall review and make recommendations concerning certificates-of-need in the manner, and to the extent, provided by systems established by State Agencies. Such State Systems shall provide that all applications of the same or similar type must be reviewed in the same manner.

Section 4. Amends Section 1515 regarding designation of Health Systems Agencies:

Amends paragraph (b)(2) to remove the 36 month limit on the period during which HSAs may be conditionally designated.

Revises paragraph (b)(3) and subparagraph (c)(1)(B) regarding the termination of conditionally designated HSAs to require the same procedures as are currently required for the termination of fully designated agencies.

Amends subparagraph (c)(3)(B) to remove the 12 month limit on the period during which HSAs which have previously been fully designated may be conditionally designated.

Amends subsection (d) to permit the same entity to be redesignated as an HSA. Current law only allows the designation of another entity.

Section 5. Amends Section 1516 by deleting paragraph (c)(2) which permits the Secretary to reduce the funds provided to HSAs. This provision will assure that grants to HSAs will continue to be made in the same manner as in previous years.

Section 6. Amends Section 1521 with regard to the designation of State Health Planning and Development Agencies:

Deletes the provisions of subparagraph (b)(2)(B) which require conditionally designated State agencies to progressively increase their functions.

Revises subparagraphs (2)(C) and (3)(B) of subsection (b) regarding the termination of conditionally designated State agencies to require the same procedures as are currently required for termination of fully designated agencies.

Amends subparagraph (b)(4)(B) to remove the 12 month limit on the period during which State agencies which have previously been fully designated may be conditionally designated.

Amends subparagraph (b)(2)(B) and deletes subsection (d) to extend the period that State agencies may be conditionally designated until October 1, 1986.

Provides that States shall not be required to have a fully designated agency or be subject to the penalty of a loss of funds under the Public Health Service Act until October 1, 1986.

Section 7. Amends Section 1526(a)(6) to require State agencies to review the appropriateness of currently offered institutional health services only to the extent such review is feasible. Current law provides that State agencies must conduct such reviews.

Section 8. Amends Section 1531 to increase the value of the projects which State Certificate-of-Need programs must review. The value of capital expenditures is increased to $1,000,000 from $600,000; the annual operating cost of institutional health services is increased to $500,000 from $250,000; and the value of major medical equipment is increased to $500,000 from $400,000.

Section 9. Amends Section 1536 to allow States which have previously elected to operate health planning systems under Section 1536 to expedite the reestablishment of health service areas and to require the Secretary to redesignate HSAs in such areas. Amends Section 935 of Public Law 97-25 to allow HSA funds to continue to be provided to States which operated Section 1536 programs in 1981.

Section 10. Authorizes $42,000,000 for grants to HSAs, $21,400,000 for grants to States and $1,500,000 for grants and contracts for Centers for Health Planning for fiscal year 1983. Authorizes such sums as may be necessary for fiscal years 1984 and 1985.

Section 11. Repeals Title XV as of October 1, 1986.●

TERROR IN EL SALVADOR

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mrs. BOXER. Mr. Speaker, two of my constituents, Dr. Milton Estes and Tom Steel, have recently visited El Salvador. They have brought to my attention two articles that speak directly to the terrible tragedies that are occurring with frequency. I would like to share them with my colleagues.

[From the Modesto (Calif.) Bee, Feb. 22, 1983]

TERROR IN EL SALVADOR

There is no ambiguity about the provisions of the law covering United States military assistance to the government of El Salvador.

It says El Salvador cannot receive U.S. military aid or buy U.S. weapons unless the president reports to Congress every six months that the Salvadoran government is respecting the rights of its citizens and is making progress toward land reform and political reform.

On January 21, one day after a report by international observer groups declared the human rights situation in El Salvador is worse than ever, President Reagan certified that the terms of the foreign aid law were being met and that El Salvador should continue receiving U.S. military aid.

One week after that certification, Modesto attorney Nancy C. Smith visited the beleaguered country as an international observer under the auspices of a coalition of East Bay churches.

In her eight-day stay at a United Nations-run refugee camp for Salvadoran refugees, she found no evidence of improvement in the human rights situation in El Salvador.

On the contrary, her graphic report which appeared on the Viewpoints page in Sunday's *Bee*, was a horror-filled recounting of the killing, brutality and oppression inflicted by the Salvadoran army on its own people.

From every refugee she talked to came a story of indiscriminate killing and violence—of women and children raped and killed, of peasants shot from aircraft as they worked in the fields, of old people burned alive in their homes as the army moves to a scorched earth policy, laying waste to entire villages.

Throughout her interviews, Smith said, the terrorized refugees sounded one refrain: "They (the army and death squads) killed children, old people, and pregnant women."

The recurring willingness of the Reagan administration to arm this continuing reign of terror, this war of termination against the peasants—as Smith says the Salvadoran soldiers themselves refer to it—offers no hope of opening the eyes of those who will not look.

Even Congress, which is responsible for the human rights certification law, is showing signs of frustration after two years of sustained debate about El Salvador.

Rep. Gerry E. Studds, D-Mass., who has led the effort to halt military aid to El Salvador, recently said he has concluded that it is "essentially futile" to try to challenge U.S. policy. Congress will not vote to cut off aid to El Salvador, he said, and unless it does the administration will continue on its course of bolstering the current regime.

What, then, can be done? With an administration that cannot see and a Congress that will not act, it is obvious that the people of this country must take the lead.

During her stay in the camp, Smith found that the presence of international observers offered protection to the refugees from the brutal zeal of the army, a shield that does not go unappreciated. The refugees have a saying among them, Smith said: "First we thank God, and then, after God, we thank the internationals."

For the sake of those terror-stricken survivors we can support and enlarge the international observer programs, programs that will return to us more Nancy Smiths to shake us into awareness of our complicity in this continuing wave of death and destruction.

"If Americans understood the poverty and misery," Smith said, "if they could hear the heart-rending stories of brutality and repression, I believe they would demand an end to United States military aid to El Salvador."

The American people need to begin voicing that demand in a popular crescendo now before it is too late.

[From the Pacific Sun, Mar. 18-24, 1983]

VIEW OF EL SALVADOR

"They killed my husband and child," the woman said. "My husband was coming from the fields when the soldiers came. They did not talk to him, nothing. They just shot him and my child. I have four other children and I came here with them."

The woman is a refugee from El Salvador now living in a United Nations camp in Honduras. She was talking to Dr. Milton Estes, a Mill Valley M.D. He and two attorneys from the Bay Area went to Honduras to discover the truth about what is going on in Central

America, and the truth will make your hair stand on end.

"We heard the same stories over and over and over again," says Estes, who traveled to the camp under the auspices of Concern, a hunger relief group based in Los Angeles. Every refugee Estes met had malaria; most suffered from malnutrition. All of them, including the children, had witnessed unspeakable events: an uncle beheaded, a sister raped than hacked to pieces, fetuses ripped from women's bellies and fed to pigs. The soldiers' excuse was that the peasants were guerrilla sympathizers.

In fact, as culled from the refugees themselves, the peasants are largely apolitical. "They are illiterate, salt-of-the-earth folks," Estes says. The free elections and land reform programs of the late seventies were called "lies." People were afraid to go into the villages to vote for fear of being killed; at the polling places, soldiers stood armed to make sure their candidate got the vote. As for the land, the prices remained out of reach of most peasants and often soldiers would burn the crops and livestock anyway. Families were starving and had to leave their homeland.

Estes brought crayons and paper and asked the children to draw pictures of their lives. I remember getting that same assignment in school; I drew pretty little houses with flowers out front and smoke curling out of the chimney. These kids drew twin-blade helicopters dropping bombs on people. These were not images they saw on TV.

The stories Estes collected from the camps are particularly significant now that Reagan has asked for an additional $110 million (at press time) in arms aid for El Salvador; $26 million has already been authorized this year. this is madness not only from a humanitarian perspective but from a logical one.

Military aid is supposed to help combat guerrilla forces. Government soldiers, with money, equipment and advice from the U.S., are given free reign to terrorize the people, kill their families and burn their homes. Guerrilla forces, by the accounts of the refugees, sometimes serve as the protectors of the people against the military's violence and display humane treatment of their prisoners. Sometimes when a child's family is wiped out by soldiers, she will adopt the guerrillas as her new family. In effect, U.S. military aid is making the guerrillas stonger and more popular.

Estes plans to present slide shows of the people in the camps, and perhaps make a film using the stories he collected there. In the meantime he urges you and me to pick up a pen and write to senators and representatives to say no, we do not want to send $110 million of our tax dollars to support the clear violation of human rights in El Salvador. Anyone interested in refugee camp visitor programs can write Dr. Estes at 333 Miller Avenue, Mill Valley, (Calif.) 94941.●

NATIONAL SMALL BUSINESS WEEK

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. BROOMFIELD. Mr. Speaker, President Reagan has declared this week to be "Small Business Week" and I think it would be appropriate at this time to submit to my colleagues' attention an article about the contributions made by our Nation's small businesses. This article appeared recently in "First Monday." I think at this time it would be well if we reflected upon what we as a Congress have done to alleviate the burdens upon small business and what we can do in the future to stimulate this most productive segment of the private sector.

The article follows:

"MOTHERHOOD OF INVENTION"—AND JOBS

What do ice cream cones and zippers have in common?

If you guessed both are examples of American small business ingenuity, you are right. But, if you don't rate a double-dip cone a significant invention, consider then the following technological contributions made by American independent inventors and small firms: air conditioners, airplanes, the CAT scanner, the artificial heart valve, the high capacity computer, xeroxography, telephones, phonographs and polaroid photography.

When it comes to developing and creating new technology, American small businesses have been in the forefront of these advances. These firms produced most of the country's new products, new processes, new industries.

More importantly, American small enterprises create more than 70 percent of all new jobs, and today, more than 50 million people work in small businesses—that is half of America's workforce. Not only do American small business owners keep half of this country at work, they have also provided most of this country's important inventions and innovations over the years. For example:

Of the 149 inventions in the aluminum industry, major producers accounted for only one in seven;

Of the major 13 innovations in the American steel industry, four originated in Europe, seven were developed by independent American firms and none were produced by the leading steel companies in the nation;

Of the seven important inventions in the refining and cracking of petroleum, all were made by independent inventors; and,

Nearly every energy-related device of this century was invented by American small businesses.

Given this track record, why is America slipping from its position of prominence among the technological leaders of the world? Why do American businesses—large and small—seem to be losing their lead over competition from Western Europe, Japan and even several Third World countries?

Ronald Reagan believes part of the blame can be traced to the federal government. Instead of boosting the efforts of American small businesses, the federal government often stifled incentive and productivity through burdensome regulations. Despite their importance to this country's economy and workforce, American small businesses were bypassed by Uncle Sam when it came to handing out federal funds for research and development grants.

The once creative and unrestricted environment of small business became bogged down with red tape and lack of capital. No more.

President Reagan is determined to reverse America's declining technical superiority. Reagan told the country in his State of the Union Address: "This administration is committed to keeping America the technological leader of the world now and into the 21st century."

When he was first elected to office, President Reagan took swift action to aid American small business. Important legislation included:

The President's three year tax cut provided help to millions of small, unincorporated firms;

Regulatory burden was relieved through administration reform of federal red tape;

The Prompt Payment Act told Uncle Sam to pay his bills on time, to the principal benefit of small businesses;

Tax barriers to the formation and investment in small firms were reduced;

Reforms in the estate tax laws made it easier for small business owners to build and maintain their businesses; and,

The Export Trading Company Act will help small firms compete in foreign markets on an equal basis with their competitors in other countries.

President Reagan also directed all federal agencies to increase federal purchases from small firms and he supported the Small Business Innovation Research Act. This legislation orders the 10 major federal agencies—those with the largest research and development budgets—to direct more contracts to small high-tech firms—the very companies that have been in the vanguard of American technology.

The Small Business Administration (SBA), which oversees and monitors this program, estimates that in 1987, small high-tech firms will receive nearly $500 million in federal funds as a result of this legislation.

When the President signed the act last July, he said, "Small business is a tonic for what ails the country. By passing and signing this act, we are showing our resolve to unleash this most innovative sector."

Lucky for Americans that some inventors ignored the federal government's prior habit of inhibiting ingenuity. In 1904, two young businessmen from Ohio approached the government with the idea they thought could prove highly successful. Federal officials told the two entrepreneurs that before they spent a cent on their project, "The device must be brought to a state of practical operation without expense to the U.S. government."

Discouraged, but not defeated, Orville and Wilbur Wright simply invented the first flying machine without help from Uncle Sam.

It is this same spirit that Ronald Reagan wants to encourage, not squelch, through federal support of American innovation. The President does not want to see, for lack of a federal dollar an idea fail to get off the ground.●

BUDGET SQUEEZE THREATENS AMERICA'S BROADCAST PROGRAMS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. KEMP. Mr. Speaker, in terms of cost effectiveness and national security value, America's international broadcasting program is one of our

best foreign policy investments in recent decades. As the London Economist has noted, "perhaps the single most brilliant act of American foreign policy since World War II" was the creation of Radio Free Europe and Radio Liberty. Their intrepid coverage of East European internal affairs has been vital in achieving a high degree of audience identification that overwhelms the Soviet's futile attempt to control and obstruct ideas and information in their official news reports.

Under its director, Ken Tomlinson, the Voice of America is basing its programing philosophy on the premise that the freedom of man, and other timeless principles of democracy, constitute the true reflection of American "ideology." Consequently, the Voice is offering its millions of listeners a broad range of views and prompt, uncensored, information.

Yet, as the following Wall Street Journal editorial notes, Radio Free Europe, Radio Liberty and the Voice of America are all coming under the budgetary guns in Washington, with their modest request for modernization funds threatened in the Senate. With the Soviet Union spending four times what we do to broadcast and jam international radio shows, I strongly believe we should support this prudent request. I commend this lucid editorial to my colleagues and hope they will continue their support for this vital democratic program.

The editorial follows:

[From the Wall Street Journal, May 4, 1983]

THE BIG SQUEEZE

Remember the presidential campaign of 1980, and the turning point we thought it marked in the conduct of our foreign policy? Remember how we were going to rebuild our defenses, become more assertive, beef up our international radio operations so they could do a stronger job in the battle of ideas? Well, it turns out that things didn't change so much at the radios after all. We had hirings, firings, planning for new initiatives—and this year, just as in years past, the bottom line is that the Voice of America is plaintively begging for more money.

The Voice is the one of the U.S. radios charged with, among other things, presenting straight news to listeners around the world. When the Reaganites arrived, some old hands screamed that a shrine of objective journalism was about to be turned into a propaganda machine.

But these ideological wars did not continue for long. The Voice got a permanent director, Kenneth Tomlinson, and the general atmosphere calmed down. The agency has been having an effect in the cultural wars and the real ones: Just last week the government of Poland actually filed an official protest complaining that VOA and Radio Free Europe were destabilizing Poland's political arrangements. If this is true, it is not an achievement to sneeze at.

All these efforts, though, have been running smack into one massive fact: The Voice of America is falling apart. Without question. Beyond the slightest debate. For one thing, it lacks certain personnel that any world-wide journalistic organization would have to call essential. Its Rome bureau was closed as an economy move during the Carter administration, days before the election of Pope John Paul II. Almost all its foreign language services are clearly understaffed. This means it cannot match the broadcasting hours put out by the Taiwanese government, let alone the U.S.S.R.

Even more fundamentally, the Voice's physical plant is going to pieces. Almost all its transmitters are more than 15 years old, a third are at least 30 years of age and some broadcasting to the Soviet Union and Eastern Europe comes out of transmitters built approximately around World War II. They are held together with the technical equivalent of baling wire and further limit the amount that the U.S. can broadcast.

The Voice now has before Congress two money requests for beginning the necessary fix-up. One is a $22 million supplemental request for the fiscal 1983 budget; it now sits before a dubious House Appropriations Committee. The other is the fiscal 1984 budget request.

The '84 request has gone for authorization to the Senate Foreign Relations Committee, as part of the budget request for the whole U.S. Information Agency of which the Voice is a part. What the Foreign Relations Committee has done to this request is to adopt an amendment by Sen. Edward Zorinsky cutting $65 million from the USIA budget. Then at the request of Sen. Claiborne Pell and others the committe tied up large chunks of money for specific purposes: one chunk for exchange programs, another to give to the private organizations that are slated to run the new Project Democracy.

What all this means is that for practical purposes the money for the Voice's modernization is gone.

It doesn't look as if anyone on the Foreign Relations Committee really had it in for the Voice. Indeed, the U.S. Senate periodically rings with mellow rhetorical tributes to the fine work the agency is doing. What seems to have happened is that some of the committee members wanted to take a general shot at USIA, and the Voice got caught in the squeeze.

The action can still be corrected. But it's already given us quite a snapshot of the way we conduct our legislative affairs in general and our foreign policy in particular. Our senators are awfully fond of talking about big ideas—about whether or not to get the MX missile, about moving the country lock, stock and blast furnace into the high-tech age. But when it comes to carrying out a policy that is indubitably beneficial and just needs a little attention to detail, they are a bust.

If there is one thing about which there is a consensus among those attentive to policy, it is that our radios do much for us in the world and can do more. You would think that this feeling would translate into some concrete beneficence. But no, when the chips are down, the Voice falls victim to the same slushiness that pervades most of our legislative activity.

Congress should reverse itself on this one, and show that it can walk and chew its policy gum at the same time.●

MX: FOUR FALLACIES

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. GREEN. Mr. Speaker, Shortly the Congress will again vote on the MX missile. Before the Pentagon can spend $560 million appropriated for fiscal year 1983 for MX basing research and conduct an MX flight test, both the House and the Senate must approve the administration's proposal to base 100 MX missiles in Minuteman II silos in Wyoming.

I believe, this recommendation must be vetoed by the House. The article that follows, "MX: Four Fallacies," prepared by the Union of Concerned Scientists, outlines the flawed reasoning behind arguments favoring the MX missiles. The article rightfully concludes the current U.S. deterrent force is adequate, that the MX is a destabilizing first strike force inconsistent with U.S. deterrence policy, that building MX to threaten the Soviet Union with a strategic response in a conventional war is terribly risky, and that MX deployment will not force the Soviets to bargain on arms control and may result in escalation of Soviet deployments.

I commend "MX: Four Fallacies" to my colleagues' attention.

[From the Union of Concerned Scientists Fact Sheet]

MX: FOUR FALLACIES

The Reagan Administration and the Scowcroft Commission have recommended the development of the MX missile system for the following reasons:

The United States needs to build the MX to preserve the effectiveness of its nuclear deterrent.

The MX is necessary to give us the capability to threaten Soviet hard targets.

The MX is essential to deter the threat of conventional attacks on the alliance by the Soviet Union.

The MX is necessary to demonstrate U.S. resolve and to pressure the Soviet Union into reaching arms control agreements with the United States.

The Union of Concerned Scientists does not concur with these justifications for proceeding with the MX. Our reasons are outlined below in response to each of the four points.

(1) The U.S. Needs to Build the MX to Preserve the Effectiveness of Its Nuclear Deterrent.

Commission arguments: Our forces are older than those of the Soviets. The U.S.S.R. is also ahead in numbers of ICBMs, and is gaining in submarines. U.S. modernization of our ICBM force is therefore necessary. It is also needed to maintain the credibility of the triad.

UCS response: In fact, U.S. and Soviet forces are of roughly comparable age. Our strategic bomber force is newer than the Soviet equivalent; the B-52s were deployed after the Soviet Bears and Bisons. Our bombers have also been modernized more extensively; new equipment includes the

same offensive avionics package scheduled to be included on the B-1B.

Our ICBM missiles are older, but the warheads are about the same age as those on Soviet ICBMs. Three hundred of the Minuteman III missiles have recently been retrofitted with 900 of the new, more accurate MK-12A warheads. The Soviets have a marginal advantage in current warheads on their ICBMs, but they also have the serious liability of concentrating more than 70 percent of their strategic warheads on potentially vulnerable land-based ICBMs.

There is no evidence to support the contention that the Soviets are gaining in submarine technology. Our submarines are older, but our missiles are considerably more modern than those of the Soviets. For example, within the last four years, the U.S. has deployed over 200 new Trident I missiles with more than 1700 warheads. These missiles are newer than virtually all of the missiles in the Soviet submarine force. In addition, U.S. submarine improvements and ASW development are proceeding. U.S. technological sophistication has traditionally been far superior to that of the Soviet Union. Indeed, Secretary of the Navy John Lehman testified in March that U.S. submarines would "remain largely invulnerable throughout this century." He also said that submarines were becoming less, rather than more, vulnerable.

The Scowcroft Commission itself has acknowledged that the Soviets cannot effectively undertake a simultaneous attack on U.S. submarine ports, bomber bases, and ICBMs. The Commission concludes that ICBM vulnerability is not a critical issue for the present, and that each leg of the triad is reinforced by the capabilities of the triad as a whole. In short, the Scowcroft Commission has fully repudiated the Administration's "window of vulnerability" argument, overturning what was previously the principal justification for proceeding with MX deployment.

The U.S. triad is formidable. It is immensely powerful, and will retain for decades a great capacity for retaliation in the event of an attack on it. Its deterrent value is more than adequate for the foreseeable future.

(2) The MX Is Necessary to Give the U.S. the Capability to Threaten Soviet Hard Targets.

Commission arguments: The Soviets have a prompt hard target kill capability, and we do not. We need a prompt hard target kill capability, and can gain it with the MX.

UCS response: MX missiles in Minuteman silos can add to U.S. capabilities only if we plan to use them in a first strike against the Soviet Union. The Soviets will not launch a first strike unless they believe they can destroy U.S. missiles in the silos. MX does not alter that Soviet calculation; it simply places more valuable targets in the silos. The Commission report states that "there is considerable merit in moving toward an ICBM force structure in which potential targets are of comparatively low value—missiles containing only one warhead." The proposed deployment of MX flatly contradicts that proposal.

The Commission report does not adequatley defend the necessity for a time-urgent response—that is, the prompt hard target kill potential offered by the MX. If MX is intended for a second-strike response, it is not needed: there will be a limited number of hardened targets against which we need to respond. After all, the Soviet missile silos will largely be empty. Once the Soviets have launched an attack on the U.S., those missiles that remain in Soviet silos will probably be in "launch-on-warning" status, ready to be released as incoming U.S. missiles are detected.

Furthermore, the U.S. hardly needs additional capacity to strike Soviet hard targets. It now has increasing numbers of cruise missiles as well as a powerful bomber force. These second-strike weapons are already adequate for attacking important hard targets remaining after a Soviet attack. The U.S. can also respond without directly attacking Soviet cities, by destroying industrial and soft military facilities not located near population enters. Such a response would not require MX.

(3) MX Is Essential to Deter the Threat of Conventional Attacks on the Alliance by the Soviet Union.

Commission arguments: The U.S. needs the MX to convince the Soviets that a Soviet conventional attack risks a strategic nuclear response by the U.S. MX is essential to this response because of its "promptness" and "controllability."

UCS response: Initiating the use of nuclear weapons in response to a conventional attack would be dangerous and suicidal, particularly if strategic nuclear weapons are used. There is no basis for the presumption that nuclear war can confidently be limited, or confined to a finite number of exchanges short of escalation to all-out nuclear war. Limiting tactical nuclear war on the battlefield of Europe or elsewhere is difficult enough to believe; controlling nuclear war waged with ICBMs is inconceivable. The very feature of MX capability that the Scowcroft group finds so attractive—promptness—virtually guarantees that any use of the MX will quickly escalate to an uncontrolled exchange, and bring about the total destruction of the U.S.S.R. and the United States. We would lose far more than we would gain.

(4) The MX Is Necessary to Demonstrate U.S. Resolve and Pressure the Soviet Union into Reaching Arms Control Agreements with the United States.

Commission argument: Cancelling the MX would signify to the Soviets that we do not have the will essential for deterrence. Abandoning MX would reduce the likelihood of reaching a stabilizing arms control agreement with the Soviets.

UCS response: Lacking a military justification for building MX, the Commission has resorted to a political argument. A key conclusion of the Scowcroft report is that we must deploy the MX to demonstrate U.S. resolve. If we do not, the Soviets will doubt our "national will and cohesion." But the United States already has a secure, powerful, and redundant deterrent force. The Soviets know this. Rejection of the MX would demonstrate that we ourselves are confident in the strength of our deterrent. It would also signify to the Soviets and the rest of the world that we are serious about arms control.

Second, there is little hope that MX deployment would pressure the Soviets to negotiate, as expected by the Scowcroft Commission. The Soviets are more likely to respond to MX deployment by augmenting and improving both their defensive and offensive weapons. Thus, instead of inducing the Soviets to negotiate on arms control, MX deployment could provoke a counter buildup by the Soviets, which would quicken the pace of the already vigorous nuclear arms race.

ADDITIONAL CONSEQUENCES OF THE MX

The decision to deploy MX in Minuteman silos risks three major consequences. The first is that U.S. ICBMs will be placed on a greater alert status at crucial times, in order to avoid having them destroyed in their silos. This alert status—"launch-on-warning"—in itself could precipitate the event we are seeking to avoid. Given the sensitive nature of the U.S. warning system and its frequent false alarms, launch-on-warning would be an extremely dangerous posture.

A second possible consequence is that the President will soon argue that we must protect the MX, because superhardening the silos is not feasible in the near term. A ballistic missile defense (BMD) will be the obvious candidate to provide such protection. Yet even the Scowcroft Commission admits that the best fixed point defense BMD systems would violate the 1972 ABM treaty.

A third consequence is violation of the SALT II treaty, which the President has pledged to observe.

The flight testing and deployment of two new missiles will violate SALT constraints, as will the construction of new, superhardened ICBM silos. The Commission response is that SALT will have expired by the time the second new ICBM is deployed. Until the Reagan Administration came to office, the assumption underlying arms control negotiations was that constraints would become more rigorous over time, not less. President Reagan plans systems that violate the SALT II treaty, even while claiming to observe the treaty.

CONCLUSIONS

In conclusion, several factors are worth repeating:

Minuteman "vulnerability" is a political, rather than a military, problem. A perceived weakness—the fictitious window of vulnerability—sparked development of the MX. Now that it is clear that the weakness does not exist, we do not need the system.

MX is a first-strike weapon. The U.S. does not need the prompt hard target kill potentially provided by the MX. MX deployment is not consistent with U.S. deterrence goals.

Deployment of the MX as an instrument of U.S. first-use policy risks escalation to all-out nuclear war.

Building the MX to "coerce" the Soviets to negotiate is likely to fail. The more likely Soviet response is to improve their strategic force to counter any new capabilities that the MX might provide the U.S.●

PREFERRED PROVIDER HEALTH CARE ACT OF 1983

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. WYDEN. Mr. Speaker, I am today introducing the Preferred Provider Health Care Act of 1983. It is my belief that this legislation will promote competition in the health care financing marketplace and stimulate a variety of initiatives throughout the United States that will moderate skyrocketing health care costs.

For more than two decades, health-care spending in the United States has risen dramatically, and current and

projected levels of spending for health are expected to continue soaring.

Congress has repeatedly considered ways to slow these rapid increases in health care costs and particularly their impact on public health care financing programs, such as medicare and medicaid.

Our immediate attention has focused on some of the financial problems of Government-sponsored programs, because of their enormous impact on the budget. But, until we begin to devote some attention to systemwide changes in the American health care financing system, we will still not have addressed the underlying causes of increasing health care costs—in either the public or private sectors.

In the last few years, we have recognized that major reforms in the design of our public programs are necessary to slow the rates of growth in the costs of providing needed services to the elderly, disabled and poor of America under medicare and medicaid. We have learned that to effectively serve the elderly and the poor, we must show a new concern for costs.

In 1981, for example, we authorized the States to make needed changes in the designs of their federally aided medicaid programs in order to develop cost-effective controls over spending for health services. Personally, I worked very hard for the prospective payment legislation that the President just signed, because I have long felt that major changes were needed in the way we pay for hospital care under the medicare program.

The purpose of these actions, Mr. Speaker, has been to provide new incentives to those who deliver services under these publicly financed programs to constrain what are now virtually uncontrolled levels of spending. In both instances, we are beginning to acknowledge that the Government simply must become a smarter, more efficient purchaser of health services on behalf of those served by these taxpayer-financed programs.

However, Mr. Speaker, the same cost pressures that compelled Congress to take steps to control spending under medicare and medicaid are also forcing the private sector to reconsider some of the traditional ways in which health care is financed.

The costs of private health benefit programs—those usually provided for Americans through their places of work—are also very much out of control. Employer costs for health benefit plans covering their workers and dependents are rising dramatically; labor has seen potential wage increases melt away in the form of higher and higher fringe benefit costs for health benefits; and, individual workers and their families are very much aware of the economic destruction that any serious illness can bring to working Americans.

Various efforts are being undertaken across the country to attempt to deal with these exploding health care expenses and their economic impact on business, labor, and individuals. Some of these efforts focus on the injection of more competitive pressures in the health care financing marketplace. Numerous opportunities are developing in communities throughout the country, as buyers and sellers of health care services recognize that an intolerable situation of ever-rising health spending simply cannot be allowed to continue.

One of the more innovative cost containment initiatives developing on the local level is the preferred provider arrangement.

"Preferred provider arrangement" is a term used to describe an alternative health care financing system in which services of some specified list of providers—hospitals, doctors, and so forth—are offered to insurers or to employers at predetermined rates. Individual providers of services enter into a contractual agreement to provide necessary care in exchange for prompt payment on the basis on negotiated, and usually discounted, fees.

Consumers who participate in the preferred provider arrangement are completely free to obtain their health care from whomever or wherever they choose. However, if they elect to receive such care from those on the list of preferred providers, they will receive some type of financial advantage that they do not receive if the care is supplied by providers who do not participate in the preferred provider arrangement.

These financial advantages usually take the form of a waiver or reduction in deductible coinsurance payments, or sometimes increased benefits. Such arrangements are being sponsored variously throughout the country by medical group practices, hospitals, union trust plans, insurance companies, Blue Cross and Blue Shield plans, and by some associations of independent physicians. Organizations offering such arrangements are often called preferred provider organizations, or PPO's.

Many who have followed the development of PPO's believe that such arrangements offer a major opportunity for moderating rising health care costs by promoting sensible, fair competition among the providers of services and by encouraging provider groups—especially physicians—to adopt or to agree to effective utilization and resource monitoring programs as a means of controlling expenditures.

There are important advantages for the consumers who specifically: First, receive the financial advantages that flow from using the providers on the preferred list, but second, are in no way locked in to specific providers of care. Because of the negotiated arrangements, consumers using such providers generally know in advance which services will be paid for and that such amounts, if obtained from a preferred provider, will be accepted—except for any explicitly defined cost sharing—as payment in full.

There are also important advantages for hospitals, physicians, and other suppliers of services who become preferred providers, including a guaranteed and stable source of patients and prompt and full payment that helps to assure steady cash flow.

The intention of my bill is not to dictate to local communities the form that these preferred provider arrangements may take, or the conditions under which they may be established. I believe it would be a serious mistake for Congress to consider any legislation that narrows, in any way, the range of innovative, competitive financing arrangements that are beginning to emerge in this area.

The purpose of my legislation, rather, is to override some of the impediments that I believe exist in some States which retard competitive innovation in the health care financing field, and which act as barriers to, or have some chilling effect on, the development of competitive alternatives in the health care marketplace.

Whether preferred provider arrangements can be incorporated into a third-party payment program—and particularly into the insured plans offered by health insurers and into some Blue Cross and Blue Shield plans—depends upon a particular State's laws and regulations governing health insurance. Sometimes, State statutes work to prevent the offering of competitive alternatives to employers and workers or the negotiation of contracts that would promote effective expenditure control programs as part of health care financing arrangements.

For example, the nondiscrimination insurance laws on the statute books of some States work to prohibit insurers from varying the amounts of payment made among providers of services—an essential part of preferred provider arrangements. Some freedom of choice laws may prohibit insurers from influencing a covered patient's choice of physician or other provider.

The bill I am introducing today will insure that these laws do not stifle competition that could benefit the purchasers and consumers of health care services. My legislation will insure that consumers who chose designated providers who are cost effective, or who are willing to participate in cost-effective programs, are not penalized through unfair regulation.

Under the Preferred Provider Health Care Act of 1983, no provision

of State insurance or other law or regulation would be allowed to prevent one or more group health plan payors; for example, health insurance, Blue Cross/Blue Shield plans, multiemployer trusts, and so forth, from negotiating and entering into contracts for alternative rates of payment with, or determining alternative rates of payment for, providers of health services.

States could not prevent the offering of the benefits of such alternative rates to beneficiaries who elected to receive care from preferred providers of health services.

Furthermore, with the explicit agreement of group policyholders, and subject to the terms of any applicable collective bargaining agreement, no State law or regulation could prevent payors from limiting payments under a health policy to services secured by plan beneficiaries from providers of services charging such alternative rates.

This legislation also makes it a matter of explicit Federal policy that such arrangements will not constitute a violation of State laws or regulations which prohibit discrimination among beneficiaries of the same class in the matter of payments under a preferred provider arrangement. The override of these State barriers under the bill would not apply to any State law which relates to cost-effective arrangements, including limitations on the use of providers, under either the medicaid program or, if applicable, under medicare.

PPO's have the potential to be a major force in health care cost containment. They represent one of the few initiatives that seem to effectively incorporate doctors into cost-containment strategies. They can serve to give our consumers another health care choice—and by stimulating fair, effective competition, could produce beneficial results for our health-care system as a whole.

As such, the legislation I offer today will not solve all the problems of our health-care system, but it is a step toward a goal all Americans can support: Quality, affordable medical care.

H.R. 2956

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Preferred Provider Health Care Act of 1983".

SEC. 2. (a) No requirement of any State insurance or other law or regulation shall apply so as to prevent one or more group health plan payors—

(1) from negotiating or entering into contracts for alternative rates of payment with, or determining alternative rates of payment for, providers of health care services and offering the benefit of such alternative rates to group health plan beneficiaries who select such providers, or

(2) with the agreement of group policyholders and subject to the terms of any applicable collective bargaining agreement, from limiting payments under a policy to services secured by group health plan beneficiaries from providers of health care services charging alternative rates.

(b) The payment with respect to group health plan beneficiaries by a group health plan payor of alternative rates of payment under subsection (a) shall not constitute a violation of any State law or regulation which prohibits discrimination among beneficiaries of the same class in the matter of payments by a payor described in subsection (c)(2).

(c) For purposes of this section:

(1) The term "group health plan" has the meaning given such term in section 162(i)(2) of the Internal Revenue Code of 1954 and does not include a State plan approved under title XIX of the Social Security Act or an insurance program under part A or part B of title XVIII of such Act.

(2) The term "group health plan payor" means any health insurer, hospital and medical service corporation, health maintenance corporation, self-insured employer, multiemployer trust, labor organization, or any other entity which provides for making payment for medical care (as defined in section 213(d) of the Internal Revenue Code of 1954) under a group health plan.

(3) The term "State" includes the District of Columbia.

SEC. 3. This Act shall take effect on January 1, 1984.●

TRIBUTE TO RONALD CALTAGIRONE

HON. ROBERT G. TORRICELLI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. TORRICELLI. Mr. Speaker, I rise today to pay tribute to Ronald Caltagirone of Emerson, N.J., a brave young sailor who recently died in service to his country.

On May 1, 1983, a U.S. Navy C131-F aircaft carrying 15 passengers crashed en route to Guantanamo Bay, Cuba. Immediately after take off the plane's left engine caught fire and the pilot attempted to make an emergency landing. The pilot's gallant efforts failed and the plane crashed only 125 yards from the runway in the St. Johns River near Jacksonville, Fla.

Among those found dead was A1c. Ronald Caltagirone. Ronald, only 21 years old, was a graduate of Emerson High School in 1980. Six months after graduation Ronald made the choice to dedicate himself to the service of his country by joining the Navy. At a time when serving our country is not always the most popular choice, Ronald is to be admired for having the determination and self-confidence to put his country first. I applaud his courage and devotion to the Armed Forces of the United States. It is young men like Ronald who continue to set fine examples of bravery and valor for our country. Ronald's selflessness to country and dedication to duty serves as a symbol of our country's character and spirit. As President Harry S. Truman once said:

The strength of this Republic lies in the fact that so many millions of men and women recognize clearly that they must serve their country before they serve themselves.

That sense of national duty is what Ronald represents.

I stand today in tribute to Ronald Caltagirone's selfless dedication to country. His parents Nicholas and Gabriel and his sister Denise Pfeiffer can be proud of Ronald. Emerson, N.J., was blessed to have as rare an individual as Ronald among its residents.

He will be sorely missed by his family, his friends, his community, his country, and all who knew him.●

A TRIBUTE TO A DISTINGUISHED EDUCATOR

HON. BOB CARR

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. CARR. Mr. Speaker, it is with great pleasure that I rise today to honor Mr. Keith Geiger, president of the Michigan Education Association, as he marks his seventh anniversary in office.

Keith Geiger's career in education has been as productive as it has been diverse. His teaching background in the schools of Livonia, Mich., is in mathematics and science; but he has also expanded his pursuits into the areas of politics, theater, philanthropy, and equal rights. He has shown a high level of devotion to his community by serving on such panels as the Lansing Area Advisory Board of the Arthritis Foundation, the board of directors of the Michigan Project on Equal Education Rights, and the recreation commission in my hometown of East Lansing.

During his 7 years at the MEA, he has both demanded excellence in education, and worked to assure that educational issues are in the forefront of the political agendas on the State and national level. He has been an energetic and enthusiastic advocate for teachers, parents, and students, taking risks and meeting challenges as opportunities for innovation and creativity. His time has been solidly invested in our children, and thus in the future of the State of Michigan.

Keith's continuing pursuit of his own education, as he works to receive his doctorate at the University of Michigan, is still further evidence of his commitment to scholarship and high academic standards. He is a fine example to all of us, and especially to the young people in our State's school system who will greatly benefit from his guidance and leadership.

Mr. Speaker, I ask that my colleagues in the U.S. Congress join me in saluting Keith Geiger, a truly distin-

guished educator and leader. On his seventh anniversary, he has reason to be proud of all he has accomplished.

THE PRICE AND SUPPLY OF NATURAL GAS

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, May 9, 1983

● Mr. DERRICK. Mr. Speaker, Members of this body are currently faced with a difficult decision concerning the regulation, or deregulation, of natural gas. It is a difficult issue because the price and supply of natural gas have a significant effect on the well-being of our constituents, and because the relationship between the price and supply of gas and a program of regulation is both complex and the subject of disagreement. In this situation I believe we are all well served by thoughtful analyses of the likely effects of deregulation. I offer here to my colleagues the summary and conclusions section of such a thoughtful analysis: A study prepared by the South Carolina Energy Research and Development Center at Clemson University, "An Assessment of the Economic Impact of Natural Gas Prices and Deregulation Upon the South Carolina Economy." I do not necessarily agree with all of the study's conclusions, but I certainly believe it contributes to an understanding of the current natural gas situation in the Nation in general, and in South Carolina in particular. I will be happy to provide a copy of the full study to any of my colleagues who would like one.

SUMMARY AND CONCLUSIONS

Included in this report is a semi-quantitative assessment of the impact of rising natural gas prices on South Carolina industry. The methodology included: (a) an estimate of industry dependence (both direct and indirect) on natural gas inputs from 1985 to 1995, (b) an estimate of direct natural gas costs per dollar of sales for major industry groups for 1985, 1990, and 1995, (c) estimates of employment multipliers for each industry group in South Carolina, and (d) the use of an established energy/economic model of South Carolina industry.

The conclusions we draw from our analysis are:

1. Supply is significantly more important to South Carolina industry than is cost. This is due to the low quantities of natural gas used (per $ of output) by our industries. Only under the extreme case of a 1985 price for natural gas of $9/MCF is there potential for a large number of industries and a large number of employees to be affected to the extent of increasing selling prices of goods to 10 percent above current levels. However, it is cautioned that selected industrial sectors could be wiped out at significantly lower levels. e.g. some textiles, since they operate on profit margins of less than 10 percent. However, if major competitors (e.g., the textile industry in other southeastern states) are faced with similar natural gas price increases, then South Carolina industry will not suffer vis-a-vis their United States competitors. However, a N.C. firm on a deep cushion pipeline would have an unfair competitive advantage compared to a S.C. firm on a shallow cushion supplier.

2. As indicated in (1) above, at levels less than the 10 percent cost of production increase there are a few sectors in South Carolina that are very sensitive to natural gas price increases and are likely to be adversely affected by competitors that have access to deep cushion gas. Sectors that are most likely to suffer significant reduction in profit margins and markets are Stone, Clay and Glass products (Sector 38), Furniture and Fixtures (Sector 30) and Finishing Plants—Cotton and Synthetics (Sic 2261-2262). Sectors 38 and 30 are very heavy users of natural gas per dollar of sales and thus will suffer accordingly from rapid rises in natural gas prices relative to their competitors if these competitors are on deep cushion pipelines. Within these sectors, Fiberglass, Brick-Structural Tile, Upholstered Furniture, Ready Mix concrete, and Concrete Block Products are most vulnerable.

The textile finishing plants use considerably less natural gas per dollar of sales than firms in Sectors 38 and 30. However, they are significant employers in South Carolina and also low profit per dollar of output sectors. Unless the locally oriented subsectors of Stone, Clay and Glass (Sector 38), textile finishers generally face stiff competition from other domestic sources. For example, Ready-Mix Concrete manufacturers tend to operate in local markets where all producers are likely to be faced with the same natural gas price increases whereas S.C. textiles must compete with Texas textiles, etc.

Textile finishing plants that are currently considered to be marginally profitable may succumb to natural gas price increases that erode profit margins despite the estimate of no more than a $.01 drop in textile sector profits per dollar of sales by 1995 because this sector tends to be a low profit per dollar of sales sector (approximately $.046/per dollar of sales). Even a $.01 drop in profits per dollar of sales may represent a 15 percent to 25 percent reduction in profit margin. If competing plants (perhaps operated by the same firm) are able to avoid this erosion of profit margin through purchase of low cost natural gas on a deep cushion pipeline in another state, then the South Carolina plant is clearly in jeopardy. Unfortunately, multiplier effects of closing of textile plants are also relatively large in South Carolina.

3. Agriculture is most likely to be affected by rising natural gas prices via the increased cost of ammonia fertilizer. The impact of rising ammonia fertilizer prices has been analyzed by Gardner. He concludes:

"In summary, the effects of deregulation versus current natural gas price regulation on the Farm and Food sector are significant but far less than those often caused by weather or international events. Consumer and farmer costs together do not exceed more than one percent of the value of farm production."

4. Under projected effects of the NGPA of 1978, individual firms located on low cushion pipelines with competitors on high cushion pipelines will suffer loss in profit margin or market share. Industries that are likely to encounter this problem (i.e., have significant competitors on other pipelines) and that employ more than 1,000 people in South Carolina are in descending order:

1. Upholstered Household Furniture, SIC 2512, Sector 30.

2. Pressed and Blown Glass Products, SIC 3229, Sector 38.

3. Finishing Plants, Cotton, SIC 2261, Sector 25.

4. Finishing Plants, Synthetics, SIC 2262, Sector 25.

5. Plastics Materials, SIC 2821, Sector 34.

6. Industrial Organic Chemicals, SIC 2818, Sector 33.

7. Plastics Products, NEC, SIC 3079, Sector 36.

8. Boiler Shop Products, SIC 3443, Sector 40.

9. Organic Fibers, Noncellulosic, SIC 2824, Sector 34.

10. Ball and Roller Bearings, SIC 3562, Sector 41.

These 10 industries meet these criteria: 1. Employing more than 1,000 people in South Carolina; 2. Had a natural gas use coefficient of $4/$1000 of output or greater; and 3. Are likely to have significant competition from outside South Carolina where competitors may be on high cushion pipelines.

5. Of the 10 industries listed in (4), we considered the employment effects of a plant shutdown by using employment multipliers for the affected sector:

EMPLOYMENT PER MILLION DOLLARS OF SALES

Sector	Direct plant	All	Multiplier
25 Fabrics, textiles	35	125	3.5
30 Furniture	48	112	2.3
33 Chemicals	15	47	3.1
34 Plastics	21	43	2.0
36 Rubber	25	62	2.4
38 Glass, stone, clay products	33	83	2.5
40 Fabricated metals	27	62	2.3
41 Machinery, nonelectrical	26	65	2.5

The largest multiplier effects would be in Sector 25 because of the well developed textile industrial complex in South Carolina. Thus, marginal textile finishing plants that shut down would most severely affect employment in South Carolina. Fortunately, Sectors 38 and 30, which are the most sensitive of all South Carolina sectors to gas price increase, have a relatively small, though not insignificant, multiplier effect. The multiplier shows the total job change for every direct change in jobs in industries in this sector. For example, if a blown glass products plant with 1,000 employees were to shut down, about 2,500 total jobs would be eliminated. The cummulative effect of shutdowns of these significant gas users would be the loss of in excess of 130,000 South Carolina jobs.

6. Recommendations were formed that favored deregulation of natural gas to a limited degree with strict provisions attached to attempt to alleviate the attendant disruptions of a shift to a total free market concept. (See page 63 for an expanded statement).●

AIDS: A NATIONAL CONCERN

HON. STENY H. HOYER

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, May 3, 1983

● Mr. HOYER. Mr. Speaker, we are faced today with a national public health crisis not known in this country since the days when polio struck thousands of our citizens. I speak of a dis-

ease for which we have no known cure, a disease which has a 40 percent mortality rate. The number of new, reported cases of this disease has doubled every 6 months since the first cases were diagnosed 1½ years ago. This sudden surge is all the more frightening when we note that the incubation period is 2 years and this may only be the beginning.

I speak of the epidemic that has come to be called AIDS or acquired immune deficiency syndrome. It is a disorder for which presently there exists no proven mode of prevention or treatment, yet it strikes at the very center of the body's primary system for staving off disease. As a result, victims of AIDS often succumb to a rare form of cancer called Kaposi's sarcoma and a more common protozoan infection of the lungs called pneumocystis carinii pneumonia. They are also left vulnerable to scores of other ailments which weaken and threaten the body. As of April 21, the total number of cases in the United States reached 1,352, with 512 dead. Citizens in 36 States and 16 foreign countries have been effected; there are already 85 cases outside the United States.

This is fast becoming a significant and growing health problem for which, at this point, we have no solution. Perhaps because the largest at-risk group is gay or bisexual men, public attention, until recently, has been negligible Government response has been slow. The second largest at-risk group is comprised of individuals who share needles for the injection of drugs. These two groups account for more than 86 percent of the total number of cases reported in the United States, and, often vocal concerns over the disease are coupled with critical judgments of the lifestyles of those who comprise the largest segments of victims. Unfortunately and tragically, this has reinforced the feelings of isolation, anxiety and loneliness that accompany the disease.

For not only are the victims of AIDS facing a 40-percent mortality rate, they are also confronted with an unsympathetic public, which merely adds to the complex psychological problems and devastating financial burdens they suffer.

Recently, AIDS has been reported in hemophiliacs, in children of parents with AIDS, and in some patients who have received blood transfusions. In fact, we do not even yet know the potential impact this disease will have on the public.

In discussions in the Appropriations Subcommittee on Labor, Health and Human Services, and Education, of which I am a member, representatives including the Director of the National Institute for Health, the Director of the National Institute of Allergy and Infectious Diseases and the National Cancer Institute reported on the steps they are taking to confront this health problem. They reported that while they have a few leads on how to prevent and treat the diseases, they had not even yet determined the causes. NIH has allocated $9 million in fiscal year 1983 and over $12 million in fiscal year 1984 for further research. In addition, the Center for Disease Control plans on spending $5 million for more applied epidemiological studies and outpatient research in their efforts to combat AIDS.

Mr. Speaker, the severity of the disease and the swiftness with which it has spread requires our immediate attention. Medical research into the causes and treatment of AIDS must be immediately intensified. National resources must be concentrated on the attack and a concerted effort on the part of our local communities is needed to provide support services for its victims.

It is imperative that we recognize AIDS as a national health problem and respond accordingly; with increased awareness, with sympathy and understanding for its victims, and with a real intent to find the means to support needed medical research.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, May 10, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

May 11

9:00 a.m.
Armed Services
Military Construction Subcommittee
Closed business meeting, to mark up certain provisions of S. 720, authorizing funds for fiscal year 1984 for military construction programs of the Department of Defense.
SR-22209

SD-430

MAY 20

9:30 a.m.
Labor and Human Resources
To hold hearings on the effects of chemotherapy in the treatment of cancer.
SD-430

HOUSE OF REPRESENTATIVES—*Tuesday, May 10, 1983*

The House met at 12 o'clock noon.

The Reverend Robert M. Raabe, United Lutheran Church, Lincoln, Nebr., offered the following prayer:

Almighty God, we acknowledge Your faithfulness and admit our dependence upon You. Since we are leaders in a complex world, make us compassionate enough to give priority to humanitarian concerns and strong enough so we need not become oppressors.

May there be peace where there is discord. May justice never be subject to partisan interests or the welfare of Your people captive to private advantage.

Bring our private morality and our public positions into harmony with Your will, reminding us that promises do not alleviate suffering nor do resolutions help the neglected, unless performance accompanies what we have said.

May the challenges of our time inspire us to be Your faithful servants of humankind.

In Your name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. HUNTER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HUNTER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 368, nays 22, answered "present" 1, not voting 41, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

REV. ROBERT M. RAABE

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, it is my pleasure to welcome to the floor of the House of Representatives our guest chaplain, the Reverend Robert Raabe, pastor of the United Lutheran Church of Lincoln, Nebr.

Pastor Raabe was graduated from Concordia College in St. Paul, Minn., and Concordia Seminary in St. Louis, Mo. He has served congregations for 30 years in the States of Illinois, Ohio, Texas, and Nebraska.

Twenty of his 30 years have been spent in the ministry establishing new congregations.

Pastor Raabe is married and has four children, one of whom graduated from American University last week. He has a distinguished record in his church and community and I am very pleased to introduce him to my colleagues today.

HOUR OF MEETING ON WEDNESDAY, MAY 11, 1983

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon tomorrow, Wednesday, May 11, 1983.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GREGG. Mr. Speaker, reserving the right to object, I wonder if the majority leader could explain to us the reason behind this request.

Mr. WRIGHT. Will the gentleman yield?

Mr. GREGG. I am happy to yield.

Mr. WRIGHT. I will be glad to explain to the gentleman.

The business for today will be to complete the Justice Assistance Act. We expect to conclude that today. Then, tomorrow, of course, we would return to the Mortgage Assistance Act.

We feel that it would be important that we begin at noon so that we could have a chance of concluding that tomorrow in order that we may conclude our entire schedule of business this week and not go over until the following week.

We are approaching that time of year when we are going to have a lot of legislation coming out of committees and onto the floor.

Mr. GREGG. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. WYLIE. Mr. Speaker, reserving the right to object, could the gentleman enlighten me as to why H.R. 1983 was removed from the calendar today?

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman.

Mr. WRIGHT. It was thought that we could continue with the Justice Assistance Act today and conclude it. The manager of the bill desiring to do that, the gentleman from New Jersey (Mr. HUGHES) is ready to conclude the Justice Assistance Act. We thought it important that we move to a conclusion of that act today and then come in at noon tomorrow so that we would have all day tomorrow, if necessary, on the other bill, the mortgage assistance bill, the one in which the gentleman is interested.

Mr. WYLIE. There was some mention about going to the Rules Committee, but that did not refer to H.R. 1983?

Mr. WRIGHT. I am not aware of any plan to go to the Rules Committee. It is my understanding that all of us on both sides of the aisle are willing to proceed with the orderly consideration of that bill, and that is why we felt it useful to come in at 12.

I am not aware of any plan to delay consideration. Rather, I think we want to move ahead and expedite consideration, and I think that is what is desired on the gentleman's side.

Mr. WYLIE. I thank the gentleman. That is my desire. And I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2307, AMENDING TRIBALLY CONTROLLED COMMUNITY COLLEGE ASSISTANCE ACT OF 1978

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-96) on the resolution (H. Res. 187) providing for consideration of the bill (H.R. 2307) to amend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2513, NATIONAL BUREAU OF STANDARDS AUTHORIZATION ACT FOR FISCAL YEAR 1984

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-97) on the resolution (H. Res. 188) providing for consideration of the bill (H.R. 2513) to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1984, and for other purposes, which was referred to the House Calendar and ordered to be printed.

PERMISSION FOR SUBCOMMITTEE ON MILITARY INSTALLATIONS AND FACILITIES OF THE COMMITTEE ON ARMED SERVICES TO SIT TODAY DURING 5-MINUTE RULE

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Military Installations and Facilities of the Committee on Armed Services be permitted to mark up the military construction and family housing authorization bill for fiscal year 1984 this afternoon as the House meets under the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

(Mr. GILMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GILMAN. Mr. Speaker, I was en route to the floor of the House yesterday, having been detained in New York City earlier, and missed the votes taken. Had I been present I would have voted:

Rollcall No. 90, H.R. 2357, Congressional Award Act, "aye."

Rollcall No. 91, H.R. 2173, Contract Services for Drug Dependent Federal Offenders, "aye."

Rollcall No. 92, H.R. 2174, Federal Antitampering Act, "aye."

Rollcall No. 93, S. 653, Establish Foundation for Advancement of Military Medicine, "aye."

Rollcall No. 94, House Resolution 184, the rule providing for consideration of H.R. 2175, Justice Assistance Act, "aye."

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1405

Mr. EDGAR. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of H.R. 1405.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

□ 1230

THE WORLD NEEDS A STRONG AMERICAN ECONOMY

(Mr. VALENTINE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VALENTINE. Mr. Speaker, since the end of World War II, the United States has been the world's greatest philanthropist. We have never forgotten the less fortunate nations, to whom we have given $170 billion in foreign aid.

However, the 98th Congress faces a pressing responsibility. Eleven million Americans are unemployed, more than at any time since the Great Depression.

Even so, we will spend no less than $10.8 billion for foreign aid in 1983—over twice as much as we spend for revenue sharing to our cities, towns, and counties. Foreign aid is one of the few programs the administration chooses to increase each year. But, we simply cannot afford to continue give-away programs of such magnitude at a time when so many Americans lack so much.

The world may want an American Santa Claus, but the world needs a strong American economy to stabilize the world economy. We should hold foreign aid down to reasonable proportions and help our own people first.

MEDICARE AND FOOD STAMP PROGRAMS HAVE INCREASED AMERICAN LONGEVITY

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, last night the President addressed a fundraising dinner in Ohio where he stated that the poverty programs of the sixties caused harm to America's poor instead of helping the poor.

Today I talked with a former county judge who served during the era of the fifties and sixties during which I asked about the plight of the rural elderly poor during that era. He responded that in yesteryear, when the elderly poor could no longer work, they simply crawled into a corner and died of malnutrition.

Mr. President, it was the medicare program and the food stamp program that improved health care and nutrition in America which increased the longevity of the American people for the following decade by a greater number of years than ever before in history.

Mr. President, to ignore the human progress achieved by our great Nation is to deny America well-deserved praise.

HONOR ROLL OF HOUSE PAGES

(Mr. MOAKLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOAKLEY. Mr. Speaker, all of us in the House are well aware from daily observation of the important services provided us by the pages who perform their duties with efficiency, dedication, and cheerfulness. In addition to their full work day, the pages spend long hours beyond our view at their rigorous studies. From 6 in the morning when school begins until late at night when homework is finally done our pages fulfill the obligations of a full college preparatory program.

In spite of the heavy demands placed on their time and energy, these exceptional young men and women not only bring distinction to themselves and the House through their work, but also by achieving high honors for their academic efforts. As chairman of the Democratic Personnel Committee I take special pride which I know is shared by my colleagues in congratulating the pages on their success. It is a pleasure to include the following list of page school honor students in the RECORD:

HONOR ROLL

FIRST HONORS

Seniors: Christine Beeby and Kelly Schaben.

SECOND HONORS

Seniors: Allison Abbate, Glenn Ault, Eugenie Bauman, Reuven Carlyle, Kelly Carter, Martha Connell, Charles Doucot, Keith Hood, Brendan Kemp, Daryl King, Albert Kroon, Robert Lavin, Jeanette Mack, and Marya Mogk.

Juniors: Dana DiCarlo, Gary Fredo, Kelly Kennedy, Karen Matyas, James Paffhausen, Diane Pascal, Leya Prussin, and Ira Robinson.

LET SMALL BUSINESS BE HEARD—CALL A WHITE HOUSE CONFERENCE

(Mr. BEDELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEDELL. Mr. Speaker, this week is dedicated as a tribute to America's small business community. We all know that small business supplies most of our employment and productivity-improving innovations. I also think we can all agree that small business is the lifeblood of not only our economy, but of our entire society. In every community throughout America, small business people blend together to weave the fabric that keeps our Nation warm and alive. Small business is truly America's past, present, and future.

The past few years have been particularly tough for small business. Business bankruptcies have been running at a rate that is reminiscent of the Great Depression. Governmental policies in the areas of procurement, antitrust enforcement, taxation, regulation, and export assistance have been adopted and applied against the best interests of the small business community. Capital for small companies remains scarce and expensive. In the past decade small business has seen its share of gross national product erode and, for the first time in history, dip below the share of GNP held by big business.

I challenge this administration to call another White House Conference on Small Business as a follow up to the very successful White House Conference held by President Carter in 1980. Let us give small business a chance to be heard.

LEGISLATION TO PERMIT ELDERLY RESIDENTS OF FEDERALLY SUBSIDIZED HOUSING TO OWN PETS

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, the week of May 8–14 has been designated National Pet Week, and I would like to take this opportunity to call my colleagues' attention to not only the 55 million pet owners in our Nation, but also to H.R. 1373, a bill I have introduced which would allow elderly and disabled residents of federally subsidized housing to own and keep pets.

As the ranking New York member of the House Select Committee on Aging, I have a special interest in seeing this legislation pass. Studies has shown that pets can be beneficial to the physical and mental health of their owners, and their mere presence can be therapeutic to the millions of elderly and disabled citizens in our country. In our research on the committee we have come across far too many examples of elderly persons being sent to institutions simply because of a lack of companionship. In some instances, this isolation and loneliness which can contribute to poor health can be alleviated by allowing pet ownership.

H.R. 1373 is clearly not a bill without responsibilities. Section 3 of the bill states that any animal which poses a threat to health or safety of the other occupants or other persons in the community may be removed by the landlord or owner. Perhaps a better description of my intent is that H.R. 1373 seeks to bring together the responsible pet owners and the reasonable landlord.

Recently, the distinguished Senator from Wisconsin, WILLIAM PROXMIRE, introduced an identical bill which has since been attached to the Housing and Community Development Act of 1983, S. 644. It is my hope that when S. 644 and H.R. 1 go to conference, elderly and disabled pet owners across the country may enjoy the right to own pets and to know the happiness that only a pet can bring.

THE SANDINISTA LEADERSHIP

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, as the debate over Nicaragua's role in Central America continues, there are characteristics of the Sandinista leadership

that I would like to share with my colleagues.

Commandante Humberto Ortega, the Minister of Defense, member of the ruling Directorate of Nine, and a powerful ally of Fidel Castro, on August 25, 1981, spoke to the Sandinista military and I quote:

> Marxism-Leninism is the scientific doctrine which guides our revolution, the instrument of analysis of our vanguard to understand the historical process and to create the revolution. . . . Without Sandinismo we cannot be Marxist-Leninists and Sandinismo without Marxism-Leninism cannot be revolutionary, and because of that they are indissolubly united and because of that our moral strength is Sandinismo, our political strength is Sandinismo and our doctrine is that of Marxism-Leninism.

This, from the commander of the army, the man with the guns.

A telling indication of the feelings of the new regime in Nicaragua is embodied in the Sandinista National Anthem, third verse:

> Los Yanquis, Los Enemigos de la Humanidad.
> The Yankees, the enemies of mankind.

My colleagues, the Sandinista national anthem is not referring to a baseball team, it refers to you. It does not differentiate between party, between liberal or conservative.

It calls the people of the United States of America the enemies of mankind.

This situation demands a genuine bipartisan approach on behalf of all Americans.

I invite my colleagues to attend the bipartisan meeting with Ambassador Jeane Kirkpatrick at 12 o'clock, this Thursday, May 12, in the Rayburn Building, room 2261.

THE DAYLIGHT SAVINGS TIME FOLLIES TAX

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SMITH of Nebraska, Mr. Speaker, we are engaged in the daylight saving time follies again. No sooner do we get into a 6-month's schedule of starting thc working day earlier so that there will be more daylight hours after work, than the Sun worshippers start advocating an extension of daylight saving time.

The next act in the follies is now on stage. Legislation is advancing in both the House and Senate to authorize at least an additional month of daylight saving time. This is an extension we do not need. Everyone should know that daylight saving time causes problems on the farm where we work with animals whose biological time clocks can not spring foward or fall back according to legislative mandate.

The animals can be fed or milked earlier, that is true, but the people who do the feeding and the milking and all of the tending that goes with these chores are adversely affected. To make a go of farming these days, many farmers have to hold a second job. Daylight saving time does not help them when they have to start earlier to do chores that cannot be done in the extra daylight they have when they get home.

In the farming area I represent, we would be content with less daylight saving time, not more. We would just as soon have daylight saving time run from Memorial Day to Labor Day. We try to live with the 6-month period we have now, but we would be happier with less.

There are arguments about energy savings and safety factors on both sides of the issue, so they are just about a wash. We have to think about the people and how they are affected. More daylight saving time may be great for the urban sprawl, but it does not exactly help all of those engaged in the Nation's No. 1 industry of providing food and fiber for the millions here and abroad.

I say ring down the curtain on the daylight saving time follies. If we can not shorten the period, let us leave it alone. No extensions please.

THE YEAR OF THE BAILOUT

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, have you noticed the great number of bailouts that are coming through this Congress? Chrysler Corp., which got one of the all-time big bailouts, is back again wanting us to sweeten up the bailout for them by another $200 million.

The big forests products corporations are here asking for $2 billion by releasing some timber contracts that they made with the Government.

The Defense Industrial Base Revitalization Act is a billion and a half for those hard-pressed, defense-related industries who cannot seem to make it on the great amount being spent on national defense.

The IMF bailout, the granddaddy of them all, is $8.5 billion for those big banks who made improvident loans all around the world.

The housing bailout for those people who cannot pay their house payments will be here on the floor tomorrow.

This is, I think, the year of the bailout, in spite of the fact that Federal lending and credit assistance programs are now growing faster than spending programs. Here we go, continuing on down that same road. These bailouts are a match for the improvident things we have done in the past, like the Alaska Natural Gas Pipeline Act.

My question is this and it is a pretty simple one: After we get through bailing out all of these people, the big banks, the big corporations, and foreign countries at the expense of the American taxpayer, who bails out the hard-pressed American taxpayer?

CONTINUED SUPPORT RECOMMENDED FOR TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

(Mr. McKERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKERNAN. Mr. Speaker, today the gentlewoman from Rhode Island will be introducing a resolution expressing continued support for title IX of the Education Amendments of 1972. I rise as a cosponsor of this legislation, to join with my colleagues in reaffirming our commitment to equality in education for women and girls. I commend the gentlewoman from Rhode Island for her abiding efforts in this matter, and I welcome the opportunity to support her legislation.

The key section of title IX reads as follows:

> No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal assistance.

The brief language of the law prohibits sex discrimination in education programs receiving Federal funds. Due in large part to this law, gains have been made in many areas of education, including vocational and higher education institution admissions, financial aid, campus health services, employment and athletics. Similarly, gains have been made at each level of education. Finally, and perhaps most important, equal access in education is tantamount to achieving equal opportunity in the job market. With women still earning only a fraction of the dollars received by their male counterparts, the need persists for our commitment to title IX to remain strong. Thanks to title IX many more women and girls are able to prepare for a broader range of jobs which offer both a professional challenge and a competitive salary.

The success of title IX is proven; it is our responsibility and intention to provide a reminder of Congress continued interest in, and support for, title IX: that it is the sense of the House of Representatives that the title IX statute be applied comprehensively, equally, and without crippling amendment or alteration, until gender discrimination throughout our education system is eliminated. I urge the support of my colleagues for this important resolution.

□ 1245

GOOD ECONOMIC NEWS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, a few moments ago on the floor we heard a discussion of small business that can be best described as coming from the gloom-and-doom school of political economics. There was a discussion of the problems in small business without discussing the fact that there had been an unprecedented entrepreneurial explosion in this country over the last 2 years, with more businesses being formed than during any similar period in our history.

That particular discussion was kind of unique, though, because we are not hearing very much discussion on the economy from the Democrats these days. Why? Because the economy is recovering. Reaganomics and supply-side economics is working, and there is no better example of the fact that it is working than in the employment area. While we still have unemployment statistics which are much too high, the fact is that we now have more people at work, as of the April statistics, more people working in this country than were working during the last year of the Carter administration. Almost 4 million more Americans are working today than were working during that last year of the Carter administration.

Not only that, but there is evidence that we are going to have even better news in the near future. The index used by the Labor Department to measure the percentage of firms that increased employment during the last month was up. It was up dramatically, by 72 percent. That is an index that, just a little while ago, stood at 39, and the 72 percent index right now is the highest point since 1977.

There is good news, good economic news, right before us, Mr. Speaker.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO SIT ON WEDNESDAY AND THURSDAY, MAY 11 AND 12, 1983, DURING 5-MINUTE RULE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be permitted to sit while the House is reading for amendment on Wednesday, May 11, 1983, and Thursday, May 12, 1983.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

JUSTICE ASSISTANCE ACT OF 1983

The SPEAKER pro tempore. Pursuant to House Resolution 184 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 2175.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, with Mr. ROMER in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the committee rose on Monday, May 10, 1983, title I was open for amendment at any point.

Are there any amendments to title I?

AMENDMENT OFFERED BY MR. HUGHES

Mr. HUGHES. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HUGHES: Page 8, line 24, insert "after" after "ending".

Page 31, line 18, strike out "Juvenile" and insert in lieu thereof "Justice".

Page 34, after line 23, insert the following new subsection:

(r) Section 827(c) of part H of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (18 U.S.C. 1761 note) is amended—

(1) by striking out "this section" and inserting in lieu thereof "section 1761 of title 18, United States Code, and of the first section of the Act of June 30, 1936 (49 Stat. 2036; 41 U.S.C. 35), commonly known as the Walsh-Healey Act,", and

(2) by inserting ", as amended from time to time," after "goods".

Page 35, line 1, strike out "(r)" and insert in lieu thereof "(s)".

Page 35, line 4, strike out "(s)" and insert in lieu thereof "(t)".

Page 35, line 8, strike out "(t)" and insert in lieu thereof "(u)".

Page 35, line 15, strike out "(u)" and insert in lieu thereof "(v)".

Page 35, line 19, strike out "(v)" and insert in lieu thereof "(w)".

Mr. HUGHES (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. HUGHES. Mr. Chairman, I will be very brief. This is, essentially, a technical and conforming amendment which has been cleared with the minority.

The first part deals with a printing error in the bill as reported from the full committee; the second is a spelling error in the bill as reported; and the third involves conforming amendments.

Mr. Chairman, I urge my colleagues to support the technical amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. HUGHES).

The amendment was agreed to.

Mr. FISH. Mr. Chairman, I move to strike the last word.

Mr. Chairman, as a cosponsor of H.R. 2175 and an advocate of Federal action to strengthen the capacity of State and local governments to reduce crime, I fully endorse the concepts embodied in H.R. 2175. And I praise Mr. SAWYER and Mr. HUGHES for bringing this bill to the floor.

Equally important as the reauthorization of worthwhile anticrime efforts is the organization structure within Justice which will administer these programs. In this respect H.R. 2175 is flawed as reported. The bill falls short of translating its basic concepts into the best possible management structure to focus Federal resources on major crime problems.

Although it is not reflected in the report filed by the committee, I stated during our deliberations that several of my colleagues and I have serious reservations concerning the fragmented organizational structure specified in the bill and the redtape and costly duplication of effort it would foster. In short, the organizational structure set out in H.R. 2175 is needlessly cumbersome and inefficient.

I believe the record should show that many of us who endorse the basic idea of targeted Federal assistance to State and local criminal justice agencies, and who will vote for passage of H.R. 2175, are convinced that further improvement in the bill can and should be made. There is wide and general agreement that the justice assistance program should be modest in scope, emphasizing programs of demonstrated effectiveness, stripped of unnecessary redtape, and managed at the Federal level with maximum efficiency. H.R. 2175 as written will not permit that.

Our fear is that after spending $8 billion on LEAA and witnessing its flaws, we are asked to repeat its mistakes. H.R. 2175's administration structure tracks too closely the design for billion-dollar programs.

It does not provide for a "lean and scaled-down operation" as the report claims. Instead, it would produce four separate, semiautonomous agencies, each headed by a Presidentially appointed director, two separate advisory boards and a total of six separate annual reports.

Instead of a consolidated management structure with a single Assistant Attorney General responsible to the Attorney General and answerable to the Congress, H.R. 2175 would produce four agencies, with four financial management and budget units,

four sets of guidelines and regulations, and four personnel operations.

Instead of linking together the products of research and statistical analysis with the funds going to State and local law enforcement, H.R. 2175 insures their isolation and provides no mechanism for coordination. The committee report acknowledges that "The Federal Government is in the best position to form the bridge between basic research in criminal justice and program implementation." Nevertheless, H.R. 2175 places a wall of separation, instead of a bridge, between research and program implementation.

It is interesting to note that the committee report emphasizes its "commitment to the current structure" of research, statistics, and financial assistance programs. In fact, however, H.R. 2175 significantly changes the present structure by eliminating the coordination and centralized staff support mechanism—which is the Office of Justice Assistance, Research, and Statistics (OJARS). Current law provides that OJARS "shall directly provide staff support to, and coordinate the activities of" NIJ and BJS. In its place, H.R. 2175 merely says that the new OJA "may" provide that function and, at the same time, it grants to each unit independent administrative authority. It is also interesting to observe that those identified by the report as having recommended independence for NIJ and BJS are, for the most part, among the major beneficiaries of grants and contracts from those organizations.

Instead of a consolidated advisory body to examine and make recommendations to the Department of Justice concerning the totality of State and local criminal justice, H.R. 2175 maintains two separate advisory boards for research and statistics, and provides for no advisory role at all in the financial assistance program.

I find it difficult to understand the committee's insistence on dictating the internal management structure for the Justice assistance program. The rationale seems to be a desire for independence on the part of these agencies yet the Congress has not specified how the Civil or Criminal Divisions of the Department of Justice should be organized. Certainly, the discretion exercised by the litigating divisions of the Department is as critical and sensitive as that entrusted to the assistance programs—perhaps more so.

The Department of Justice fears that the organizational structure of H.R. 2175 will increase the cost of the program by $2 to $3 million over the DOJ proposal.

Aside from the structural issue, I fully support H.R. 2175.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. FISH. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman has made an important statement. As the gentleman well knows, we changed the structure in 1979, as part of the Justice System Improvement Act. At that time we gave a certain amount of independence but flexibility to particularly the Bureau of Justice Statistics and the National Institute of Justice.

All of the witnesses who appeared before our subcommittee, including distinguished experts in criminal justice, ex-heads of NIJ and users of BJS service, all testified that the existing structure, which is the result of the 1979 reforms, is the best possible structure. Others who have written to the subcommittee advocating current structure include the American Bar Association, Council of Professional Associations on Federal Statistics, Judge Harold Tyler, former Deputy Attorney General, a distinguished member of the Department for a number of years. They all advocated maintaining the present structure.

The CHAIRMAN. The time of the gentleman from New York (Mr. FISH) has expired.

(By unanimous consent, Mr. FISH was allowed to proceed for 2 additional minutes.)

Mr. HUGHES. If the gentleman will yield further, the gentleman is correct; we will have, I think, an opportunity to do some streamlining. As the gentleman knows, the other body has similar legislation moving through that incorporates, basically, the approach taken by the Justice Department.

For instance, both the ranking minority member and myself have grave questions as to whether we need all these advisory committee members, and whether we could not in fact attempt to assimilate all of the duties into one advisory council.

There is some question as to whether or not we need all of the redtape that is involved, all of the annual reports that are required and which often end up collecting dust.

So I think that there are a number of areas where we can work in conference to try to achieve the goals that I know the gentleman from New York seeks and I can represent to him that I seek also.

Mr. FISH. Mr. Chairman, I am very encouraged to hear the chairman's remarks. I wanted to make a record here. I do not intend to offer an amendment to conform to the Senate version, but that will be before us, as the gentleman said, in conference. I do think that, particularly in the bodies the gentleman mentioned, the National Institute of Justice and the BJS, the research and statistical work can be far better coordinated with the program activities under this very worthwhile piece of legislation.

Mr. HUGHES. If the gentleman will yield further, I just want to say that I want to commend the gentleman, as the ranking Republican member of the full Judiciary Committee. The gentleman has been very actively supportive of not just this piece of legislation but every crime bill that we have moved out of the subcommittee, both in the last term of Congress and in this one, and I look forward to working with the gentleman to achieve the very best possible anticrime initiatives.

Mr. FISH. I thank the gentleman.

AMENDMENT OFFERED BY MR. GLICKMAN

Mr. GLICKMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GLICKMAN: On page 45, add the following after line 23:

"COOPERATION IN SECURING ACCESS TO HUMAN ORGANS FOR TRANSPLANT PURPOSES

"SEC. 121. It is the sense of the Congress that, in connection with assistance provided under this Act, law enforcement officials and personnel should be made aware of the critical shortage of human organs available for life-sustaining medical transplant operations and be fully advised of the means by which they can be of potential assistance toward alleviating that shortage when, in the course of their responsibilities, they are involved in activities resulting in fatalities."

Mr. GLICKMAN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. GLICKMAN. Mr. Chairman, I believe it is safe to say that this sense of the Congress language is noncontroversial. At the same time, I think it sends an important message to law enforcement officials which we can all embrace.

The Science and Technology Subcommittee on Oversight has held a number of well publicized hearings recently highlighting problems that currently exist in helping secure donated organs in instances where transplants are badly needed to save lives. One point that came up in those hearings and then has been confirmed from my own State of Kansas is that one link in the process that could stand strengthening is that initial one: making sure that the option of organ donation is considered at the painful time when a death occurs.

Law enforcement officials, unfortunately, often find themselves in situations where deaths have occurred, especially accidental deaths. Those situations are ones where organs are not in any way damaged by disease and are, therefore, potentially useful for transplant purposes. Hence, my amendment would indicate that the

Congress feels that law enforcement officials should be aware of the shortage of human organs for life sustaining transplants and should be informed of means by which they can be of possible assistance when they are involved in cases resulting in fatalities.

I would hope that this expression would encourage local law enforcement officials to promote awareness of the shortage of human organs for transplants and ways they can help alleviate it. It can readily build on the policies of many States including organ donor notifications on their driver's licenses.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I want to commend the gentleman. I talked with the ranking minority member of the Subcommittee on Crime about this amendment. What it would do, if I understand it correctly, is to create a sense of the Congress that law enforcement officials should be sensitized to the need to quickly identify potential donors of vital organs. We see no problem with the amendment.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Michigan.

Mr. SAWYER. Mr. Chairman, we accept the amendment.

Mr. GLICKMAN. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Kansas (Mr. GLICKMAN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. WALKER: Page 8, line 21, strike out "and".

Page 8, line 23, strike out the period and insert in lieu thereof "; and".

Page 8, after line 23, insert the following new paragraph:

"(16) providing programs which address the increase in the incidence of offenses committed against the elderly, and which address the stress and fear among the elderly caused by such offenses.".

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, I think that the amendment that I am offering is fairly self-explanatory. What it does is, it puts an additional section into the functions that can be considered under these programs and adds a function to help fight the crimes that are being committed against the elderly in this country. Crime against the elderly is increasing at frightening rates at the present time. It is increasing in most categories of crime, but particularly in violent crime.

Let me cite a few examples. But first, so that there can be no distortion resulting from population increases, we must remember that the number of elderly has increased by 17.9 percent since 1973, while the general population has increased by 7.3 percent.

Since 1979—and that is the figure I am going to be using most in my statistics—the number of elderly has increased by 2.2 percent, while the general population has increased by 2.3 percent.

Since 1979, violent crime against the elderly has increased by 18.7 percent, while only increasing by 11 percent for the general population. In other words, in that period of time since 1979, that most recent period of time, there was a very, very substantial increase of crimes directed against the elderly in our society.

Since 1979, the increase of aggravated assaults against the elderly has escalated dramatically, by 23 percent, while the increase for the general population was approximately one-quarter of that, 6.6 percent.

In the category of forcible rape, among the elderly there has been an increase of 189 percent since 1979.

There are a lot of other figures, but they all say the same thing. In the most recent time period, crime against the elderly has become a very, very considerable problem, and they have reasons to be fearful.

There is one other thing that I think we also ought to address as we talk about crime against the elderly, and that is the fact that many of them have become virtual shut-ins because of their fear of crime. They have found themselves locked in their homes, fearful of what is going on about them in the streets.

□ 1300

I think it is entirely appropriate, as we pass a bill of this type, a bill which addresses State and community needs in crime, that we should focus on one particular element of that; namely, the crimes being committed against some of the most vulnerable of our citizens, the elderly.

Mr. Chairman, I would also point out that the kinds of things that I am talking about here are demonstrated in some polling data that was released recently. The Gallup poll has indicated that three-quarters of the elderly limit their activities or their lifestyle in some way to avoid crime. A recent Pennsylvania State University study indicated that 88 percent of the elderly had modified their lives in some way to avoid being victimized by crime, and two-thirds claimed that the fear of crime seriously inhibited their use of senior citizen parks and centers around the country.

I was particularly reminded of this by a New York Times article during Crime Victims Week which was held in April, describing the experiences of a number of couples who were participating in a White House ceremony. One couple, Lilly and Harold Tuthill, a couple from St. Louis, talked about the fact that they had been beaten by three robbers last year. The New York Times article indicated that they fractured Mrs. Tuthill's skull, cut her face with an iron bar, and he was held at gunpoint and was forced to watch this assault.

They were asked what they thought about the concept of capital punishment. Mrs. Tuthill said, "I am all for it." "I am not," said her husband. "I do not believe in taking a life."

"You did not go through what I did," Mrs. Tuthill told him.

There are millions of stories like that around the country of elderly citizens who have been victimized by crime.

We should, in this particular bill at this time, say that this is one of those areas that we want addressed, and we want it addressed in a meaningful kind of way.

So I would ask, Mr. Chairman, the adoption of my amendment.

Mr. HUGHES. Mr. Chairman, the gentleman from Pennsylvania deals with a segment of the population that obviously is preyed upon probably as much as any other segment of the community by those who are bent on crime. During the time that I have been chairman of the Subcommittee on Crime, we have had a series of hearings on crime in general, and we have learned that the fear of crime on the part of the elderly, in fact, runs way ahead of the actual rate of crime in neighborhoods.

Originally I did not have that perception, but apparently all the data we have seen bears out that premise. What the gentleman is doing is, in effect, offering a whole new section, section (16), which would structure the bill in a general way while we have attempted in the committee to be very specific. What we have done is taken those success stories in LEAA such as career criminal, neighborhood programs, and put them in a block grant program that can be replicated in other areas. What we are attempting to do is set up specific categories of successful programs that would borrow from the successful old LEAA program.

What the gentleman attempts to do, on the contrary, is put a section in the bill that deals just with the elderly which is contrary to the basic structure of the bill. In effect, what he would do, I would think, may be to limit the bill. I fear his amendment

might weaken other sections of the bill which would permit programs for the elderly.

For instance, in section 401(a)(1) of the bill, a local jursdiction, a law enforcement agency, could very well indeed apply for a matching grant for a program directed at attacks upon the elderly in a neighborhood. That is already provided for under that section of the bill.

Under 401(a)(6) of the legislation, we could very easily have a fundable program for the elderly because it deals with developing and implementing programs which provide assistance to jurors and witnesses and assistance to victims of crime. This is an area where a local jurisdiction could very easily develop a program that would address itself to crimes against the elderly or for that matter for the handicapped, or any other group that happens to be a specific problem in the community.

Mr. Chairman, I might say to my colleague that a program that would address crimes against the elderly, could also very easily be funded under 401(a)(13) and 401(a)(14), which are both, again, demonstration programs.

I would also say to my colleague from Pennsylvania that a program dealing with crime against the elderly, could be funded if a local law enforcement agency, applied under the discretionary grant program, 501(4).

I think the gentleman has really offered an amendment that might be perceived as somewhat restrictive. What we have attempted to do is, to address the problems of the elderly and other potential victims in a series of specific program categories that have otherwise been viewed as credible programs. These specific programs have been tested and proven to be very successful in all parts of the country and for all the potential victims.

So I frankly think that the gentleman's amendment is already incorporated basically within about six sections of the bill, and for that reason, I just feel that the gentleman's amendment is unnecessary.

Mr. SAWYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I concur with the observations of the gentleman from New Jersey. The gentleman from Pennsylvania is approaching the categories in the opposite way that the bill does. We have approached it with crime programs aimed at specific types of crimes and specific methods of combating crime, as opposed to the group for whom it is supposed to benefit in that all of the categories are supposed to be for the benefit of everybody.

I think the facts show that the elderly are not a particular target of crime. As a matter of fact, the incidence of crimes against the elderly is considerably lower than crimes against young people, and definitely lower than crimes against minorities, who are the prime targets of crime numerically because of the neighborhood situations, and whatnot.

So I think if we were going to go that route, we would have to specify a program for crimes against the elderly, crimes against the handicapped, crimes against the young, crimes against minorities, and so forth. We have done it the other way and specified types of anticriminal programs that will equally benefit all of these groups, plus a discretionary innovative area that could be tailored on special programs for any of those groups, including the elderly.

While I agree that subjectively, as the gentleman stated, the fear of crime among the elderly is extraordinarily high, we are very aware of that, we knew that in our hearings, and all of the experts bolstered that. However, the fear does not necessarily reflect the fact of the incidence of crime, and perhaps it is the fear that lets the incidence be as low as it is. But I just think it destroys the symmetry of the bill and that actually the purposes which are laudable enough fit well within the categories we have used, including a wide-open one on innovative programs.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. SAWYER. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, it just occurred to me there is another point to be made, because the gentleman is absolutely right. What we have done is, we have attempted to use tools that have been developed and proven to be successful. Most of the other categories, other than the ones I have mentioned, also could be used for crimes against the elderly.

For instance, career criminal and sting operations could very well be set up in areas where there is a high incidence of crime against the elderly. So the gentleman is absolutely correct. Many of the tools that we have provided in different sections of this bill under the 15 or so categories are already adaptable for crimes against the elderly and other groups within a community, depending upon what local law enforcement feels is essential to address the crime problem in that area.

Mr. SAWYER. It is just a question of approaching it from different categories. We, in effect, said here is a hammer we provide, here is a saw we provide, here are nails we provide, and so on, and the gentleman wants one where we can build a house. It is just approaching it from the opposite direction.

But I think all of these categories fit crimes against the elderly very definitely, as well as against minorities, handicapped, and youth, and everyone else.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WALKER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1315

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence.

Pursuant to the provisions of clause 2, rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

The CHAIRMAN. Three hundred ninety-four Members have answered to their names, a quorum is present, and the Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania (Mr. WALKER) for a recorded vote.

A recorded vote was ordered.

The CHAIRMAN. The Chair will advise the Members that this will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 401, noes 5, not voting 26, as follows:

Mr. VANDERGRIFF changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

Mr. SIMON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, we have just voted on an amendment that deals with the elderly.

I happen to have in my district a gentleman who is 85 years old, who retired as a rural mail carrier, and since that time has built up the fourth largest travel agency in the United States out in a rural area of southern Illinois.

But he has come up with an idea on crime and getting people to phone in information and to receive secret awards without having their names involved that has resulted in a dramatic reduction in crime in this rural area. It is the kind of approach that can be funded under this bill. It is the kind of thing that I think my colleagues from around the country ought to be taking a look at.

I am going to insert in the RECORD more details about this program started by a man named Wayman Presley. I think 85-year-old Wayman Presley has an idea on crime that we ought to be taking a look at around the country.

Mr. Chairman, I rise for the purpose of discussing one particular local government program which could be funded through the block grant or discretionary Federal funding aspect of the Justice Assistance Act, which has proven effective.

That program is a community crime watch program. Wayman Presley of Makanda, Ill., initiated a community crime watch program in the rural area in which I happen to live. Within 6 weeks after the program began, five criminals were caught. In the nearly 2 years of the program's existence, the community has had only one crime committed, the robbery of an aluminum ladder which was later returned.

In Makanda, anyone having knowledge about a crime can call a designated phone number. The callers are told they may disguise their voices if they wish. The caller is given a secret code number and a telephone number to call back for update information on the reported crime. When the criminal is apprehended and convicted or when stolen property is recovered, a reward is paid to the person with the corresponding secret code number. In Makanda, the reward money is left in a secret, designated place for the informant.

Similar programs exist in a few communities across the Nation. These local programs can be adapted to the needs of the community. The reward might be paid when the criminal is apprehended and indicted rather than upon conviction. The reward payment might be paid through the local postmaster who would give a person who shows the code number and a designated fictitious name an envelope containing the reward which is marked to the attention of that name and number. Any number of variations are possible.

The important aspect to remember is that people do care about their communities and are willing and anxious to see an end to crime in their neighborhoods. Many people, however, fear reprisal or prefer to remain anonymous or do not want to become publically involved in trials. Providing individuals a way of tipping police anonymously, allows concerned citizens to participate in an effective, safe way in curbing crime in their communities.

We can all learn and benefit from programs like Wayman Presley's in Makanda, Ill. I urge my colleagues to inform the communities they represent of the success community crime watch programs have in curbing crime. This bill could fund such programs across the Nation. I urge my colleagues to use the example of Makanda and Wayman Presley.

AMENDMENT OFFERED BY MR. KINDNESS

Mr. KINDNESS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KINDNESS: Page 45, after line 23, insert the following:

(b) Section 1761 of title 18, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding any law to the contrary, materials produced by convict labor may be used in the construction of any highways or portion of highways located on Federal-aid systems, as described in section 103 of title 23, United States Code.".

Mr. KINDNESS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

□ 1350

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from New Jersey (Mr. HUGHES), the chairman of the subcommittee.

Mr. HUGHES. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman's amendment is a fine amendment and we are prepared on this side of the aisle to accept it.

Mr. SAWYER. Mr. Chairman, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Michigan.

Mr. SAWYER. I thank the gentleman for yielding.

Mr. Chairman, I concur with the chairman and congratulate the gentleman. I think it is a very good and worthwhile amendment. And this side of the aisle will accept the amendment.

Mr. KINDNESS. Mr. Chairman, I thank both of the gentlemen who have previously spoken.

The amendment is to clarify a point that is extremely important I think to the survival of prison industries in 37 States. Many of us represent States that have these industries operating successfully and it is very necessary that we do not interfere with the functioning of those State prison industry systems which may indeed be part of an important future in penal reform throughout our country.

I would ask support of the amendment and yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. KINDNESS).

The amendment was agreed to.

Mr. BIAGGI. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I do not expect to take the 5 minutes. I am rising for the purpose of engaging in a colloquy with the chairman, the gentleman from New Jersey (Mr. HUGHES).

I would like to ask the chairman. Under title II of the bill where funds would be provided to localities for emergency financial assistance experiencing critical law enforcement problems, I wish to inquire of the chairman whether funds under this section could go to a unit of local government such as the city of New York for costs associated with providing protection to Federal buildings and property within its boundaries. I have been advised by city officials that security costs have increased in the past year due to increased acts of criminal violence such as the New Year's Eve bombing of a Federal building where three police officers were maimed. Would these security costs be included as an eligible area for consideration under this section of the legislation?

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. BIAGGI. I yield to the gentleman from New Jersey.

Mr. HUGHES. I thank the gentleman for yielding.

First, I want to say to the gentleman that I think that the Federal Government should be responsible for the costs of providing security to Federal courthouses and other Federal buildings. But title II of the bill was crafted to respond to crime emergencies, a crisis that is beyond the ability of a community to handle. Such as the Atlanta child murders, where, as the gentleman knows, the request by Atlanta for Federal assistance bounced around for 2 months because we had no formalized way of responding and no money. In fact, the President had to tap a HUD fund to provide the moneys for Atlanta.

It is that type of a crime emergency, an epidemic, that title II is crafted to handle.

Mr. BIAGGI. If the gentleman will respond to another question.

If we had a situation where we had a series of bombings, repeated bombings, of Federal buildings, of Federal property, would the city of New York then become eligible?

Mr. HUGHES. In my judgment where we had a series of bombings and such incidents were beyond the capability of the city of New York to handle and help was requested, title II funding would be available for that purpose. In that instance you would have an epidemic or crime problem beyond the admitted capability of a law enforcement agency to handle.

Mr. BIAGGI. I thank the gentleman.

Mr. ALBOSTA. Mr. Chairman, I move to strike the last word.

Mr. Chairman, crime continues to be a serious problem in our country. In my own State of Michigan last year, 1 out of every 15 residents was the victim of a major crime. The economic recession has so strained budgets that many localities are desperate just to find funds to maintain basic crime protection service. They are not financially capable of initiating programs which would make their jobs easier, such as crime prevention and improvement of present programs. Clearly there is a crying need to aid State and local governments in their fight against crime.

One of the major problems in combating crime is that of career criminals: Recent studies have shown that just 3 months after release from a long term conviction, 45 percent of those released have again been arrested. The programs eligible for block grant assistance under H.R. 2175 will help reduce career criminals' incentive to return to crime. Programs to provide treatment for drug-dependent offenders so that they can kick their habit and not turn to crime to support their addiction, to counsel juvenile offenders so that they do not establish a lifelong pattern of crime, and to develop prison industry programs so that prisoners can learn skills to gain employment when released rather than return to crime, will reduce the number of habitual criminals. Also included in H.R. 2175 is a program to identify career criminals. H.R. 2175 will be money well spent, because it is an investment in the future to reduce the large percentage of crime committed by career criminals.

I want to add that I have introduced H.R. 1869, the Crime Control and Victims Compensation Act, to deal with the serious problem of career criminals. H.R. 2175 is a necessary start in rehabilitating prisoners early on, but we also need strong action to deter those who continue to commit crimes. My bill would make the thrice-conviction of certain crimes a Federal offense, and would impose a mandatory sentence of 20 years in prison with no parole. Such strict and certain sentencing will deter criminals. Additionally, H.R. 1869 requires that these career criminals work, with their pay going for their keep, for compensation to their victims, and for family support. H.R. 1869 is needed to follow up the initiatives included in H.R. 2175.

In conclusion, I strongly support H.R. 2175 for the desperately needed assistance it will provide to States and localities in fighting crime, and for the important first step it takes in dealing with the serious problem of career criminals. I urge my colleagues to favorably consider H.R. 2175.

Mr. PEPPER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I want to commend in the warmest way the distinguished chairman of this subcommittee, the gentleman from New Jersey (Mr. HUGHES) and his committee for bringing out this bill with respect to crime.

But there is one other element that I wish to commend to the consideration of this committee. We mentioned the matter to the distinguished chairman and ranking minority member of the Rules Committee the other day and they are very sympathetic.

The idea is to try to find some way to diminish if not to stop school dropouts.

□ 1400

I had the privilege of being chairman of the Crime Committee of this House, a select committee, for 4 years, and we conducted many hearings and made many inquiries about the subject of crime. Fifty percent of the arrests for crime are of people under 18 years of age. Therefore, they are generally in the juvenile category. Yet 9 out of 10 of the juveniles who are arrested for serious crime are school dropouts. So you can see how relevant the school dropout is to the juveniles who commit serious crime.

I do not know what all of the answers are and how is the best way to deal with the school dropout; but I do know I had some testimony one time before Judge Orlando, who was the juvenile judge of Broward County, the county from which some of our Members come. Judge Orlando said that he took 10 juveniles, 10 boys, who had a bad record, and he put them into a program giving them training in maritime matters. The training period was for a year. At the end of 11 months, not a single one of those boys had dropped out. One of them had gotten a job in Orlando, Fla., at about $5,000 a year and the other nine expected to finish the course in another month after he talked to us. He said, "I am sure that, had they not been engaged in a program like that, many of those boys, if not all of them, would have been engaged in the commission of serious crime."

So I know we need all of these things, we need more police, we need the best of equipment, we need civilian cooperation, and all that; but I believe that we could reduce crime 25 percent if we could find some way seriously to diminish the number of young people who drop out of school.

I know the distinguished chairman is sympathetic, and I just hope the gentleman's distinguished committee can find some way be which we can try out, at least in some demonstration project if we cannot cover the whole country in such a program, such a suggestion as that.

Mr. HUGHES. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from New Jersey.

Mr. HUGHES. Mr. Chairman, I think the gentleman is absolutely correct. I do not think there is any question but that all of the data shows that a significant amount of crime, well over 50 percent in many categories, is committed by people between 14 and 22 years of age, particularly in that category from about 14 to about 18.

From my own experience in law enforcement, I found that there was an inordinate amount of crime that was borne out of just basic idleness on the part of young people. If you look at the structure of unemployment today, particularly among minority youth, in many inner city areas the unemployment rate is up around 50 percent. Idleness breeds crime. Much of that idleness is directly connected to the school dropout problem.

I know my colleague, the gentleman from Michigan (Mr. SAWYER), a former distinguished prosecutor, is working, himself, on a project that would address that particular problem. And we share the concern of the gentleman from Florida. Even though we do not have direct jurisdiction over education and training programs, I am satisfied that what the gentleman is promoting is an essential ingredient of any crime prevention program for this country.

The CHAIRMAN. The time of the gentleman from Florida (Mr. PEPPER) has expired.

(On request of Mr. HUGHES and by unanimous consent, Mr. PEPPER was allowed to proceed for 1 additional minute.)

Mr. HUGHES. If the gentleman will yield further, the gentleman from Florida may have seen an editorial in the Post, which reflected upon a study just done of a 1981 program that was a work-study program for school dropouts, and the gentleman may remember that in that particular program one of the requirements was that the youngster go back to school as a condition precedent to getting a job. We had a dramatic increase not only in

the number of dropouts who went back to school but a significant percentage who actually found full-time employment.

So, I think the gentleman is on the right track. It may very well be that we can have a joint hearing on that subject with the Education and Labor Subcommittee. I did not mean to suggest that I could speak for the gentleman from Michigan, because he himself is very much involved in this, and he can certainly speak for his own program.

Mr. SAWYER. If the gentleman will yield, in that regard, the gentleman does speak for me on it. I agree with the gentleman.

Mr. PEPPER. Mr. Chairman, I thank both gentlemen very much.

● Mr. FEIGHAN. Mr. Chairman, I am pleased to rise in support of H.R. 2175, the Justice Assistance Act of which I am a cosponsor. I commend the distinguished chairman of the Subcommittee on Crime, Mr. HUGHES—a subcommittee on which I am proud to serve—and commend him for his direction, and for his longstanding and diligent efforts in the area of law enforcement.

As a State legislator, and now, as a congressional representative of an urban district, I have long been concerned about the problem of crime—especially in our cities. As a member of the Subcommittee on Crime I have, in the past few months, gained an even broader and deeper perspective on the magnitude of the crime problem we are facing in this country today and, I have gained a greater appreciation for the role that all levels of government play in law enforcement efforts.

Crime is not something that affects only one area of the country or one group of people. Virtually everyone is a potential victim. Nobody, no matter who they are or where they live is completely safe from crime. Women, the elderly, and young children are especially vulnerable.

Anyone who has ever listened to crime victims speak of their experiences is made instantly and painfully aware of how violently crime impacts upon not only their lives, but the lives of their families and friends as well. All across the country, people have been afraid—but they are starting to fight back.

In Greater Cleveland, more than 25 neighborhood groups have formed for the purpose of self-help against crime.

Last month, some of these groups came together to discuss the crime problem. One of the findings that came out of this hearing was that the resources currently available to local agencies and to local police departments are woefully inadequate to deal effectively with the problem. In Greater Cleveland, as in other urban areas, citizens and public officials are working hand-in-hand to deal with this problem that everyone knows will not go away by itself—but they need help.

It is a fact that virtually all violent crime that affects the public is under the jurisdiction of State and local law enforcement authorities. However, Reaganomics have forced many local governments to cut many of their programs. H.R. 2175, the Justice Assistance Act, provides a crucial shot in the arm to these State and local authorities for crime control efforts.

H.R. 2175 provides a much more focused approach to funding local law enforcement than we have seen in the past. Of the $170 million in law enforcement grants that will be provided under the bill, each State will be assured at least $250,000, with the remainder of the funds to be distributed to States on the basis of the crime rate and on population. Funding will be targeted to specific programs that have proven effective in the past. The bill also requires a 50-percent State contribution to prevent the funding of ineffective, wasteful projects.

The Justice Assistance Act will also help to reestablish a partnership between Federal, State, and local government in the area of law enforcement, without placing unduly restrictive Federal limits on State and local officials, allowing them to focus on anticrime activities and programs that will best serve the needs of their specific localities and citizens.

The Federal Government has a responsibility to assist State and local authorities as they seek effective responses to the war on crime. We, in Congress, have the responsibility to provide them with adequate resources to do this.

While the Justice Assistance Act is not a panacea for the problem of crime in this country, I am convinced that it will help to foster constructive cooperation and serve as a link between Federal, State, and local law enforcement efforts.

Our constituents are calling for our help to end crime. I believe that today, we have the opportunity to show them that we are committed to combating crime by supporting the legislation we have before us today—the Justice Assistance Act.

As a member of the Subcommittee on Crime, I look forward to participating in continued efforts in the area of law enforcement under the leadership of our distinguished chairman, BILL HUGHES, and I urge my colleagues to support H.R. 2175 in the bipartisan manner it deserves.●

The CHAIRMAN. Are there further amendments to title I?

If not, the Clerk will designate title II.

The text of title II of H.R. 2175 reads as follows:

TITLE II—EMERGENCY FEDERAL LAW ENFORCEMENT ASSISTANCE

APPLICATION

SEC. 201. (a) In the event that a crime problem of serious and epidemic proportions exists throughout a State or a part of a State, a State (on behalf of itself or another appropriate unit of government) may submit an application under this section for Federal law enforcement assistance.

(b) An application for assistance under this section shall be submitted in writing by the chief executive officer of a State to the Attorney General, in a form prescribed by rules issued by the Attorney General. The Attorney General shall, after consultation with the Director of the Office of Justice Assistance and appropriate members of the Federal law enforcement community, approve or disapprove such application not later than ten days after receiving such application.

(c) Federal law enforcement assistance may be provided if such assistance is necessary to provide an adequate response to a crime problem described in subsection (a). In determining whether to approve or disapprove an application for assistance under this section, the Attorney General shall consider—

(1) The nature and extent of the crime problem throughout a State or in any part of a State,

(2) the emergency or extraordinary circumstances which produced the problem,

(3) the availability of State and local criminal justice resources to resolve the problem,

(4) the cost associated with the increased Federal presence,

(5) the need to avoid unnecessary Federal involvement and intervention in matters primarily of State and local concern, and

(6) any assistance which the State or other appropriate unit of government has received, or could receive, under any provision of title I of the Omnibus Crime Control and Safe Streets Act of 1968.

DEFINITIONS

SEC. 202. For purposes of this title—

(1) the term "Federal law enforcement assistance" means funds, equipment, training, intelligence information, and personnel,

(2) the term "Federal law enforcement community" means the heads of the following departments or agencies:

(A) the Federal Bureau of Investigation,

(B) the Drug Enforcement Administration,

(C) the Criminal Division of the Department of Justice,

(D) the Internal Revenue Service,

(E) the Customs Service,

(F) the Immigration and Naturalization Service,

(G) the United States Marshals Service,

(H) the National Park Service,

(I) the United States Postal Service,

(J) the Secret Service,

(K) the Coast Guard,

(L) the Bureau of Alcohol, Tobacco, and Firearms, and

(M) other Federal agencies with specific statutory authority to investigate violations of Federal criminal laws, and

(3) the term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific Islands, or the Commonwealth of the Northern Mariana Islands.

LIMITATION ON AUTHORITY

SEC. 203. (a) Nothing in this title authorizes the use of Federal law enforcement personnel to investigate violations of criminal law other than violations with respect to which investigation is authorized by other provisions of law.

(b) Nothing in this title shall be construed to authorize the Attorney General or the Federal law enforcement community to exercise any direction, supervision, or control over any police force or other criminal justice agency or an applicant for Federal law enforcement assistance.

(c) Nothing in this title shall be construed to authorize the Attorney General or the Federal law enforcement community—

(1) to condition the availability or amount of Federal law enforcement assistance upon the adoption by an applicant for such assistance of, or

(2) to deny or discontinue such assistance upon the failure of such applicant to adopt, a percentage ratio, quota system, or other program to achieve racial balance in any criminal justice agency of such applicant.

(d) No funds provided under this title may be used to supplant State or local funds that would otherwise be made available for such purposes.

(e) Nothing in this title shall be construed to limit any authority to provide emergency assistance otherwise provided by law.

PROHIBITION OF DISCRIMINATION

SEC. 204. (a) No person in any State shall, on the ground of race, color, religion, national origin, or sex, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with any activity for which Federal law enforcement assistance is provided under this title.

(b) Paragraph (3) and paragraph (4) of section 712(c) of part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (as so redesignated by section 110 of this Act) shall apply with respect to a violation of subsection (a), except that the terms "this section" and "paragraph (1)", as such terms appear in such paragraphs, shall be deemed to be references to subsection (a) of this section, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such paragraphs shall be deemed to be a reference to the Attorney General.

CONFIDENTIALITY OF INFORMATION

SEC. 205. Section 715 of part G of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (as so redesignated by section 110 of this Act) shall apply with respect to—

(1) information furnished under this title,

(2) criminal history information collected, stored, or disseminated with the support of Federal law enforcement assistance provided under this title, and

(3) criminal intelligence systems operating with the support of Federal law enforcement assistance provided under this title,

except that the terms "this title" and "this section", as such terms appear in such section 715, shall be deemed to be references to this title and this section, respectively, of this Act, and a reference to the Office of Juvenile Justice and Delinquency Prevention, the National Institute of Justice, the Bureau of Justice Statistics, and the Office of Justice Assistance in such section 715 shall be deemed to be a reference to the Attorney General.

PROHIBITION OF LAND ACQUISITION

SEC. 206. No funds provided under this title shall be used for land acquisition.

REPAYMENT

SEC. 207. (a) If Federal law enforcement assistance provided under this title is used by the recipient of such assistance in violation of section 204 or for any purpose other than the purpose for which it is provided, then such recipient shall promptly repay to the Attorney General an amount equal to the value of such assistance.

(b) The Attorney General may bring a civil action in an appropriate United States district court to recover any amount required to be repaid under subsection (a).

RECORDKEEPING REQUIREMENT

SEC. 208. (a) Each recipient of Federal law enforcement assistance provided under this title shall keep such records as the Attorney General may prescribe to facilitate an effective audit.

(b) The Attorney General and the Comptroller General of the United States shall have access, for the purpose of audit and examination, to any books, documents, and records of recipients of Federal law enforcement assistance provided under this title which, in the opinion of the Attorney General or the Comptroller General, are related to the receipt or use of such assistance.

REPORT TO CONGRESS

SEC. 209. Not later than April 1 of each year, the Attorney General shall submit to the President, to the Speaker of the House of Representatives, and to the President of the Senate a report describing Federal law enforcement assistance provided under this title during the calendar year preceding the date such report is made.

OFFICE OF JUSTICE ASSISTANCE

SEC. 210. The Director of the Office of Justice Assistance may assist the Attorney General in providing Federal law enforcement assistance under this title and in coordinating the activities authorized under this title.

LIMITATION ON CIVIL JUSTICE MATTERS

SEC. 211. Federal law enforcement assistance provided under this title may not be used with respect to civil justice matters except to the extent that such civil justice matters bear directly and substantially upon criminal justice matters or are inextricably intertwined with criminal justice matters.

ISSUANCE OF RULES

SEC. 212. The Attorney General, after consultation with appropriate members of the law enforcement community and with State and local officials, shall issue rules to carry out this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 213. (a) There is authorized to be appropriated $20,000,000 for each fiscal year ending after September 30, 1983, to provide under this title Federal law enforcement assistance in the form of funds.

(b) There are authorized to be appropriated for each fiscal year ending after September 30, 1983, such sums as may be necessary to provide under this title Federal law enforcement assistance other than funds.

The CHAIRMAN. Are there any amendments to title II?

If not, the question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore. (Mr. WRIGHT) having assumed the chair, Mr. ROEMER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, pursuant to House Resolution 184, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole?

If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HUGHES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 399, nays 16, not voting 17, as follows:

□ 1420

Mr. CHENEY and Mr. GRAMM changed their votes from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENGROSSMENT OF H.R. 2175, JUSTICE ASSISTANCE ACT OF 1983

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that in the engrossment of the bill (H.R. 2175) to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes, the Clerk shall have the authority to correct references, punctuation, and spellings in the legislation.

The SPEAKER pro tempore (Mr. BROWN of California). Is there objection to the request of the gentleman from New Jersey?

There was no objection.

GENERAL LEAVE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and include extraneous matter, on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 2066, NATIONAL SCIENCE FOUNDATION AUTHORIZATION ACT FOR FISCAL YEAR 1984

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 183 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 183

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2066) to authorize appropriations to the National Science Foundation for fiscal years 1984 and 1985, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Science and Technology, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Science and Technology now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole House to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to fiscal passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the customary 30 minutes, for purposes of debate only, to the gentleman from Tennessee (Mr. QUILLEN), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 183 provides for consideration of H.R. 2066, the National Science Foundation authorizations for fiscal years 1984 and 1985. House Resolution 183 is an open rule providing 1 hour of general debate. It also makes in order a Committee on Science and Technology amendment in the nature of a substitute which shall be considered as an original bill for the purposes of amendment. Finally, House Resolution 183 provides for one motion to recommit with or without instructions.

Mr. Speaker, H.R. 2066 authorizes appropriations of nearly $1.35 billion for the National Science Foundation in fiscal year 1984. This is a prudent investment in the future of this country. We are all increasingly aware that we are part of an intensely competitive, quickly changing, global economy. In this situation a failure to keep up with technological and managerial advances can quickly doom a country to second-class status and a lowered standard of living.

Of course, the Government cannot bear the full responsibility for maintaining our technological edge. Our Nation's industries must continue to devote considerable resources to their own research and development programs, but there is no substitute for Government support for basic research which benefits all of our industries and all of our citizens. The National Science Foundation, which

serves as a major conduit for Government funds for basic research in the natural, behavioral, social, economic, and information sciences, deserves our continued support.

Mr. Speaker, House Resolution 183 provides for full and open consideration of this legislation that is so important for the future of the Nation. I urge adoption of this rule.

□ 1430

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, I know of no controversy over the National Science Foundation authorization. I think debate of the measure on the floor will reveal that the Foundation has made some freakish grants. I hope these grants can be cut out, saving taxpayers' dollars.

I have no objection to the rule, Mr. Speaker. The rule itself has been ably explained. I am anxious to get the House to debate the measure.

Mr. Speaker, I have no requests for time, and I reserve the balance of my time.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 408, nays 1, not voting 23, as follows:

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 2587, DEPARTMENT OF ENERGY CIVILIAN RESEARCH AND DEVELOPMENT AUTHORIZATION ACT FOR FISCAL YEAR 1984

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 185 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 185

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2587) to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the Chairman and ranking minority member of the Committee on Science and Technology, the bill shall be considered for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

□ 1450

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN).

Pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 185 is a straightforward open rule providing for the consideration of the bill, H.R. 2587, to authorize appropriations to the Department of Energy for civilian research and development programs for the fiscal year 1984.

The rule provides 2 hours of general debate to be equally divided and controlled by the chairman and the ranking minority member of the Committee on Science and Technology. There are no waivers of points of order and upon conclusion of consideration of the bill, one motion to recommit would be in order.

Mr. Speaker, although there is some controversy over the funding level in the bill, I am aware of no opposition to the rule. This is a completely open rule and any Member would have the opportunity of offering any germane amendments.

H.R. 2587 authorizes approximately $3.29 billion for civilian research and development programs in the Department of Energy. The authorization level represents an increase of $557.8 million over the administration's fiscal year 1984 request and an increase of $318.8 million above the amount appropriated for fiscal year 1983. Chairman FUQUA has indicated that the increased authorization represents the committee's endorsement of the President's requested increases in the magnetic fusion, uranium enrichment research and development, supporting research and general science programs.

Mr. Speaker, there is substantial controversy over a committee amendment that would prohibit further funding of construction and development on the Clinch River breeder reactor project until Congress enacts special legislation providing an alternative financing scheme for the program. The bill provides that in the absence of enactment of a private sector cost-sharing proposal by the end of the current fiscal year, funding for the Clinch River breeder reactor will expire on September 30, 1983.

Mr. Speaker, the Science Committee has been confronted with many extremely difficult decisions in the development of the civilian R&D programs for fiscal year 1984.

The committee's 15 Republican members filed minority views in opposition to the bill on the basis of its level of funding. Their concerns can be addressed during the amendment process.

Mr. Speaker, this legislation is vital to the development of our energy future. Under this rule, adequate time is provided for fair and open debate. I urge adoption of this rule so that the House can move forward to the consideration of this most important legislation.

Mr. Speaker, I reserve the balance of my time and yield to the gentleman from Tennessee, for the purpose of debate only.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

The Department of Energy authorization for civilian research and development needs to be discussed on the floor of the House.

This is a good rule and I hope when the measure is debated the amendment of the gentleman from California (Mr. BROWN) will be taken out of the bill because it hamstrings the further development of the Clinch River breeder reactor project.

I think this is a very good demonstration project and this amendment to clamp down, to stifle or kill it should be eliminated.

There will be a vote on it after it is discussed on the floor of the House.

Mr. Speaker, I urge the adoption of the rule. I have no requests for time but I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CAMPBELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were—yeas 409, nays 2, not voting 21, as follows:

□ 1510

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ESTABLISHING THE HARRY S. TRUMAN NATIONAL HISTORIC SITE IN THE STATE OF MISSOURI

Mr. SEIBERLING. Madam Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs be discharged from further consideration of the Senate bill (S. 287) to establish the Harry S. Truman National Historic Site in the State of Missouri, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Ms. KAPTUR). Is there objection to the request of the gentleman from Ohio?

Mrs. VUCANOVICH. Reserving the right to object, Madam Speaker, I do so for the purpose of asking the gentleman from Ohio for a brief explanation of the bill.

Mr. SEIBERLING. Madam Speaker, if the gentlewoman will yield, this bill is substantially the same as a provision of the omnibus parks bill establishing the Harry S. Truman National Historic Site that passed the House earlier this year, and this will simply clear this portion of the bill for the House.

Mrs. VUCANOVICH. Madam Speaker, I thank the gentleman for his explanation, I support this legislation, and I urge its approval.

Madam Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 287

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to preserve and interpret for the inspiration and benefit of present and future generations the former home of Harry S Truman, thirty-third President of the United States, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized to acquire by donation, purchase with donated or appropriated funds, transfer from another Federal agency, or otherwise, the residence and real property known as 219 North Delaware Street in the city of Independence, Missouri, as passed to Bess Wallace Truman upon the death of her husband. The Secretary may also acquire, by any of the above means, fixtures, and personal property for use in connection with the residence.

SEC. 2. The property acquired pursuant to subsection (a) is designated as the Harry S Truman Historic Site and shall be administered by the Secretary in accordance with the provisions of law generally applicable to units of the national park system, including the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1-4), and the Act of August 21, 1935 (49 Stat. 666; 16 U.S.C. 461-467). The Secretary is further authorized, in the administration of the site, to make available certain portions thereof for the use of Margaret Truman Daniel subject to reasonable terms and conditions which he may impose.

SEC. 3. There is authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) is recognized for 1 hour.

Mr. SEIBERLING. Madam Speaker, I yield myself such time as I may consume.

Madam Speaker, S. 287 would establish the Harry S Truman National Historic Site in Missouri. It is virtually identical to legislation authored by our colleague from Missouri, Mr. SKELTON, which passed the House twice—during the 97th Congress and again earlier this year as part of H.R. 1213. That was a bill that included several important matters relating to our public lands and national parks.

H.R. 1213 has been scheduled for consideration by the Senate Energy and National Resources Committee, and I have received assurances that it will be acted upon by that committee in the near future.

Meanwhile, this week, however, May 8 marked President Truman's 99th birthday anniversary. The passage of this bill coincides with efforts, also spearheaded by the gentleman from Missouri (Mr. SKELTON), to celebrate the Truman Centennial next year. The plans for the centennial are being announced this week.

Indeed, I would like to emphasize that we would probably not be here today considering this legislation had it not been for the prompt action last year of the gentleman from Missouri (Mr. SKELTON).

When President Truman's wife Bess died in October 1982, her will provided that their home in Independence, Mo., would be donated to the United States, under the direction of the Archivist of the United States. However, the Archivist does not have the Federal responsibility of administering national historic sites, a function that is carried out by the National Park Service. The property was in limbo, with only minimal protection, threatened by possible vandalism, theft, or fire.

Because of the urgent need to protect this important property, our colleague, Mr. SKELTON, requested the Secretary of the Interior to exercise his authority to designate and administer President Truman's home as a national historic site. The Department refused, and Mr. SKELTON quickly introduced legislation to establish the historic site. Mr. SKELTON's bill passed the House on December 13, 1982, but the Senate failed to act on it before the end of the session.

Fortunately, on December 8, 1982, the day after our hearing on Mr. SKELTON's bill, the Secretary of the Interior signed a secretarial order designating the home as a national historic site. In addition, the Interior Appropriations Act for fiscal 1983 earmarked $160,000 for the National Park Service to operate, maintain, and protect the site. Authorizing legislation is essential, however, to assure the long-term protection of this historic site.

This year, Mr. SKELTON reintroduced the legislation, H.R. 1304, which was subsequently incorporated into the bill H.R. 1213. The only difference in S. 287 from the House-passed version is the elimination of reference to a tract of adjacent property which had been owned by President Truman and left to his wife, who subsequently transferred it to one of their relatives. The Senate bill would not include this property in the historic site. We agree that it is not essential to include it, since we believe the Secretary has authority under existing law to acquire the property if that were ever necessary. We do expect, however, that the Park Service will consider the future use of this property in developing its management plans for the site to insure that it remains compatible with the history and integrity of the area.

Before closing, I would also like to thank several staff members who worked hard on this legislation, including Loretta Neumann and Clay Peters of the Interior Committee staff and Toni Arnett of Mr. SKELTON's staff.

Madam Speaker, I urge all Members to support this legislation.

Mr. SKELTON. Madam Speaker, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Missouri.

Mr. SKELTON. I thank the gentleman for yielding.

Madam Speaker, I first wish to commend the subcommittee chairman, the gentleman from Ohio (Mr. SEIBERLING), for his very dedicated attention to this legislation and on behalf of all of the citizens of Missouri for his assistance in getting this bill passed.

As the gentleman from Ohio did point out, this bill was introduced last year. We had some difficulty with the Secretary of the Interior. Fortunately, he did finally see his way clear to assist and to take the property over. We passed legislation last year and

sent it to the Senate. No action was taken. Earlier this year, we passed legislation and sent it to the Senate, and now they send us back their own legislation, which is companion legislation to the bill which we sent.

I especially want to pay tribute to the other members of the Missouri delegation, and particularly the gentleman from Kansas City who also represents, as a result of redistricting, the Truman home itself, Mr. ALAN WHEAT, for their encouragement and assistance through these many weeks of trying to get this historic site preserved for all time.

□ 1520

I would like to say, Madam Speaker, that the 100th birthday of President Truman will be upon us 1 year from this month, and we will announce tomorrow the plans for the centennial celebration of the Harry S. Truman birthday.

This bill itself is a fitting beginning to commemorate the memory, commemorate the lovely wife, and the life of this gentleman from Missouri who epitomized all the fine and great things that we stand for in this Nation.

Again, I thank this body for their assistance in passing this legislation, so finally and at last it can be sent to the President for his signature, and again I thank the committee, and again, the chairman, Mr. SEIBERLING.

Mr. SEIBERLING. Madam Speaker, I would just like to add my commendations again to the gentleman from Missouri for his leadership in this matter.

I had the pleasure over the weekend to be in the State of Missouri and float the Eleven Point River, which is a wild and scenic river, and visit the proposed Irish Wilderness. I must say it was a real thrill to know that I was also there on the birthday of our great President Harry S. Truman, and I think this is a most fitting time to be acting on this bill. I thank the gentleman for his remarks.

Madam Speaker, I yield such time as he may consume to the gentleman from Missouri (Mr. WHEAT).

Mr. WHEAT. I thank the gentleman for the opportunity to comment on this legislation, first to commend Senator EAGLETON for his sponsorship of S. 287, and also to congratulate and to commend the gentleman from Missouri (Mr. SKELTON) for his twice successful sponsorship of legislation in this House of Representatives to have the National Park Service maintain and preserve the Truman home. I know it has been a difficult fight for him because there are still those in the administration, even though Mr. Truman has been gone for more than a decade, who fight against having his home maintained for the benefit of the people of the United States.

It is especially appropriate that this is the year that the National Park Service begin to maintain the Truman home, since this is the 100th year of the anniversary of the birth of Harry S. Truman. The home that we are referring to is one that he and his wife, Bess, lived in from the time of their marriage in 1919 until President Truman's death in 1972 and the death of our esteemed First Lady in 1982. At that time, she left the home, the carriage house, and the grounds to the people of the United States.

It is also appropriate because there are several communities within the Fifth District that are now doing their utmost to honor the memory of Harry and Bess Truman.

The city of Independence presented the 10th annual Harry S. Truman Public Service Award to Mrs. Coretta Scott King last weekend on the steps of the Truman Library. Mrs. King is indeed a worthy recipient of the award, that is bestowed to an outstanding public servant that typifies the dedication, industry, ability, honesty, and integrity of President Truman. She joins a distinguished list of recipients of the award, that includes President Jimmy Carter, Senator Hubert Humphrey, Clark Clifford and W. Averell Harriman, among others.

In Grandview, thousands of residents participated in the city's annual celebration to honor President Truman last week. In coordination with the festival, the Truman Farm Home Restoration Committee also started its fundraising efforts to help finance the restoration of the boyhood home of our 33d President. The fundraising committee, under the direction of Rev. Bob Johnson, the pastor of the Grandview Assembly Church, is planning a major fundraiser later this summer to insure the beautiful restoration of the home. The committee is well on its way to reaching its fundraising goal of $100,000 to make sure a memorial to President Truman is adequately maintained. I support the committee's efforts and believe this legislation would greatly help their efforts.

Madam Speaker, I hope that you and the rest of the Members of this House of Representatives will join us today in passing this legislation to honor President Harry S. Truman and make sure that his legacy for the people of the United States is maintained and preserved.

Mr. SEIBERLING. Madam Speaker, I have no further requests for time, and I yield back the balance of my time.

GENERAL LEAVE

Mr. SEIBERLING. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the Senate bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO FILE SUNDRY REPORTS

Mr. SEIBERLING. Madam Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until 5 p.m. today to file reports on:

H.R. 2520, the NRC authorization bill;

H.R. 9, the Florida Wilderness bill;

H.R. 2477, the Sipsey Wilderness bill; and

H.R. 2465, the earthquake hazards authorization bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

GENERAL LEAVE

Mr. KOLTER. Madam Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Maryland (Mr. MITCHELL).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

HANDGUNS AND THE NRA—THE SPEECH REAGAN DID NOT DELIVER

(Mr. SEIBERLING asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, President Reagan, addressing the NRA convention on May 6, again pledged his continued opposition to any effort to get control of the epidemic of handguns and handgun deaths that afflict our country. Of course, he is free to disregard the lesson of his own close brush with death following the assassination attempt by John Hinckley. He is less free, however, to disregard the 11,000 murders a year and the 11,000 suicides and accidental deaths caused by handguns in this country.

He is also not free to ignore the thousands of people injured and maimed for life each year by hand-

guns, including his own press secretary, James Brady. James Brady is still paralyzed and may never be the same physically again.

A fine young man on the staff of one of our colleagues from Ohio will be confined to a wheelchair for the rest of his life because 2 years ago two other young men in Washington shot him in the back for no apparent reason, after robbing him on the street.

President Reagan said in his speech that he would never deprive Americans of the right to protect their families. What connection he makes between that and the ownership of handguns is left to the imagination. The ownership of handguns did not protect James Brady. It did not protect our colleague's young staffer. It did not protect my son from being held up at gunpoint at the door of my house in Washington earlier this year by two teenagers pointing a gun at him and demanding his wallet. One of the teenagers remarked that it was a good thing that there was some money in the wallet or "We would have to burn you." These are the terrifying realities that the opponents of handgun control shy away from.

On Thursday, May 5, Washington Post columnist Richard Cohen devoted his column to an imaginary speech that President Reagan did not deliver to the NRA. Mr. Cohen, in his "speech," points out that even a total ban on handguns would not eliminate them immediately, but it would eliminate most of them eventually. This conclusion is supported by police authorities and criminologists all over the country. Perhaps some day we will get a President and a Congress that have the courage to take their advice.

The complete text of Richard Cohen's article follows these remarks:

HANDGUNS

(The following is the text of a speech President Reagan will not deliver to the National Rifle Association meeting tomorrow in Phoenix:)

Good afternoon. It is an honor to be here today. As you know, I have been a long-time supporter of the National Rifle Association, supporting you as you have supported me, but I think we have come now to a parting of the ways. Maybe you can understand. Your cause nearly killed me.

My concern is handguns. As you know, a certified psychotic named John Hinckley, Jr. took a gun and tried to kill me. He had been under psychiatric treatment, yet he had no trouble buying a gun, taking it across the country and taking a shot at me.

No one asked him why he wanted to buy a gun. No one insisted on a license, on a cooling-off period, on a check of some sort to see why in the world he wanted a handgun. After all, you don't hunt animals with a handgun. Only people. It turned out Hinckley was hunting me. No one is to blame for that. But he took a shot at me. You have to share the blame for that.

Let me go on. Obviously, Hinckley was not successful. I was wounded and recovered, but others were not so fortunate. I am referring here, of course, to James Brady. He is the White House press secretary, but he is that in name only. He was seriously wounded in that assassination attempt and it is not clear yet whether he will ever be the same physically again.

The last time I saw Brady, I wanted to cry. He was sitting on the dais at some Washington event, his wife next to him, a big grin of his wide face. I hardly knew the man when I named him my press secretary, but I know him now. There is a sweetness in Brady that comes through in the smile but the truth is that his life is not sweet. He is still partially paralyzed. There are lots of medical reasons for that, but one reason is that you people in the National Rifle Association have fought all attempts to regulate the sale or ownership of handguns.

This sounds a bit harsh, I know. But I have thought it over and I just have to blame you for Brady—for all the Bradys. I have to blame you for Bradys who are not famous, who go out into the street and get shot by some kid who hasn't the slightest appreciation of either his own or anyone else's life. I blame you for every dumb domestic fight in which someone reaches for a handgun. I blame you for helping to turn the cities into metropolises of fear. I blame you for Robert Kennedy and George Moscone and John Lennon.

I blame you for 37 million gun-owning households—half the households in the country. I blame you for more than 11,000 murders a year and another 11,000 suicides or accidents. I blame you for the defeat of efforts to control this epidemic of hand-gun ownership, for the lobbying you do in Congress and for your misinterpretation of the constitutional right to bear arms—originally meant as a way of ensuring that there would be a militia. No militia uses Saturday night specials.

Now I'm going to tell you something. I know that if you banned handguns tomorrow, there would still be handgun killings. There are too many guns out there for any law to make a difference right at the beginning. And I know that the last people to turn in their guns would be the criminal element. But I know, too, that such a law would be a start. There will always be guns, just like there will always be illegal narcotics, but I do what I can to control drugs and keep damage to a minimum. I think we can do the same for guns. At least we could try.

The truth is that neither Nancy nor I can figure out why you NRA types are so crazy about handguns. You can't really hunt with them and if you want to target-shoot, fine—get a license. The only thing handguns are really good for is killing. This is why I thought that in the name of Jim Brady and all the other victims of handguns, I would come here today to say that I will now support a bill to restrict the ownership of handguns.

I have learned something the hard way. You people are right. Guns don't kill people.

Sometimes they just leave them maimed for life.

NATIONAL SMALL BUSINESS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. MITCHELL) is recognized for 60 minutes.

● Mr. MITCHELL. Madam Speaker, across the Nation this week there will be gatherings of individuals and coalitions of small business associations that represent the interests of this country's small business sector. They meet to recognize and reaffirm the validity of a nationwide, and indeed, a Government-wide, commitment to small business.

Indeed, these delegates and the population at large are seeing and will come to see, the devastating efforts of the monetary and tax policies favoring big business and the military-industrial complex of this Nation. It is no secret that such policies are wrecking havoc across the board on basic and traditional support systems dependent upon reasonable levels of Government subsistence—be there a Republican or Democratic administration in the White House.

The week's proclamation—"There's No Business Like Small Business"—becomes more than a catchy slogan; for it must say to this Nation and to this administration that this country must not and cannot "stay the course," with current policies of this administration—as reflected in and administered through policies and programs of the Small Business Administration.

These policies are burdensome and shortsighted. They are regressive and reactionary. They ignore and fuel the flames of this country's economic holocaust, engendering even more small business failures—as reflected in the over 500 applications for bankruptcy filed every week and the weekly small business shutdowns of 10 times that number.

Friends and colleagues, this is anathema to this country's well-being. It is inimical to the interests of all of us, regardless of party affiliation.

If we accomplish anything this week, here in our annual spring gathering, let it be that we make this administration see what the many small business delegations and advocacy groups see; what my colleagues and I see from our vantage point of leadership in the House Committee on Small Business, that small business in this country must be viewed as being in a state of national disaster. Small business in America must be viewed and recognized as a national disaster that is giving impetus to far-reaching social and economic crises that have weakened and that continue to weaken binding threads in the fabric of this Nation. Small business in America in 1983 is a national disaster that is breeding joblessness, nonproductivity, and for too many citizens, namely nonwhites, hopeless alienation from the mainstream of economic independence.

As difficult as it may be to fathom, let us look at some specific actions taken by this administration in what has become no less than its attack on small business. I believe an objective

and reasoned examination of program cutbacks, policy reversals, and restrictive monetary policies combined with massive tax cuts and increased military spending—will disclose a formula for disaster that is already reduced to its most basic and elemental state.

First let us look at the manner in which this administration has used its budgetary authority to address the national crisis of small business failures and joblessness. This administration continues to make loans at the same low level of the last 2 years despite the new post-World War II record of business failures this year—4,315 in the first 7 weeks alone. This represents a total of over three times the 1,246 failures for the same period in 1980 and over 1,000 more than 3,067 failures in 1982. More businesses failed in the first 25 months of this administration than in the previous 5 years.

It is clear that the current economic climate is not favorable for small business owners, even though small business firms account for two-thirds of new job opportunities in the Nation. Despite these foreboding statistics, the administration continues a policy of severe reductions in loans—both direct and guaranteed loans by approximately 50 percent from 1981 levels. This represents costly neglect that we can measure and gage by insensitivity and inaction.

My friends and colleagues, I remind you that we are witnessing such insensitivity and inaction at a time when joblessness—a byproduct of business failures—hovers at nearly 17 million or 15 percent of the civilian labor force.

To this insensitivity and inaction, the House Small Business Committee and its six subcommittees have responded with hearings and legislative proposals intended to reverse the anti-small-business policies of this administration—policies that exacerbate and, indeed, serve to impede recovery from our worst recession in over 41 years.

This administration's belief that the Federal Government should not intervene in private credit markets is both misguided and menacing to the well-being of small business in this country and to economic recovery.

Our response will be a continuing fight for strong enforcement of recent legislative initiatives such as the Small Business Innovation Development of 1982. As you know, this measure required Federal agencies with a research and development budget of $100 million or more to create a small business innovation research program whereby larger portions of their research and development budgets will go to small businesses.

I see relief in the Prompt Payment Act, passed by the 97th Congress, whereby interest penalties will be charged to Federal agencies that are late in their payments to small businesses. Surely, we cannot endorse a policy to exempt the Federal Government from basic policies of soundness and integrity in business practices. I daresay it would be difficult to document the innumerable failures of small businesses that are attributable to inadequate cash flow caused by late payment for services rendered.

Looking ahead, let me say that we hope to report out of committee by the end of May an omnibus bill that will amend the Small Business Act and offer improved assistance to small businesses that are tottering in the wake of sustained decline to both physical and nonphysical circumstances. The bill will address aid to such firms that are immobilized by floods and other natural disasters and will seek new assistance levels for firms suffering from a negative impact of currency fluctuations, such as the Peso devaluation that has hurt small businesses along the United States-Mexico border. Many small businesses in this area have endured severe economic crises. This measure would reinstate the old, pre-1981 SBA nonphysical disaster loan program and make it specifically applicable to economic dislocation arising from foreign currency devaluation.

The far-reaching effects of these seemingly regional disasters render them crises of national consequence. They require no less than a national response.

As a part of this omnibus package, I introduced a measure to give small and minority business the chance to lead the Nation's economic recovery by creating jobs and offering opportunities for training of new employees. The implications for the black and Hispanic unemployment level are clear. This level is at its highest since 1941.

These measures respond to the unsound policies of an administration that has courted big business interests at the expense of a loss of over 45,000 small businesses in its first 25 months in office. This represents the largest number of small business failure in 5 years.

This week's many activities must give constant attention to reversal of unsound policies of this administration and meaningful representation of small business views and interests in the decision and policymaking process of this and future administrations.

In closing, I salute this year's small business winners, those business owners who have, indeed, demonstrated that in the face of adversity there is still hope for a rebirth of a strong business community.

A special salute goes out to Melvin Bilal, Maryland's small business winner. Mr. Bilal is proprietor of the Howard Security Service in Baltimore. He is an attorney and former military policeman. Mr. Bilal formed his company in 1973. He now employs over 500 people and projects sales of over $5 million in 1983.●

● Mr. McDADE. Madam Speaker, I applaud the President for proclaiming this week Small Business Week. As our country salutes the small business owners of America, I think the theme is most appropriate because it is true—"There's No Business Like Small Business." There are, of course, a number of reasons why there is no business like small business:

The enterprises that are included in the group we call small businesses are most of the businesses in the country—95 percent in fact.

Most of the jobs in the country are in small business establishments. Almost 55 percent of all jobs are in businesses with less than 100 employees. And most of us got our first job in a small business.

But the fact that is by far the most important is this: Small business plays an essential role in our economy in producing and marketing new products and in creating new jobs.

If we are determined to reinvigorate our economy—and we are—we are going to have to depend in large part on small business to get the job done.

It has been small business over the last 10 years that has produced 70 percent of all new jobs. Although it employs a larger total number of workers, of course, big business has only created 1 percent of new jobs in the same period.

Small business also represents many of the traditional values which we hold dear. It provides the opportunity for entrepreneurship and economic self-determination which are unique to our society. Personal service, merchant accountability to customers, and community involvement are hallmarks of small business. With these attributes, small businesses make much more than an economic contribution to the communities in which they are located.

Small businesses are the innovators in our country. It was small business that discovered the CAT-scan, xerography, air-conditioning, the ballpoint pen, the Polaroid camera, and the list goes on—even the franchising of hamburgers originated in a small business.

Congress has been very concerned about the economic impact small businesses have on our economy and has been moving to make the business climate better for the entrepreneur upon whom a great portion of our national well-being depends.

In the last few years, Congress has acted upon a number of bills that will make real improvements for small business owners:

Regulatory Flexibility Act: Requires that Federal agencies implement a two-tier set of regulations so that the regulations are less onerous for small business.

Equal Access to Justice Act: A law that guarantees that if a small business person fights Uncle Sam in court and wins, the Government pays the attorney fees and court costs. This year we will be reauthorizing the Act and intend to have the IRS included.

Small Business Innovation Act: This was a very difficult fight last Congress. The legislation mandates that Federal agencies target a certain amount of their research and development money to small businesses.

Paperwork Reduction Act: We must reauthorize the act this year and in doing so remind Federal agencies of the impact of paperwork on small business—in terms of both money and time.

Tax Relief: We will preserve the third year tax cut which is so important to small businesses who file tax returns as sole proprietors.

Congress must continue in its efforts to help small business. We must continue to be sensitive to the special problems of small business and to assure fair competition for them in the marketplace. It is in the best interest of our Nation for small businesses to continue to grow and prosper in our economy so that they may create the jobs we need.●

● Mr. RUSSO. Madam Speaker, this week is Small Business Week. I am pleased to have the opportunity to salute our small business men and women for their contributions.

The 4 years I served on the Small Business Committee proved educational for me. There were not only the legislative specifics that enhanced my understanding of the odds the small entrepreneur may face, but the tenacity and courage and just plain good sense that characterized so many people in small business I met during those days. It taught me an important lesson about one of the factors that, literally, makes America great. What is more the American story than people who possess these characteristics—and go on to start a country, build the West from the ground up, advance a civilization?

The cornerstone of our economic system is the small business. Sprinkled across the land, the individual small business provides services for the hometown and provides jobs as well. As a whole, these businesses give this economy its substance and strength. And day to day the people running these businesses live the American dream—individual men and women can make a difference, can shape their own destiny. Those that have chosen the challenging task of maintaining their own business demonstrate the kind of optimism that keeps us growing.

There are easier ways to make a living. But ease is not what the small business men and women are about. They are about the hard work required to be successful in any endeavor. Their success benefits us all. I applaud them and thank them, and join with my colleagues in paying them the tribute they richly deserve during this Small Business Week.●

● Mr. ANDERSON. Madam Speaker, more than 97 percent of our Nation's enterprises may be classified as small businesses. Therefore, I believe it is only fitting that, as the President has proclaimed this week as "National Small Business Week," we should recommit ourselves to assisting wherever prudently practicable those men and women who comprise America's small business community.

I am today especially fearful that, unless the Congress and the President take concerted measures to bring the budget deficit under control, those "idea generators" and "risk takers" of our Nation will become an endangered species. Of course in referring to "idea generators" and "risk takers," I am referring to small businesses.

Last year, 66,000 businesses filed for bankruptcy under chapters 7, 11, or 13 of the Bankruptcy Reform Act of 1978. This marks a 38-percent increase in bankruptcy filings over the previous year. And, although small businesses appear to be weathering the current recession with a bit more ballast than larger firms, a recent Presidential report, "The State of Small Business," readily concedes that "* * * Nineteen eighty-two was not an easy year for the American economy" and that "small business earnings were down."

Madam Speaker, it is the small business sector of our economy which we are looking toward to pull America out of the current recession. However, if we cannot put together a budget that reduces the deficit—which surpassed $129 billion in just the first 6 months of this fiscal year—interest rates will continue to prohibit any realization of our hopes for a strong and sustained economic recovery. It is my hope that, in recognition of the leading role which is expected of the small business community, we will take responsible measures to reduce both the budget deficit and interest rates.●

● Mr. COUGHLIN. Madam Speaker, President Ronald Reagan has proclaimed the week of May 8, 1983, as National Small Business Week as a tribute to the millions of Americans who are part of the small business community throughout our Nation.

Small business, as is so often correctly pointed out, is the backbone of our free enterprise system. Ninety-five percent of all businesses are, in fact, firms with fewer than 100 employees, accounting for almost 55 percent of all jobs. Recent studies have shown that small businesses are the growth and innovation centers of our economy: two out of every three new jobs created are in small firms which also produce two to three times as many innovations per employee as larger businesses. In the last 10 years, small businesses have created 69 percent of all new jobs.

This record of performance, growth, and innovation is one of which the hard-working small businessmen and women of our Nation can be justifiably proud. We must continue our legislative efforts to make sure that small businesses are given a fair shake in the marketplace, that they receive an appropriate share of Federal contracts, that they are provided with permanent relief from excessive Government regulation, and that tax policy encourages small businesses to fulfill their vital role in our economic system.

The Small Business Administration is sponsoring a number of activities this week to focus on small business concerns and to honor the 1983 State Small Business Persons of the Year and the 1983 Small Business Advocates of the Year. My congratulations go to all the honorees.●

● Mr. DE LA GARZA. Madam Speaker, during Small Business Week, it is a privilege to honor the owners of small businesses. They are the people who take full responsibility for all their actions, bear the lumps and get the rewards when there are any. We owe a great debt to their initiative, courage, and commitment. This year in particular I commend the many members of the small business community for their endurance and steadfastness during a troubled economic period.

Small businesses play a vital role in the economic health of our country. Small businesses provide about half the country's total employment (about 50 million people) according to the Small Business Administration, and small firms with under 500 employees accounted for 60 percent of the new jobs created between 1979–81. It is also interesting to note that SBA studies show that during the 10-year period from 1970 to 1980 there has been a shift in our economy toward more self-employment.

Through the years, small businesses have generated the ideas and borne the risk for many important inventions that have had a major impact on changing lifestyles in the United States and throughout the world. They have been responsible for the development of the aerosol can, the airplane and helicopter, the cotton picker, the heart valve and pacemaker, the personal computer, Polaroid camera, safety razor, vacuum tube, and zipper, to mention only a few innovations.

While we are on the topic of Small Business Week, I want to compliment the people who make the Small Business Administration function. The staff in the Harlingen District SBA office, probably the best SBA office in the country, has provided outstanding

service to small businesses through the years. In particular, this past year, their dedication, commitment, and responsiveness to the needs of border businesses so adversely affected by the peso problems have resulted in an extremely effective peso pack program in the Rio Grande Valley.

This year, I take special pleasure in celebrating Small Business Week because the Texas 1983 Small Business Person of the Year, Phyllis Griggs, comes from McAllen, Tex., in my district. The owner of Mister Donut franchises in McAllen, Mission, and Edinburg, Mrs. Griggs has developed and expanded her business from a very small base in 1973 to several units with sales totaling $1.4 million in 1982. She has given her popular shops local flavor by introducing Mexican pastries and by sponsoring numerous fiestas and other special events. I am very pleased her business acumen, dedication, and hard work are being recognized and honored.

Phyllis Griggs represents the best in the American entrepreneur. I salute her and the many other small business owners. With their initiative, enterprise, and independence, small business persons in the United States have shown the rest of the world how successful a society can be when the individual has the right and ability to pursue his or her own dream.●

● Mrs. SMITH of Nebraska. Madam Speaker, I am honored to join my colleagues today in recognition of National Small Business Week. Of all the days and weeks we manage to set aside to commemorate one thing or another, I feel none is any more significant than the week we pay tribute to the Nation's small business community.

As it was for all sectors of the economy, the past year was a very difficult time for small business and many tough challenges still loom ahead. But as documented in the President's report on the "State of Small Business," the Nation's small businessmen and women mustered their spirit and determination and weathered the storm better than their big industry counterparts. And now as we are turning toward economic recovery, small business will be leading the way with new jobs and new ideas, further proving what we are taking time to recognize today—that small business is the foundation of the economy. No other sector is as dynamic, competitive, innovative, or better exemplifies American free enterprise.

I want to express my special appreciation to the small businesses of Nebraska, 65,000 of which are farm and ranch operations, but still small businesses and deserving of our tribute today. I also have the privilege of recognizing a particular Nebraska businessman, Mr. Owen W. Berthelsen, who has been named a 1983 Small Business Person of the Year. Mr. Berthelsen is the president of Century Manufacturing Co., which makes its home in Aurora, Nebr., in my district.

Mr. Berthelsen is an outstanding example of American small business ingenuity, determination, and hard work. Twenty years ago he had a new idea for a birthing chair, challenged longstanding practices of the medical profession, and set up production in the barn behind the house. Today that idea accounts for over $2 million in sales, the barn has been replaced by over 90,000 square feet of production and warehouse facilities, and Century Manufacturing has 85 employees and a worldwide market for innovative, unique patient-care products, which generated over $16 million in gross sales last year. There is no doubt that Mr. Berthelsen has earned and richly deserves our recognition for his business achievements and his contributions to his community.

National Small Business Week should not only be an opportunity to salute Mr. Berthelsen and his small-business colleagues across the country, but it should also be a time for us in Congress to reaffirm our commitment to small business. All of our statistics, our words of appreciation and praise, and the well-earned "pat on the backs" today will be meaningless unless we send small business something more than rhetoric in the coming months. We must control Federal spending and reduce the deficit, and we need to renew our efforts for meaningful reforms in Federal regulations and taxes that we began in the 97th Congress. If we give small business the opportunity to grow and prosper without cumbersome, needless Federal regulations, without a stifling tax burden, and without having to compete with Uncle Sam at every turn for credit, these hard-working businessmen and women will answer with jobs, with new products and technologies, with increased productivity, and with a signal that we are ready to compete again as No. 1 in the world marketplace.

America needs small business, and small business needs Congress to put forth sound fiscal policies that will be conducive to small business formation and growth. Our efforts are the important first step in creating a better business atmosphere and toward removing some of the traditional barriers to small business success. Let us make our tribute today truly worthwhile and pledge our support to small business.●

● Mr. MAZZOLI. Madam Speaker, I join with my colleagues in honoring our Nation's small businesses today.

Most people do not realize that approximately 97 percent of all businesses in the United States are classified as small and these small businesses produce about 48 percent of the Nation's business gross national product and about 43 percent of the U.S. total economy.

Small businesses are the job creators: Over 86 percent of new jobs are created by small businesses. They are also the innovators: They account for over 50 percent of all scientific and industrial innovations and do so, generally, with more efficiency than larger businesses.

Small businesses—and the hard-working entrepreneurs behind them—are truly the backbone of the Nation's economy. It is fitting that we should set aside this week to honor the industriousness, independence, and productivity of our small-businessmen and women who have helped make our Nation great.●

● Mr. IRELAND. Madam Speaker, as we celebrate Small Business Week our Nation faces several severe problems. Unemployment is approaching record levels. This year's budget deficit may approach $200 billion. All too often in recent years we here in Washington have engaged in problem management rather than problem solving. This must end. We must address our economic problems and soon.

There is a segment of our populace that can help and help now—that is small business. Small business is a combination of social values, a pattern of civic life, a free society, and a healthy competitive community. It is the small-business person who is the foundation of his or her hometown's growth and development.

While we tend to give small business a lot of lipservice, other countries are ahead of us in helping small business. Belgium and Canada have Cabinet-level ministers for small business. France has designated financial institutions which may pay up to 90 percent of an invoice owed small business by the Government. West Germany permits capital assistance to small businesses. What other countries have done we can do, too, and better, and we must.

Our Government in recent decades has tended to view Americans as employees and consumers rather than as entrepreneurs and producers, a philosophy of collectivism at the expense of individualism. As a result, there are two fundamental imbalances in postwar economic policy—a kind of double tilt that, largely through inadvertence, has permitted the climate for small, independent ventures to deteriorate badly.

One is a tilt favoring the Nation's largest corporations. The Tax Code, accounting principles, credit policies, procurement practices, export incentives, even business-school programs have all evolved over the years to support big business.

The other is a tilt toward managing the demand side of the economic equation to the neglect of the supply side—

alternately whetting and suppressing the appetite to consume rather than quickening the adrenalin to produce.

It is time to recognize that small business is the Nation's chief job producer and our major innovator. Every time we pass a piece of legislation we must from now on ask ourselves—how will this affect small business? Many legislative initiatives will come our way—on taxes, on exports, on procurement, et cetera. Each and every time we must assess the small business impact. It is my intention to follow major legislation and speak out when I believe small business is not being acknowledged. In addition, from time to time I plan to address this House on specific issues and the small business implications. You will again and again hear my creed. It is a simple one but a meaningful one for the years ahead—if America will save small business, small business will save America.●

● Mr. LIPINSKI. Madam Speaker, I am honored to join my esteemed colleagues PARREN J. MITCHELL and JOSEPH MCDADE in this special order commemorating small businesses across the United States.

In my work in politics over the years, I have become acquainted with the problems that small businessmen face and the benefits that they enjoy. Certainly the problems for the proprietor are many: High interest rates, economic fluctuation, taxes, and overhead. Almost all small businesses are community oriented and all participate in charities and community drives. But local businesses have only a limited amount of money to donate to local causes, and there are always local concerns asking for help. And we cannot forget the issue of crime. Although our local police departments are doing their best to stem the tide of crime against property, every small business owner must go to sleep at night with the fear that criminals will make off with his business in the dark of night.

Yet there are many advantages that small business owners enjoy. Perhaps the best thing about owning your own business is that it is yours. The freedom that comes from the responsibility and control that one has when he owns his own business make all of the problems pale by comparison. Every small businessman is a vital part of his community, and while the responsibility for his business' downturns are solely his, so is the responsibility for his business' success.

Many of the economic experts say that America's economy is in trouble because our multinational corporations cannot compete with those of other countries. They say that the United States will go under because Ford cannot compete with Honda. There may be some truth in that, but it certainly is not the whole truth. To see the strength of industrial America you can go to the industrial parks, but to see the might of American spirit and enterprise, just take a drive down Main Street. There you see businesses of every shape and form selling commodities to fill modern America's every need. These businesses are the heart and soul of America, and they are something in which we can all take pride.

All that we have heard recently is how many businesses have gone under in these tough times, but I find it more interesting to note how many small concerns have managed to stay in business. These businesses are competing against the neighbor down the street, cheap foreign imports, tight credit, and a general reluctance on the part of the public to buy any products. To be able to stay afloat with problems like these is a vivid depiction of the depth of American commitment and strength of the businessman's character. The economic health of our country will improve, and the small businessman across the land will emerge stronger than ever.

Multinational conglomerates did not start out that way. Sears, Roebuck, Exxon, and Xerox all started out as small concerns. Apple Computers is an example of a two-man firm using American know-how and determination to grow into an international business. The small businesses across the country are living, breathing proof that the American Dream is still with us.●

● Mr. NOWAK. Madam Speaker, with the designation of May 8 through 14 as U.S. Small Business Week, I would like to emphasize the important role smaller firms play in fostering prosperity and economic opportunity for our citizens.

Nevertheless, our Nation is currently in the depths of the worst economic downturn since the Great Depression. Previous postwar recessions have lasted an average of 11 months each. This one has lasted approximately 22 months. The civilian jobless rate hovered around 10.2 percent of the work force in April.

Businesses have been hit hard by the current recession. According to Dun & Bradstreet statistics, business failures totaled in excess of 25,300 in 1982. This amounts to a 50-percent increase over 1981, which is the year the economic downturn began. More dishearteningly, virtually all of these business failures are smaller firms.

I am concerned that our unemployment problem will continue to fester. Businesses that have been hit hard by the current recession will probably continue to be cautious about hiring the unemployed. In addition to the swell in our unemployment rolls resulting directly from the protracted recession, there is another economic factor which is contributing significantly to the current high jobless rate.

Our Nation is presently undergoing major structural changes involving economic deterioriation of many older urban areas and a rapid decline in the prosperity of some of our basic industries. The resultant effect is an increasing number of displaced American workers who may no longer be able to match their present skills with those needed to fill existing and future job opportunities. For example, a recent New York Times article indicates that iron and steel employment which reached a peak of 952,000 in 1957 plunged to 630,000 in 1982 and is expected to continue this negative pattern through this century. Further, the auto production statistics claim that after a high of 1.02 million workers in 1978, the industry's job level dropped to 716,000 last year. Although there have been many propositions as to the underlying factors contributing to this dilemma, including increased automation and decreased export trading, the critical problem which we must address is how best can we return these workers to productive employment? Since small business is recognized as a major source of new jobs, it necessarily follows that we can develop job opportunities by encouraging small business growth and expansion.

Therefore, in recognition of the vital role of small business in the job generation process and in response to the long-term deterioration of many of the Nation's older urban centers, I recently introduced a comprehensive package of economic initiatives to distressed areas, The Enterprise Development and Urban Revitalization Act. This measure is designed to develop an awareness in Congress that tax and regulatory relief alone will not provide the impetus to revitalize our older urban areas and to propose a viable plan which combines several components that will actually encourage small business to locate and expand in these areas. The ultimate goal of this program is to return the millions of American unemployed workers, especially those displaced through no fault of their own, to their former position of pride and responsibility as productive elements of the economy.

In addition, since this is U.S. Small Business Week, it seems particularly appropriate to discuss briefly one of the most significant problems facing the small business community, capital formation.

The small business community has traditionally experienced difficulty in obtaining debt and equity capital. For instance, small firms, as a general rule, are unable to utilize the bond and commercial paper markets and, therefore, must rely on commercial bank credit to meet their financing needs. However, many small- and medium-sized banks argued during the debates

over deregulation that massive deregulation could lead to the obliteration of local community based banks through acquisition and mergers. These banks contend that such a proposal eliminates a major source of financing for farmers, small business, and certain local investors. Pursuant to this potential problem, I believe that it is essential to the small business capital formation process that we continue to monitor the impact of bank deregulation on small business lending.

Specifically, in the area of enhancing small business capital formation, I would like to bring to the attention of the Congress and the administration, my new proposal entitled (H.R. 2543) "The Small Business Capital Formation Tax Act". This initiative provides us with one of the best ways for reversing the current recessionary trends in the economy. H.R. 2543 provides small business with a secure and adequate financing source to meet its working capital and investment needs. Moreover, it insures that small companies have a way of reducing the high cost of external financing and it provides them with a means of generating more cash internally.

The provisions of the Small Business Capital Formation Tax Act are generally as follows:

1. CORPORATE RATE AND BRACKET ADJUSTMENT

Corporate tax brackets are widened and corresponding tax rates reduced. The highest corporate rate would apply to corporate taxable income over $200,000 as contrasted with $100,000 at present.

2. CAPITAL GAINS REDUCTION FOR INDIVIDUALS

If an individual makes an equity-type investment in a small business and holds that investment for more than 5 years, the maximum effective capital gains rate is reduced from 20 percent to 10 percent.

3. CORPORATE CAPITAL GAINS RATE

If a corporation makes an equity investment in a small business, the maximum effective capital gains rate for that firm is reduced from 28 percent to 20 percent.

4. CASH METHOD OF ACCOUNTING AND INVENTORY TAX REFORM

Permit businesses with less than $1.5 million in gross receipts to use the cash method as opposed to the accrual method of accounting.

5. CAPITAL GAINS ROLLOVER PROVISION

Taxpayer receives a 10-percent investment tax credit for a qualified small business investment (QSBI).

If the taxpayer sells his QSBI and reinvests the proceeds in another QSBI, he may defer the capital gains tax otherwise due on the sale.

In conjunction with U.S. Small Business Week, I would also like to urge Congress to develop a comprehensive export strategy. Increased exporting could have a dramatic impact on the Nation's work force. This is significant in light of the fact that small business creates approximately 80 percent of all the net new jobs in the United States. Further, a comprehensive export strategy will be utilizing an important avenue for broadening the country's economic base. This would provide our cities with a hedge against general downturns in the economy and with a means of increasing business opportunities for other domestic industries and suppliers.

As chairman of the Subcommittee on Tax, Access to Equity Capital and Business Opportunities, I conducted on April 14, 1983, an investigatory hearing regarding the administration's recent proposal to replace the existing domestic international sales corporation (DISC) tax incentive. Moreover, viable tax incentives should be considered as an important element of any comprehensive export initiative. My subcommittee will closely monitor the administration's drive to replace the DISC incentive. Whatever provisions are ultimately adopted, they should not be unduly complex for smaller firms.

In closing, let us view U.S. Small Business Week as a reminder that small business, our Nation's greatest job creator and innovator, has long been and should remain the backbone of a healthy and prosperous national economy.●

● Mr. DAUB. Madam Speaker, we in the Congress often acknowledge the importance of the role small business plays in our country. Each Member of this body regularly makes the point that the new jobs that are created in this country are almost all the product of increased small business hiring. It would seem then that the health of small business should be the prime concern of a Congress intent on helping Americans find jobs.

The problem is that what helps small business the most is what Congress likes to do least. What is more important than anything else is an economy free of inflation, interest rates that are affordable, and a healthy buying power possessed by the potential customers. This requires that we in the Congress avoid deficits and other inflationary measures. It means that we cannot spend billions of dollars that we do not have, forcing the treasury to borrow and limiting the capital available to small business. If we want to help small business, if we want to be viewed as friends of small business, then we must control the dangerous spending and taxing practices of this body.

In the past I have said on this occasion that we are frustrated by the fact that small business is difficult for Congress to address. Unlike other constituencies that the Congress can target a spending program for, the small business community is too large and too diverse to make a dent in. The activities of the Small Business Administration affect only 1 percent or less of the Nation's businesses directly.

There is no question that the small business community knows what it needs. No small business, no matter how new or old, is likely to mention Federal intervention in the marketplace, low-interest Federal loans for its competitors, or other schemes designed to place one enterprise at an advantage over another.

What each small business wants is for us to do our job. More than anything else they seek the optimism and prosperity that would come from an economy that is well managed. Madam Speaker, each day millions of small business men and women must match their expenses with their revenue. If they are lucky then there is a little left over that represents their profit. Often that profit translated into a salary would provide them an income below the minimum wage laws. They work hours that would not be tolerated if they were someone else's employee. These people face hardships, difficult decisions such as whether to hire or fire an employee are daily occurences; but they understand that such things are necessary to succeed in this world and meet the challenges the real world offers.

We in Congress should learn from their example. We should be willing to make the hard decisions that might make us unpopular with someone, we should be willing to make the kind of decisions about what we can and cannot afford. The small business does everyday and because they do we in the Government have a source of revenue that allows us to provide for the national defense, provide a system of justice in this country, and help those who are unable to help themselves. These things we owe the people who paid for them, not the politicians who often take credit for them.

I hope that each Member of Congress today takes occasion to stop and think about what small business means to this country. It is clearly the goose that lays the golden egg and when we undertake policies that threaten that goose we threaten as well the means by which we provide everything that flows from the Government. When we spend a dollar let us remember where that dollar came from and make sure that our economy will continue to make those dollars possible.●

● Mr. CORRADA. Madam Speaker, I am honored to join in this tribute today in which we commemorate the Small Business Week and honor the States small business persons and advocates of the year.

Small businesses are the cornerstone of our Nation's free enterprise system. Their growth and development is critical to our economic stability. Approxi-

mately 98 percent of all businesses in the United States can be considered small. They are responsible for the creation of more than half of the nongovernmental jobs, and according to the National Science Foundation and Commerce Department reports small businesses are 24 times more innovative per research and development dollar than large firms.

Small business owners are among the most dynamic and innovative leaders of the business community. Their eagerness and desire for success, and their creativity and determination has made our Nation a place of opportunities and prosperity.

One example of tenacity, hard work, and desire to succeed is Mr. Sergio Luna, chosen as Puerto Rico's small business person for 1983. Mr. Luna worked on his father's farm during Puerto Rico's long depression years. Gradually, by going to night school, he was able to complete a bachelor's degree in business administration.

In 1957, Mr. Luna joined Superior Paints Corp. There he served as general manager in manufacturing, product development, marketing and accounting until 1976. The company's sales increased in that period to $10 million annually, making it Puerto Rico's largest paint manufacturer. In 1976, Sergio Luna went on his own, forming Luna Paints Corp. with four employees. Luna Paints has become the third most important marketer of paints in Puerto Rico, controlling about 10 percent of the market. Fiscal year 1982 sales surpassed $2.5 million.

I want to congratulate Mr. Luna as well as all the 1983 State small business persons of the year and urge my colleagues to join in this tribute.●

● Mr. CONTE. Madam Speaker, thank you for granting us this special order to salute small business. I would also like to recognize the chairman of the Small Business Committee, Mr. MITCHELL of Maryland, and my dear friend and colleague from Pennsylvania, Mr. MCDADE, for the fine leadership they have provided the committee and all of us.

This year, small business deserves a special salute. Our country is just now starting to climb out of the worst recession since the Great Depression of the 1930's. From June 1981 through the end of 1982, this country lost 2.7 million jobs. But the sectors of the economy that are composed mainly of small business actually increased the number of people they employed. According to the President's 1982 "Report on Small Business," the finance, insurance, and real estate jobs increased by 65,000 and the services sector picked up 528,000 new jobs. Even though business bankruptcies totaled 65,807 in 1982, there were 560,000 new incorporations. This total is just under the 1981 record of 580,600. These numbers are the "proof in the pudding" that small business was a very important buffer during the recession. Without small business, the unemployment situation would have been much worse.

Many of you are familiar with the litany of statistics which suggest the importance of small business to the economy. Ninety-five percent of the firms in operation in the United States have fewer than 20 employees. Small business accounts for more than 50 percent of the private sector employment. Small business generates 60 percent to 70 percent of all new private sector jobs. Small business is the source of 40 percent of the gross national product. Small business is responsible for half of all the innovations and new technologies in this country. I could go on and on.

The point I would like to make is this. Small business owners are representative of the American dream. In this land of opportunity, they have discovered situations which can make them successful. They have utilized all their skills and talents in that situation. During the working day, they display qualities that make America great—creativity, hard work, and a determination to succeed, They have a sense of pride in their accomplishments and they are greatly respected by many of us.

My involvement with the small business community during my 25 years in Congress has been very rewarding. The change in your importance in the economy is reflected in the change in your status in Washington. When I first joined Congress, small business was just an infant. The Small Business Administration was only 5 years old. The House of Representatives had a Select Committee on Small Business.

Today, to borrow a popular advertising slogan, "You've come a long way, baby." Both the House and the Senate have Small Business Committees. Last year I was a cosponsor of a bill, the Small Business Innovation and Research Act which requires 10 Federal agencies to devote a certain portion of their R&D budgets to small businesses. The views of small business interest groups are not only listened to but solicited on various issues.

The future holds even more promise for small business. The SBA, through its Office of Advocacy, is becoming more and more vocal about Federal policies which will benefit small business. There are serious discussions taking place to include a small business representative on the Council of Economic Advisers and the Federal Reserve Board.

I am very happy I have been able to help small business develop into such a powerful position in the economy and in Washington. I am very anxious to be involved with small business in the future. I salute small business for your past accomplishments and wish them the best of luck in the future.●

● Mr. MARRIOTT. Madam Speaker, the President of the United States has designated the week of May 8, 1983, as "National Small Business Week." During the observance of this week, it is important that we reaffirm our commitment to a vital force in America's economy—the small business men and women of our country.

Before I discuss the state of small business in general, I want to take this opportunity to recognize one individual in my State of Utah, Mr. Steven J. Uresk of Roosevelt, Utah, who has been singled out as Utah's small business person of the year. Since 1964, awards have been presented to small business owners whose personal achievements and contributions best exemplify America's entrepreneurial spirit. Steven J. Uresk has demonstrated this spirit.

Expanding oil businesses had created a need for more printing facilities in Utah's Uintah Basin in 1979. Steven Uresk left his job with a Roosevelt printing firm to open his own one-man shop in a two-room building. With only $8,500 borrowed from a local bank, Steve purchased paper supplies and remodeled the space to include a darkroom, a pressroom, a paste-up desk, and an office. Business was good from the first day the shop opened. Within its first 2 years, the operation twice outgrew its facilities, and at the end of the third year, Steve opened a second printing shop in neighboring Vernal, Utah. The company now employs eight and is equipped with high-quality printing equipment, including a Heidelberg GTO press, the only one of its kind in the area. Steve Uresk continues to assess market potential in the Uintah Basin. Recently, the company ventured into the publishing business, and plans are now underway for further expansion in this area.

The contributions of Steve Uresk and the many other small businessmen and women across our Nation demonstrates American ingenuity. Their innovations and stamina will continue to reshape and enhance our lives.

Today, I am pleased to have this opportunity to join my colleagues in saluting and honoring not only Steven Uresk, but all small businessmen and women throughout the country which symbolize the true essence of America and the free enterprise system.

Unfortunately, the private sector's greatest source of innovation and job creation, the small business, has been an endangered species. It does not have to be that way. We, in Congress, can see to it that it does not.

The small business owner plays a crucial role in our national economy. As a past member of the House Small Business Committee and, as a small

businessman myself, I am very aware of the contribution the 11 million businesses make to our economy annually, both in terms of gross national product and private sector employment.

Unfortunately, the small businessmen and women of America, the backbone of the economy, are being suffocated under the weight of Federal laws, restrictions, regulations, and prohibitions which have dried up the venture capital they so desperately need. Clearly, the nightmare of the past several years must cease. But for this to happen, the bureaucrats in Washington, both in the executive and the legislative branch, must wake up.

The essential parts of an economic policy to assist the small business are in place. The need to have programs designed to assure unrestricted access by everyone to economic resources and markets must follow. An effective mechanism for achieving regulatory reform has been established. A policy of stable, moderate, monetary restraint must be followed. A fiscal policy calling for budgetary restraint coupled with important new tax incentives for work, saving, and investment has been put into practice. It must not be tampered with. The problems of inflation, high interest rates, access to capital and regulation to research and development, export and equal business opportunities must be faced by the Congress. The history of "throwing Federal dollars" at these problems has not been effective. Business failure rates are devastating.

More then 160 owners and managers of small businesses joined with accountants, attorneys, and Government officials in Washington, D.C., at the end of 1982 for the Small Business Capital Formation Forum. They discussed and clarified issues pertaining to capital formation by small businesses. In general, the participants confronted issues in four general areas:

One, access to investors,

Two, securities regulations,

Three, taxation, and

Four, credit.

At the conclusion of the sessions, the conference adopted 38 proposals, some of which included:

Tax credits for investments in small business, deferral of capital gains tax for funds reinvested in small business, one-time capital gains tax exclusion on disposition of a business on elderly business owners, safe harbor for small business on proposed IRS debt to equity regulations, and reinstatement of the jobs tax credit;

Creation of a new type of security, a small business participating security, and changes in the SBIC program and ERISA laws;

An increased exemption of small security offerings from filing and reporting requirements, introduction of substantial good faith compliance to exemptive regulations and adoption by States of uniform Federal exemptions; and

Liberalization of the SBA loan program and establishment of an SBA revolving loan agreement.

The message from the small business forum was clear: Incentives for small business capital formation are needed and attainable.

It is imperative that we look at what has contributed to the present state of affairs for the small businessperson.

One reason is the combination of long-term inflation with growingly excessive Government generated paperwork and regulation, which have increased the cost of doing business to a degree that it is difficult for the smaller firm to absorb the additional financial burden. The 97th Congress was successful in passing the paperwork reduction bill and it is a start but is only a start in the sea of redtape facing the young entrepreneur.

Then, of course, the obvious reasons: The high interest rates experienced in 1982 was the straw that broke the back of the small businessman. While we have a better interest rate figure facing borrowers at this time, as a result of a successful economic recovery program, we must not forget the ills of excessive Federal spending that brought up those rates.

Under the economic proposals of the past 2 years, inflation has been knocked flat. In January 1981 personal savings hit an all-time low of 5.4 percent. It climbed to nearly 7 percent in October, even more last month. Every percentage point increase in the savings rate adds about $22 billion to the lending pool, making more money available for loans, and ultimately, making interest rates fall. We are not only toeing the line on inflation, we are building our saving at the same time, to a level where we are nearly saving as much as our major competitors, the Germans and the Japanese. This is important to the small businessman.

We need to stick behind the economic strategies of the past 2 years to allow better interest rates and less regulations.

Bankruptcies and business failures rose from 1979 to 1982: almost 30 percent. But, if you look at the figures, the statistics reveal even more:

Data from the Internal Revenue Service indicated that the largest number of recorded partnership dissolutions—cases where businesses simply quit or the owners retired—were in fields dominated by small firms. The heaviest toll has been on the construction industries.

For the past several years, the smaller the firm, the less its chances for survival. A business with 21 to 50 employees had a 54 percent likelihood of surviving 4 years; but a firm of 20 employees or less had only a 30 percent chance of surviving that long. Ironically, the survivors among these smaller firms are the ones that create the most jobs.

So, today it is important that we remind the Congress, the Federal Government, and all Americans of the importance of small business to our economy and to the fact that they need our help. Small business employs 47 percent of the Nation's nongovernment work force; small business creates 86 percent of all new private sector jobs; in fact 75 percent of those new small business jobs are provided by firms less than 5 years old; and small business accounts for 80 percent of new jobs for black Americans.

In fact, minority enterprises are predominately small business, as are those owned by women. It is fair to say that small business offers the best opportunity for all Americans—regardless of race, color, or sex—for a meaningful share in the American dream of successful self-sufficiency.

Small business' returns to the economy are measurable in other ways as well. For example, small firms provide twice as many innovations per employee as larger firms.

What can we do, as representatives of these small businesses, to help the young company hang on?

We can broaden the tax base, tap the most innovative segment of our economy and harness the Nation's best job creating machinery.

While it is easy for us to stand here on the floor of the House and repeat the rhetoric of praise for the small businessman, and state what we ought to do, it takes the will of the majority of Members of this august body to carry out his ought to do. By a willingness of the U.S. Congress to—in the words of President Reagan—"confront uncertainty with creativity and determination to succeed," the same attitude which encourages our entrepreneurs, Congress can enact laws to encourage the formation and success of small businesses. Then, and only then, can America insure its economic standing in the world.

Small businesses are being helped today by the mending economy. Since 1979 the outlook for increasing employees and inventories has been dismal. But during the past 2 months the National Small Business Association (NSB) in a cross-country poll indicates optimism. And the President of the National Federation of Independent Business (NFIB), Mr. Wilson Johnson, directly relates this optimism to economic growth. Positive economic indicators, says Johnson, mean "small business owners * * * are now ready to put their money where their hopes are." There has been a substantial jump in investment activities for inventories, plants, and equipment. And since small firms still have lean inventories, new sales will result

in almost immediate orders to factories and suppliers. These mean new jobs. In fact, 14 percent of small business owners state they plan to increase employment in the next 3 months.

But small businesses need our help. They need two things desperately. First, sufficient start-up capital to get into the business. Then, they need economic stability and low interest rates so they can generate the capital to stay in business, and perhaps even to expand.

Small businesses do not usually generate the internal capital necessary to sustain them even after they are operating during extended inflationary periods. The central reality of economic life for small business is that they rely almost exclusively on debt capital, borrowed money. In fact, about 98 percent of the new capital needs of small business are met by borrowing.

The mercy of the marketplace, nor increasing grants and loans (all with Federal strings attached) have solved the financial problems facing new business.

First, the marketplace is distorted. With the enormous spending programs of the past years, tax laws have been distorted that actually encourage investors to put their money into safe unproductive tax shelters that create few—or even no—new jobs and often produce few—or even no—new goods. The Federal Government has used bracket creep, by pushing and pushing taxpayers into higher and higher tax brackets by inflation to create new revenues to further spend, spend, spend. This must stop and we as Members of Congress can stop it now—and stop it in an effort to aid not only the taxpayers in general, but the small businessman and the farmer—our backbone.

First, less taxes. The facts are now in. The revenues received from the first decrease in taxes have exhibited greater revenues to the U.S. Treasury—by reducing the highest tax bracket from 70 to 50 percent, investors are putting their money into jobs and taxable interests—not tax shelters. The fact is, if we really want to stimulate the job market, and continue to receive revenues into the Treasury—we should slash taxes even more. The House Budget Committee, in their budget for fiscal year 1984, suggested a repeal of the third year tax cut. This would only prove further harmful to the middle-income taxpayer—the small businessman and woman. We cannot take away the July 1983 tax reduction.

Further, the talk around town has been to eliminate indexing which was passed in TEFRA, the Tax Equity and Fiscal Responsibility Act of 1982. This, too, will be harmful to the small businessman. Indexing must be maintained if we are to put a cap on the increasing tax burdens being placed on our small businesses. Investment is essential to their survival. Drying out this investment potential is disastrous.

What about grants and loans? A loss rate of 38 percent on SBA loans is not a wise investment of American taxpayer dollars. Guaranteed loans are still not the best avenue for the small businessman as they are simply slightly over prime rate.

I, along with several of my colleagues in the House, believe in an alternative.

This alternative does not tinker with fiscal and monetary policy, and does not abandon the tax cuts—especially since the great percentage of small businessmen who file individual tax returns have already figured those cuts into their economic plans. Instead, we want to give the small business the tools to work around the high interest rates, and use a Federal-private sector partnership as the engine to make the business go.

Joined by over 30 of my colleagues in the House of Representatives, Members from both sides of the aisle, and in an effort to create a small business participating loan program, I have introduced H.R. 1902. Tailored specifically to attract investment capital to productive small firms, and away from dead-end tax shelters, it involves no Federal money whatsoever. Instead, it provides a package of tax incentives, beginning with a modest investment tax credit and combines that with favorable tax treatment on the participating earnings of the lender.

For example, if you own a small business, you can approach a lender for a loan of $100,000. H.R. 1902 would allow the lender to charge as little as 6 percent simple interest, plus a percentage of the profits that would be negotiated with the lender, for a number of years on which you both agree.

The lender would receive a $20,000 tax credit—$30,000 if you are a minority or disadvantaged firm. The interest would be taxed as ordinary income, but the share of the profits would receive preferential long-term capital gains tax treatment. Your interest payments would be deductible as the cost of doing business. And, since it is a loan, not a security, there would be no, I repeat, no Government redtape. You, the owner, and the lender would simply work out the best mutually agreeable terms.

But, here is the key element: Although you give up no ownership in the business, the lender's share of your profits means his or her success is dependent on your success. So, the lender has a vested interest in giving you the benefit of any business expertise he or she possesses. That element of vested interest is present in all of these necessary programs. The private sector participation will guarantee that someone is working at all times to make the investment a good investment, one in which the small business succeeds. And, in protecting himself, the private investor protects the taxpayers' interest as well.

Legislative initiatives have also been proposed to provide greater regulatory relief to small business. I am pleased to be a cosponsor of the Rulemaking Reform Act, a legislative veto measure. This provides Congress with a mechanism to tell Federal regulators, the fourth branch of the Government when they have gone too far.

Small business has contributed a great deal to our national economy throughout our history. They deserve the best efforts of their elected representatives. We must pledge, together, to do no less.

We as legislators must insure a fighting chance of insuring that our small businesses will not become the innocent casualties of a battle to rescue this Nation from the reckless and shortsighted fiscal, monetary, and bureaucratic excesses of the past. Let us not let this opportunity slip away.

Small business people in Utah tell me that they are fighting for their lives. If we are to have a small business sector of the economy capable of generating the jobs that we must have, we must have a national policy that fosters the formation and growth of small businesses. Unfortunately, this policy has not been given a priority.

As we observe this week, May 8, as National Small Business Week, let us recognize the necessity of this priority. For all the importance that small business contributes to our national economy, they should not get the short end of the stick. Small Business Week is an appropriate recognition of the importance of small business. But what small business needs is not a week of flowery speeches and nice ceremonies but a genuine policy that incorporates small business into the decisionmaking process and genuinely gives small business the clout it deserves. Surely the job creator, innovator, melting pot, exporter, competition provider, and risk taker of America is entitled to no less.●

● Mr. HILER. Madam Speaker, I first want to commend the distinguished chairman of the Small Business Committee, Mr. MITCHELL, and our ranking Republican member, Mr. MCDADE, for their leadership in arranging for this opportunity to honor our Nation's small business. By providing small business its own standing committee in both the House and Senate, we have clearly indicated our support for an interest in the most entrepreneurial part of our Nation's economy.

It is a special honor for me personally to serve on the Small Business Committee, especially as the ranking Republican on the Subcommittee for Energy, Environment and Safety

Issues Affecting Small Business. My own small business background in the foundry industry has helped me to understand many of the issues which are important to small business, including natural gas deregulation, taxes, interest rates, Government spending, and overregulation.

Madam Speaker, while most of us in these Chambers today realize that economic recovery is now underway, one that is long overdue, I do not believe enough of us appreciate just who is leading us out of the recession. It is small business. We read daily of the dramatic increase in housing starts. They were up 75 percent in the first quarter of this year compared to last year. What we do not see in those numbers alone are the thousands of homebuilders, realtors, and others who, through their hard work, dedication, perseverance, and belt tightening during this difficult recession, have helped poise our economy for a healthy recovery.

We have heard recently that automobile sales are up 32 percent from last year. What we do not hear often enough is how the initiative of automobile dealers are bringing consumers back into their showrooms. Their confidence in their products and our Nation's economic future have helped renew consumer confidence, the heart of our economic recovery.

Madam Speaker, I am very honored to represent a region of this Nation, northern Indiana, that has a rich small business heritage. Northern Indiana, as with nearly every other part of this country, relies on small business as the backbone of the area economy.

I am especially pleased to report that our economic recovery is becoming particularly evident in northern Indiana. Only 3 years ago, Madam Speaker, Elkhart County, Ind., the home of the manufactured housing and recreational vehicle industry nationally, was suffering through a very deep recession. High interest rates and questionable energy supplies and prices had put a damper on this industry. Unemployment there in 1980 reached 15.7 percent. Well, that industry, which is largely comprised of small businesses, is now booming. Unemployment in Elkhart County in March plummeted to 7.7 percent, less than one-half what it was only 3 years ago. While that is still too high, Elkhart County is now in a position to become a major center of economic activity in the Hoosier State.

Here are some of the signs of economic recovery in that industry:

Coachman Industries, a major manufacturer of recreational vehicles, had to go before the news media in its effort to fill jobs. Already, the recreational vehicle industry has almost exhausted its supply of 1983 models. RV retailers are reporting exceptional sales, and RV components suppliers, which include air-conditioners, chassis frames, wood products, and other industries, are reporting booms of their own.

Fairmont Homes, a major manufactured-home supplier in Nappanee, Ind., has announced plans for a new million-dollar plant. They also participated with other leaders in this industry in a national demonstration project near Elkhart featuring many manufactured homes that clearly meet today's and tomorrow's demand for comfortable, well-constructed, and affordable homes. I had the opportunity to visit demonstration sites last year and am very impressed with their innovations.

In the South Bend-Mishawaka area of the district I represent, several small businesses are reporting improved economic climates, including Nyloncraft Industries, which late next month is featuring an open house in celebration of their expansion. Nyloncraft is one of the leading pioneers in the plastics industry, particularly with injection molding.

One example of a new small business that has the promise of becoming a big business in northern Indiana is Geri-Wear, which specializes in providing clothing to wheelchair patients, particularly senior citizens. I am very impressed with the founder and president of this growing South Bend company, Mrs. Virginia Voll, and deeply admire her compassion and ingenuity.

Another company which has northern Indiana buzzing is the Avanti Corp., manufacturer of the vehicle by the same name. It is clearly America's best built car, and its new owner, Mr. Stephen Blake of Washington, D.C., has ambitious plans for this small South Bend company. The Avanti symbolizes the great pride Hoosiers have traditionally taken in their work. Until recently, only 200 or so handcrafted Avanti's were made each year.

I can go on and on.

Once our economic recovery has been in full swing for awhile, Mr. Speaker, I have no doubt that people will turn toward northern Indiana for proof positive that small business is the backbone of a healthy and prosperous economy. The optimism I have expressed today is a small reflection of attitudes throughout the Third District which I represent in this Congress.

But while optimism is growing about our economy, it is imperative that the concerns and opinions of small businesses be considered seriously. While we talk of high interest rates and how to bring them down, it is small business that suffers most. While we complain of high deficits, it is small business that must bear the brunt of our inability to control spending. While many of my colleagues here talk of raising taxes to balance the budget, it is small business who must largely foot the bill for our extravagance. While we praise and recognize the importance of small business for its role in our Nation's economy, is it not even more important that we follow up our deeds with action? To give our words of praise the meaning they deserve, we must do those things which help, not hinder small business. And that does not include extravagant spending policies, raising taxes, and increasing an already-high regulatory burden.

Madam Speaker, I think it is only fitting that we emulate the courage, the initiative, the resourcefulness, the efficiency, and the commonsense that our small business men and women possess and must exercise every day. They do not call for more Federal spending. They do not clamor for more costly regulations. They certainly have not asked me to raise their taxes. Like most Americans, they too want more jobs. After all, small business is the No. 1 job creator in our Nation. What they want from us is what they must do each and every day, to make the tough decisions necessary to get our Federal Government back into sound fiscal shape, to make it more responsive, to make it more efficient, to insure an honest day's work for an honest day's pay, and to run the Government like they run their own businesses. Unfortunately, Madam Speaker, if small businesses were run like we run the Federal Government, there would be no small businesses. Therein lies the challenge that Small Business Week 1983 provides.

My thanks again to Chairman MITCHELL and my good friend, Mr. MCDADE, for this opportunity to pay tribute to our Nation's small businesses.●

● Mr. BILIRAKIS. Madam Speaker, I am delighted to have this opportunity to join in the commemoration of National Small Business Week.

There is no segment of our economy more important than our small business men and women.

Not only do they represent the backbone of our economy, but it is to these small business men and women that we must look if we are to solve our country's unemployment woes.

The Fortune 500 companies, as vital as they are to our Nation's economy, are not going to provide the new jobs necessary to bring the unemployment rate down. And they are not going to create the jobs necessary to meet the needs of future generations.

Let us face it, our Nation's automobile factories and steel mills are never going to employ as many men and women as they once did. They are being forced to go heavily into automation in order to compete with foreign producers.

So the new jobs this country needs—and needs desperately in some areas—

are going to have to come from small business. They are going to have to come from the existing businesses which expand their work force from 10 to 20 or 10 to 50.

They are going to have to come from the man or woman with a new idea, a new concept, who has the courage and the determination to go into business for himself.

These individuals are out there. What they need is encouragement.

What they need is a climate in which they can prosper.

And that is the job of Congress.

All too often, in the past, the laws we passed and the rules and regulations sparked by those laws have served to place virtually unbearable burdens on small businesses. In effect, we have done a great deal to discourage small business and the creativity and entreprenurial spirit it represents.

Recently, however, the climate has improved. Many of the actions of the 97th Congress eased the burden on small business. Not enough; but at least, it was a start.

So, as we in the House of Representatives take this time to commemorate National Small Business Week and honor the men and women who are our small businesses, I hope we will also dedicate ourselves to creating the kind of climate in which they can grow, prosper, and flourish.

That is why I wanted to serve on the House Committee on Small Business, to help bring about that climate.

As a former small businessman myself, I know all too well just how onerous some of the demands placed on business by this Government can be.

And I know how difficult it can be meeting a payroll.

But, I also know that if we in the Congress will create the right climate, the entrepreneurial spirit which made this country what it is today will once again come to fore.

And when it does, we will see a national economic vitality unmatched by anything we have seen in recent years.

All we have to do is water the ground in which small business takes root, and help the entrepreneur learn to tend the crop.

For that reason, Mr. Speaker, I will be sponsoring a small business conference in the Ninth Congressional District of Florida next month.

The conference, entitled "For the Nation's Future—Helping Small Business Succeed," will be held June 25 at Clearwater Beach. And I am hopeful we can provide the kind of assistance and expertise which will enable the small business men and women of the area to prosper and flourish.●

● Mr. CLINGER. Madam Speaker, in official recognition of National Small Business Week, I find it fitting to reflect upon the unique contributions of America's small businesses to our Nation's economy and the lives of each and every citizen of the United States. The efforts of small business firms in the marketplace are integral to the Nation's economic growth. Small businesses are on the cutting edge of recovery, leading the way in job creation, product innovation, and expansion through new sources of venture capital as our economy emerges from the depths of inactivity and decline.

To drive home the importance of small business in the fabric of our economy, I would point out, Madam Speaker, that over 97 percent of all nonfarm businesses are small businesses under U.S. Small Business Administration guidelines. By their sheer numbers it should be evident that small businesses operate and bolster every facet of our national economy. In addition to being a central part of our national economy, America's entrepreneurs are among the most dynamic and innovative of our business leaders. Recently, when so many sectors of our economy were suffering from high unemployment and cutbacks in production capacity, small businesses were cautiously expanding. Between 1979 and 1981 approximately 2.8 million jobs were added to U.S. industries. Small firms with 500 or fewer employees accounted for 60 percent of the increase. Most recently, in 1982, there were approximately 560,000 new businesses incorporated in the United States, almost all of which were small firms.

The men and women in small business have also been leaders in bringing product and process innovation to the marketplace. The aerosol can, air-conditioning, outboard engines, pacemakers, precast concrete, and the zipper are just a few of the myriad of revolutionary concepts brought from drawing boards to the market by small businesses in the 20th century. The prospects for continued economic contributions from small businesses are promising. The advent of programs like the small business innovation development program, which channels Federal research and development funds into small hi-tech firms, will reinforce the historical vitality of small business innovation. In addition, private venture capital funds now have a pool of about $7 billion which is available to new and growing small firms.

Madam Speaker, I ask my colleagues to join me in saluting America's entrepreneurs and small business owners. These men and women embody the American pioneer spirit in facing uncertain markets with their undaunted determination to succeed. During National Small Business Week, May 8–14, let us pause to reflect on the accomplishments of small business in America and applaud those who have helped to make our country great. Therefore, Madam Speaker, I heartily endorse the special order to honor the small businesses of our country.●

● Mrs. JOHNSON. Madam Speaker, May 8–14, 1983, has been designated as "National Small Business Week." Along with my colleagues, I am delighted to pause and recognize the tremendous contribution of small business and small business people to our Nation.

Our country owes a great debt to the men and women of our small business community. Small businesses today produce close to 40 percent of our gross national product and employ 50 percent of the nongovernment labor force. In this country, two out of three new jobs are created by small business and small businesses produce twice as many innovations per employee as do larger firms.

I would also like to recognize the key role that small business has played in providing economic opportunities for women. Today, firms owned by women account for 7.1 percent of all small businesses. This is a 30-percent increase since 1977.

The small business sector remains the most dynamic, competitive, and productive sector of today's economy. Their contributions to our society are far greater than their numbers or size would judicate. Small business is no small matter as far as America is concerned.

During National Small Business Week we acknowledge that perhaps no other group has done so much to make our country prosper. The contributions of small business to the U.S. economy in terms of new jobs created, initiation of innovative new products and services, and opportunities provided for people with initiative, imagination, and grit is very impressive and at the heart of our promise as a nation.●

● Mr. MONTGOMERY. Madam Speaker, as you know, the President has designated the week of May 8 as "National Small Business Week." I want to join with my colleagues in honoring the great contributions the owners and employees of these businesses have made to our Nation's progress.

Statistics from the Department of Labor for 1981 show for my State of Mississippi that about 31 percent of the work force was part of a business with less than 20 employees. Another 30 percent worked in a small business which employs between 20 and 99 persons. As you can see, the impact small businesses have on our State is very vital to the economy.

I believe the economic recovery has begun and I hope that we in Congress will be careful to take action that will spur that recovery and aid the small business men and women hit so hard by the recession. Also, we should look closely for ways to ease the regulatory burdens which have hampered the full

operations of many of these businesses in the past.

A prosperous small business environment is important to the continued progress of our Nation and I hope we will work toward this goal here in Congress.●

● Mr. EVANS of Iowa. Madam Speaker, Small Business Week, 1983, provides a fitting opportunity to pay tribute to the thousands upon thousands of small business owners and entrepreneurs across the United States whose creative ambitions and individual enterprises make such an outstanding contribution to the vitality of our American economy. Since the earliest colonial times our Nation has relied on individuals, competing in a free and open marketplace, for the goods and services necessary to sustain a growing economy. The challenges created by this competition, and the innovative spirit it has fostered, have resulted in a degree of prosperity unmatched by any other nation and a record of accomplishment which is truly worthy of praise.

It is the legacy of this innovative spirit which places American small businesses on the threshold of even greater accomplishment as we face the challenges of tomorrow. It is within this community that the most dynamic innovations and developments are being generated, creating new jobs for our citizens and new technologies to meet changing needs.

Madam Speaker, this spirit of accomplishment is exemplified by the individuals receiving the Small Business Person of the Year Awards for 1983. These individuals have demonstrated outstanding ability as they have directed businesses toward greater sales and employment, developed innovative solutions to the needs of their customers, and contributed time and resources to community-oriented projects.

I am particularly pleased, Madam Speaker, to recognize Char Les and Edwin F. Klouda of Swisher, Iowa, who have been nominated as Iowa Small Business Persons of the Year for 1983. Since 1971, Manufacturing Specialties had designed and produced plastic injection molds to meet a wide range of customer needs. In 1981 this husband and wife team formed Plastic Specialties, which manufacturers plastic and glass fiber components used to improve the insulating qualities of concrete walls. The firm is also involved in designating an earthquake resistant condominium project to be built in Dale City, Calif. These innovative developments have helped Plastic Specialities to achieve a 56-percent annual growth in sales every year since 1977.

These outstanding accomplishments represent the spirit and vitality of the small business community, in Iowa and across the country. I am pleased to join in recognizing these efforts and extend my congratulations to Char Les and Edwin F. Klouda and to all recipients of the Small Business Person of the Year Awards for 1983.●

● Mr. ACKERMAN. Madam Speaker, it is with both personal pride and appreciation that I join in this tribute to honor the small businessmen of this country, and to reflect upon the important contributions they make to our economy and the overall improvement of life in America. I can think of no other pursuit that more enduringly captures the progressive quality of the American ethos—that entrepreneurial commitment which harnesses the energy of many individual citizens in order to advance the opportunity, well-being, and even the feelings of social cooperation and public spirit for society as a whole.

America's affection for this livelihood is underscored by recent polls that show that 9 out of 10 Americans have favorable attitudes toward small firms. Almost 40 percent of private sector employment is in small, independently owned businesses. They have traditionally played a hugely critical role to the economy in terms of job creation.

A landmark study by a researcher from the Massachusetts Institute of Technology a few years ago affirmed that 80 percent of new jobs between 1969 and 1976 were created by firms with fewer than 100 employees. And despite the present business climate marked by recession, takeovers, and corporate mergers, small businesses have weathered the storm. Their share of employment has remained remarkably stable over the past quarter century. With our economy crippled by devastatingly high unemployment rates, we must recognize this particularly vital role of small businesses.

Small businesses are also credited with being the most productive source of technological and product innovations. Small businesses are responsible for many important innovations that have improved the quality and style of life for the rest of us, from the airplane, the assembly line and overnight national delivery service to the personal computer and the safety razor, to name just a few.

More important, studies have shown that small businesses not only contribute a disproportionately greater share of product innovations, but they also bring these products to the market faster than larger businesses.

In the current climate where many American businesses find themselves hard pressed by competition from abroad, it would be wise to reaffirm those values and practices which characterize the "excellence" of small firms, and from which all companies can learn. The advantages of well-organized smaller units, aided by employee contributions, personnel/management cooperation, a sense of pride in one's labor and responsibilities, and eagerness for improvement—all are being incorporated by larger businesses to better equip them for today's economy.

Like more than one-third of my distinguished colleagues, I have been a small businessman myself, and as a former member of the board of directors of the Flushing Merchants Association I take special pride in honoring the gainful rewards contributed by the millions of small businessmen in every community across our Nation.●

● Mr. MINETA. Madam Speaker, as a Representative of Santa Clara County, one of the fastest growing areas in the country, and as the owner of a small general insurance agency, I am well aware of the important and substantial role that small business plays in our economy. Indeed, Silicon Valley has grown famous as a vivid example of the innovation and productivity so typical of small companies and lone entrepreneurs.

The electronics industry owes much of its success to the genius of a few small companies and entrepreneurs who had the vision and dedication to move us into the world of advanced technology. Yet the successful economic development of Santa Clara County is not only due to these high-tech geniuses. Successful economic development of this fast-growing area is also highly dependent on the service and retail industries. The majority of companies comprising these industries are small businesses. These companies are indeed the backbone of our economy. They provide the basic services and goods necessary to our daily lives.

It is important that we take the opportunity offered to us this week to voice our appreciation for the women and men who run these small businesses. However, it is not enough merely to voice appreciation. We must also grow more aware of the special concerns of these entrepreneurs.

We, in Congress, must be sure that our efforts promote, rather than hamper, the growth of small business. Last year, Congress passed several pieces of legislation to ease the regulatory and tax burden of small companies and we should continue these efforts. The best thing we can do, however, to promote the economic health of America's small companies is to get our economy back on its feet.

According to the President's March 1983 Report on the State of Small Business, small business failures have increased dramatically since 1980. Between late 1981 and late 1982, the number of bankruptcies increased by 38 percent. The report attributes this tragic increase in bankruptcies to the height of interest rates and the severity of America's recession.

Thus, to provide significant help for small business, Congress must do more than offer praise. And we must even offer more than regulatory reforms. To help America's small businesses, we must help strengthen the economy on which small businesses depend. With respect and appreciation for the business people who make America's small businesses work, let us proceed with that task.●

● Mr. LUKEN. Madam Speaker, May 8–14 has been designated "U.S. Small Business Week" for 1983. It is most appropriate for this Nation to set aside a week each year to honor those private entrepreneurs who are on the frontlines of economic battle daily in the pursuit of earning a living and providing employment to millions of Americans.

Those owners of small businesses are today's true pioneers who are willing to take the risks, the long hours, and the headaches that can go along with running a small business. They also, however, reap the rewards of seeing something built of their own creation for which they can claim responsibility. There is little that can compare to the thrill of seeing one's own business expand and develop new products and services.

The last year has not been an easy one for any business. With historically high interest rates, a weak national economy, and consumer timidity, times have been difficult for most businesses. The job that has been done by small business is nothing short of amazing. Compared to larger businesses, small businesses have coped with the ravages of the recession rather well. According to the President's report, "The State of Small Business," they were better able to withstand the recession than larger concerns.

Although small companies have fared comparatively well with regard to employment and income, they have not done well in avoiding bankruptcies which are at a very high level. There are today almost 500 firms filing bankruptcy per week. "The State of Small Business" reports this is due to the continued high interest rates and the length of the recession. Given the fact that 500 dreams are being broken on a weekly basis, we, in Congress, must do what we can to improve the business climate in the United States so that small businesses can prosper and hire some of the Nation's unemployed.

As chairman of a Small Business Subcommittee, I am aware of the difficulties facing our business community and I am working to do what I can to provide the necessary and appropriate help. Perhaps the most important obstacle to overcome for most small businesses is access to capital. Although the prime rate has dropped to a nominal rate of 10.5 percent, that is still quite high in real terms. Further, the rates paid by numerous businesses certainly exceed the often-quoted prime rate. In order to provide stable and affordable interest rates, we must adopt prudent fiscal policies in Congress and I intend to continue to oppose wasteful spending. In addition, however, I am supporting a new instrument for providing necessary capital to small business known as the Small Business Participating Debenture. This hybrid of debt and equity could provide critical funds for America's expanding businesses.

It is also essential to maintain one method of financing small business—the industrial revenue bond. IRB's have enabled some businesses to expand which otherwise might have stagnated. At this time of tight money, we should do what we can to preserve those programs which have been effective, such as industrial revenue bonds. In fact, a Congressional Budget Office study in 1981 showed that IRB's have been used overwhelmingly by small business.

Those of us in Congress who champion small business also have a responsibility to examine proposed legislation for its potential regulatory impact. Last year, we enacted the Regulatory Flexibility Act which requires Federal agencies to consider the impact of their proposed regulations on small business prior to promulgating new rules. Clearly, regulations have a greater effect on small business because the cost of compliance is spread over a smaller revenue base. Small business is less likely to have a full-time law department. The cost of unnecessary regulation falls on the consumer.

If this small business week serves to remind Congress of the contributions made by our small entrepreneurs, it will have served a useful purpose. For it is important for all lawmakers to constantly consider what the impact of their actions will be on the small business community.

Madam Speaker, I appreciate having this opportunity to say how much small business means to me. We have a very active and hard-working group of business people in Cincinnati who ask only that they be given a fair chance to survive in the business world. I am very pleased that we have set aside this week to say to them that we appreciate their work and will consider their needs throughout the year.●

● Mr. SNYDER. Madam Speaker, I appreciate the opportunity to rise in recognition of the vitality and the importance of small business in our Nation's economy and to salute the Kentucky Small Businessman of the Year—Mr. John C. Mouser—a man who personifies the promise and the potential of small business as well as he exemplifies the dynamism and drive that makes small business such a driving force in our economy.

In 1969, John C. Mouser purchased a small Key Market in Crestwood, Ky. When he bought it, the store had a weekly sales volume of $4,900. His net profit after the first year was $926.66. Despite intense competition from chain food stores, Mr. Mouser gradually and continually increased the customer base of his store by paying careful attention to personal service.

In 1976, with the help of a Small Business Administration guaranteed loan, he moved to a new location, where he now has a sales volume of $63,400 weekly. In 1978, he purchased a second store in Middletown, Ky., and boosted the sales there from $12,000 to $30,000 per week. In 1979, Mr. Mouser added a third store in Campbellsburg, Ky.

Thirteen years later after John Mouser entered the supermarket business, his operation had grown to three stores—employing 61 people with a sales volume of $143,000 weekly.

By putting his own future and his own talents on the line—by bucking the odds and persevering through intense competition and rough times—John C. Mouser proved that free enterprise still works and that small business is still the driving force in the free enterprise system.

I congratulate John C. Mouser for the honor of being recognized as the Kentucky Businessperson of the Year. He is a very fitting representative of the multitude of outstanding small businessmen and women of the State of Kentucky and of the Fourth Congressional District.●

● Mr. STENHOLM. Madam Speaker, I am happy to be able to take part today in the recognition of a special sector of our society as we observe National Small Business Week. This is an opportunity to celebrate not only the accomplishments of the small entrepreneur but also the strong character, the motivation, and the freedom of spirit that are so characteristic of American small businessmen and businesswomen.

We have heard the small business statistics before: About half of all Americans are employed by small businesses; these businesses create two out of three new jobs; and they provide the greatest portion of our Nation's growth in productivity and technology. We, as a nation, rely on them: If American democracy is humanity's grand experiment, then each small business, operating in a free marketplace, is one of the many small miracles that makes that system work. Small businesses are an important part, and an important cause, of our Nation's diversity and our desire to strive for excellence.

While the old frontier has disappeared into the pages of history books, a true pioneer spirit still exists today: It lives in the dreams, the hard work,

and the achievements of the small entrepreneur. He or she is a risk taker, an investments analyst, a manager, and more; he or she is our most effective ally in fighting unemployment and keeping our economy competitive in today's world.

When considering the role of small business in today's society, I am reminded of the familiar saying, "Give a man a fish, and you have satisfied his hunger for only a few hours; but teach him to fish, and you have given him the means to eat for his lifetime." The wisest role our Government can play is to help our small businesses during the especially tough times—in a way that helps them help themselves—and then free them up as much as possible to use their creative energies.

In this National Small Business Week we pause to offer millions of small businessmen and businesswomen our recognition, our thanks, and our willingness to work together to continue building a better nation.●

● Mrs. BOXER. Madam Speaker, I am very pleased today to be able to participate in this special order honoring small business in our country. Small business is our Nation's most significant employer. It is the economic backbone of my California district and of our country as a whole. The Nation's 13 million small businesses provide two out of every three jobs which exist in this country, and they retain employees longer.

Furthermore, small business is resilient, innovative, and very productive. The recent State of Small Business study indicates that they have fared much better than other parts of the economy in our current economic slump.

Because of their large numbers, their diversity and their hard work, small businesses play a key stabilizing and producing role in our national economy. Almost 40 percent of the gross national product is provided by small business.

Finally, small business is perhaps the most important part of our country's economic future. The recent revolution in technology and communications has been led by small business. Certainly, the Silicon Valley and other parts of the San Francisco Bay area have been recognized as the world leaders in computer and related technology. Most of those innovations have come, and I expect will come, from individuals and small business. One study shows that small business produces 2½ times as many innovations as large business.

I believe that American workers have the skills and the creativity to continue to lead the world's revolution in technology and I believe that small business will continue to be in the forefront of that leadership. It is fitting today that we honor this vital segment of our society and our economy.●

● Mr. BEDELL. Madam Speaker, this week is dedicated as a tribute to America's small business community. We all know that small business supplies most of our employment and productivity-improving innovations. I also think we can all agree that small business is the lifeblood of not only our economy, but of our entire society. In every community throughout America, small businesspeople blend together to weave the fabric that keeps our Nation warm and alive. Small business is truly America's past, present, and future.

The past few years have been particularly tough for small business. Business bankruptcies have been running at a rate that is reminiscent of the Great Depression. Governmental policies in the areas of procurement, antitrust enforcement, taxation, regulation, and export assistance have been adopted and applied against the best interests of the small business community. Capital for small companies remains scarce and expensive. In the past decade, small business has seen its share of gross national product erode and, for the first time in history, dip below the share of GNP held by big business.

Now, I know that the purpose of this special order is for the Members to say nice things about small business. I hate to put a damper on the party, but we should all stop for a minute and think about what is really happening in our Government.

The chief antitrust enforcement official in our Government has said, and I quote, "There is nothing written in the sky that says this world would not be a perfectly satisfactory place if there were only 100 companies." Let me read that statement once more, "There is nothing written in the sky that says this world would not be a satisfactory place if there were only 100 companies."

That same official also said that he would not enforce the law that prohibits large companies from vertical price maintenance. What makes this statement especially appalling is that it comes on the heels of a Supreme Court ruling that vertical price maintenance is per se illegal. This official said that although he was aware of the Supreme Court decision, he did not agree with it, so he was not going to enforce the law, and that was that. So big businesses know that they can break the law and not get prosecuted.

On another front, the Assistant Secretary for Tax Policy has said on the record that he does not care if an item in the Tax Code discriminates against small business vis-a-vis big business. He clearly said that he doesn't think those policies should be changed.

In another agency, the man in charge of energy research in our Government ordered the abolition of an entire office that specialized in supporting small business energy research projects. He took this action without even knowing what projects the small businesses were working on. How do I know that he did not know? When I asked to review the files of the projects, his office had no idea where they were.

In still another area, the procurement policies of our Government have been steadily shifting businesses opportunities away from the small business sector. Not only is it becoming increasingly difficult for the Government to contract-out work to the private sector, but when they do, it has become easier to give the work out in large, consolidated "umbrella" contracts that severely restrict opportunities for small business.

Madam Speaker, I could go on and on citing instance after instance. But I only intend to demonstrate that our Government's basic philosophy toward small business must be changed. If we are really serious about small business, we, in the Government, better start backing up our words with action.

I challenge this administration to call another White House Conference on Small Business. The conference should be modeled after the 1980 White House Conference on Small Business. At that conference, small businesses from all over the country came to Washington for an open and sometimes painfully honest working session. Out of the conference came 60 priority recommendations. From those recommendations came several landmark laws such as:

First. The Equal Access to Justice Act which said that in lawsuits between the Government and small business, if the business won, the Government would be liable for the legal expenses of the small business.

Second. The Paperwork Reduction Act which required agencies to issue paperwork impact statements and mandated a 25-percent cut in Government paperwork.

Third. The Regulatory Flexibility Act that permits 2-tier regulations to help Small Business.

Fourth. The Small Business Investment Incentives Act which makes it easier for small business to attract venture capital.

Fifth. The Patent Trademark Amendments Act which provided that small businesses retain title to patents developed during Government contracting.

Sixth. The Small Business Export Expansion Act which provides matching funds to organizations that help promote small business exports.

Seventh. The Small Business Innovation Development Act which dramatically increased the amount of Federal research and development funds that goes to small business every year.

But, almost as important as these very significant legislative successes, the 1980 White House Conference on Small Business changed a lot of attitudes about small business that were held by Government officials. Small

businesspeople developed a spirit of activism that forced policymakers to wake up and take notice. Government officials that push policies like those that I mentioned earlier could use a large dose of humility that the conference would administer. They need to go see and hear firsthand over and over again how the small business community is affected by the decisions they make.

The time to act is now. The challenge is for us to back up our rhetoric with action. The small business community needs our help to give them the opportunity to be heard.●

● Mr. HORTON. Madam Speaker, today I join with my colleagues to pay tribute to small businessmen and women across the United States. President Reagan has designated the week of May 8 as National Small Business Week. I think it only fitting that we honor those Americans who have the courage and drive to establish their own small business and build a successful enterprise.

Very few Americans seem to recognize the important contributions small business makes to our society and economy. It is small business that employs two out of three of all Americans. It is small business that generates over 45 percent of our GNP. It is small business that forms the basis of our cities and towns and it is the innovation and imagination of small businessmen and women that continue to make the marketplace a constantly changing environment.

During these troubled economic times, it is important that we recognize and encourage the achievements of small business. If we are to continue to pull out of the worst recession we have faced since the Great Depression, much of the burden will be borne by small businessmen and women. Additionally, as we cope with growing competition from foreign business and industry, we will continue to depend on small business for new ideas and the competitive edge we will need to keep the American economy strong and American business No. 1.

In closing, Madam Speaker, I would like to join my colleagues in congratulating our small businessmen and women on their contributions and on the courage they have shown during these difficult times. I look forward to a continued climate of cooperation between small business and the Congress as we work together to strengthen our economy and put Americans back to work.●

● Mr. KRAMER. Madam Speaker, it is a privilege for me to join Members on both side of the aisle to praise the efforts of men and women who operate small businesses of all kinds in all parts of our country.

I salute the initiative of Mr. MITCHELL, distinguished chairman of the Small Business Committee, and Mr. MCDADE, distinguished ranking member, in requesting this special order to provide an opportunity for Congress to honor the hundreds of thousands of small business proprietors who are the strength and the vitality of this Nation's economy.

Small business is the mom and pop grocery store, the local hardware store, the local jeweler, your insurance and real estate agents, men and women who make and sell electronics and manufacturing equipment. Collectively, they are the backbone of the American economy and the American dream. Small business accounts for 55 percent of all private employment in this country. They produce 48 percent of this Nation's business output, 43 percent of the GNP, and more than 50 percent of America's inventions and innovations. In fact three out of every four workers are employed by small establishments, and these businesses create a staggering 80 percent of all new jobs.

There can be no question that our Nation's survival depends on the health of our small businesses. Congress must remain aware of the role small business plays in our economy, and must remain committed to providing a climate of opportunity for small businesses to grow and prosper. If we in Congress ignore the needs of these small businesses, our economy will not mend, our jobless will not find new employment, our productivity will not increase and we will lose our place as a world leader in technological innovation.

Last week, I had the pleasure of meeting with 12 of my constituents who were in Washington attending the annual Conference of the Small Businesses United. What I found remarkable about these folks who left hectic schedules back home to come to Congress, was that they were not asking for a handout, but were offering assistance in mending the economy. The challenge they laid before Congress was to create a climate that will enable small businesses to help themselves. That challenge is worth pursuing and I applaud their initiative, and integrity and confidence in the future of our country; and I support their goals of strengthening our Nation's economy and concurrently our Nation's pride in its workmanship.

I encourage my colleagues to pay particular attention to the problems facing small businesses during the next few years. Inflation, high interest rates, excessive taxation, and burdensome regulations are serious problems in any business; but they are particularly onerous to small business—75 percent of which are sole proprietorships, file individual tax returns, and rely on personal savings as a major source of capital. Clearly any steps Congress takes to encourage capital formation for small business growth would translate to a boom in the economy. Conversely, any steps Congress takes which limits or decreases the availability of capital for small business proprietors will hurt the general economy.

One such step which some have been urging but would have disasterous implications to small businesses is the repeal of the third year of the tax cut, and tax indexing. As I mentioned earlier, fully three-fourths of all businesses are not corporations, and do not pay corporate income tax. They report their business income through individual returns. A repeal of the third year and indexing would raise their taxes, slow return to full output and reduce investment in new plant and equipment and most importantly new job creation. It is critical that Congress remember the distinction between business and households does not exist in the case of three-fourths of our countries small businesses, and that a negative impact on one will negatively impact the other. Congress must encourage capital formation in small businesses, not hinder it. This is not a handout, simply a fair shake.

Let us not forget that when big business is cut back because of a lack of capital or a poorly performing economy, they become smaller. However, when small business is cut back, they go out of business, and with each failure we all lose a little more of the American dream of free enterprise which has contributed in a big way to making the United States the best example of free enterprise in the world. Again, my heartiest support to the men and women who operate small businesses all across our country and who continue by hard work and long hours to make the American dream a living reality.●

● Mr. UDALL. Madam Speaker, I rise to honor the small business community of this country. As the Nation's largest employers, they are the foundation of this country's economic development. In these times of high unemployment, the involvement and success of America's many small businesses will be essential to the recovery of a productive and stable economy. The business community, through hard work, devotion, and good old American ingenuity, has made this country a better place to live. The small business community has enabled the people of this great country to become accustomed to a standard of living that far surpasses any country in this world.

I would like to take this opportunity to recognize Roberto Ruiz, Ben C. Hill, and Paul Klores, three Arizonans to be honored by the U.S. Small Business Administration. I am proud of the accomplishments of Arizona's small business community, and I congratulate these representatives who are receiving well-deserved recognition for their

efforts. As these three people are well aware, the pursuit of the American dream is a path of hard work, long hours, and the ability to be patient enough to forgo immediate pleasures for future benefits. It is in tribute to these people and others like them, that we honor the small business community of this country.●

● Mr. HATCHER. Madam Speaker, as a member of the House Small Business Committee, I am proud to join in this salute to National Small Business Week.

Today, we find the true spirit of enterprise in America's small businessmen. That spirit is the embodiment of the frontier spirit that made this country great. People of all ages become entrepreneurs. While most start their businesses between the ages of 25 and 40, the range exceeds that.

There are obstacles, but that has always been implicit in the frontier spirit. When one embarks on the adventure of small business he or she is calling on the talents, resourcefulness, and skills that have taken a lifetime to develop and accumulate. For example, the most common source of financing for a small business is one's personal resources. Financial institutions, friends and relatives are also important, but in the last analysis, the test of success rides on the individual. Personal financing backs 60 percent of all newly formed businesses. Where the businesses are already in existence, 39 percent are supported by personal finances. In both instances—in the cases of new and existing businesses, financial institutions, and friends and relatives play a secondary role.

But, while small businessmen make great contributions they also take great risks. Since World War II, the number of small business employers per capita has slowly decreased. Unlike most wage and salary workers, small businessmen and women cannot count on reasonably constant sales or earnings or profit levels. These levels vary considerably not only from year to year, but from quarter to quarter, making financial security uncertain. Further, since the mid-1960's, small business's share in the Nation's economic activity has decreased while the share of big business has remained constant and Government's share has increased.

So, I would suggest that it is incumbent upon those of us in the Congress to work to create an economic climate that will work to reverse a disturbing trend, that small businesses are failing at a rate greater than at any time since the Great Depression.

We must build on the solid foundation initiated several months ago. It is hardly an exaggeration to say that the changes in the business climate in this country over the last 30 years pale in comparison to the changes we have experienced in the last 30 months. Through estate tax reform, the creation of a task force on regulatory reform and other steps to protect small businessmen we see, at the very least, a change in attitude. That change in attitude is that our national direction, our goals and progress, can best be set and measured by the private sector and not by Government regulators.

During the week of May 10, 1983, National Small Business Week, we should consider the great contributions made to our country by small businessmen and our obligation to them.●

● Mr. TORRES. Madam Speaker, the occasion of Small Business Week gives us all the opportunity to reflect on the vital role of small business in the American economy and society. Consider the fact that the 15 million small businesses in this Nation make up 99 percent of the total number of businesses in the United States, produce almost half of the GNP and employ over half of the American work force.

Small businesses also are major contributors to the pulse and morale of the local community. Tulare, Calif., I am sure, is extremely proud that Louis and Frederick Ruiz of Ruiz Food Products were named as California's small business persons of the year. Congratulations to both father and son Ruiz.

Small businesses are deserving of all the praise they have and will receive today, but they also require assistance. One way that each Member of Congress can help small businesses in their communities is by trying to bridge the information gap that exists between Federal, State, and local governments, large corporations, and small businesses. The individual entrepreneur with a small business cannot afford the trips to the big cities to attend seminars and workshops to learn about new opportunities. Even if this person could afford the financial cost, he or she could not afford to take the time away from managing the business.

Therefore, it is with much enthusiasm that I am holding a small business development conference in my district on Thursday, July 7. On that day, representatives from Federal, State, and local agencies, several major corporations and utility companies, as well as other associations will be sharing their knowledge about small business opportunities with the business owners in my district. The purpose of Business Expo 1983 is to give the small business operator the chance to learn about new markets for growth.

We, as Members of Congress, also can assist small businesses by passing legislation that can help them to compete for Government contracts and capital financing. For example, H.R. 2130, the Small Business Procurement Reform Act, would give the small business a chance to contend for Government contracts without being at a disadvantage to larger businesses. And, H.R. 1136 would improve small businesses' ability to obtain capital by creating a small business participating debenture. This alternative and innovative form of financing would help small businesses escape the dilemma of high interest rates and the resulting lack of access to capital.

I might add that already this session, the House has passed legislation helpful to the Nation's small businesses. H.R. 1043 modified the contract solicitation and bid period so as to assist small businesses. H.R. 861 reauthorized two programs to aid minority and disadvantaged businesses seeking contracts for high-technology work.

And this week, the Committee on Small Business is marking up omnibus legislation. Particularly noteworthy are sections to help small businesses adapt to drastic economic changes. Disaster loan programs would be strengthened and expanded—a particularly timely action in light of last week's devastating earthquakes and tornadoes. Loans also would be authorized to aid U.S. businesses hurt by Mexico's devaluation of its currency.

I cannot think of a better time than Small Business Week for the Congress and particularly the Small Business Committee to not only acknowledge the crucial role small business plays in our economy, but also to commit ourselves to improving their ability to grow and thrive.●

● Mr. STANGELAND. Madam Speaker, I would like to take a moment to honor our Nation's small business men and women during this National Small Business Week, and give a special thanks to the main-street merchants, farmers, and all small businesses which make up the seventh district of Minnesota.

While 1982 was a difficult year for small business throughout the country, I am pleased to note that the number of small businesses has increased annually almost without exception during the last 30 years, according to the Small Business Administration.

The growth of small business needs to be encouraged. Small business promotes competition, creates jobs, adds capital, promotes innovative ideas, and supports progress. I hope the Small Business Administration will work harder than ever this year to help people get into business, help them stay in business, and advocate programs and policies that will help small business.

I speak from experience, having been in the small business of farming for over 30 years. I know the hardships, the dedication, the long hours, the sacrifices, and the tremendous re-

wards of creating and maintaining a small business.

Seventy-two percent of all small businesses are sole proprietorships. This means that small business is people, people with ideas, fulfilling their creative ambitions.

So today I would like to honor the people, the entrepreneurs, the pioneers of small business, who started with an idea, created a nation and have become the cornerstone of the American free enterprise system. In 1983, may you grow and prosper.●

● Mr. PASHAYAN. Madam Speaker, I am particularly honored to participate in this special order to salute small businesses today because two of my constituents have been chosen as the small business persons for the State of California. These two men, Louis and Frederick Ruiz, own and operate Ruiz Food Products in Tulare, Calif. Their business is the second largest producer of Mexican food in the West and the employer of 200 people.

The Ruizs have demonstrated an innovative entrepreneurial spirit as they have expanded their business and developed new products over the last two decades. Louis Ruiz invented much of the equipment that was used in the early stages of production. In 1976, they negotiated a loan with the Small Business Administration to build the plant they use for production today. In addition to the SBA loan, the Ruizs make use of tax credits to hire minority and low-income individuals in the community and provide on-the-job training. The success they have achieved is a reflection of the excellent product they make and the creativity and versatility they have demonstrated over the years. I have toured their plant and can personally attest to the outstanding quality of the Mexican food products they make.

Ruiz Food Products is an excellent example of a business working in concert with the Government to grow and prosper, to provide jobs, and to create a better community. Small business has always been the backbone of our economy and wealth as a nation, and I am proud to represent the district in which this small business is located. I extend my warmest congratulations to Louis and Fred for their award, and my appreciation for the contribution they have made to their community.●

● Mr. SAVAGE. Madam Speaker, the week of May 9, 1983, has been proclaimed by the President as National Small Business Week. I take this occasion to join my colleagues, Congressman PARREN J. MITCHELL, chairman of the Small Business Committee, and Congressman JOE MCDADE, ranking minority member on the committee, in saluting the many small businesses in my district as well as the countless tens of thousands of small firms across this great Nation of ours.

When I first came to Congress as a Member of this august legislative body, one of the committee assignments I wanted most, and succeeded in getting, was that of the Small Business Committee. As a former businessman myself, the owner and publisher of a respected and successful newspaper in Chicago, I am well aware of the many varied problems that small businesses face in trying to survive and grow in the face of stiff competition from larger competing firms. On the other hand, I am also aware of the many and significant contributions that small businesses have made to the quality of life in America. It is often said, and statistics bear this out, that small businesses are on the cutting edge of many of the technological innovations that have helped keep America pre-eminent in the world in terms of trade and commerce.

However, we in Congress should be ever mindful of the fact that small businesses, particularly minority-owned ones, do not enjoy the advantages that come with bigness. The successes of Sonicraft, WXOL Radio, Suriety Trucking, and Globetrotters Engineering, all minority firms in Chicago, are the exceptions to the general rule concerning the fate of small minority firms. The Federal Government can—indeed, must—play a more constructive role in insuring the viability of minority firms, for the end result will benefit us all.

On the occasion of this recognition of small business, I salute the ingenuity, the fortitude and determination of entrepreneurs, for they embody the spirit that has made our country what it is today: The greatest nation on Earth.●

□ 1530

CHEMICAL AND BIOLOGICAL WEAPONS FOUND INEFFICIENT AND UNSAFE

The SPEAKER pro tempore (Ms. KAPTUR). Under a previous order of the House, the gentleman from Arkansas (Mr. BETHUNE) is recognized for 60 minutes.

Mr. BETHUNE. Madam Speaker, I will remind my colleagues that on several occasions over the last 3 years I have taken to the floor in opposition to the request of the Department of Defense for the production of a new age of chemical weapons known as the binary nerve gas weapon.

The Chemical Corps' plan to produce a new age of nerve gas, the so-called binary weapon, is not ready. There are simply too many unanswered questions, and if it was ever in doubt, it was put to rest last week when the General Accounting Office came out with a comprehensive report finding several points which need to be restated over and over again for all our colleagues.

First of all, the GAO report found that the Chemical Corps' plan to produce the new nerve gas weapon was insufficent because no testing or no dynamic testing has been done to see if the binaries work, if they would be efficient, and if they would be safe. This is a very critical factor. In fact, when we had the debate on this floor last year, several of my colleagues and I made the point that the Bigeye bomb, which is the aerial bomb that the Department of Defense is requesting in the chemical weapons program, was faulty. We made the point over and over again that the timing mechanism on the bomb was not worked out, and that in all probability the Bigeye bomb would not be efficient and that it would not be safe.

Now, those who were advocating the Bigeye bomb and the binary nerve gas program tried to argue us down. They parroted the lines and the arguments of the Chemical Corp., giving us the soothing assurances that the Bigeye bomb would be ready and that it should stay on schedule. Of course, the House disagreed in a rather lopsided vote and joined with me and the distinguished chairman of the Committee on Foreign Affairs, the gentleman from Wisconsin, Mr. CLEMENT ZABLOCKI, in denying the Department of Defense its request to produce the nerve gas weapon.

That was the right decision, because in the GAO report which came out last week it is now clear that the Bigeye bomb is not safe and that the Bigeye bomb is not as efficient as it was originally thought to be. As a matter of fact, now the Department of Defense has pulled the Bigeye bomb request that it made last year, which simply ratifies and admits the arguments that we made here last year.

The General Accounting Office has also found that there is a general tendency within the Department of Defense to just simply build more and more chemical weapons, and there is a mindset there in the Department of Defense that we have to have retaliatory capability in kind so that whatever specific chemical weapons the Soviets might have, we have to have one just like it or very similar to it. This position, of course, ignores the fact that there are many other relevant factors that bear on the decision of whether or not we need a new age of chemical weapons.

The GAO report also says that there is no comprehensive plan as to how military personnel are to act or react in a chemical war. In short, there is no doctrine for the use and deployment of chemical weapons. The report goes on to find that the Department of Defense has no plan for protecting the civilian population in a chemical war.

The point that I want to make today is a larger point, because last week I

spoke rather extensively about the GAO report and the shortcomings of the Chemical Corps' plan to produce nerve gas. I would like to talk a little more today about the larger context in which we find ourselves on this very important issue of chemical weapons.

Even if the Department of Defense modernization plan were ready, this is not the time to start production of a new age of chemical weapons, because such action would break the unilateral freeze that we have had since President Nixon stopped production and use of chemical weapons by the United States back in 1969. In other words, for 14 years—and we are now going into our 15th year—we have not produced or used chemical weapons.

This is in stark contrast to the policy and practice of the Soviet Union. Everyone has read the allegations of production and use of chemical and biological weapons by the Soviet Union. The stories coming out of Sverdlovsk and the stories coming out of Afghanistan clearly indicate that there is reason to believe that the Soviet Union is in fact not only producing but using chemical weapons. I think that this clearly gives the United States the high ground on the issue of chemical weapons.

Now, it may be that we have a hard time convincing the people of the world that we have the right position or the moral position when we are talking about nuclear weapons or conventional weapons, because I think the average person around the world believes correctly that both the United States and the Soviet Union are building up in the area of nuclear and conventional weapons, and so, therefore, it is hard for them to believe that the United States is better than the Soviet Union when we are discussing nuclear and conventional weapons. That is a circumstance which exists and which I think will be difficult for us to deal with for some time to come.

But that is not the case with chemical weapons. With chemical weapons, we have the indisputable high ground. Because of our 1969 policy, one which has kept us in a position of nonproduction and of nonuse for 14 and going on 15 years, we can literally contrast ourselves with the Soviet Union in such a way that people around the world will clearly understand that the United States has the high ground on this issue.

As a matter of fact, in the last session of the Congress the administration and many of the administration's supporters in this particular area tried to get authorization to produce the new age of chemical weapons. They failed. But by asking for the right to produce the new nerve gas weapons, the administration has sent a signal to the world that we are ready to abandon the 1969 policy. That means that we lose the high moral ground that we have held for 14 years, and that we can no longer make the distinction between the United States and the Soviet Union, and many of us who fought the request last year think that that is the key point in the whole debate.

Presently at the Committee on Disarmament in Geneva, the ambassadors who are delegated there from all around the world have a high degree of optimism about the prospect of getting a chemical weapons treaty for the world, banning the production and use of chemical weapons once and for all. I think that they have that optimism because they realize the juxtaposition of the U.S. policy vis-a-vis the Soviet Union's policy.

I was there in February of this year and had occasion to talk to over half of those delegates, and I can assure the Members and I can assure all who are concerned about this issue that we do have the high moral ground and that it is working to our advantage in the Committee on Disarmament. If we are going to get an international treaty banning chemical weapons, we will get in the Committee on Disarmament. They meet this July, and then they will meet again in the fall. I believe that we should stick to our 1969 policy until we see what progress is made in the July meeting of the Committee on Disarmament and what progress might be made in the fall session.

□ 1540

Now, it is not likely that they could produce a treaty which would cover every aspect of chemical and biological weapons for all time to come in that short a period of time. Many nations will be involved and it will be an extensive process, but I do believe that in the summer session or in the fall session there will be benchmarks of progress, measurable benchmarks that we can look to determine whether or not the Soviet Union is, in fact, willing to reach a treaty with the United States and with other nations in the world on this score.

For instance, if they are serious, then we can make progress, the two superpowers and the other countries involved on the question of verification for destruction of existing stockpiles.

We can also tell if there is a willingness on the other side to negotiate a treaty by whether or not they will be willing to take steps toward declaring their existing production facilities. These are things that we can see and measure in the next 6 months to a year that will tell us whether or not the Soviets are serious.

Until that time, I think we should do everything in our power to demonstrate the distinction between the policy and practice of the United States, and the policy and practice of the Soviet Union. In order to do that, we do not need to abandon the 1969 policy which has served us well. We need to stick with it.

Therefore, I think the administration's request and their continued request for production of nerve gas weapons is a fly in the ointment right now. They should back off that request. They should go work with the policy that has been established in the House of Representatives, and that is that we will not break the 1969 freeze. We will stick to it. If the administration would pick up on that particular thesis and argue for the people of the world that the United States is trying to do right in this particular area, show to the world that our policy and practice has been pure as the driven snow since 1969, it would challenge the Soviet Union in such a way that if public opinion is ever going to have an impact on that nation, it would surely do so in this area of chemical weapons and it would surely do so when it would have such an impact when the Committee on Disarmament meets in July of this year.

I and others who have been working on this issue are now working to draft a resolution which would contain four points in support of our position and to further the position that we have been arguing now for some 3 years.

Basically, we believe that this House should resolve itself in a positive fashion on the issue of chemical weapons so that the world can see clearly that our policy is positive and that it has a method and that it has a good degree of commonsense.

Heretofore, I think people have seen the House of Representatives as merely obstructing the request made by the administration. As is the case with most weapons requests, it simply is another battle in the larger battle of the defense budget here in the House. There is more to our position than that. It is a distinct position from the position we take so often in the area of conventional and nuclear weapons.

The resolution that we are trying to put together at this time would contain four significant points. The first point would say that this country has since 1969 honored the policy established by President Nixon and we have not produced or used chemical weapons.

The second point would state that the Soviet Union follows an entirely different policy and practice and that, in fact, the allegations around the world are that they are not only producing chemical and biological weapons, but they are using them.

The third point would recognize that the Committee on Disarmament and other fora, possibly including bilateral discussions between this country and the Soviet Union, could produce a treaty, that there is optimism among

those that study these issues that such a treaty could be produced.

Fourth and most importantly, we would make the point in the resolution that our position and our policy has an element of conditionality to it and that is that this country prefers not to produce chemical weapons. Certainly this country abhors the use of chemical weapons in the world and that we have adhered to such a policy for 14, going on 15 years; but the fact of the matter is that anyone knows that we cannot continue to hold such a pure position in the face of continued production, deployment, and even conceivably alleged use by the Soviet Union. So we cannot hold ad infinitum the position that we have held since 1969 and the world would know, our allies and our enemies and those nonalined countries, and particularly the Soviet Union, would know that while we prefer to stick with the policy that we think is correct, that there is a limit to what we can do.

I think this again sends a signal to the Soviet Union and is a shot across their bow to let them know that they better come forward in the summer session of the Committee on Disarmament and in the fall session of the Committee on Disarmament and put their money where their mouth is, because they have been talking a lot about how they want a chemical weapons treaty.

We would give them every opportunity to carry out and demonstrate that, in fact, they do want a chemical weapons treaty.

Why do those of us who make mention of the chemical weapons issue argue our case with such intensity, and why are we so insistent on this particular point? I remember when I first got into the issue that I basically came to the conclusion that I should resist this because it was immoral. Since then, I have added many arguments to my position, as others have, but we all know that chemical weapons are as deadly as nuclear war. We know that it is not the soldiers who would be killed by these chemical weapons, because the soldiers would have defensive equipment, gas masks and every other conceivable type of equipment to ward off the effects of chemical weapons. It is the civilians who would be killed in a chemical weapons attack, because chemical weapons kill indiscriminately. Clouds of chemical gases are uncontrollable due to the atmospheric conditions and the winds which might prevail at the time and would scatter the killing force of the chemical weapon in ways and areas that we have not yet understood thoroughly.

All of the religious leaders, of course, call chemical weapons immoral and even the Pentagon will concede the point that chemical weapons are immoral; but, moreover, we argue that our current stockpile is sufficient, contrary to every argument that the Chemical Corps will make, that our chemical weapons stockpile right now, even though we have not produced since 1969, would be sufficient to deter the Soviet Union and would hold out for at least a 30-day confrontation, were that to occur.

The stockpile, the Chemical Corps argues, is deteriorating. That is not the case. Much of it is old and useless, but those weapons which have value to our military at this time, the 155-millimeter shell, are not decreasing in number, they are increasing in number, in spite of what the Chemical Corps may have Members believe.

Also, we have to think about what U.S. production would do to the attitudes and thinking of our friends in Western Europe. Our allies there reject the idea that we should make new deployments of chemical weapons in the West European countries. The reason they do, of course, is because they remember about chemical weapons. We Americans have enjoyed a rather remarkable circumstance in a world that has been filled with trouble. We have never experienced the use of chemical weapons here on our soil. In fact, the number of battles that have been fought on American soil are relatively few in number compared to the great wars that have occurred in Europe.

□ 1550

So they have a recollection which has been passed down from generation to generation about the use of chemical weapons in World War I.

The European press condemns the administration for its request for production of the new binary chemical weapon and I think, therefore, that it does undermine all of the work that we have been doing and can do among the European Community to gather together a force, a world force against the production of chemical weapons.

So there are many reasons in addition to the reasons that chemical weapons are just plain immoral. The reasons have been brought out time and again here on the floor of the House of Representatives.

I wish that this administration would take time to realize the sincerity and the correctness of the position that has been argued here in the House. It is not self-serving to stand here and say that I and the others who have been successful in stopping the production of chemical weapons have been superior in our debating skills or that we have worked harder to marshal the facts and the information in this particular debate because the other side has worked hard. It is just simply that we have been proven right over time by developments and by circumstances which are outside of this Chamber.

I think the most startling ratification and proof that I could offer that we were right and that we are right is the fact that the Chemical Corps itself has now pulled the request for the Bigeye bomb and that they themselves are beginning to admit certain facts like the stockpile of the 155's is not smaller but is in fact larger. They themselves are beginning to admit that there just might be something to the argument that we can do better in the Committee on Disarmament and in the summer session that will take place in that forum by sticking to the 1969 policy which is such a stark contrast to the Soviet policy than we would do if we were to abandon that policy and commence production of weapons that are not even ready to produce, by their own admission.

So, as time goes by, and particularly in the next week or two, I think this issue will begin to take shape. I hope that the administration will overcome that hard, thick, leathery mindset that is in place at the Department of Defense, a mindset that precludes them from considering the many arguments that we have made here in the House of Representatives, a mindset that is going to lead to a division in this Congress and in this country on one of the most significant issues that is before us today.

We need to get together on this issue. We need a united approach rather than a divided approach on the great issue of chemical weapons.

It is possible that we could have such an approach. But the administration must pull its request for production of chemical weapons this year. We have the votes to defeat that request here in the House of Representatives and we will defeat the request.

The only thing they are going to gain by pushing for production in the House of Representatives is to divide this Chamber and to divide this country on this issue.

Much more productive right now would be the approach to come together, rally around the existing policy in this country, make it plain to the world that we are different than the Soviets in the area of chemical weapons, stroke our allies and our friends at the Committee on Disarmament, encourage them to produce a treaty, challenge the Soviets to produce a treaty, all the while letting the world know that we cannot go on like this ad infinitum, that we must have such a treaty.

I think the Soviets will respond to such pressure. I think they spend an awful lot of time trying to cultivate world opinion and it must be important to them. In this particular area, we can really draw a contrast between us and them, one that I think will create the right environment in the Committee on Disarmament, and will

produce a treaty that will serve the world well.

I hear people say you cannot get the Soviets to do anything through world opinion, but that is not true. In 1969, when we established this particular policy, it covered not only chemical weapons but biological weapons. A few years later the Soviets did enter into an agreement on biological weapons. I think that is some evidence that they will respond.

We learned a lot out of that treaty. We learned that we need to have better verification procedures. But it is evident that they will respond.

Certainly it is worth a try before we throw away a policy that has served us well now for 14 years.

I yield back the balance of my time.

SMALL BUSINESS WEEK

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Nevada (Mrs. VUCANOVICH) is recognized for 5 minutes.

Mrs. VUCANOVICH. Madam Speaker, I am very pleased to be able to participate in honoring Small Business Week. The President's proclamation makes very clear his commitment to and respect for the accomplishments and contributions of small business. I wholeheartedly share his views and appreciate this opportunity to pay tribute to the most valuable component of our free enterprise system—the small business.

We are indeed indebted to small business for its leadership, innovation, productivity, and stamina to withstand burdensome Federal regulations, inflation, and years of increased taxation. Small business comprises 97 percent of the total businesses in this country and employs over half of the current labor force in the United States. It is small business which has taken the lead in providing new jobs to help ease our employment situation, 90 percent of all new jobs in this country are offered by small business.

We are really here to pay tribute to the men and women who keep our small businesses going. One person, in particular, from my State of Nevada, deserves special recognition during this week.

Nell Worden of Pahrump, Nev., has been named a Women in Business Advocate by the U.S. Small Business Administration's Office of Advocacy, in recognition of her major contribution to small business.

Nell has worked diligently to improve business and financial opportunities for women in business, and exemplifies the spirit of small business and all it represents to Americans who value the opportunity and independence this country has to offer. Her hard work and capabilities make her especially deserving of the award she has received.

Having the honor to represent the State of Nevada which has limited industry but an abundance of small business enterprises, I have a great appreciation for the hard work and dedication which goes into keeping a small business afloat in these economic times.

Unfortunately, not all of our small businesses have been able to survive the past years of high inflation and exorbitant interest rates. We in the 98th Congress must continue the reversal of this downward spiral by pursuing the economic recovery policies which began in the 97th Congress.

Small business is the heart of our economy and the backbone of our free enterprise system. Ms. Worden and all of the many small business people in Nevada and the Nation really deserve our thanks for all they have done to contribute to the future of America.

RECOGNIZING THE CONTRIBUTIONS OF ASIAN/PACIFIC AMERICANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HORTON) is recognized for 5 minutes.

● Mr. HORTON. Madam Speaker, I would like to join with my Asian-Pacific American friends around the country in celebrating the Fifth Annual Asian-Pacific American Heritage Week. May 7–14, 1983, by Executive order, has been set aside to recognize the contributions which Asian and Pacific Americans have made throughout the history of the United States.

On June 30, 1977, I had the honor and pleasure to introduce House Joint Resolution 540, which for the first time in this Nation's history asked the Congress and the people of the United States to set aside a period in May as Asian-Pacific American Heritage Week. Through the efforts of Jeanie Jew, who created the idea for the proclamation and commemorative period, and Ruby G. Moy, my administrative assistant, who arduously assisted in the successful outcome of the bill in the Congress, Public Law 95-419 became a reality.

This special legislation has become the groundwork and foundation for all Asian-Pacific heritage and ethnic observances throughout the United States.

America derives her strength from the ethnic plurality which constitutes her people. I have never appreciated this so much as when I had the privilege of addressing the people of American Samoa at their Flag Day ceremonies on April 15, 1983. I stated then, and I believe now, that the reverence and allegiance to the flag of our country which the American Samoans exhibit should be followed everywhere in our Nation.

Asian-Pacific Americans have sacrificed a great deal, at times even their lives, for the betterment of our Nation. Many of the railroads and canals which spurred the rise of the United States to economic supremacy were built with the toil and commitment of Asian Americans. My close friend and colleague, FOFO SUNIA, of American Samoa, often speaks with great pride about the fact that his district, for its size, contains more men and women in the U.S. Armed Forces than any other district in our country. In addition, I have recently discovered that he may also claim to represent more veterans and military retirees than any other Member of Congress.

The Asian-Pacific Americans have sacrificed a great deal for the economic well-being and military security of our country. I hope that each of my colleagues will join me in this opportunity to recognize the contributions of Asian-Pacific Americans to the United States of America.●

THE STRANGE BEDFELLOWS OF NATURAL GAS PRICE CONTROLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) recognized for 10 minutes.

● Mr. CORCORAN. Madam Speaker, as the summer heats up, so will congressional consideration of the Reagan administration's plan to include the decontrol of so-called old gas as part of a legislative package aimed at reducing natural gas prices to market-clearing levels.

Madam Speaker, as you can well remember, when the Congress last considered the controversial issue of natural gas, there was as much activity and debate within the Congress as outside of it. One of the interesting byplays of any public policy debate involving vested economic interests and the people of this country is the way various coalitions form to lobby one side or the other of the question. This year's developing drama on natural gas is certainly no exception.

Sometimes to refresh my evaluation of the issues involved in natural gas, I let my mind wander to the interesting coalitions that are being formed. And it was on such an occasion when my imagination was given free reign, that I had a thought which I would like to share with you, Madam Speaker, and my colleagues. Picture, if you will, two opponents of the old gas decontrol plan getting together in a Capitol Hill bar after a long day of lobbying.

Dudley Dewright, a lobbyist for consumer causes, is sipping a Perrier and looking troubled. Next to him is John Q. Brown, a Washington lobbyist for a gas industry group opposing decontrol of old gas prices.

"You know, John, I've been thinking lately," says Dewright, staring into his third Perrier. "I'm not too sure you and I can both be right about why the President's decontrol bill is such a disaster for the gas consumer."

"Hey, don't worry, kid," replies Brown, a bit nervous. "We'll beat back those money-grubbing oil companies and their bureaucratic pawns. If we just keep working together * * *."

"That's not what I mean. I've always favored price controls on old gas to keep the price down for low-income consumers and prevent the big energy companies from making money out of those folks' misery."

"What's wrong with that?"

"Nothing. But what are all you big energy companies doing on my side this time?"

Brown ordered another Chivas Regal. "Golly, kid, can't we support all those fine ideals, too?"

"Sure. But isn't the reason that you want prices on old gas kept at $1.50 or so just to subsidize the $9 price from all those deep gas wells that nobody wants to buy any more?"

"Heck, no. We don't have to have a subsidized price for those wells. Golly, even if we can't sell gas from them, the Nation needs those 15,000 foot holes for the MX missiles. We're going to call it 'Deep Pack' and the Pentagon will love it."

"Well, what about the agrument that keeping old gas prices down just subsidizes that coal gasification plant out in North Dakota? They're supposed to be getting ready to ask the Synfuels people for nearly $1 billion in purchase guarantees because no one wants to buy their $6 gas. Is it true that if we keep old gas under price controls, they won't need the taxpayer subsidy because they'll have a ratepayer subsidy instead?"

"Hey, that's no subsidy; that's an insurance premium. You believe in a little insurance, don't you? Besides, if they couldn't sell their coal gas, they wouldn't need to strip mine any coal and then they wouldn't need James Watt to help them. Where would all the environmental groups be if Watt wasn't out there stripping away the plains?"

Brown is beginning to breathe heavily, fogging up Dewright's glasses.

"And don't tell me that the only reason I favor keeping old gas prices low is to subsidize the Alaskan gas pipeline. That's a downright slur! The truth is that America needs $18 gas if it's ever going to learn to conserve its natural resources. What with oil prices going down, the last thing we need is more $2.50 gas."

"I guess that's what I'm afraid of, John. After we roll in all that $6 coal gas, $9 deep gas, $18 Alaskan gas, $7 LNG and Lord knows what else, won't the average price be just about the same as if old gas price controls were removed? I mean, even the GAO says that the administration's package, even including old gas decontrol, will reduce the average gas price, not raise it."

Dewright's voice begins to quaver. "But if all those expensive projects are going to be subsidized by cheap old gas, then how does the consumer benefit? And if they're not going to be subsidized, then how come all you guys want to keep controls on old gas? Is there something you're not telling me?"

Brown puts his arm around Dewright in a fatherly way. "You know, if I were you, I'd watch what I say. You sound like you're almost in favor of decontrolling old gas prices."

Dewright breaks out in a cold sweat. "No, no, I didn't mean it. I do believe that price controls help the consumer. I really do believe. I do * * *."

"There, there," says Brown, lighting up a fat Havana. "I know you still believe. And you know what, kid? So do I." ●

A NEW STANDARD FOR INSANITY PLEA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. PORTER) is recognized for 5 minutes.

● Mr. PORTER. Madam Speaker, today I am introducing legislation to establish standards for the use of the insanity plea by those accused of Federal crimes.

The legislation is designed to greatly restrict the limits of the insanity defense, thereby greatly reducing the number of defendants who will be able to successfully plead insanity.

My legislation would accomplish this through the establishment of the McNaughten rule, or "right from wrong" test as the uniform test defining the insanity defense's parameters. Such a provision would not only create a uniform Federal standard for determining legal insanity where none presently exists, but would also severely curtail the use of the insanity defense to those few defendants who actually cannot tell right from wrong.

Furthermore, my proposal shifts the burden of going forward with the evidence from the prosecution to the defense regarding the defendant's sanity or lack thereof. Under my proposal, if the prosecution can prove that the defendant possessed the mens rea, or "evil mind" necessary for the commission of the crime, the defense would then be required to show by clear and convincing evidence that defendant was insane under McNaughten.

Last, this legislation will also allow for the plea and verdict of "guilty but mentally ill." Should a defendant committed to a hospital or mental treatment later be pronounced mentally fit, he would be required to serve the remaining portion of his sentence in prison.

I urge my colleagues to join me in supporting this legislation. ●

HOW FRESNO, CALIF., HAS REDUCED CRIME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PASHAYAN) is recognized for 5 minutes.

● Mr. PASHAYAN. Madam Speaker, a recent report by the Federal Bureau of Investigation revealed that the crime rate in this Nation decreased last year by 4 percent, the first time the rate of reported crime has gone down since 1977.

A large part of the credit for that reduction should go to the efforts of people like those in the city of Fresno, Calif., and its surrounding communities, who have been working together in a unique program of policing by objective.

This program has dramatically decreased the local crime rate by increasing citizen participation. The story of how this happened and what has been accomplished was told in an article in Western City, the monthly magazine of the League of California Cities. This article, "Policing by Objective—With the Public's Help," was written by the late George K. Hansen, police chief of Fresno until his untimely death April 16, 1983.

This article and the accomplishments it chronicles stand as a fitting tribute to Chief Hansen, a respected public official, to his colleagues in law enforcement, and to the people of the cities of Fresno, Clovis, and of Fresno County, and I should like to reproduce the article here.

POLICING BY OBJECTIVE—WITH THE PUBLIC'S HELP—FRESNO REPLACES THE TRADITIONAL MODEL OF POLICE PATROL WITH "COMMUNITY BASED POLICING"

(By George K. Hansen)

Like other law enforcement agencies throughout the nation, Fresno's police department has faced the dilemma of providing effective police services despite diminishing resources. In the late 70's, it became evident that the traditional policing model was outdated for contemporary needs.

Fresno is often perceived as a small, rural community with simple problems, but since 1978 the city's population has increased 25 percent, from 196,000 people to 245,674 city residents. The city's land area has grown from 62 to 87.6 square miles during the same five year period, a 41.3 percent increase.

Calls for police service in fiscal year 1978 totalled 196,000. Calls for service in 1983 are projected to reach 234,300. Although the size of the city, its population and the demand for police protection have steadily increased, only six positions have been added to the city's sworn complement of police officers since 1978.

The Fresno police department began modernizing the delivery of police services in January 1979. These endeavors did not

evolve by accident, nor were they a result of community or political pressure. Instead, conscious efforts were made to improve the effective use of existing resources. It was clear that the police alone could not minimize or reduce criminal activity in the city without the active participation of the entire community. A police-community cooperative effort became the foundation for Fresno's community based policing program.

THE OLD WAYS

Preliminary analysis of the department's organizational structure and the roles and responsibilities of its management and line personnel were completed in 1979. Findings indicated that neither the structure nor the responsibilities of personnel were conducive to providing effective police services.

Officers were assigned to shifts and patrolled all sections of the city. Customarily, one patrol unit was responsible for each beat. Line supervisors were not required to regularly assign officers to the same beats, so it was difficult for them to become familiar with specific problems in any given area. Preventive policing methods were seldom employed; instead, emphasis was primarily on responding to calls for service. Officers were concerned only with the activities occurring during their shifts, and they seldom knew what occurred on other shifts or in other geographical parts of the city.

Lieutenants and sergeants also operated on a shift basis. They were responsible for activities and personnel assigned only to their shifts on a city-wide basis. They were, in effect, watch commanders with a scope of responsibility so tremendous that they were often too involved in administrative details to participate in tactical or strategic operations. The opportunity for supervisors to learn about a specific area's people, problems, and resources, or to prepare tactical action plans to control the problems, was rare. Because the scope of responsibility of each individual was limited to what occurred during their eight-hour tour of duty, that responsibility did not carry over into the next day's work.

Prior to community-based policing, Fresno's police department was a traditionally structured organization with limited opportunity for creative or autonomous operations. Police sergeants and officers seldom participated in the decisionmaking and planning processes. Most plans and decisions were made by the chief of police and the executive managers. The tightly interacting management team, coupled with the call-to-call syndrome experienced by line personnel and supervisors, discouraged either group from eliciting input from the other. That interaction, however critical, did not regularly occur until the planning of community based policing was initiated.

GOALS

Executive management was interested in improving productivity. It was apparent that those responsible for certain activities were not always held accountable, and too often employees' activities were reactionary and not necessarily synchronized toward common goals. The philosophy of the community based policing program was expressly articulated in a statement of the department's mission and goals:

To reduce the incidence of suppressible crimes per capita in the city of Fresno;

To increase the percentage of offenses reported to the police;

To increase the proportion of cleared offenses;

To decrease the percentage of cases not prosecuted due to faulty investigation or case preparation;

To decrease the projected rate of motor vehicle accidents per number of registered motor vehicles;

To reduce criminal opportunity through police-community cooperation;

To increase effectiveness in the delivery of police services.

Establishment of these goals was the first step in the department's transition to policing by objectives, a method that parallels the private sector "management by objectives" theory but is tailored for non-profit, public sector, law enforcement agencies.

Eighty hours of management training was provided to all supervisors through the rank of deputy chief. Emphasis was placed on planning, executing, and reviewing police activities directed toward the specified, desired results. Individual managers were to be held accountable for the results obtained by units under their command.

Once supervisory personnel became familiar with setting objectives and tactical action planning, patrol officers became involved in the process. They began developing tactical action plans for specific area crime problems. Policing by objectives has enabled all executive managers, supervisors, and line personnel to actively participate in problem solving, program planning, and decisionmaking.

Training was essential. A more sensitive and open-minded approach toward policing could only be accomplished through a comprehensive educational process to include all ranks. A task force was formed to develop the training program for preliminary investigations, interpersonal communications, cultural awareness, current law update, officer survival, rape investigation, crisis intervention, and the handling of battered women. The task force found that officers desired additional training in the area of interpersonal relations.

FOUR POLICE AREAS

To implement community based policing. Fresno was divided into four community police areas, a district contrast to the former departmental structure organized on a city-wide basis by eight hour shift.

The determination of the four policing areas was based on comparable workload activities in the four districts, and on the city's demographic makeup. Communities with similar problems, needs, and demographic makeup were left intact. Four captains were assigned as area commanders in the patrol division, with each commander responsible and accountable for the police activities, crime increases and reductions, resources, and personnel in his area.

The basic patrol function is on a shift basis, but is additionally confined to an area. While under conventional staffing one officer was assigned to one beat, area commanders could now assign as many as five officers to a single beat when needed, while other beats with less need could be covered with fewer officers.

Community based policing has enabled patrol officers to attack problems in nonconventional ways. For example, officers can work in plainclothes during different hours if the need arises.

To further assist management, the department assigned two lieutenants to each area as operational and management support to the citizens and officers in the field.

Similar to team policing, community based policing decentralizes patrol operations, improves internal communications, and perpetuates generalist-oriented rather than specialist-oriented officers. Unlike team policing, community based policing actively solicits the involvement of the community in minimizing crime.

PUBLIC INVOLVEMENT

Evidence shows most crimes are prevented or solved by citizens who witness crimes and relay valuable information to the police, and not through extensive, sophisticated investigative techniques. The best investigative tools are the eyes and ears of citizens willing to recount to police what they've seen or heard and, more importantly, become involved.

Recognizing the importance of public participation in police operations, Fresno's police department sought to improve the relationship between the police and the community. Historically, their relationship has been guarded, due largely to the nature of public contacts which patrol officers generally initiate: traffic stops, investigations of residential burglaries, and responses to family disturbances, petty thefts, and vandalism calls. In general, most encounters place both the officer and the citizen on the defensive, simply due to the emotional nature of many circumstances.

Through community based policing, officers are encouraged to be less confrontational with the public. They are encouraged to leave their patrol vehicles and talk to citizens about both criminal and non-criminal problems. This opens lines of communication between the citizens and police officers and more is accomplished in the long run.

Another reason for improving the police image is based on the nature of requests for service that police departments receive. National surveys indicate that of the total calls for service handled by law enforcement agencies, some 70 percent are not crime-related emergencies. Instead, various kinds of personal and community-related problems keep members of the department busy.

The police department also developed a community service officer program. Community service officers are non-sworn personnel who handle non-emergency field reports and develop and maintain crime prevention activities in each of the four areas, relieving police officers from the mundane, non-emergency, non-crime related activities to concentrate on actual crime-related problems. They receive 200 hours of P.O.S.T. certified training and an additional 40 hours of in-house training in crime prevention.

Police officers are the most visible and accessible representatives of city government. People come to them on the streets seeking assistance with problems in their daily lives. While police cannot resolve all social or criminal issues, they can take an active role in softening the police image. Community based policing allows officers to attack the real problems people face in a preventative approach to law enforcement. Too often, those personal problems escalate to criminal activity.

Ongoing programs such as Neighborhood Watch and Business Watch have become very much a part of the city's policing efforts. The watch group programs existed prior to community based policing, but had not appealed to the numbers of citizens it currently attracts. The neighborhood watch program has increased its watch groups by 57 percent, and in June 1981 there were 591 neighborhood watch groups representing 6,797 households and 18,215 participants. Today, 42,378 citizens from 15,833 households are involved in 1,375 watch groups.

Youth and senior citizens have become active participants. Senior citizens have been organized in residential complexes dominated by the elderly, and junior neighborhood watch members have also been organized.

Other youth programs, such as a bicycle rodeo, painting over graffiti on walls, a youth modeling class, and competitive games between police and youth groups have been developed in conjunction with the Fresno parks and recreation department.

Community centers have been used to bring the police closer to the community. The centers are conveniently located for public access, and both non-emergency and crime prevention assistance are provided from them. Non-sworn community service officers are assigned to the centers and effectively perform both functions.

Neighborhood watch has evolved from a program where neighbors "watch out" for each other to a program where citizens consciously plan efforts to prevent crime. Neighborhood area watch group councils have been formed, and a priority of the city-wide council is to increase community crime prevention awareness and resident recruitment. Volunteer members meet regularly to discuss neighborhood crime problems, and an overall executive council is represented by members of the four areas.

ANTI-CRIME CAMPAIGN

A specific example of the efforts between police and community is demonstrated by the 1982 fall crime prevention campaign. While the crime rate per capita in Fresno has dropped steadily in the last three years, there is a dramatic increase in serious crimes during November and December of each year. A new approach was needed to combat the high levels of robberies, burglaries, and thefts that occur from Thanksgiving to New Years. The plan of attack was to launch a comprehensive public awareness campaign and increase tactical operations.

Fresno is surrounded by heavily populated, unincorporated areas, and is immediately adjacent to Clovis, a city of about 40,000. To have any measurable effect on crime in Fresno, the Clovis police department and the Fresno County sheriff's department had to be included. These agencies were contacted and they eagerly agreed to participate. They were joined by the business community in an effort to educate the public and to break the seasonal crime wave in 1982.

A public awareness program of the size and scope needed was extremely expensive, and the revenue needed was not available in the city budget. The police department decided to seek private support, and received both money and services. With the assistance of community groups, the Fresno police department built a $250,000 public awareness campaign with $15,000 in cash and the remainder in donated services, at no cost to the city's general fund.

The fall campaign was kicked off with a five hour rally at the Fresno convention center. Approximately 15,000 people attended. Thousands of dollars worth of free door prizes donated by local merchants were given away, free soft drinks were provided, and law enforcement exhibits by the Fresno and Clovis police departments, the Fresno sheriff's department, and California Highway Patrol were displayed. Popular personalities and sports figures from the community were made available for autographs. Continuous live entertainment was provided, and banners of the rally sponsors and contributors were displayed. "Sheriff" Joe Higgins, famous for his Dodge commercials, and Rene Enriques, Lt. Callenstano of Hill Street Blues, made public appearances.

Other activities during the two-month period in 1982 included:

A complete public information program handled by a professional advertising firm.

The campaign committee contracted for 36 billboards in the community which carried seven different crime prevention messages.

Public service announcements on radio, television and newspaper advertised the campaign.

Community service officers provided training to employees of retail stores and other businesses on crime prevention and security.

A full page ad in the *Fresno Bee* was run each week for 12 weeks to advertise the campaign's impact on seasonal crime trends compared to last year's statistics.

Large buttons were provided to retail clerks with the "It's a Crime to Shoplift" message printed on each.

Crime prevention messages accompanied by a professionally recorded theme song were broadcast on local radio and television stations.

Detailed crime information and protective measures were distributed to all 30,000 participants in the city's neighborhood and business watch programs.

Special tactical efforts were employed. Four general field tactics were used by the city-wide teams to address specific crime targets. Uniformed patrol suppression, designed to reduce the opportunity for offenders to commit crimes, was used to address burglary and robbery. Surveillance of known active offenders and stakeouts of businesses in robbery prone areas were also used to address commercial robberies. Plainclothes covert patrols were used to address residential burglary.

With the generous support of the media, the fall campaign was a success, with thousands of Fresnans participating. As a result, there were 50 fewer robberies and 115 fewer burglaries during the months of November and December, 1982. If enough people get involved, public awareness can indeed impact criminal activity, but it requires a total commitment by both community and police.

A four-year, statistical analysis indicates crime in Fresno is on the decline. From 1979 to 1982, crimes have dropped from 117.92 to 100.5 per 1,000 population. Case clearances have also improved. In 1982, 24 percent of the offenses were cleared by arrest, as compared to 17 percent cleared in 1979.

It is anticipated that in the next two to three years, Fresno will witness a greater reduction in crime and improvement in case clearances. If the 1982 fall campaign and rally were indications of the Fresno community's support, then crime is sure to be reduced even further.●

POLISH CONSTITUTION DAY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Madam Speaker, May 3 marks the anniversary of the Polish Constitution of 1791, and in celebrating this anniversary, we honor the deep ties between our country and the people of Poland.

These ties are rooted in the principles which were enunciated by the Constitution of May 3: Liberty, representation, and protection under law. They originated in the valiant participation of Polish soldiers and patriots in our own revolution and have been nourished by the rich gifts the Polish people have brought to our life and culture.

On Saturday, April 30, the 192d anniversary of Poland's Constitution, the Polish National Alliance sponsored Chicago's annual Constitution Day Parade in Chicago, and at this point in the RECORD I wish to insert the 2-day program of the events commemorating Poland's May 3, 1791, Constitution:

The program of events follows:

SATURDAY, MAY 7, 1983

PROGRAM AT REVIEWING STAND, DEARBORN AND WASHINGTON STREETS, 12 NOON

Welcome: Mrs. Helen M. Szymanowicz, Vice President, Polish National Alliance; General Chairman, Poland's Constitution Day.

National Anthems: Mr. Bogdan Parafinczuk, Accompanied by U.S. 81st Army Band, Fort Sheridan, Illinois.

Parade Narrators: Mrs. Helen Szymanowicz, Mr. Bob Lewandowski, WCIU-TV, WSBC Radio.

Grand Marshal: Honorable Roman C. Pucinski, Alderman, 41st Ward.

Parade Coordinator: Larry Rzewski.

PROGRAM AT RICHARD J. DALEY CENTER, 1:30 P.M.

Welcome: Mr. Roman Kolpacki, Commissioner, District 12, Polish National Allicance.

Invocation: The Right Reverend Joseph K. Zawistowski, Bishop, Western Diocese, Polish National Catholic Church.

Master of Ceremonies: Honorable Aloysius A. Mazewski, President, Polish National Alliance, President, Polish American Congress.

Remarks: Honorable James R. Thompson, Governor, State of Illinois.

Remarks: Honorable Harold Washington, Mayor, City of Chicago.

Principal Address: Honorable Alan Dixon, U.S. Senator, Illinois.

Address: Honorable Miroslaw Chojecki, Solidarity Union Official.

Benediction: Very Rev. Edward J. Pajak, Vicar General, Pastor, Holy Innocents Parish.

Closing:

SUNDAY, MAY 8, 1983

Assembly for Solemn Mass: 10:00 a.m.—Holy Trinity School Hall, 1123 Cleaver St.

March to Church: 10:45 a.m. to Holy Trinity Church, 1118 Noble St.

Solemn Mass: 10:30 a.m.—Rev. Casimir Tadla, CR, Pastor, Principal Celebrant and Homolist Co-Celebrants: Rev. Joseph Bartkowiz C.R., Rev. Walter Krempa; Deacon: Rev. Dr. Edward C. Rozanski; Choir under direction of Mr. Joseph Labuds.

Executive Committee: Helen M. Szymanowicz, Chairman, Roman Kolpacki, Commissioner Dist. 12 PNA; Genevieve Wesolowski, Commissioner Dist. 12 PNA; Joseph I. Sikora, Commissioner Dist. 13 PNA; Kazimiera Pytel, Commissioner Dist. 13 PNA.

The drafting and adoption of the constitution of 1791 by patriotic Polish leaders marked a turning point in the

history of that country. By that significant document the Poles effected a peaceful change in the structure of their Government without resorting to the bloody and violent measures which characterized the French Revolution. By adopting a progressive and popular constitution, they led their countrymen from the feudal ways of the Middle Ages to the concepts of individual liberty and responsibility which characterized the American Constitution of 1776.

The constitution contained many provisions which still retain their validity today. Under these provisions the authority of the monarch was sharply curtailed, and ministerial responsibility was established. The intricate and obstructive features of the old system were eliminated. The upper chamber lost some of its preponderant powers and the second chamber, the elected representative body of the nation, was vested with genuine legislative authority. Economic barriers between the nobility and the middle class were drastically lowered.

The townsmen recovered their judicial autonomy and gained a number of political rights, especially that of admission to many of the higher offices. The peasantry was taken under the protection of the law and religious toleration was established. The constitution abolished the worst abuses from which Poland had been suffering for centuries. Through the abolition of the most pressing political evils of the old regime, and by granting increased freedom to the middle and lower classes, the Constitution of 1791 marked a great advance over all previous attempts at reform in Poland.

Unfortunately, before the Poles had any chance to enjoy the benefits of this constitution their homeland was divided among the autocrats of Austria, Prussia, and Russia. Having thus lost their sovereign existence and national independence, Poles became subjects of the alien governments in their homeland, and for more than 120 years they lived under oppressive foreign regimes.

Then, toward the end of the First World War, when they witnessed the defeat and disintegration of the governments which occupied their country, they joyfully seized upon the opportunity and regained their national freedom. The birth of the Republic of Poland in 1918 also signified the resurgence of the spirit embodied in the Polish Constitution of 1791.

On the anniversary observances of Polish Constitution Day it is impossible to omit a reference to today's Poland, which is a far cry from what all patriotic and liberty-loving Poles had hoped it to be. They had dreamed, prayed, and worked for a liberated, free, and independent Poland. We all know that since the treacherous seizure of their country at the end of the last war these Poles have not known freedom.

Despite all the outrages suffered by the heroic Polish people at the hands of their Communist oppressors, these dauntless souls cling to their noble ideals as outlined in the Constitution of 1791. I am proud to join with Americans of Polish heritage in the 11th District of Illinois, which I am honored to represent, in Chicago, and all over this Nation in expressing support for the strong and unwavering desire of the Polish people that Poland once again may be free to decide its own national destiny.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON of Florida. Madam Speaker, due to unavoidable circumstances, I was not present and was, therefore, unable to cast my vote on rollcall No. 87, which was an amendment to House Joint Resolution 13 that permit safety-related improvements in strategic bombers. Had I been present, I would have voted for this amendment.

Also, I was not present and was, therefore, unable to cast my vote on rollcall No. 88, which was a motion to recommit House Joint Resolution 13 to the Committee on Foreign Affairs. Had I been present I would have voted against this motion to recommit.

Also, I was not present and was, therefore, unable to cast my vote on H.R. 2357 (rollcall No. 90), which provided for an increase in the number of members of the Congressional Award Board; H.R. 2173 (rollcall No. 91), which amended the Contract Services for Drug Dependent Federal Offenders Act of 1978; H.R. 2174 (rollcall No. 92), which amended the United States Code to prohibit certain tampering with consumer products; S. 653 (rollcall No. 93) which amended the United States Code to establish a Foundation for the Advancement of Military Medicine; and House Resolution 184 (rollcall No. 94), which was the rule to consider H.R. 2175, Justice Assistance. On all five of these votes, I would have voted for if I had been present.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. CLARKE) is recognized for 5 minutes.

● Mr. CLARKE. Madam Speaker, on May 9, 1983, I was necessarily absent for several votes. I would like to make clear my position on those measures considered by the House.

On the motion to suspend the rules and pass H.R. 2357, the Congressional Award Act, rollcall No. 90, I would have voted "yea."

On the motion to suspend the rules and pass H.R. 2173, the Contract Services for Drug Dependent Federal Offenders Authorization Act of 1983, rollcall No. 91, I would have voted "yea."

On the motion to suspend the rules and pass H.R. 2174, the Federal Antitampering Act, rollcall No. 92, I would have voted "yea."

On the motion to suspend the rules and pass S. 653, the Foundation for the Advancement of Military Medicine Act of 1983, rollcall No. 93, I would have voted "yea."

On the motion to approve House Resolution 184, providing for the consideration of H.R. 2175, the Justice Assistance Act of 1983, rollcall No. 94, I would have voted "yea."

Madam Speaker, I appreciate having this opportunity to make my position known for the RECORD.●

URGING SUPPORT FOR AN AMENDMENT TO THE FEDERAL ELECTION CAMPAIGN ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HAMILTON) is recognized for 5 minutes.

● Mr. HAMILTON. Madam Speaker, I bring to the attention of the House a bill which I am introducing today to amend the Federal Election Campaign Act to modify the role that political action committees (PAC's) now play in our electoral process.

Every election brings renewed calls, both within and outside Congress, for reform of the congressional campaign finance laws. The 1982 election was no exception. In particular, critics charge that political action committees wield excessive power as a result of their sizable contributions to candidates' campaigns. They argue that PAC money corrupts the legislative process by giving inordinate access and influence to special, narrow interests. Consequently, it becomes increasingly difficult to form a cohesive national policy on any issue. While PAC's may not "buy" particular votes, legislators find it difficult to vote against these narrow interests because of their dependence upon PAC's for campaign funding. In addition, the PAC's tilt toward incumbents adds to the incumbent's existing advantages and makes it extremely difficult for challengers to mount a viable campaign.

There is certainly no doubt about the significant and growing role PAC's play in financing election campaigns. The statistics speak for themselves. PAC's contributed $83 million to Federal candidates for the 1982 elections, more than a 50-percent increase over the figure for the 1980 elections. Twenty winners of House campaigns

received over $200,000, and 170 winners received more than $100,000 from PAC's. In Senate campaigns, 12 winners received more than $500,000 from PAC's, and the average for winners was $450,000. In the 1980 general elections, 21 percent of Senate candidates' funds and 29 percent of House candidates' funds came from PAC's, and it appears likely that final figures for the 1982 elections will show a similar or even larger role for PAC's in financing campaigns.

What is more worrisome than the growing role of PAC's in elections is the growing public perception that there is a connection between this campaign money and action in Congress. Such a view breeds cynicism about Congress and the political system. In recent years, academics have pointed to a decline in the public's trust and confidence in Government institutions. Continuing media coverage of the activities of PAC's contributes to this disturbing trend. In the long run, PAC's significant role in financing elections and the resultant public perception that PAC's wield inordinate influence over legislators cannot be healthy for the political system. The foundation of democratic government—the trust and confidence of the people—is being undermined.

Yet some perspective on the role of PAC's is needed. PAC's are not nefarious in and of themselves. They are legitimate associations of individuals. In fact, the campaign finance reforms of the early 1970's gave them a legal role in elections. Proposals to reform the campaign finance laws which are designed, either implicitly or explicitly, to deny them such a role could lead to PAC spending we would find even more pernicious than present patterns. For example, these proposals likely would lead to much greater independent expenditures by PAC's. PAC's are now operating, thriving organizations. We should be seeking ways to constructively channel the activities of PAC's and to moderate their role rather than trying to eliminate them. PAC's themselves are not harmful. But candidates' reliance upon PAC's for significant portions of their campaign funding and the ensuing public perception of corruption are harmful.

Many proposals to reform our campaign finance laws focus on public funding of elections, not only as a way of encouraging reliance on small individual contributions, but also because it provides the means to discourage independent expenditures by PAC's and large personal expenditures by candidates. Furthermore, candidates who accept public funding could be subject to constitutionally acceptable limits on total expenditures. These proposals would provide public funds to match small individual contributions and to respond to independent expenditures, and they would impose limits on personal expenditures and total campaign expenditures as a condition for providing public funds.

While the advantages of public funding are attractive, there are serious drawbacks as well. For one thing, the low total expenditure ceilings common to public funding proposals hinder challengers, who must spend a certain amount just to get name recognition, and add to incumbents' already considerable advantages, thus detracting from the competitiveness of elections. But the most significant problem with these proposals is that polls indicate that the public is highly skeptical of public funding of congressional campaigns. In an era of high budget deficits, it will be extremely difficult, at best, to convince the public that funds should be made available from the Treasury to finance congressional campaigns. There is just no consensus in favor of public funding, either within Congress or the public, and it is simply not likely, in the present political circumstances, to expect the enactment of a public financing law.

Even so, I believe that something must be done to break the public perception of undue PAC influence on Congress. We should take a first step now rather than wait for a consensus to develop about public funding, if in fact one ever does develop. Consequently, I am introducing a bill to reform the campaign finance laws. The bill addresses the problem of the perceived corrupting influence of PAC's, but does it in such a way that the competitiveness of elections is maintained and strengthened, that independent expenditures are discouraged, and that personal expenditures by candidates are also minimized.

The bill puts a cap on the aggregate amount that candidates may receive from PAC's. The $200,000 to $600,000 limit, depending upon the size of the State, on Senate candidates, and the $90,000 limit on House candidates allows the PAC's to continue to participate in elections, but keeps each candidate's PAC receipts at a respectable level and avoids individual instances of large contributions from a related group of PAC's. This will also dampen the problem of opportunistic money that is given by PAC's at the end of campaigns purely because they perceive the candidate as a winner and desire to "buy in" to a successful campaign.

Free TV and radio air time is provided to allow candidates to respond to independent expenditures through TV and radio advertisements. Candidates can thus deal with TV and radio spots even where the candidates lack sufficient funds and without diverting scarce resources from other elements of their campaigns. Furthermore, additional party contributions are authorized for the candidates to respond to other types of independent expenditures. These party contributions will be allowed in an amount equal to the amount of such independent expenditures by groups or individuals.

Large personal expenditures by candidates are discouraged by allowing their opponents higher limits of individual, PAC, and party contributions. If personal and immediate family campaign expenditures exceed $25,000 for a candidate for the House or $50,000 for a candidate for the Senate, the limits on contributions to the opposing candidates from individuals and PAC's and the PAC aggregate limit are doubled. Additionally, all limits on party spending and contributions to the opposing candidate are removed.

Lastly, the bill widens the option of sources of funds other than PAC's by raising the individual contribution limit and allowing more party spending. Because of inflation, the present $1,000 individual limit is now worth about half of what it was originally. That and the disparity between it and the $5,000 PAC limit to a candidate certainly give the candidate incentives to seek funds from PAC's rather than from individuals. The bill raises the individual limit to $3,500 to diminish this disparty and to make it worthwhile again for the candidate to seek individual contributions.

The political party provides an alternate source of funds which not only releases the candidate from an excessive preoccupation with fundraising but also provides the sizable sums of money that make PAC's so attractive. Yet these funds are free of the public perception of corruption which taints the reliance on large sums of PAC money. The Republican Party has shown the advantages of party spending and the Democratic Party has begun its own effort. Consequently, while the bill restricts PAC contributions to candidates, it raises the PAC contribution limit to political parties and raises the limits on party support to candidates. In order to adjust gradually to the increasing fund raising efforts of the parties, the limits on party support to candidates will be raised gradually over three elections.

I am well aware of the "law of unintended consequences" which has made us hesitant to change the present campaign finance laws for fear of raising new, unforeseen problems. But we have studied the issues and the consequences of the present law long enough. It is time to take a first, but reasoned, step forward. As representatives of the people, we have no other task more urgent than trying to build the public's trust and confidence in our democratic institutions. We must have confidence that we can adjust the present campaign finance laws to that end.

Madam Speaker, I urge the speedy consideration of this bill.

SUMMARY OF PROPOSED CAMPAIGN FINANCE BILL

PAC LIMITATIONS

House—Limit the amount a candidate may accept from PACs to $90,000 per election cycle.

Senate—Limit the amount a candidate may receive from PACs to $200,000 or $400,000 multiplied by the number of representatives the state has in Congress, but no candidate may receive more than $600,000 in PAC contributions.

Limits—PAC contribution limits remain the same except that PACs may contribute up to $35,000 to party committees.

INDIVIDUAL LIMITS

Raise the individual contribution limit to a candidate to $3,500 per election.

Remove the contribution limit to party committees, thus, in effect, raising it from $20,000 to the aggregate individual limit of $25,000.

PARTY COMMITTEES

House—Increase the coordinate spending base from $10,000 to $18,000 over 3 elections: 1986—$13,000; 1988—$16,000; 1990—$18,000.

Increase the direct contribution limit from national committees to a candidate from $20,000 to $60,000 for nomination and election to Congress over 3 elections: 1986—$35,000; 1988—$50,000; 1990—$60,000.

Senate—Increase coordinate spending from 2 cents to 4 cents multiplied by the voting age population of the state over 3 elections: 1986—3 cents; 1988—3.5 cents; 1990—4 cents.

Increase the direct contribution limit to a candidate from $17,500 to $50,000 over 3 elections: 1986—$30,000; 1988—$40,000; 1990—$50,000.

INDEPENDENT EXPENDITURES

Require radio and television stations which broadcast attacks on a candidate or support of an opposing candidate by independent groups to provide comparable free time to the candidate to respond.

Allow additional direct party contributions to candidates in response to other types of independent expenditures in an amount equal to the amount of such expenditures when their aggregate exceeds $1,000.

PERSONAL EXPENDITURES BY CANDIDATES

If personal and immediate family campaign expenditures exceed $25,000 for a candidate for the House or $50,000 for a candidate for the Senate, the limits on contributions to the opposing candidates from individuals and PAC's and the PAC aggregate limit are doubled. Additionally, all limits on party spending and contributions to the opposing candidates are removed.

INFLATION

Limits on party committee contributions to candidates would be adjusted for inflation as would the limit on PAC contributions to political parties.

REPORTING

Radio and television stations which broadcast attacks on a candidate or support of an opposing candidate by independent groups must notify the candidate or candidates of such a broadcast within 24 hours of its airing.

Candidates making personal expenditures must report to the Federal Election Commission within 24 hours after they have exceeded the limits on personal expenditures.

PAC's and individuals making independent expenditures aggregating above $1,000 must report such expenditures to the FEC within 24 hours of the expenditure within 90 days of an election.

The FEC, the Secretary of the Senate, or the Clerk of the House must notify the opposition candidates within 24 hours of receiving a report about independent or personal expenditures.

OTHER

Special elections, including any primaries leading to them, are treated like general elections and their primaries for the purpose of PAC limits.

Include a provision adding to the definition of "contribution" to cover the extension of credit by "political consultants."●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. MACKAY) is recognized for 5 minutes.

● Mr. MACKAY. Madam Speaker, due to the late arrival of my flight returning to Washington from my district on Monday, May 9, 1983, I was unable to cast my vote on the four bills considered under suspension of the rules. I would like to take this opportunity to make my position on these measures known for the RECORD.

Had I been present, I would have voted as follows: Rollcall No. 90, to suspend the rules and pass H.R. 2357, the Congressional Award Act, I would have voted "yes;" on rollcall No. 91, to suspend the rules and pass H.R. 2173, relating to contract services for drug dependent Federal offenders, I would have voted "yes;" on rollcall No. 92, to suspend the rules and pass H.R. 2174, the Federal Antitampering Act, I would have voted "yes;" and, on rollcall No. 93, to suspend the rules and pass S. 653, relating to the Foundation for the Advancement of Military Medicine, I would have voted "yes."

Madam Speaker, I appreciate having this opportunity to announce my position on these four bills for the RECORD.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MICHEL (at the request of Mr. LOTT), for today and tomorrow, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. BILIRAKIS) to revise and extend their remarks and include extraneous material:)

Mr. COATS, for 60 minutes, on May 11.

Mr. MYERS, for 60 minutes, on May 11.

Mr. BETHUNE, for 60 minutes, today.

Mrs. VUCANOVICH, for 5 minutes, today.

Mr. HORTON, for 5 minutes, today.

Mr. CORCORAN, for 10 minutes, today.

Mr. PORTER, for 5 minutes, today.

Mr. SNYDER, for 5 minutes, today.

Mr. PASHAYAN, for 5 minutes, today.

(The following Members (at the request of Mr. KOLTER) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 30 minutes, today.

Mr. NELSON of Florida, for 5 minutes, today.

Mr. CLARKE, for 5 minutes, today.

Mr. HAMILTON, for 5 minutes, today.

Mr. MACKAY, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent to revise and extend remarks was granted to:

Mr. EDGAR, to revise and extend his remarks and include extraneous material notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,328.

(The following Members (at the request of Mr. GREGG) and to include extraneous matter:)

Mr. MCKINNEY.

Mr. GOODLING.

Mrs. JOHNSON.

Mr. JEFFORDS in two instances.

Mrs. VUCANOVICH.

Mr. OXLEY in two instances.

Mr. PAUL.

Mr. HILER.

Mr. SILJANDER.

Mr. WEBER.

Mr. MCGRATH.

Mr. DAUB.

Mr. WOLF.

Mr. YOUNG of Florida in 10 instances.

Mr. MCKERNAN.

Mrs. SCHNEIDER.

(The following Members (at the request of Mr. KOLTER) and to include extraneous matter:)

Mr. STAGGERS.

Mr. BROWN of California in five instances.

Mr. KASTENMEIER.

Mr. YATRON.

Mr. EDWARDS of California.

Mr. DYSON in two instances.

Ms. FERRARO.

Mr. BARNES.

Mr. TORRES in two instances.

Mr. FORD of Michigan in two instances.

Mr. RAHALL.

Mr. FORD of Tennessee.

Mr. PEPPER.

Mrs. COLLINS.

Mr. HATCHER.

Mr. RODINO in two instances.

Mr. WILLIAMS of Montana.

Mr. MRAZEK.
Mr. MCDONALD.
Mr. SIMON.
Mr. TORRICELLI.
Mr. FAZIO.
Mr. OTTINGER.
Mr. ALEXANDER.
Mr. MACKAY.
Mr. HOYER.
Mr. MITCHELL.
Mr. BORSKI.

ADJOURNMENT

Mr. KOLTER. Madam Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock p.m.) under its previous order, the House adjourned until tomorrow, Wednesday, May 11, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1101. A letter from the Assistant Secretary of the Air Force (Manpower, Reserve Affairs and Installations), transmitting a draft of proposed legislation to amend title 10, United States Code, to clarify the authority of the Armed Forces to conduct safety investigations of accidents involving aircraft of the Armed Forces and to protect from public disclosure certain parts of reports of such investigations; to the Committee on Armed Services.

1102. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the shelf-stocking function at the branch commissary store, Cecil Field, Fla., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1103. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the shelf-stocking function at the branch commissary store, Jacksonville, Fla., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1104. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the shelf-stocking function at the branch commissary store, Orlando, Fla., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1105. A letter from the Assistant Secretary of the Navy (Shipbuilding and Logistics), transmitting notice of the Navy's decision to convert to contractor performance the custodial services function at the Naval Medical Command, Bethesda, pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1106. A letter from the Chief of Legislative Affairs, Department of the Navy, transmitting notice of the Navy's intention to lease a certain naval vessel to the Government of Turkey, pursuant to 10 U.S.C. 7307(b)(2); to the Committee on Armed Services.

1107. A letter from the Acting Secretary of the Treasury, transmitting a report on activities relating to the minting of 1984 Los Angeles Olympic Games coins, during the period of January 1, 1983, to March 31, 1983, pursuant to section 11 of Public Law 97-220; to the Committee on Banking, Finance and Urban Affairs.

1108. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting a copy of EIA's 1982 annual energy review, pursuant to the section 57(a)(2) of the Federal Energy Administration Act, as amended; to the Committee on Energy and Commerce.

1109. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles and services to Pakistan (Transmittal No. 83-33), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1110. A letter from the Chairman, U.S. Commission on Civil Rights, transmitting a report of urban minority economic development in Baltimore, pursuant to section 104(c) of Public Law 85-315; to the Committee on the Judiciary.

1111. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the Saltonstall-Kennedy Act to allow the carryover of funds without fiscal year limitation; to the Committee on Merchant Marine and Fisheries.

1112. A letter from the Secretary of Transportation, transmitting the fourth annual report on the highway bridge replacement and rehabilitation program, pursuant to 23 U.S.C. 144(i); to the Committee on Public Works and Transportation.

1113. A letter from the Secretary of Transportation, transmitting the third annual report on collision avoidance systems, pursuant to section 401 of Public Law 96-193; to the Committee on Public Works and Transportation.

1114. A letter from the Deputy Administrator, National Highway Traffic Safety Administration, transmitting a report on the status of the highway safety innovative grants program, pursuant to 23 U.S.C. 407(e); to the Committee on Public Works and Transportation.

1115. A letter from the Assistant Secretary of Energy for Conservation and Renewable Energy, transmitting the seventh annual report from the Interagency Geothermal Coordinating Council on the activities and programs in geothermal energy, pursuant to section 302(a) of Public Law 93-410; to the Committee on Science and Technology.

1116. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting the annual reports on the financial condition and results of operations of the airport and airway, hazardous substance response, highway, inland waterways, and reforestation trust funds, pursuant to 26 U.S.C. 9602(a), 42 U.S.C. 9633(b)(1), 26 U.S.C. 9602(a), 33 U.S.C. 1801(c), and 16 U.S.C. 1606a(c)(1); to the Committee on Ways and Means.

1117. A letter from the Deputy U.S. Trade Representative, Executive Office of the President, transmitting a semiannual report on the operation and effect of the International Sugar Agreement, 1977, pursuant to section 5 of Public Law 96-236 and Executive Order 12224; jointly, to the Committees on Agriculture and Ways and Means.

1118. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Low-Income Home Energy Assistance Act of 1981 to improve the grant allotment formula, to remove certain burdensome and unnecessary Federal administrative requirements on State programs, and for other purposes; jointly, to the Committees on Energy and Commerce and Education and Labor.

1119. A letter from the Comptroller General of the United States, transmitting a report on the examination of the Overseas Private Investment Corporation's financial statements for the fiscal years ended September 30, 1982 and 1981 (ID-83-40, May 6, 1983); jointly, to the Committees on Government Operations and Foreign Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BEILENSON: Committee on Rules. House Resolution 187. Resolution providing for the consideration of H.R. 2307, a bill to amend the Tribally Controlled Community College Assistance Act of 1978, and for other purposes (Rept. No. 98-96). Referred to the House Calendar.

Mr. FROST: Committee on Rules. House Resolution 188. Resolution providing for the consideration of H.R. 2513, a bill to authorize appropriations to the Secretary of Commerce for the programs of the National Bureau of Standards for fiscal year 1984, and for other purposes (Rept. No. 98-97). Referred to the House Calendar.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2477. A bill entitled the "Sipsey Wilderness Additions Act of 1983"; with amendments (Rept. No. 98-98 Pt. I). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2465. A bill to authorize appropriations for the Earthquake Hazards Reduction Act of 1977 and the Federal Fire Prevention and Control Act of 1974 for fiscal year 1984 and fiscal year 1985, and for other purposes (Rept. No. 98-99 Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ST GERMAIN (for himself, Mr. WYLIE, Mr. NEAL, Mr. PATTERSON, and Mr. LEACH of Iowa):

H.R. 2957. A bill to extend the authority of the Export-Import Bank of the United States, encourage balanced worldwide economic growth, provide for continued participation in the International Monetary Fund, strengthen the supervision of international lending by U.S. banks, and provide for continued U.S. participation in multilateral development banks; to the Committee on Banking, Finance and Urban Affairs.

By Mr. EVANS of Iowa (for himself, and Mr. STANGELAND):

H.R. 2958. A bill to amend the Agricultural Act of 1949 to authorize the Secretary of Agriculture to make payments to reimburse producers for the cost of applying approved conservation practices to acreage diverted under an acreage limitation program for the 1982 through 1985 crops of wheat, feed grains, upland cotton, rice, and soybeans; to the Committee on Agriculture.

By Mr. HAMILTON:

H.R. 2959. A bill to amend the Federal Election Campaign Act of 1971 to limit contributions by nonparty multicandidate political committees in congressional elections, and for other purposes; jointly, to the Committees on House Administration and Energy and Commerce.

By Mr. JEFFORDS (for himself, Mr. MRAZEK, Mr. WYDEN, Mr. FRANK, Mr. BEILENSON, Mr. WEAVER, Mr. ACKERMAN, Ms. SNOWE, Mr. MORRISON of Connecticut, Mr. WAXMAN, Mr. CARPER, Mr. EDGAR, Mr. LELAND, and Mr. KILDEE):

H.R. 2960. A bill to require a refund value for certain beverage containers, and for other purposes; to the Committee on Energy and Commerce.

By Mr. MCCOLLUM:

H.R. 2961. A bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act to require the denial of registration of a pesticide unless there is submitted certain third-party data demonstrating that such pesticide will not cause unreasonable adverse effects on the environment; to the Committee on Agriculture.

By Mr. PAUL:

H.R. 2962. A bill to repeal all authority of the Federal Government to regulate wages in private employment; to the Committee on Education and Labor.

By Mr. PEPPER:

H.R. 2963. A bill to amend section 312(1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

By Mr. PORTER:

H.R. 2964. A bill to amend title 18 of the United States Code to clarify and modify the criminal law with respect to persons alleged to be insane at the time of the alleged commission of Federal offenses, and for other purposes; to the Committee on the Judiciary.

By Mr. SAWYER:

H.R. 2965. A bill to provide for uniform State licensing of marine recreational fishermen, and other purposes; to the Committee on Merchant Marine and Fisheries.

By Mrs. VUCANOVICH (for herself and Mr. REID):

H.R. 2966. A bill to authorize the conveyance of certain lands to the county of Mineral, Nev.; to the Committee on Armed Services.

By Mrs. VUCANOVICH:

H.R. 2967. A bill to award a special congressional gold medal to the daughter of Gutzon Borglum; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SIMON (for himself and Mr. GILMAN):

H.J. Res. 263. Joint resolution designating October 16, 1983, as "World Food Day"; to the Committee on Post Office and Civil Service.

By Mr. BROWN of California, (for himself, Mr. BARNES, Mr. BEDELL, Mr. BEILENSON, Mr. CONYERS, Mr. DELLUMS, Mr. DYMALLY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. FEIGHAN, Mr. KASTENMEIER, Mr. LEHMAN of Florida, Mr. LELAND, Mr. LEVINE of California, Mr. LOWRY of Washington, Ms. MIKULSKI, Mr. MITCHELL, Mr. OWENS, Mr. PEASE, Mrs. SCHROEDER, Mr. SIMON, Mr. TORRICELLI, Mr. WALGREN, Mr. WEAVER, Mr. WOLPE, and Mr. TAUKE):

H. Con. Res. 123. Concurrent resolution expressing the sense of the Congress that the common security of all nations is threatened by the escalating arms race and that the danger of nuclear war requires renewed and persistent efforts to negotiate a comprehensive treaty for stage disarmament to be verified by an international security and disarmament authority and accompanied by strengthened international peacekeeping and dispute resolution institutions; to the Committee on Foreign Affairs.

By Mr. FAUNTROY (for himself, Mr. BARNES, Mr. GRAY, and Mr. STARK):

H. Res. 189. Resolution to preserve and restore the first town hall of the city of Washington, D.C., the historic Rhodes Tavern; to the Committee on the District of Columbia.

By Mrs. SCHNEIDER (for herself, Ms. SNOWE, Mr. RODINO, Mr. EDWARDS of California, Mr. JEFFORDS, Mrs. SCHROEDER, Mrs. Collins, Mrs. MARTIN of Illinois, Mr. PRITCHARD, Mr. LEACH of Iowa, Mr. FISH, Ms. OAKAR, Ms. FERRARO, Ms. MIKULSKI, Mr. FAUNTROY, Mr. WOLPE, Mr. WEAVER, Mr. STARK, Mr. RATCHFORD, Mr. FORD of Tennessee, Mr. OBERSTAR, Mr. FROST, Mr. FOLEY, Mr. WALGREN, Mr. FASCELL, Mr. LELAND, Mr. DYMALLY, Mr. PETRI, Mr. SOLARZ, Mr. WYDEN, Mr. AKAKA, Mr. FRENZEL, Mr. MAVROULES, Mr. BROWN of California, Mr. BORSKI, Mr. UDALL, Mrs. BOGGS, Mr. DUNCAN, Mr. EDGAR, Mr. SMITH of Florida, Mr. GRAY, Mr. FRANK, Mr. HOWARD, Mr. SCHUMER, Ms. KAPTUR, Mr. FOGLIETTA, Mr. MITCHELL, Mr. MATSUI, Mr. LEVIN of Michigan, Mr. SWIFT, Mr. MCKERNAN, Mr. PEASE, Mr. MARKEY, Mr. BEREUTER, Mrs. JOHNSON, and Mr. GONZALEZ):

H. Res. 190. Resolution expressing the sense of the House of Representatives with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity; to the Committee on Education and Labor.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

116. By the SPEAKER: Memorial of the Legislature of the State of New York, relative to the installation of a U.S. Navy base in the New York-New Jersey Harbor; to the Committee on Armed Services.

117. Also, memorial of the Legislature of the State of California, relative to natural gas cost; to the Committee on Energy and Commerce.

118. Also, memorial of the Legislature of the State of Hawaii, relative to the establishment of strategic petroleum reserves; to the Committee on Energy and Commerce.

119. Also, memorial of the Legislature of the State of Nevada, relative to fluoride levels in water; to the Committee on Energy and Commerce.

120. Also, memorial of the House of Representatives of the State of Arizona, relative to American prisoners and Americans missing in action in Southeast Asia; to the Committee on Foreign Affairs.

121. Also, a memorial of the Legislature of the State of Hawaii, relative to the export of unregistered pesticides; to the Committee on Foreign Affairs.

122. Also, a memorial of the Legislature of the State of Hawaii, relative to the Caribbean Basin Economic Recovery Act; to the Committee on Ways and Means.

123. Also, a memorial of the Legislature of the State of Hawaii, relative to tax-exempt revenue bonds as primary source of funding for Hawaii's Hula Mae mortgage loan program; to the Committee on Ways and Means.

124. Also, a memorial of the Legislature of the State of Hawaii, relative to the National Aquaculture Act of 1980; jointly, to the Committees on Agriculture and Merchant Marine and Fisheries.

125. Also, a memorial of the General Assembly of the State of Tennessee, relative to unfair agricultural trade barriers, subsidies, and import restrictions; jointly, to the Committees on Foreign Affairs and Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 10: Ms. FERRARO, Mr. VANDERGRIFF, Mr. PACKARD, Mr. ANDREWS of Texas, Mr. SUNDQUIST, Mr. VALENTINE, Mr. RIDGE, and Mr. MCCLOSKEY.

H.R. 100: Mrs. HOLT, Mr. RANGEL, and Ms. SNOWE.

H.R. 279: Mr. MCEWEN.

H.R. 511: Mr. MCCOLLUM.

H.R. 625: Mr. BEDELL, Mr. BERMAN, Mr. BRITT, Mr. BROOMFIELD, Mr. BROYHILL, Mr. CHANDLER, Mr. CONTE, Mr. DANIEL B. CRANE, Mr. PHILIP M. CRANE, Mr. DANIEL, Mr. DOWDY of Mississippi, Mr. EDWARDS of Oklahoma, Mr. EMERSON, Mr. FRENZEL, Mr. SAM B. HALL, JR., Mr. HALL of Ohio, Mr. HARTNETT, Mr. HILER, Mr. HORTON, Mr. HUGHES, Ms. KAPTUR, Mr. KASTENMEIER, Mr. KEMP, Mr. LAGOMARSINO, Mr. LATTA, Mr. MARRIOTT, Mr. MARTIN of New York, Mr. MCGRATH, Mr. MILLER of Ohio, Mr. MONTGOMERY, Mr. MOORHEAD, Mr. MYERS, Mr. PARRIS, Mr. PASHAYAN, Mr. REGULA, Mr. ROE, Mr. SCHAEFER, Mr. SHUMWAY, Mr. SKEEN, Mr. STANGELAND, Mr. VENTO, and Mr. WILSON.

H.R. 635: Mr. SHUMWAY.

H.R. 1028: Mr. FRANK and Mr. OLIN.

H.R. 1036: Mr. MCCLOSKEY, Mr. CARR, Mr. ZABLOCKI, and Mr. WEAVER.

H.R. 1244: Mr. ROSTENKOWSKI and Mr. VALENTINE.

H.R. 1286: Mrs. BOXER, Mr. MARKEY, Mr. RANGEL, Mr. WHEAT, and Mr. LELAND.

H.R. 1307: Mr. ROSE, Mr. LELAND, and Mr. ORTIZ.

H.R. 1315. Mr. ADDABBO, Mr. BLILEY, Mrs. BOGGS, Mr. BROOMFIELD, Mr. CHAPPELL, Mr. DWYER of New Jersey, Mr. HERTEL of Michigan, Mr. HOPKINS, Mr. HYDE, Mr. KASICH, Mr. MORRISON of Connecticut, Mr. MRAZEK, Mr. OWENS, Mr. SIMON, Mrs. VUCANOVICH, and Mr. WINN.

H.R. 1373: Mr. CROCKETT, Mr. HERTEL of Michigan, Mr. SKEEN, and Mr. MITCHELL.

H.R. 1418: Mr. FEIGHAN, Mr. ACKERMAN, Mr. MOODY, Mr. STOKES, Mr. HARKIN, Mr. MCKINNEY, Mr. SPENCE, Mr. NIELSON of Utah, Mr. GARCIA, Mrs. SCHROEDER, Mr. CARPER, Mr. OLIN, Mrs. LLOYD, Mr. BOUCHER, Mr. KOSTMAYER, Mr. GRAY, Mr. LEATH of Texas, Mr. DANIEL, Mr. OTTINGER, Mrs. BOXER, Mr. MOLINARI, Mr. PATTERSON, Mr. BARTLETT, Mr. SUNDQUIST, Mr. CRAIG, Mr. BILIRAKIS, Mr. FLIPPO, and Mr. BORSKI.

H.R. 1430: Mr. OWENS.

H.R. 1441: Mrs. COLLINS and Mr. PORTER.

H.R. 1584: Mr. WAXMAN and Mr. BADHAM.

H.R. 1590: Mr. FAUNTROY and Mr. WOLPE.

H.R. 1595: Mr. ACKERMAN, Mr. FAUNTROY, Mr. CARPER, Mr. MATSUI, Mr. MOAKLEY, Mr. DASCHLE, Mr. DONNELLY, Mr. HARKIN, Mr. ROE, Mr. TALLON, Mr. KILDEE, Mr. LOWRY of Washington, and Mr. PANETTA.

H.R. 1597: Mr. LEVINE of California.

H.R. 1706: Mr. LEWIS of Florida, Mr. WHITTEN, Mr. BATES, Mr. TAUZIN, Mrs. HALL of Indiana, and Mr. KEMP.

H.R. 1752: Mr. SHANNON.

H.R. 1880: Mr. ANDERSON, Mr. LANTOS, Mr. MAVROULES, and Mr. PEPPER.

H.R. 1955: Mr. SIMON.

H.R. 1991: Mr. CHANDLER, Mr. EVANS of Iowa, Mrs. HOLT, and Mr. LELAND.

H.R. 2062: Mr. BREAUX, Mr. JONES of North Carolina, Mr. FORSYTHE, Mr. STUDDS, Mr. OBERSTAR, Mr. HUGHES, Mr. SUNIA, Mr. HERTEL of Michigan, Mr. LIPINSKI, Mrs. BOXER, Mrs. SCHNEIDER, Mr. BEILENSON, Mr. SMITH of Florida, Mr. THOMAS of Georgia, Mr. GUARINI, Mr. RATCHFORD, Mr. PANETTA, Mr. MCKINNEY, Mr. EDGAR, Mr. LOWRY of Washington, Mr. BENNETT, Mr. HEFTEL of Michigan, Mr. HOWARD, and Mr. FEIGHAN.

H.R. 2106: Mr. FIELDS, Mr. LELAND, Mr. MCKINNEY, Mr. RANGEL, Mr. DENNY SMITH, Mr. STANGELAND and Mr. WHITEHURST.

H.R. 2126: Mr. MARRIOTT, Mr. LANTOS, Mr. CORRADA, Mr. LEHMAN of Florida, Mr. LAFALCE, Ms. OAKAR, Mr. STARK, and Mr. EVANS of Iowa.

H.R. 2127: Mr. LELAND, Mr. MARRIOTT, Mr. LANTOS, Mr. LEHMAN of Florida, Mr. LAFALCE, Ms. OAKAR, Mr. STARK, Mr. EVANS of Iowa, and Mrs. HOLT.

H.R. 2152: Mr. FORSYTHE.

H.R. 2153: Mr. HOWARD and Mr. FORSYTHE.

H.R. 2161: Mr. LEWIS of Florida and Mr. DAUB.

H.R. 2207: Mr. HAWKINS.

H.R. 2374: Mr. PORTER, Mrs. JOHNSON, Mr. LANTOS, Mr. DOWNEY of New York, Mr. LEHMAN of Florida, Mr. LAFALCE, Ms. OAKAR, Mr. LELAND, Mr. EVANS of Iowa, and Mr. VANDERGRIFF.

H.R. 2382: Mr. EVANS of Iowa, Mr. BEDELL, Mr. BARNARD, Mr. NIELSON of Utah, Mr. FRANKLIN, Mr. MCCURDY, Mrs. LLOYD, Mr. HANCE, Mr. BETHUNE, Mr. KEMP, Mr. GUNDERSON, Mr. TRAXLER, Mr. MCCAIN, Mr. SHELBY, Mr. ANTHONY, Mr. STENHOLM, Mr. LOTT, Mr. BLILEY, Mr. HANSEN of Idaho, Mr. VOLKMER, Mr. HAMMERSCHMIDT, and Mr. WINN.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 1405: Mr. EDGAR.

PETITIONS, ETC.

Under clause 1 of rule XXII,

88. The SPEAKER presented a petition of the Palm-Broward Council of Senior Citizens Clubs, Deerfield Beach, Fla., relative to endorsing S. 814, a bill to control health escalating costs; which was referred jointly, to the Committees on Ways and Means and Energy and Commerce.

SENATE—*Tuesday, May 10, 1983*

(Legislative day of Monday, May 9, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, God of all wisdom, we invoke Thy presence and blessing upon the Senate today as it struggles with the budget. Grant special wisdom and patience to the chairman as he manages the floor. Guide each Senator as he considers the complex issues involved which are judgmental, rather than ethical or moral.

Thou knowest Lord that there is not a person in the Senate who is not concerned for the elderly, the unemployed, the poor and needy, as well as national defense and a mounting deficit. Help Thy servants to find their way through all these complications to a solution that is just. Help them to have cool heads and warm hearts, despite all the pressures that converge on them today. We ask this in the name of Him who is Light and Truth. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

ORDER OF BUSINESS

Mr. STEVENS. I thank the Chair.

Mr. President, it is my understanding that there already is an order for the transaction of routine morning business following the time for the two leaders?

The PRESIDENT pro tempore. The Senator is correct.

S. 49—THE ALASKAN NATIONAL HUNTING BILL

Mr. STEVENS. Mr. President, Senator MURKOWSKI and I, along with many of our colleagues, have introduced S. 49, the Alaska national hunting bill. We hope that the Senate Energy Committee will mark up this legislation soon. Members of the committee will report the bill as introduced with no complicating amendments. This is strictly a hunting bill and it should remain so.

Mr. President, as the committee addresses the hunting bill, I hope its members will keep several important points in mind.

First and foremost is the fact that these national parks are open to hunting now by subsistence users. Local rural residents can currently hunt on almost all new national parklands in Alaska. Sport hunters, however, may not use these lands. Senator MURKOWSKI and I introduced S. 49 to provide all sportsmen an equal opportunity to hunt on a portion of national parklands. They are Federal lands set aside by Congress for all Americans to use and enjoy, not a select class of Alaskans.

The second point I would urge members to consider is that sport hunting would be managed by the Alaska Department of Fish and Game on a sustained yield basis. Bag limits, seasons, and other management techniques would be employed to insure the game would be managed as a renewable resource. If a particular species or a specific area were found to be overhunted, the Department would have full authority to institute immediate measures to protect the game.

Some members I have talked to have expressed concern over the effect increased hunting resulting from our bill would have on game populations. Friday the Alaska Department of Fish and Game issued estimated figures on the effect our bill would have on annual harvest of several different species. Caribou is the most heavily hunted animal in the State. The Alaska Department of Fish and Game estimated that caribou harvest would increase by only 3 percent if our bill were enacted. Similarly the moose and bear take would increase by only 10 percent while goat harvest would rise by 17 percent. The species that would be most affected by implementation of S. 49 is the dall sheep population where hunting would increase by 300 animals, 85 percent of which would be taken by resident hunters.

Mr. President, I think hunters across the country understand that this bill will not harm the resident game populations in our national parks, but rather it will insure that they are properly managed as a renewable resource. Over 1,400 hunting, sporting, and conservation organizations have endorsed the bill. The National Wildlife Federation, which originally joined forces with the Alaska coalition in support of the Alaska Lands Act, which originally closed these lands to sport hunting, has come out in favor of the bill. I hope the committee will keep in mind the broad support this bill has from hunters across the country as it considers this most important measure for America's sportsmen.

Mr. President, I ask unanimous consent that Senator HUDDLESTON be added as a cosponsor to S. 49.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE SCHEDULE

Mr. STEVENS. Mr. President, the Senate will resume consideration of Senate Concurrent Resolution 27, the first concurrent budget resolution for 1984 at 10:30 a.m. today. There are approximately 19 hours and 13 minutes of debate left under the statutory 50-hour time limitation.

Under a previous order, votes ordered on yesterday will occur beginning at 2 p.m. The first vote will be on the Nunn/Jackson amendment No. 1242. Immediately following that vote, the Senate will have 5 minutes of debate on the Pryor amendment No. 1246 followed by a rollcall vote. Immediately following that, the Senate will have 5 minutes of debate on the second Pryor amendment No. 1247 followed by a rollcall vote.

The question will then recur on the Domenici substitute amendment No. 1243.

So, Mr. President, beginning at the hour of 2 p.m., there will be a series of three rollcall votes within a very short timespan this afternoon.

There is the possibility of further rollcall votes prior to completion of the business of the Senate today.

Mr. President, it is the hope of the leadership that complete consideration of the budget resolution may occur early in the week so that other items may be considered, such as S. 529, the immigration bill, and the nomination of William Ruckelshaus to be Administrator of the Environmental Protection Agency.

Mr. President, I ask unanimous consent that should the majority leader wish to make a statement for the RECORD today, that it appear at this point in the RECORD.

The PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I reserve the remainder of our time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. BYRD. Mr. President, I yield to the Senator from Vermont (Mr. LEAHY).

Mr. LEAHY. Mr. President, I thank my good friend from West Virginia for his courtesy and understanding.

THE NUCLEAR FREEZE—IDENTIFYING ISSUES AND SEEKING SOLUTIONS

Mr. LEAHY. Mr. President, I rise today to discuss the most crucial issue of our time—survival in the nuclear age. Over the past few years, Americans have expressed their profound concern over the nuclear arms race through their support of the nuclear freeze concept. I personally feel a strong identification with the freeze movement because of the important role played by my home State of Vermont in this arms control effort.

The small State of Vermont, which I so proudly represent here today, was at the forefront of this issue. My State—with the third smallest population in the country—through that most democratic of all institutions, the town meeting, on a spring day when the State halts and people vote on every issue affecting their town spoke out early and forcefully in support of the freeze. This clear message from our State reflected the work of those tireless citizens who literally traveled from town to town, throughout Vermont, raising support for the freeze concept and submitting the freeze resolution for inclusion on town meeting ballots. The grassroots effort paid off, and almost 200 of our 246 communities included the freeze issue on their agenda. All told, a total of 186 Vermont towns have voted in favor of a bilateral verifiable nuclear weapons freeze since 1981.

Support for the arms control and the freeze still runs high in my State. This spring, over 7,000 high school students from 30 schools debated and voted on the nuclear weapons freeze. Nearly 73 percent voted in favor of this measure.

Mr. President, the State of Vermont deserves much of the credit for raising this issue, for putting it squarely before the Republic, and I predict Vermont's role will someday be looked upon with appreciation by future Americans who will remember this milestone in nuclear arms control.

Mr. President, I also want to congratulate our colleagues in the House for approving the nuclear freeze resolution. Their action shows how greatly the nuclear freeze movement has influenced American attitudes toward arms control. They are responsibile for educating millions of citizens to the character and dangers of the nuclear arms race. It is contributing to the ongoing national debate on ways of halting this senseless competition. It has generated fresh ideas in a field not distinguished in recent years by originality, creativity, or daring. The freeze movement has challenged the nuclear status quo.

These are major accomplishments, but freeze supporters, both within and without the Congress still have far to go.

It is not enough for a freeze initiative merely to goad the Reagan administration toward more serious arms control efforts. To be successful, it must lead to a well-defined proposal providing a realistic basis for genuine negotiations with the Soviet Union.

In studying the growing body of literature about the nuclear freeze concept it becomes clear that there is insufficient analysis of the form a verifiable freeze-based proposal would take, making it somewhat vulnerable to legitimate concerns and questions raised by skeptics. Questions of verifiability, negotiability, implications for security, and impact on strategic stability must be analyzed. The Federation of American Scientists has been doing some impressive work on these questions. My distinguished colleague and friend from Wisconsin (Mr. PROXMIRE) has been making a series of major statements on the problems confronting the freeze idea, including a particularly important statement on the Senate floor on April 14. His speeches on the freeze should be studied with great care by all those interested in dealing frankly with the problems as well as the prospects of a freeze.

Nevertheless, Mr. President, the controversial nature of the freeze initiative has meant that what has been done so far is primarily advocacy by supporters or criticisms by opponents. It has been, for the most part, a monolog of the committed. The debate cries out for finding of fact and objective statement of issues. Both sides want meaningful, verifiable arms control which enhances national security and stability. They differ on how to get there.

With these concerns in mind, I asked the Congressional Research Service (CRS) to analyze a comprehensive freeze approach, as well as other possible alternatives based on the freeze concept. I was aware that the study would raise issues that freeze proponents, like myself, would find difficulty in resolving. But because I am in earnest about seeking a viable alternative to the present arms control stalemate, I accepted this challenge. A far greater challenge exists today with the two key arms negotiations deadlocked, and with both sides moving ahead with new weapons which may make verifiable nuclear arms control all but impossible in the near future.

Mr. President, this is not a study tailored to support either side in the controversy. I suggested no premise, asking merely that CRS concentrate on the critical issues which arise in a comprehensive freeze as well as other, narrower freeze approaches. I did not expect definitive answers. CRS does not have sufficient resources or analytical capabilities to undertake more than a preliminary review. Nevertheless, I hoped it would identify in one document both the potential arms control advantages and the issues necessary to consider in structuring a freeze proposal.

The study does that. It points clearly to an array of attainable, verifiable limitations which even skeptics must agree are possible. The United States clearly has the capability to verify numerical limits on virtually all currently deployed nuclear delivery systems. With Soviet agreement to certain cooperative measures, including a ban on deliberate concealment measures such as extensive telemetry encryption, the United States can also monitor very broad limitations on testing—although some test limits would still be monitorable even without cooperative measures. This is demonstrated by the provisions and negotiating history of the ABM Treaty, the SALT I Interim Agreement, and the SALT II Treaty. The Comprehensive Test Ban Treaty negotiations provide persuasive evidence that a total halt to all nuclear weapons testing is feasible. That treaty was derailed not as a result of negotiating difficulties, but by the downturn in United States-Soviet relations after the invasion of Afghanistan.

Now, in START and INF, the Reagan administration has proposed limitations on total missile warheads and on deployed and nondeployed missiles (not just launchers). It has called for the dismantling of all existing Soviet SS-20's, and SS-4's, and SS-5's, with a total ban on the deployment of all intermediate range missiles.

To prevent Soviet stockpiling of intermediate range missiles, I can only suppose the U.S. proposal also envisions a prohibition on the production or testing of such missiles as well. I assume it would not do so without confidence that these constraints could be verified.

We must be careful to separate problems which would be encountered in any arms control approach from those which are unique to the freeze. Virtually the only verification task specific to a comprehensive freeze involves a ban on production of all nuclear weapons and their delivery means. Perhaps one should add a freeze on deployment of tactical nuclear weapons and dual capable aircraft in Europe and other theaters, but even in this case, the U.S. INF proposal evidently supposes limitations on certain shorter range theater nuclear systems. I understand that in INF there has even been some discussion of the problem of tactical nuclear capable aircraft.

The most militarily significant verification difficulties identified in the CRS study come, for the most part, in new systems now being deployed or developed: Mobile missiles and cruise missiles.

The current administration's INF proposal seeks to avoid some of these verification problems by banning ground-launched cruise missiles, as well as mobile medium- and intermediate-range ballistic missiles on a global basis. This is consistent with the objectives of a freeze, which would extend the principle to strategic systems as well. Moreover, after reading the analysis of these monitoring problems in the CRS study, I sought the views of some former Government officials with great experience in verification. Their reaction was that the problems, while real, tend to be exaggerated, and are susceptible to solution, especially by cooperative measures going beyond national technical means.

Another serious problem involves the monitoring of covert deployment of additional warheads on missiles not currently fitted with their maximum warhead capacity. While I agree this is a genuine issue, it will exist in virtually any meaningful arms control agreement, including the START and INF proposals, which seeks to limit warheads. The superb U.S. monitoring capabilities, especially if supplemented by substantial cooperative measures such as a prohibition of the denial of telemetry, random challenge inspections, automatic sensors, and the like, ought to be able to deal effectively with this task.

The study also draws attention to the disparity in the ages of United States and Soviet nuclear delivery systems, particularly heavy bombers and ICBM's. This has been a concern of mine for some time, and I anticipated its emergence as a factor in the freeze study. The CRS study places too much emphasis on the difficulty of maintaining the reliability and effectiveness of existing U.S. strategic delivery systems. The extensive modernization, maintenance, and upgrade programs presently on line for the Minuteman ICBM's and the B-52 heavy bomber insure that these mainstays of our deterrent will be capable of carrying out their mission for many years into the future. To preserve the reliability and effectiveness of our present strategic deterrent, it seems reasonable that a properly structured nuclear freeze have provisions permitting continued maintenance and replacement of current systems with equally capable models, as well as continued production of invulnerable missile-firing submarines.

Despite the manifest of wishes of a large segment of Congress and the American people, I have regretfully concluded that the Reagan administration will never give serious consideration to any arms control approach based on the concept of a mutual and verifiable freeze.

This means that the freeze movement cannot benefit from the sophisticated analytical resources of the Government until there is an administration more concerned with stopping the increasingly wasteful and dangerous buildup, and less interested in attempting to achieve some sort of ephemeral military advantage through the deployment of more capable nuclear weapons.

Given this unfortunate reality, it is up to the freeze movement itself to do the basic analyses of the issues that this and similar studies raise. The objective should be the development and continual refinement of an arms control approach based on as comprehensive a freeze as feasible, consistent with fundamental verification and security requirements. Such an approach should envision subsequent negotiations from deep reductions, especially in vulnerable MIRV'd ICBM's, one of the most destabilizing systems in the arsenals of both sides. This must accompany stringent qualitative barriers to the growing sophistication of nuclear weapons and their means of delivery. We must stop the inexorable march of the past 22 years toward nuclear weapons designed not solely to deter, but to be useable for discrete foreign policy and military objectives. I urge all freeze supporters to proceed with this work candidly, objectively, and without illusions as to its seriousness and difficulty.

I would welcome all ideas on dealing with the political, security, technical, and negotiating issues this study raises and how we can transform the freeze ideal into a more meaningful and realistic proposal than the ones now on the table in Geneva.

Given the movement's zeal, resourcefulness, and ingenuity—the fact that it cuts across all lines, Republicans and Democrats, conservatives, and liberals, young and old—I do not think that this is too great a task.

Mr. President, I ask unanimous consent that the Congressional Research Service study on Nuclear Freeze Alternatives be printed in the RECORD.

There being no objection, the study was ordered to be printed in the RECORD, as follows:

NUCLEAR FREEZE ALTERNATIVES: MONITORING, MILITARY AND POLITICAL IMPLICATIONS

I. INTRODUCTION

This study examines the issues involved in a "notional" freeze proposal, and in alternative freeze proposals. The "national" proposal closely resembles the one introduced in the 97th and 98th Congresses, and which is usually referred to as the nuclear freeze proposal, i.e., a ban on the further production, testing or deployment of nuclear weapons and their delivery systems.

The major initial criterion by which this proposal will be evaluated is that of U.S. monitoring capabilities and the adequacy of verification. The primacy of this criterion stems from two requirements:

(a) the security of the United States cannot be jeopardized by an agreement. Significant undetected cheating (i.e., cheating sufficient to give the Soviets a military advantage) is not acceptable.

(b) continued public and congressional support for any arms control proposal, and for arms control in general, is highly dependent on the perception that agreements are being adhered to or, if not, that the U.S. is taking the necessary and proper steps. To a certain extent the demands of this factor, which is political, are more stringent with regard to verification than are those of the previous security factor.

Admittedly, in the public arena the security and political factors are not wholly separable. Knowledge of any cheating (i.e., even non-compliance below the level considered to be militarily significant) will trigger adverse public and congressional reactions. Thus, what may be acceptable militarily still will not be acceptable politically, either within Congress or to the public at large.

Such an analysis implicitly affirms that verification requirements have become a major force in shaping agreements, rather than necessary safeguards imposed after much of an agreement has been fashioned. For these reasons, monitoring issues are used as the initial criterion for assessing the "notional" freeze proposal. After this analysis, the proposal will be analyzed in terms of its military significance to the U.S., effect on U.S. and Allied opinion, and potential Soviet acceptance.

The "notional" proposal may be regarded as a comprehensive or maximalist approach to the freeze concept. Less all-embracing proposals are also analyzed, based to a large extent on monitoring issues discovered in this original proposal.

II. PROPOSAL 1: A COMPREHENSIVE FREEZE

A. Terms

Proposal 1 is based on the following terms:

The United States and the Soviet Union agree to a freeze on the production, testing and deployment of nuclear weapons and their delivery systems.

B. Implications

Proposal 1 carries with it the following implications:

a. It bars the testing, production and deployment of systems not currently deployed.

b. It includes both strategic and intermediate/theater systems, as the only defining term is "nuclear weapons," regardless of range or size.

c. Depending on the definition of "deployment" it could bar the replacement of current weapons with weapons now in storage. Implicitly, both force structures will therefore be frozen in place and subject to deterioration over time. This could decrease reliability as well, given the ban on testing, if maintenance efforts alone prove to be inadequate.

C. Monitoring: System by system [1]

ICBM launchers (non-mobile).—Permanent fixed-ICBM launchers require large amounts of construction activity. This can be easily detected with a high degree of confidence by national technical means (NTM), specifically overhead surveillance. Installation of fixed ICBM launchers pose no significant problems.

Footnotes at the end of article.

A freeze on the testing of launchers raises problems of definition. Testing a launcher is not the same as a test launch of a missle, which is easily detected. However, if, in the case of launchers, a freeze on testing included a variety of pre-launch procedures (ground equipment readiness checks, telemetry checkpoints at which a commitment must be made to proceed to launch) would be extremely difficult to detect. Those activities dependent on communications not on hard lines (telemetry check, range safety check), would be susceptible to detection, even if encrypted. If there was no intention to actually proceed to a launch these steps could be dispensed with, allowing a test of all other phases of an ICBM launch without detection. Past strategic arms agreements have assumed that these steps could be tested without detection. This has not been seen as a problem as testing these procedures remains different from an actual test of the missile from the launcher, which remains the key issue.

Given the large number of fixed ICBM launchers deployed by both nations (1050 U.S., 1398 Soviet), permanent on-site inspection would be costly, politically prohibitive, and probably incomplete. At the same time, the military significance of such illicit testing would also be limited, as these tests would not ensure that the entire launch sequence remained reliable. None-the-less some circumvention would appear to be possible.

Moreover, some provision would have to be made for continued peaceful launches, such as for space explorations and for launching satellites. The flight-path of such launches should be sufficient to distinguish them from ICBM tests. However, they could be used to test components of the ICBM missile.

ICBM launchers (mobile).—Neither nation currently deploys mobile ICBM launchers, so far as is known, The Soviets have developed such a capability (for the SS-16) but have not deployed any missiles in this mode. The U.S. has considered mobile deployment for the MX missile. The issue of mobility largely erases the confidence expressed concerning the monitoring of non-mobile—i.e., fixed—ICBM launcher production and deployment. Monitoring then becomes dependent, in part, on the degree of mobility. In the case of the MX, for example, mobility within a limited system—such as the multiple protective shelters—would still alllow for monitoring by NTM as long as there were agreed "viewings" of the launchers, thus adding a cooperative measure as well.

Monitoring air-mobile systems would depend on the size of the missile and available aircraft. For example, the MX missile could be deployed in C-5 aircraft, of which the U.S. deploys 77. It might be possible to develop and deploy a new, smaller ICBM in aircraft such as the C-130, but testing a new missile would be detectable. Cooperative measures agreed to in SALT II, such as FRODs (functionally-related observable differences), could obviate this problem.

However, monitoring a truly mobile missile launcher in an unlimited system, such as a road- or rail-mobile system, would be extremely difficult, if not impossible. If the launcher vehicle were camouflaged the risks of deception would increase. This could be further complicated by the possibilities for surreptitious production of additional missiles (see below).

To date neither nation has developed and deployed such a launcher for ICBMs. A freeze enacted before such a system was fully tested and deployed would leave tremendous doubts as to its reliability. Cheating would then become less likely, given the ability to detect launches. It is arguable that neither nation would be willing to devote resources to a system of uncertain reliability.

ICBMs.—Missiles present different problems than do the launchers. Testing of ICBM's is easily monitored, given certain features such as the telltale flight path and the unique "signature" associated with the engine of each type. Deployment of additional ICBM's in fixed launchers is also easily monitored given the known location of currently available launchers and the ease of detecting new ones while under construction. The problem related to mobile systems has already been noted, although this does not appear to be an issue at present.

Monitoring the production of ICBM's remains more difficult. Although ICBM's are fairly large objects (the MX is 71' long, 7.7' in diameter; the Soviet SS-18 is 121.4' long, 10.5' in diameter), it would be possible to surreptitiously build missiles as long as they were either kept in place, or moved surreptitiously.[2]

Two launching factors may increase the significance of this problem, one future and one current. The possibility of road- or rail-mobile launchers discussed above could conceivably make it possible to deploy new missiles without detection. As noted, this is not a current threat. However, both nations either possess or plan on having cold-launched systems, i.e., ones in which the missiles are raised out of their silos and then fired, leaving the silos intact and essentially ready for reuse. The U.S. MX and the Soviet SS-17 and SS-18 all use this system. Cold launch raises the concern that excess missiles could be produced for wartime use. Admittedly, this reload capability remains controversial within the U.S. intelligence community, and its efficacy under wartime conditions is highly questionable. Nonetheless, it is an area of concern.

The production issue could be made less of a problem with cooperative measures, such as the identification of current ICBM production facilities. Other cooperative measures, such as the permanent disruption of rail links or roads leading to such facilities could also be introduced and monitored. The movement of trucks and trains can be monitored by NTM with passive cooperative measures. The possibility of new facilities remains a problem, as their purpose could be easily masked during construction. Overall, surreptitious ICBM production would be of greater concern for missiles already tested and deemed reliable. New missiles require 20-30 tests to establish performance as designed. It is questionable whether a nation would devote the resources to, or run the military risk of relying on, missiles of undemonstrated reliability. Some circumvention might be possible through the use of new missiles for peaceful space launches, but this almost surely would be detected, and would not assure reliability of the missile for ICBM-type missions.

SSBs.—Missile launching submarines (regardless of power plant) are the launchers for SLBMs. Despite their mobility and current ability to go undetected, SSBs do not represent major difficulties in terms of monitoring production or deployment. The activity associated with building a submarine, which takes place at known shipyards in both nations, is easily monitored, as is the launch of a submarine. Previous SALT rules counted a submarine as part of the strategic force when it entered into sea trials, thus covering deployment. Testing issues would be similar to those for ICBMs. Full testing, including missile launch, would be easily monitored. Testing of pre-launch procedures could be carried out without detection, again leaving some questions of overall reliability unresolved.

SLBMs.—The production monitoring problems discussed under ICBMs remain valid for SLBMs. However, excess SLBMs could not be readily translated into a military advantage as there would not be additional launchers—SSB tubes—available. Submarines today do not have the capacity to store missiles other than those already in the tubes. Thus, deployment on submarines also could be monitored. Some analysts have raised the possibility of SLBMs being fired from surreptitiously built land-based launchers, or from other sea-based platforms. This would be a more difficult violation to monitor. Testing of SLBMs, like ICBMs, could be detected. This might provide the main method of monitoring deployment of SLBMs on non-SSB platforms, presuming that these new launchers would have to be tested before they could be relied upon.

Strategic bombers.—The production and deployment of strategic bombers is easily monitored, given their size and the observation of airfields by NTM. One issue which has been a monitoring issue with these bombers is that of planes which are multimission, i.e., which in different configurations perform different missions, including ones not related to strategic roles. Under SALT II this was to be handled by FRODs. Presumably this cooperative measure could be carried over to a freeze.

Testing raises a more difficult issue. It would be difficult to distinguish between the normal patrol activities carried out by aircraft and flights used for testing. Indeed, patrols could be lengthened in duration as a means of testing for reliability over a mission of the same duration. Furthermore, the launch techniques for free-fall bombs or cruise missiles could also be carried out easily and without detection up to the actual point of launch. Thus, depending on the airplane, it may be necessary to introduce restrictions on flight time, or on the number of flights permitted in any given period as a cooperative measure. This situation may be considered less threatening by the fact that stragegic bombers are not first-strike weapons, requiring by the fact that strategic bombers are not first-strike weapons, requiring several hours to reach their targets.

Cruise missiles.—Limits on the production, testing and deployment of cruise missiles all present major monitoring difficulties. Cruise missiles are small enough (ALCMs are 20.8' long and 2.0' in diameter; GLCMs and SLCMs are both slightly smaller) to be produced in large numbers without detection. With the exception of the navigation system cruise missiles can also be tested in laboratories to a high degree of reliability. Finally, they can be deployed easily and surreptitiously without detection, although the longer they are deployed the more susceptible they become to detection. Bombers not currently capable of carrying cruise missiles can also be converted without detection. As with the bombers themselves, cruise missiles are not first strike weapons, requiring some hours to fly to target. However, as they allow bombers to "stand off" their targets and launch, they do raise higher risks. The

potential for large numbers being surreptitiously added to the arsenal with high reliability is also a problem. Comparatively, ALCMs might be less of a problem than SLCMs and GLCMs as their potential launch platforms are easier to identify. Production and deployment of the other two systems pose greater monitoring problems. However, neither of these have been deployed to date, while some ALCMs have.

IRBM launchers (non-mobile and mobile).—These launchers raise many of the same issues as ICBM launchers. Non-mobile, or permanent launchers are easy to detect. Testing can be carried out through most of the launch sequence, with some telemetric limits, without detection and with a certain degree of reliability.

Mobile launchers, either road- or rail-mobile, create production and deployment monitoring problems, especially if they are produced surreptitiously in new locations, and are camouflaged. IRBM mobile launchers currently are of more concern than ICBMs, as the Soviets currently deploy such a system, the SS-20. The Pershing II will be a mobile system as well. The degree of cooperative efforts versus deliberate concealment would be a major factor in this regard.

IRBMs.—As with ICBMs and SLBMs, surreptitious IRBM production could pose a monitoring problem if additional launchers are available, or if reload is possible, such as is planned for the Pershing II. The problem is compounded by the relatively small size of IRBMs, and their potential mobility. This is not a direct threat to U.S. security, given the range limits of these systems (e.g., the SS-20s estimated full payload range is 3,500 miles). However, U.S. commitments to NATO, if fulfilled, would nullify this distinction.

Nuclear-capable theater aircraft.—Both alliances deploy a number of aircraft which have both nuclear and non-nuclear capabilities.[3] Production of these aircraft would be less easily monitored than that of strategic bombers, but still liable to detection. Testing would pose the same monitoring problems as strategic bombers. Deployment could be monitored by NTM. The fundamental problem with these aircraft is their multi-mission capabilities. For example, the F-4E, which can carry either nuclear or conventional bombs, can be modified to become an F-4G, which has no nuclear capabilities and is designed for operations against enemy radar guidance systems. The obvious method of dealing with this problem would be the cooperative measure of FRODs, some of which are inherent in the various types. However, given the larger number of aircraft involved, the chances for counting errors and opponents' deception would increase dramatically. These weapons may be less threatening militarily to the U.S., although not our allies, as these aircraft are not first strike systems.

Nuclear weapons.—Nuclear weapons, i.e., missile warheads or bombs, may be the most significant component to be considered. It is the one element common to all the systems discussed above. Indeed, it is the one element that justifies the inclusion of any system in the freeze proposal under consideration. The success or failure in monitoring the freeze on the actual weapons themselves would thus be a major factor in the ultimate success of a freeze.

Nuclear weapons are produced in a limited number of locations. In the United States there are seven facilities in seven different states. While the locations of Soviet facilities are not available publicly, it is probable that some of these sites are known and monitored by U.S. intelligence. However, the possibility of circumvention exists in that facilities producing nuclear material for peaceful purposes (i.e., nuclear power plants) can also be used to create weapons-grade material, and the number of such plants is large. Moreover, actual assembly of weapons can take place in numerous locations. This problem currently exists, and is one of the principal reasons for the safeguards system of the International Atomic Energy Agency (IAEA). The IAEA safeguards, despite their acknowledged shortcomings, offer the best available cooperative measure model for this aspect of monitoring.

The IAEA safeguards depend on the voluntary cooperation of each state to maintain a system of accounting and control for all nuclear materials subject to safeguards, and for necessary IAEA inspections. Compliance is voluntary and no sanctions are available for enforcement. Several states not signatory to the Nuclear Non-Proliferation Treaty—India, Pakistan, Israel, South Africa—have only allowed IAEA inspection of some of their installations. In the words of Dr. Hans Blix, Director General of the IAEA, ". . . the Agency cannot of course pronounce itself on more than it has seen . . ."[4]

Without a system for rigorous and continuous monitoring of all nuclear material processing facilities there could be no assurance of compliance with this aspect of a freeze. Moreover, the amount of fissionable material used for a bomb is relatively small enough (8 kilograms of plutonium according to the IAEA) to permit easy diversion and transportation without detection. (U.S. nuclear plants already have problems with missing material that cannot be accounted for.) Thus, production and deployment limits could be circumvented. Testing reliability might not be an issue at all, given the extensive tests already carried out by both nations, affording a wealth of available data. However, it might be desirable to include a comprehensive test ban as well.

Whether such a detailed system to monitor nuclear materials production would be politically acceptable to any state remains questionable. However, creating a military advantage from unauthorized weapons production would in turn be dependent on the successful circumvention of restrictions on launchers and delivery systems.

However, available delivery systems already exist in both arsenals. ICBMs which have not been MIRVed to full capacity could be upgraded. It is feasible to upgrade the number of MIRVs on a missile without detection, and with fairly high levels of reliability. Table I offers an illustration of potential MIRV increases for both sides based on publicly available figures. In both cases, however, the megatonnage of the individual weapons would have to drop to accommodate their smaller size.

TABLE I.—POTENTIAL MIRV INCREASE UNDER A FREEZE [1]

Missile and current deployment	Total RV's	Multiplied by	Each MIRV'd to maximum	Net gain
SS-17:				
32 with 1 RV	32	4	128	96
120 with 4 RV's	480		480	
SS-18:				
58 with 1 RV	58	10	580	522
150 with 8 RV's	1,200	10	1,500	300
100 with 10 RV's	1,000		1,000	
SS-19:				
60 with 1 RV	60	6	360	300
300 with 6 RV's	1,800		1,800	
Total	4,630		5,848	1,218

[1] The figures in this chart are derived from open sources and are not authoritative. They are used here solely for illustrative purposes.

Note: It should be noted that the SS-18 postboost vehicle, i.e., that part of the system that actually carries and deploys the RV's, has been tested with a motion apparently indicating a 14-RV capability. If that were the case, and not accounting for poor reliability in the absence of actual test deployments, the Soviets could gain an additional 2,054 RV's over current SS-18 deployments, for a total net gain of 2,450 RV's.

Similarly, the United States could increase its MIRV'ing of the 550 Minuteman IIIs, currently at 3 RV's each for a total of 1,650, to 7 RV's each for a total of 3,850, or a net gain of 2,200 RV's.

D. Military significance: Force structure, deterrence and crisis stability

A key issue in assessing the acceptability of any freeze proposal is its effect on the force structure, involving the maintenance of both credible deterrence and crisis stability, and thus U.S. security.

With the forces of both powers frozen over a specific period, and with bans on testing, the reliability of the forces would become a key issue. Like all other machinery, weapons age and deteriorate over time, and reach points at which they are no longer reliable and indeed may become hazardous. For example, the Titan II missiles deployed by the United States in 1963 have experienced two accidents. Soviet systems will be subject to the same problem of deterioration as U.S. systems.

It is not possible to project precise force levels over the period of the freeze for several reasons. First, there are no accurate public data on the aging and deterioration of the forces in question. The retirement or planned retirement of older systems has to some degree been predicated on the availability of new systems, which would no longer be the case. Second, the availability of U.S. and Soviet spare armed missiles to replace unreliable ones is questionable.[5] Neither SALT I nor SALT II precluded the production of spare missiles; the limits imposed restricted the number of launchers only. Thus, if the reliability of a missile became questionable it could conceivably be replaced by an already extant missile. Whether this replacement would be permitted would depend on interpretations or agreements as to the meaning of the freeze on deployment.

Critics of current freeze proposals have argued that a freeze would give the Soviets an advantage as they have newer systems in their strategic forces, thus decreasing their susceptibility to problems caused by aging. An assessment of the accuracy of this contention cannot be made. Table II offers a comparison of the main components of the respective strategic triads and the years each entered into service:

TABLE II.—AGE COMPARISON OF STRATEGIC TRIADS

	United States	Soviet Union
ICBMs	Titan II (1963), Minuteman II (1965–73), Minuteman III (1970–75).	SS–11 (1966–73), SS–13 (1969–72), SS–17 (1975–?), SS–18 (1974–?), SS–19 (1975–?).

TABLE II.—AGE COMPARISON OF STRATEGIC TRIADS—Continued

	United States	Soviet Union
SLBMs	Poseidon (1971–76), Trident I (1981–).	SS–N–5 (1963), SS–N–6 (1968–73), SS–N–8 (1973–?), SS–N–17 (1977–?), SS–N–18 (1978–?), SS–NX–20 (?).
Bombers	B–52 D (1956–57), B–52 G (1959–61), B–52 H (1961–62).	Tu–95 (1956–?), Mya–4 (1956–?).

Note: End dates for some Soviet deployments are not publicly available.

Sources: General Dynamics (Pomona Division). The World's Missile Systems. April 1982. Robert P. Berman and John C. Baker. Soviet strategic forces: Requirements and responses. The Brookings Institution. Washington, 1982. U.S. Air Force. Deputy Chief of Staff, Plans and Operations. Strategic Offensive Forces Division.

Despite the inability to derive specific force levels over the duration of a freeze, some general observations can be made. First, it must be recognized that deterrence is largely based on perceptions of the capabilities of deployed forces and the relative likelihood of retaliation. Second, it is possible that crisis stability (i.e., that the nature and number of strategic forces themselves will not provide an incentive for a nation to use them first during a crisis), in part depends upon confidence in the reliability of weapons and the perceived appropriateness of agreed strategies. Therefore, any overt indications that frozen systems have become unequally unreliable could only have negative effects on the perceptions of the other side. Deterrence would suffer as the probable scope of retaliation decreased. Crisis stability would suffer if one power suddenly believed itself to be in a newly superior *or* inferior position.

It would obviously be desirable to keep concerns about the reliability of systems hidden from the other side. Continued permitted replacement might obviate these concerns although such a practice could also raise concerns about cheating. While such a replacement program might mask reliability problems from the other side, these worries would still operate as a factor for the side doing the replacing. While it might be fair to assume that the other nation's missiles were also deteriorating, a prudent military planner, working on a worst-case basis, would have to assume the opposite—i.e., that only *his* systems were so unreliable—unless he had convincing intelligence to the opposite. Such a perception could be dangerous, especially in time of crisis.

One method of obviating this problem would be to allow a specific number of reliability tests per year for each missile type, perhaps with a ban on all telemetry encryption.[6] Such a provision would address the instability inherent in unknown reliability, while minimizing the chances of the tests being used to circumvent agreed limits. A complete ban on testing would stimulate other methods of improving reliability testing without overt missile tests.

Such a freeze might also increase the incentive to develop an ABM system, in this case a non-nuclear one. A major argument in the past against ABMs has been that it will always be easier to add reentry vehicles (RVs) than to deploy additional ABMs against them. With a freeze the RV levels would be constant, while non-nuclear ABMs would be allowed, subject to the provisions of the ABM Treaty (see below for details of the treaty). It is possible that either power might be motivated to either renegotiate or even withdraw from the ABM Treaty to pursue this type of defense, although such a step would be unlikely as it would probably jeopardize the freeze agreement as well.

E. Political effects: Domestic and allied

Such a freeze would obviously appeal to that large body of the American public which has already demonstrated its support for this concept. At the same time, those who feel that the current military situation favors the Soviet Union would be disaffected. Some later domestic disappointment could also be expected for several reasons. Some local unemployment would result from a freeze. Any economic "dividend" from a freeze would likely be less than expected, as nuclear weapons tend to be relatively inexpensive, and a rather small portion of the overall defense budget.[7]

Furthermore, more funds would probably have to be devoted to the maintenance of extant systems in order to avoid the reliability issues discussed above. It might also be necessary to put additional sums into conventional forces as the NATO-Warsaw Pact force imbalances now made tolerable by the nuclear umbrella might seem less prudent under a freeze. The nature and size of such increases, if any, would depend on the international situation, and domestic and NATO politics.

As with most other issues, allied reaction would be mixed. On the positive side, a freeze step would be lauded as a genuine step towards arms control. It might also avoid the current thorny issue of the planned GLCM and Pershing II deployments. On the negative side, a freeze would not address the current Soviet INF build-up which brought the NATO decision to deploy these new weapons, thus leaving the Allies with theater weapons notably inferior to the SS–20s. It is also likely that NATO would expect some increases in U.S. conventional forces as a means of compensating for the new limits on the nuclear umbrella, as well as increased pressure to reach an agreement with the Soviet Union on limiting conventional forces in Central Europe.

F. Soviet acceptance

Among his recent public statement, Yuri Andropov has already suggested a freeze of this sort. It is possible that the Soviets would accept this idea as the basis of negotiations, although this remains uncertain, as does the overall Soviet view of what a freeze might entail.

Such a proposal would offer the Soviets some positive incentives. It would halt the planned U.S. strategic modernization, particularly the Trident II, MX, and the B–1. It would preserve what the Soviets claim to be a balance in INF, while also forestalling the NATO deployment of GLCMs and Pershing IIs. At the same time, ongoing Soviet programs would also be halted, leaving them susceptible to any vulnerabilities which they now perceive or have in fact.

These incentives for Soviet acceptance do not necessarily mean that such a freeze proposal could be quickly negotiated. The details of the verification provisions and other "housekeeping" details would have to be worked out. Further, the Soviets might ask for non-circumvention provisions to prevent the United States from using British and French nuclear forces as surrogates.[8] Moreover, a freeze would have an uncertain effect on those systems purchased from the U.S. such as Britain's new Tridents.

G. Summary

Based solely on problems of monitoring, and excluding political factors and the unknown issue of reliability, the following points can be made:

ICBM launchers, excluding the missiles and the warheads, could probably be successfully frozen, barring a move to a widely mobile system, and depending on the practicality of reloading of cold-launch systems. Should reload be feasible, then a significant military advantage might be attained by producing excess missiles. Such an advantage would favor the Soviets, based on current deployments of cold-launch systems.

SSBs and SLBMs deployed in SSBs do not appear to pose significant problems, although non-SSB deployments of SLBMs may.

Strategic bombers would be more difficult to monitor in terms of testing, or if they were converted to cruise missile carriers (CMCs). Limiting strategic bombers, or their conversion to CMCs is dependent on FRODs. Concern here is reduced as these are not first strike weapons.

Cruise missiles are inherently unverifiable weapons, heavily dependent on voluntary restraints. This is mitigated by the fact that cruise missiles are not presently first strike weapons, although the potential numbers of these weapons could become very large and troublesome, and improvements in speed can be expected.

IRBMs, like ICBMs, pose monitoring problems depending on their mobility and possible cold launch/reload capability. The military significance of these issues is made at least debatable in terms of very narrow U.S. interests by the limited range of IRBMs.

Nuclear-capable theater aircraft would require cooperative measures such as FRODs. Again, their limited range tempers the military significance for the U.S. alone, although not for our NATO allies, nor, presumably, for the Soviet Union.

Nuclear weapons themselves can only be monitored by voluntary cooperative measures which would have to be very detailed and of questionable political acceptability. The military significance of covert weapons production would be dependent on the availability of delivery systems. Surreptitious MIRVing of missiles not MIRVed to capacity could prove to be a dangerous means of circumvention which would be difficult to monitor.

Two alternative freeze proposals, at least, are suggested by these conclusions: (1) a freeze limited to first strike weapons (ICBMs, SLBMs, IRBMs); and (2) a freeze limited to strategic weapons largely similar to the national freeze, or structured like SALT II. The structure and implications of these freezes are examined below. Following these, several systems-specific freezes are proposed as other means of addressing problems raised by the large freeze.

III. PROPOSAL 2: A FIRST STRIKE WEAPONS FREEZE

A. Terms

Proposal 2 is based on the following terms:

The United States and the Soviet Union agree to a freeze on the production, testing and deployment of all ballistic missiles, including warheads and launchers, regardless of range.

B. Implications

Proposal 2 carries with it the following implications:

a. Like Proposal 1, it bars the production and testing of systems not yet deployed.

b. It still covers both strategic and theater systems, but only those involving ballistic missiles.

c. The issues of deterioration and reliability remain relevant.

d. Opportunities would exist and be attractive for rechanneling arms efforts into those areas not frozen.

C. Monitoring issues

Four major monitoring problems exist under Proposal 2:

(1) mobile launchers, particularly for IRBMs (and for ICBMs should they be deployed before a freeze were enacted.)

(2) the production of MIRVed warheads and their emplacement on systems either un-MIRVed or MIRVed below already tested capacity.

(3) the production of excess missiles for cold launch systems.

(4) the testing of warheads on cruise missiles, and then transferring them to ICBMs, SLBMs or IRBMs.

D. Comparison with proposal 1

The First Strike Weapons Freeze, like Proposal 1, deals with ballistic missiles, the weapons seen as being the most destabilizing. However, it eliminates as issues those systems most likely to create severe monitoring problems. Therefore, it might more easily be negotiated, and perhaps less subject to contention and controversy once the agreement entered into force.

The past history of the arms race indicates that once a system has been limited, research and development shift to other aspects of that system, or to wholly different systems. In the case of this freeze, however, that rechanneled effort would now be limited to those systems whose time-to-target renders them less threatening to retaliatory forces. Moreover, conventional defenses already exist to combat aircraft, although a new race in this area might result.

Under this freeze concept efforts to improve the speed of cruise missiles might appear to be very attractive. Even with such improvements, however, their time-to-target would still be much longer than that of ballistic missiles.

E. Military significance: Force structure, deterrence and crisis stability

All of the uncertainties of Proposal 1—aging and deteriorating systems, questionable reliability, and the effects on deterrence and crisis stability—remain relevant for Proposal 2 as well.

A First Strike Weapons Freeze might lead to changes in U.S. and NATO military doctrine. Western military policy envisions a presumed controllable ladder of escalation, from conventional war, to tactical nuclear exchange, to theater nuclear exchange, to strategic exchange, with stopping points at each level. Many analysts question the validity of this policy, and argue that the use of nuclear weapons regardless of size or range will lead rapidly to a strategic exchange. Compared to a total freeze, Proposal 2 might create one, or possibly two additional rungs on the escalation ladder by forcing each side to place greater initial reliance on those non-ballistic forces which are not subject to this freeze, and thus have undergone continued development, testing, and presumably have greater reliability. The escalation ladder might actually expand, with first recourse at the theater and strategic levels to aircraft and cruise missiles, which not only would be more reliable, but would also have the advantage of being less time urgent in terms of retaliation or the next escalation decision. This possible new ladder, compared to the current one is shown in Table III. Once again, the arguments of those who doubt the wartime relevance of differences between any types of nuclear exchange remain relevant.

TABLE III.—*Comparative ladders of escalation*

Current U.S./NATO ladder	*Possible ladder, proposal 2*
Strategic Nuclear Exchange	Strategic Nuclear Exchange
∧	∧
∧	∧
∧	∧
∧	Bomber/Cruise Missile
∧	Strategic Nuclear Exchange
∧	∧
∧	∧
∧	∧
Theater Nuclear Exchange	IRBM Exchange
∧	∧
∧	∧
∧	∧
∧	Aircraft/Cruise Missile
∧	Theater Nuclear Exchange
∧	∧
∧	∧
∧	∧
Tactical Nuclear Exchange	Tactical Nuclear Exchange
∧	∧
∧	∧
∧	∧
Conventional Warfare	Conventional Warfare

A freeze as structured in Proposal 2 would channel military efforts into aircraft (strategic and theater) and cruise missiles, including an incentive to improve on cruise missile speed. The importance of air defense systems against manned aircraft would also increase. For U.S. programs such a proposal would also mean likely increased interest in or pressure in favor of either the B–1 or ATB (the Advanced Technology Bomber, i.e., Stealth), or both. The incentive to surreptitiously MIRV all ballistic missiles to their maximum capacity would also remain. This would still be a major means of increasing military capability with fairly low risks of detection. Finally, non-nuclear ABM systems again might prove attractive.

F. Political effects: Domestic and allied

The First-Strike Weapons Freeze would have somewhat less public appeal than a comprehensive one, especially for those committed to the idea of a comprehensive freeze. At the same time, the public may be eager enough for any arms control progress to accept a First Strike Weapons Freeze as an important first step. Moreover, the fact that Proposal 2 freezes destabilizing first strike systems could be another argument in its favor, as this may appear to increase security. Once again, opposition could be expected from those who feel that the Soviets currently enjoy an advantage in precisely those strategic and theater forces which would be frozen in place by this proposal.

Any expected economic dividend from Proposal 2 would probably be lower than for Proposal 1. Once again, it might be necessary, for both military and political reasons to increase conventional force spending in order to counter the effects of the freeze on extended nuclear deterrence. As noted, there would also be pressure to spend more for strategic and theater aircraft, for cruise missiles, for air defenses, and for increased maintenance for frozen systems.

Allied reaction would probably center on the continuing problem of the credibility of the nuclear umbrella. Proposal 2 would be subject to criticism that the United States was effectively dealing with threats to its own territory and security, while doing less for NATO security. Indeed, any additional rungs on the ladder of escalation could be interpreted by the Allies in just that way, i.e., as trying to postpone the direct involvement of continental U.S. targets without reducing the devastation of Europe. There would also be the continuing problem of existing Soviet SS–20s, but Proposal 2 might be more acceptable to NATO than Proposal 1 in this regard as the GLCM deployment could still proceed even though the Pershing II deployment would be forestalled. For the allies, a demonstrated U.S. willingness to buttress other areas in compensation for those now frozen, in this case conventional forces and cruise missiles, would be a significant factor in maintaining confidence in NATO's credibility.

Again, there would also be renewed pressure for a conventional force limitation agreement.

G. Soviet acceptance

As with Proposal 1, the First Strike Weapons Freeze would appeal to the Soviets because it would preclude the U.S. strategic modernization program, particularly Trident II and MX. It would also avoid the Pershing II deployment in Europe without reducing the number of SS–20s. This proposal would be less attractive to the Soviets than Proposal 1 with regard to INF as it would permit ongoing cruise missile developments, an area in which the United States currently has a lead. The Soviets would probably still insist on non-circumvention provisions, especially now that cruise missiles would be deployed in other NATO states.

This proposal would also favor the development of manned strategic bombers, an area to which the Soviets have devoted fewer resources than the United States. At the same time, the Soviet Union already possesses an extensive air defense system, including some 2,250 interceptors and 10,000 surface-to-air missile launchers. Continental U.S. air defenses are far less extensive, but targets are also farther removed from threatening Soviet non-first-strike systems than are Soviet targets from similar U.S. systems. In sum, Proposal 2 would probably be somewhat less attractive to the Soviets than Proposal 1, but might still have sufficient positive aspects to engage Soviet interest.

IV. PROPOSAL 3: STRATEGIC WEAPONS FREEZE

A. Terms

Proposal 3 is based on the following terms:

The United States and the Soviet Union agree to a freeze on the production, testing and deployment of all strategic weapons,[9] including warheads, bombs and delivery systems.

B. Implications

Proposal 3 carries with it the following implications:

(a) it decouples strategic and theater forces.

(b) It continues to freeze the destabilizing first strike strategic systems.

(c) It tends to appear more as an alternative to the START proposal rather than as a striking new departure as does the freeze. SALT definitions of what consitutes strate-

gic systems could be used to define included and excluded systems.

C. Monitoring Issues

Five major monitoring tasks remain problematical under Proposal 3:

(1) the production of additional ICBM's for cold launch systems.

(2) the production of MIRVed warheads to increase the MIRVing of those missiles not MIRVed to capacity.

(3) distinguishing between different types of bombers, and monitoring conversion to Cruise Missile Carriers.

(4) cruise missiles.

(5) the testing of warheads on cruise missiles, and then transferring them to ICBMs or SLBMs.

D. Comparison with Proposals 1 and 2

The major difference between Proposal 3 and the previous proposals is that it decouples the strategic and theater systems. In a way this represents a reversion to the basic arms control approach now being followed. Where Proposal 1 was all-embracing, and Proposal 2 was largely responsive to monitoring problems, Proposal 3 responds to systems by intended military function, and is somewhat less driven by monitoring issues.

E. Military Significance: Force Structure, Deterrence and Crisis Stability

Issues relating to the deterioration and reliability of the systems and their effect on deterrence and crisis stability remain relevant but unresolved. One significant additional factor with this proposal is that the Soviets would still have their SS-20s deployed in Europe and not subject to the freeze. Were the NATO Pershing IIs and GLCMs not deployed for other reasons, this fact might add instability, as the Soviets would have an apparently reliable theater system, while the main NATO retaliatory systems—U.S. strategic missiles—would now be frozen and subject to questions of reliabiity. U.S. plans for conventional force impovements would again be crucial, as would completion of the full NATO INF deployment.

Depending on reliability problems, Proposal 3 could conceivably limit the last rung on the NATO escalation ladder, in effect making more real the perceived distinction between theater and strategic nuclear exchanges. To those who question this distinction such a step would probably be seen only as self-denial of one component of the nuclear arsenal, regardless of basing or range.

Proposal 3 would probably push military research and development efforts strongly into INF as a means of buttressing that component while strategic forces remained frozen. Such a development could ultimately be more threatening to the Soviet Union, given its contiguity with and proximity to the European theater. This might raise Soviet incentives to increase, perhaps surreptitiously, the range of their IRBM's in order to equally jeopardize U.S. home interests, although such a development could be monitored.

F. Political Effects: Domestic and Allied

Proposal 3, like Proposal 2, would be less than satisfactory to those favoring a comprehensive freeze, but still would satisfy the general desire for progress in arms control. Moreover, as it would address strategic weapons, it would respond to concerns about the safety and security of the United States, allied interests and U.S. commitments to them notwithstanding. Proposal 3 would also have a legitimacy that devices from following in the direction of the SALT agreements, which only dealt with strategic systems. Again, those who view the current strategic situation as being unfavorable to the United States would oppose such a freeze.

The economic dividend of Proposal 3, while perhaps higher than that of Proposal 2, would still likely be a source of some disappointment. Continued maintenance costs of frozen systems, and improvements for INF and conventional forces would all diminish expected defense savings, which would still be low in any event.

Allied reaction could be expected to be negative in that the main focus of Proposal 3 would still be on systems most threatening to the United States itself. However, SALT I and II were similar in this respect and offer useful precedents. There would presumably be additional pressure from the Allies for an INF agreement or freeze. At the same time, this proposal would leave NATO free to respond to the SS-20 threat with both Pershing IIs and GLCMs, unlike Proposal 2, thus offering a more equivalent response. Going ahead with these deployments, with an improved conventional posture, and with talks for conventional force limits would be of major significance to the NATO allies.

G. Soviet Acceptance

Two major incentives appear in Proposal 3 to attract Soviet interest. First, it would still preclude the U.S. strategic modernization program, and the deployment of MX, Trident II and the B-1. Second, it would not limit Soviet INF deployments. At the same time, Proposal 3 would impose no restrictions on planned NATO INF deployments, which the Soviets are eager to block. Nonetheless, Proposal 3 follows in the tradition of SALT I and II, and would probably be more acceptable to the Soviets than President Reagan's START proposal, which would require large reductions in the Soviet ICBM force. Non-circumvention would still be a Soviet concern, although it is unclear how this proposal would affect British plans to acquire Trident.

V. PROPOSAL 4: A SALT II FREEZE

A. Terms

Proposal 4 is based on the following terms:

The United States and the Soviet Union agree to a freeze of force levels as established in the SALT II Treaty, and to the other treaty terms as well (i.e., limits on certain new systems, sublimits on specific types of systems, but probably without the allowance for one new light ICBM).

B. Implications

Proposal 4 carries with it the following implications:

a. Like Proposal 3, it decouples strategic and INF issues.

b. It continues to freeze the destabilizing first strike strategic systems.

c. It would make formal the SALT II agreement which both the U.S. and the U.S.S.R. have tacitly agreed not to undercut.

d. Unlike Proposal 3, it differentiates between MIRVed and unMIRVed systems.

C. Monitoring Issues

Three major monitoring issues are important under Proposal 4:

(1) Carrying out of the reductions required of the Soviet Union by SALT II ceilings.

(2) Distinguishing between different types of bombers, and monitoring possible conversion to Cruise Missile Carriers.

(3) Cruise missiles.

The monitoring tasks under Proposal 4 are ones whose difficulty have already been assessed by U.S. experts during the negotiations for SALT II. Thus, they probably represent much less of a departure from known capabilities and familiar tasks than do the other proposals considered above.

D. Comparison with Proposal 1, 2, and 3

Like Proposals 2 and 3, this proposal represents a step away from the more all-embracing freeze. It closely resembles Proposal 3, a Strategic Weapons Freeze, although there are important differences. First, SALT II is an already completed agreement. Therefore, while some negotiation would still be necessary, the basic terms are already familiar to both sides. Second, SALT II sets specific ceilings for overall numbers of SNDVs, and for MIRVed systems and subsystems, which would require immediate reductions by the Soviet Union.[10] These ceilings include the counting rule "once MIRVed, all MIRVed," ending the differentiation between different "mods" (i.e., variants) of missiles of the same type which can be MIRVed or unMIRVed. Finally, a SALT II might not require a freeze on the production of ICBMs, if it continued to allow (Article IV.5) production so long as it is not in excess of "normal deployment, maintenance, training, and replacement requirements."

E. Military Significance: Force Structure, Deterrence and Crisis Stability

As with the other proposals, issues of deterioration, reliability and their effect on deterrence and crisis stability remain unresolved. A significant change with this proposal is that it would require reductions by the Soviet Union to achieve the overall ceiling of 2250 SNDVs. None of the other proposals would require this. This would bring both forces into closer numerical equality in terms of launchers.

SALT II would allow the development of one new ICBM for each nation, although a freeze might forego this option. If SALT II were accepted in full as the basis for a freeze then this missile could be developed.

In terms of crisis stability across the wider spectrum of forces Proposal 4 would be very similar to Proposal 3—much would depend on the outcome of planned NATO INF deployments and of possible U.S. conventional force improvements, while perhaps raising the military significance of, and incentive to develop INF.

F. Political Effects: Domestic and Allied

Proposal 4 is initially attractive because it comprises an agreement already negotiated between the United States and the Soviet Union. It would also appear to be more practical to implement and monitor than the larger freeze. At the same time, it would probably be a disappointment to freeze supporters, and might even be seen as a step backward overall. Furthermore, implementation would not be immediate. Some negotiations would be required to update the data bases, and to extend, if so desired, the protocol which expired on December 31, 1981.

Such a proposal would also suffer from the political decline of SALT II, while still facing the same opposition which was evident when the Senate considered the treaty in 1979. Freeze advocates would probably take exception to the provision allowing the development of one new light ICBM if this remained part of the agreement.

Thus, the domestic political liabilities may outweigh the value of a completed agree-

ment. While negotiations might be easier, approval might be more difficult.

Any economic dividend under Proposal 4 would be fairly low, given maintenance costs, INF and conventional force requirements as substitutes, and perhaps no restrictions on current plans for the development, production and deployment of some new strategic systems under the sublimit substitution provisions.

Allied reaction would be similar to that under Proposal 3. There would be the positive aspect of some arms control being achieved. There would be some negative reaction on the grounds that INF still were not included, which in turn would put more pressure on these talks, and on expectations of U.S. policies regarding INF deployments and conventional force improvements.

G. Soviet Acceptance

Proposal 4 might be less attractive to the Soviet Union than other freeze proposals. Unlike the others it would require some reduction by the Soviets. Morever, it might not necessarily preclude MX, or Trident II, and would still leave NATO free to initiate the planned INF deployments of Pershing IIs and GLCMs. Indeed, Proposal 4 could offer the Soviets a useful propaganda tool if they were to respond with a more comprehensive freeze, one which pointedly does not allow the development of new systems.

VI. LIMITED FREEZES

A number of limited freezes might be attractive, either as parts of the four proposals analyzed above, or in conjunction with a different arms control agreement. Given their more limited nature none of these carry the same wider implications and appeal of the earlier proposals.

A. Cold Launch Freeze

In simple engineering terms cold launch systems offer the advantage of less technically complex launchers by obviating the need to properly vent launchers when the missiles fire in order to avoid self-inflicted damage to the missile. At the same time, they offer the possibility of a reloadable launcher, thus increasing the incentives for additional ICBM production. A freeze on cold launch systems could be attractive as a means of reducing this type of circumvention. At least three different types of this freeze are possible:

(1) A simple ban. This would require changes in the Soviet SS-17s and SS-18s, in planned MX deployments, and in IRBMs, and might prove to be too expensive and unattractive.

(2) A ban on "rapid reload" systems for ICBM launchers, as in SALT II (Article IV.5).

(3) In conjunction with a rapid reload ban, or as an amendment to it, a stricter ban on the collocation of cold launchers and storage facilities for excess ICBMs.

B. ABM Freeze

The ABM Treaty signed in 1972 limited the United States and the Soviet Union to 100 ABM launchers with 100 missiles. By the 1974 associated protocol each nation chose to defend either an ICBM site (as did the U.S.) or its national capital (as did the Soviet Union.) The treaty also banned the development, testing or deployment of sea-based, air-based, space-based, or mobile land-based ABMs, multiple ABM launchers, or rapid reload ABMs. It did not ban further research and development of land-based ABMs, which has gone on in both nations.

ABM remains an area of concern in that the ability to "solve" the defensive aspect of nuclear arms could add tremendous instability. One nation might perceive itself to have the ability, whether real or not, of launching a first strike with only a limited risk of retaliation, thus ending the deterrence afforded by the residual force.

An ABM freeze, specifically on the testing and production of ABMs, would limit further developments beyond laboratories, foreclosing this possibility. The necessity of testing interceptors against a target missile could be easily monitored, denying final reliability to any proposed system.

C. Cruise Missile Freeze

Cruise missiles pose large monitoring problems given their small size and ease of testing and basing. They also pose significant military problems, given their relative cheapness and their ability to penetrate, albeit more slowly than ballistic missiles, to their targets. Of the three types of cruise missiles—ALCMs, GLCMs, and SLCMs—the United States has already begun ALCM deployment. The ALCM problem is mitigated, however, by their dependence on certain types of aircraft as launch platforms. While there remains the possibility of circumvention, as noted above, the aircraft currently used as Cruise Missile Carriers have been subject to monitoring, although this could become dependent on FRODs.

GLCMs and SLCMs pose wider deployment problems, but are more easily frozen given their earlier state of development. A freeze of their development (as in the SALT II Protocol, Article II.1), could postpone or avoid this problem.

VII. SUMMARY AND CONCLUSIONS

Table IV offers a comparison of the main benefits and drawbacks of the four major proposals considered. The comparison below is based on the determinants used to analyze these proposals.

A. Monitoring

The first three proposals all raise similar problems. These include excess ICBM production (especially for cold launch systems); over the ability to test ICBM/SLBM prelaunch procedures with some limits; and the ability to produce additional nuclear weapons, particularly MIRVs for systems already deployed but not MIRVed to capacity.

Proposal 1 raises the largest number of monitoring issues over all, and is most heavily dependent on cooperative measures. This is to be expected as it is the most all-embracing proposal.

Proposal 2, which is largely shaped by a combination of monitoring concerns and their military significance, raises fewer monitoring issues and is the least dependent on cooperative measures. It is probably the most easily monitored solely by NTM.

Proposal 3 raises fewer problems than the all-embracing proposal, but is still dependent on some cooperative measures. Monitoring tasks under this proposal would closely resemble those for SALT II.

Proposal 4 raises fewer problems than Proposal 3, especially if ICBM production is allowed, and the "once MIRVed all MIRVed" rule is enforced. Presumbly these monitoring tasks are ones already considered by the United States and so will be the most familiar. Cooperative measures would be required of all FRODs and cruise missile limitations.

B. Military Significance

It is not possible to determine what effect these proposals will have on the deterioration and reliability of systems, deterrence, or crisis stability. The problem is most general with Proposal 1; with Proposals 2, 3 and 4, it would depend on the effects of those systems not included. Each raises serious concerns for those who perceive a "window of vulnerability" for the United States. Each raises the possibility of additional MIRV deployment noted under monitoring, which would add to the current strategic instability, and possible incentives to develop non-nuclear ABMs.

Proposal 1, in addition to raising the general issues common to each proposal, would deny the planned NATO response to the Soviet SS-20 deployment. This could decrease stability. At the same time, Proposal 1 would be the most satisfactory in terms of avoiding new directions for the arms race.

Proposal 2 addresses only those systems considered to be the most destabilizing. It could possibly add rungs to the ladder of escalation planned on by NATO. This proposal would likely see military efforts rechanneled towards strategic bombers and cruise missiles, nuclear-capable theater aircraft, and perhaps improved air defenses.

Proposals 3 and 4 would decouple strategic and INF reduction efforts. They would still address the most destabilizing strategic systems, but could limit the upper end of the escalation ladder. Rechanneled military efforts would probably go into INF, although under Proposal 4 MX might still be allowed as well. Proposal 4 would also require reductions by the Soviets, which the others would not.

C. U.S. Domestic Reaction

Each proposal would draw on the evident public sentiment in favor of arms control, most positively for Proposal 1, less so for Proposals 2, 3 and 4. All four proposals would be opposed by those who feel the U.S. currently has military inferiorities vis-a-vis the Soviet Union. In each case the expected economic dividend to be realized by a freeze would probably be a disappointment, because of the relatively low cost of nuclear weapons, the higher demands a freeze would put on the maintenance of current systems, and the political and military needs of compensating elsewhere for newly limited capabilities.

Proposal 1 could be expected to attract the most support and opposition given its all-embracing nature. This proposal would probably offer the largest economic dividend, although even here this would probably prove to be lower than expected and a disappointment to some supporters.

Proposal 2 would still draw on significant public support, but would disappoint those advocating a total freeze. It would appeal to U.S. concerns in that it addresses those systems most destabilizing overall, and most threatening to the United States itself. Economic dividends would be lower than for Proposal 1.

Proposal 3, like Proposal 2, would enjoy public support while disappointing those in favor of a total freeze. Its legitimacy would derive from the fact that it follows the precedents of SALT I and II in decoupling strategic and INF reductions, although this would once again disappoint freeze advocates. Like Proposal 2, this proposal would address those systems most threatening to the United States, and would also result in a lower economic dividend than Proposal 1.

Proposal 4 might prove to be the least attractive domestically, despite the greater ease of negotiation. Given its past criticism of SALT II the current Administration is unlikely to pursue such a course, and to freeze advocates it might even be seen as a

step backward when compared to other potential freezes.

D. Allied Reaction

Allied reaction would be mixed in all cases. Each proposal would appeal to the general European desire for arms control and for a reduction of East-West tensions. Each would raise issues about the ability to respond to Soviet INF improvements already in place, and each would heighten concerns about the overall credibility of the U.S. nuclear umbrella. In each case the nature of subsequent U.S. efforts to compensate for capabilities now frozen would be crucial, as would U.S. willingness to pursue other arms control efforts.

Proposal 1 would do the least in terms of responding to Soviet INF growth, as both GLCMs and Pershing IIs would be frozen. While this would appeal to the European peace movement, it would also pose dangers of imbalance for the NATO allies. That being so, Proposal 1 would likely require the largest conventional force improvements or increases on the part of the U.S. to compensate for frozen systems.

Proposal 2 would still allow the planned GLCM deployment, which would leave the Soviet Union with an INF first strike advantage, but would not deny NATO all planned responses. This proposal could add rungs to the escalation ladder, although this might be a mixed blessing in terms of NATO perceptions of the credibility of the U.S. nuclear deterrent. This proposal might also suffer from the appearance that the U.S. was more concerned about the safety of its own territory than it was about its NATO commitments.

Proposals 3 and 4, by only addressing strategic arms, would allow the full planned NATO INF deployments. This would be a military benefit for the allies but still a political problem. Like Proposal 2, these proposals might appear to indicate a greater U.S. concern for its own territory and security. Proposals 3 and 4 would also greatly increase pressure for some sort of INF agreement.

E. Soviet Acceptance

Each proposal would offer the Soviet Union the opportunity to put their recent statements into action by accepting a freeze of some sort. The first three proposals would preclude planned U.S. deployments of MX and Trident II, as well as any Soviet missile systems now being developed. Proposal 4 might allow one new light ICBM each. Each proposal would allow the Soviets to keep their current SS-20 deployment in Europe.

Proposal 1 would impose the greatest limits on both sides, and thus would probably be most satisfactory to the Soviets in terms of precluding planned strategic and INF deployments by the U.S. and NATO designed to redress the INF imbalance.

Proposal 2 would still preclude MX, Trident II and Pershing II, but would be less attractive to the Soviets as the United States has more strategic bombers and greater capabilities thus far in cruise missiles. This cruise missile lead could be translated into both strategic weapons and the planned NATO GLCM deployment. The Soviets would derive considerable offsetting compensation from their extensive air defense system.

Proposal 3 would create a strategic freeze, and leave the Soviet INF deployment in place. It would presumably be more attractive to the Soviets than the START proposal. At the same time, it would have no effect on the planned NATO INF deployments.

Proposal 4 might prove to be least attractive, as it might not preclude MX, Trident II, or the INF deployments, and would require unilateral reduction by the Soviets in overall numbers of launchers.

F. General Observations

Several points concerning various aspects of arms control, and of the freeze proposals bear repeating.

There is a distinction between the military and political demands for monitoring. While U.S. officials would like to have as much information as possible on Soviet arms activities, it is generally assumed that there will be gaps. How significant these gaps will be is one of the factors that goes into assessing the confidence in monitoring any provision. Another is the likelihood that any gap could result in a significant military gain by the Soviet Union. However, more rigorous standards must be applied to monitoring when considering the maintenance of public support for current and future arms control agreements. Indications, or even serious suspicions about Soviet non-compliance will undercut domestic support for arms control among the public at large and within Congress. Congress experiences a particular problem, as it has not always received all of the information it felt it needed on the resolution of compliance issues, as evidenced by statements concerning oversight of the Standing Consultative Commission and the verification process made during the SALT II debate. The assessments in this paper have been limited to the military significance of monitoring issues; the political significance is more general, and harder to assess in advance.

Negotiations for a freeze—of any sort—may not be any less lengthy than those for SALT, START or INF. Although proponents have tended to advance the freeze concept as some immediately realizable palliative, negotiations—especially over monitoring and verification—would require some time. Thus, it is fair to ask which proposal produces the preferred outcome for the United States; a freeze, or separate START and INF talks? One may not be any more quickly negotiated than the other.

The political effects of a freeze on NATO have not been fully addressed thus far in the debate over this concept. A freeze would offer our allies some gains and some areas for concern, some of which could only be allayed by other U.S. defense commitments or expenditures.

A freeze is unlikely to produce large economic dividends. Nuclear weapons are a relatively small part of defense spending. Other defense costs—maintenance of frozen systems to avoid deterioration when reliability can no longer be fully tested, and improvements in non-frozen areas, including conventional forces, to buttress capabilities in response to those aspects which are now frozen—would likely increase as well.

Finally, a decision to seek a freeze is a political decision which must ultimately rest with the President. Though great pressure could be brought to bear, it is difficult to see how a President could be required to negotiate a particular type of agreement. A statutory requirement would also raise major constitutional issues concerning the conduct of negotiations in foreign and defense policy.

---

[1] Monitoring is the process by which information is gathered on Soviet arms activities and then assessed. It is different from verification, which refers to the political process by which decisions are made based on this monitoring information.

In the area of theater systems there is much U.S.-Soviet disagreement as to which systems should be counted. For the purpose of comprehensiveness a mix of the counts preferred by both nations is applied here.

[2] A distinction should be made between knowing that something illicit was occurring, and knowing specifically what that activity was. While it might be possible to hide excess missile production, it would be more difficult to hide the "fact" that something—necessarily undefined—was going on.

[3] As noted above, there is tremendous controversy at the current INF negotiations as to which aircraft of this sort should be included. The following planes all fall into this category:

U.S.: F-111, F-4, A-6, A-7, FB-111.

Soviet: Tu-16, Tu-22, Tu-26, Su-17, Su-24, Mig-27.

Britain: Vulcan.

France: Mirage-IV.

[4] Dr. Hans Blix. Arms control, non-proliferation and IAEA safeguards. Lecture, May 11, 1982.

[5] Secretary of Defense Harold Brown estimated that the U.S. had approximately 300 spare ICBM boosters in 1979, for use in space launches, research and development, and operational training. He estimated that the Soviets had 600 spares. See U.S. Congress. Senate. Committee on Armed Services. Military implications of the Treaty on the Limitation of Strategic Offensive Arms and Protocol thereto (SALT II Treaty). Hearings, 96th Congress, 1st session. July 23-26, 1979. Part 1, p. 38.

[6] For example, the Air Force plans annually on testing 5 Minuteman IIs and 7 Minuteman IIIs. For 1982 the actual test launches were 3 Minuteman IIs and 6 Minuteman IIIs. U.S. Air Force, Minuteman Office.

[7] For example, in the FY84 Defense Budget request the Total Obligational Authority for Strategic Programs is $28.2 billion out of $274.1 billion, or 10.3 percent.

[8] Britain and France both have nuclear forces of their own. Britain has 4 SSBNs with 16 Polaris each, and 54 nuclear-capable Vulcan bombers. France has 5 SSBNs with 16 missiles each, 18 IRBMs, and 34 nuclear-capable Mirage IV aircraft. See International Institute for Strategic Studies. The Military Balance, 1982-83. London, 1982. pp. 30, 31, 34.

[9] These could be defined by SALT II definitions. Under SALT II ICBM launchers were defined as land-based launchers of ballistic missiles with a range in excess of 5,500 kilometers; SLBM launchers were defined as any ballistic missile launchers installed on submarines; heavy bombers were specified by type, and as any equipped with cruise missiles with ranges in excess of 600 kilometers. See SALT II Treaty, Article II.

[10] A different SALT II freeze proposal was made in June 1982 by the Federation of American Scientists. Under this proposal both sides would freeze at their current force levels and continue to be restricted by the aggregate limits and sublimits of SALT II, which would further curtail force growth and new missile types, as any new weapon introduced would have to be compensated for by dismantling some other weapon to stay under the freeze limits and sublimits. Unlike Proposal 4, the Federation's SALT II freeze would not necessarily require Soviet reductions to the 2250 SNDV limit. See Federation of American Scientists. Public Interest Report, Vol. 35, No. 6, June 1982, pp. 3-4.

TABLE IV.—COMPARISON OF MAJOR FREEZE PROPOSALS

Proposal	Monitoring issues	Military significance	U.S. domestic reaction		Allied reaction		Soviet acceptance	
			Positive	Negative	Positive	Negative	Positive	Negative
Proposal 1: Freeze on the production, testing, and deployment of all nuclear weapons and their delivery systems.	1. Excess ICBM production for cold launch systems. 2. ICBM/SLBM testing of prelaunch procedures. 3. SLBM deployment in non-SSB launchers. 4. FRODs for strategic bombers. 5. Cruise missiles. 6. Mobile IRBM launchers. 7. Excess IRBM production. 8. FRODs for theater aircraft. 9.Nuclear weapons overall and additional MIRV'ing.	1. Unknown effects on deterioration, reliability, deterrence, and crisis stability. 2. Question of relative age of U.S. and Soviet systems. 3. Window of vulnerability? 4. Soviet INF deployments. 5. Problems re potential new secret MIRV'ing. 6. Possible incentive to develop nonnuclear ABM.	1. Public support for a freeze.	1. Reaction of those who feel United States is vulnerable. 2. Limited economic dividend and increased defense costs in other areas.	1. Desire for arms control. 2. Postpones GLCM and Pershing II deployment.	1. SS–20's not countered. 2. Question of credibility of U.S. nuclear umbrella.	1. Public statements favoring freeze. 2. Precludes MX, B–1, and Trident. 3. Precludes NATO, Pershing II and GLCM deployment.	1. Precludes any Soviet planned deployments.
Proposal 2: Freeze on the production, testing and development of first strike weapons.	1. Excess ICBM production for cold launch systems. 2. ICBM/SLBM testing of prelaunch procedures. 3. SLBM deployment in non-SSB launchers. 4. Mobile IRBM launchers. 5. Excess IRBM production. 6. Nuclear weapons overall and additional MIRV'ing. 7. Cruise missile warhead testing and transfer to ICBM's, SLBM's, IRBM's.	1. Unknown effects on deterioration, reliability, deterrence and crisis stability. 2. Addresses most destabilizing systems. 3. Could extend "ladder of escalation." 4. Might channel efforts into bombers, cruise missiles, and nonnuclear ABM. 5. Window of vulnerability? 6. Limited response to Soviet INF deployments. 7. Problems re potential new secret MIRV'ing.	1. Public support for some arms control. 2. Addresses destabilizing systems.	1. Disappointment of freeze advocates. 2. Reaction of those who feel United States is vulnerable. 3. Limited economic dividend.	1. Desire for arms control. 2. Allows GLCM response to SS–20.	1. No Pershing II against SS–20's 2. Greatest U.S. concern over own territorial integrity. 3. Question of credibility of U.S. nuclear umbrella.	1. Public statements favoring freeze. 2. Precludes MX and Trident. 3. Precludes Pershing II. 4. Large Soviet air defense in place.	1. Precludes any planned Soviet missiles. 2. Greater number of U.S. strategic bombers. 3. Current U.S. lead in cruise missiles. 4. Allows NATO GLCM deployment.
Proposal 3. Freeze on the production, testing and deployment of all strategic weapons.	1. Excess ICBM production for cold launch systems. 2. ICBM/SLBM testing of prelaunch procedures. 3. SLBM deployment in non-SSB launchers. 4. FRODs for strategic bombers. 5. Cruise missiles. 6. Nuclear weapons overall and additional MIRV'ing. 7. Cruise missile warhead testing and transfer to ICBM's, SLBM's, IRBM's.	1. Unknown effects on deterioration, reliability, deterrence and crisis stability. 2. Leaves Soviets with an INF first strike capability. 3. Addresses destabilizing strategic systems. 4. Could limit "ladder of escalation." 5. Might channel efforts into INF systems and nonnuclear ABM's. 6. Window of vulnerability? 7. Allows INF response to Soviet SS–20's. 8. Decouples strategic arms and INF, like SALT. 9. Problems re potential new secret MIRV'ing.	1. Public support for some arms control. 2. Allows NATO GLCM and Pershing II response to SS–20's.	1. Disappointment of freeze advocates. 2. Reaction of those who feel United States is vulnerable 3. Limited economic dividend.	1. Desire for arms control. 2. Allows NATO, GLCM and Pershing II deployment.	1. Continued political problems re NATO INF plans. 2. NO INF arms control. 3. Additional pressure for INF agreement. 4. Greater U.S. concern over own territorial security. 5. Question of credibility of U.S. nuclear umbrella.	1. Public statements favoring freeze. 2. Precludes MX Trident II, B–1. 3. No limits on SS–20's. 4. Preferable to START.	1. Precludes Soviet strategic force plans. 2. Allows NATO INF deployments.
Proposal 4: Freeze based on SALT II Treaty.	1. Soviet reductions to 2,250 ceiling. 2. FRODs for strategic bombers. 3. Cruise missiles. 4. Limits on new type ICBM, if allowed.	1. Unknown effects on deterioration, reliability, deterrence and crisis stability. 2. Leaves Soviets with an INF first strike capability? 3. Addresses destabilizing strategic systems. 4. Could limit "ladder of escalation." 5. Might channel efforts into INF systems, and nonnuclear ABM's. 6. Window of vulnerability?—but allows MX. 7. Allows INF response to Soviet SS–20's. 8. Decouples strategic arms and INF, like SALT.	1. Public support for some arms control. 2. Allows NATO, GLCM and Pershing II response to SS–20's.	1. Disappointment of freeze advocates. 2. Substantial opposition to SALT II. 3. Might allow new ICBM development.	1. Desire for arms control. Allows NATO, GLCM and Pershing II deployment.	1. Continued political problems re NATO INF plans. 2. No INF arms control. 3. Additional pressure for INF agreement. 4. Greater U.S. concern over own territorial security. 5. Question of credibility of US. nuclear umbrella.	1. Earlier statements pro-SALT II. 2. Preferable to START. 3. No limits on SS–20's.	1. Require Soviet reductions. 2. Might allow MX, Trident. 3. Allows NATO INF deployments.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. TRIBLE). Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10:30 a.m. with statements therein limited to 5 minutes each.

BYRD IS BACK

Mr. INOUYE. Mr. President, the distinguished minority leader, ROBERT C. BYRD, has had an extraordinary political career. In his home State of West Virginia, Senator BYRD has held more legislative elective offices than anybody else in that State's history—elected first to the West Virginia House of Delegates, then to the State senate, next to the U.S. House of Representatives, and ultimately to the U.S. Senate. In West Virginia, ROBERT C. BYRD is an institution—a man who has never lost an election, and a Senator who has consistently won with the massive support of Democrats and Republicans alike.

Senator BYRD's national record is no less remarkable. Since 1967, when he was elected secretary of the Senate Democratic Conference, Senator BYRD has been part of the Senate leadership. From 1971 until 1977, he was the Senate majority whip. And during the 95th and 96th Congresses, Senator BYRD served as the Senate majority leader. Certainly, ROBERT C. BYRD has rewarded the trust placed in him by the people of the Mountain State and by his colleagues here in the Senate, as well.

In the 1980 elections, the Senate majority crossed to the Republican side of the aisle. But in January 1981, the Senate Democrats reaffirmed their confidence in Senator BYRD by again electing him Senate Democratic leader.

Washington thrives on conjecture, and local pundits wondered widely if Senator BYRD would readily adjust to his new minority leader position.

But Senator BYRD's Senate colleagues and Capital Hill insiders both know that ROBERT C. BYRD is a man of almost limitless stamina, practical brilliance, and enviable resilience. The Senate has long been Senator BYRD's passion and professional home, and few people in American history know the rules of the political game as well as does ROBERT BYRD. Most Senators and the real political experts were not surprised, therefore, as Senator BYRD shifted into his new Senate role, and

began working in tandem with our distinguished majority leader Senator BAKER.

Now, what the Senate has known about Senator BYRD for more than 2 years is becoming public knowledge, as well. The most recent issue of the National Journal carries on its cover an announcement that "Byrd Is Back," and goes on in a subsequent article within to outline Senator BYRD's effectiveness as the Senate minority leader.

I ask unanimous consent that the National Journal article on Senator BYRD be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the National Journal, May 7, 1983]

BYRD IS BACK—SALT IN THE WOUNDS

(By Richard E. Cohen)

(Minority status seems to have enhanced Byrd's position among fellow Democrats; but Democratic Senators, looking eagerly toward the 1984 elections, are finding that their increased ability to influence policy is eroding their internal unity.)

Senate Democratic Leader Robert C. Byrd may have lost much of his power to shape policy following the 1980 Republican takeover of the Senate and White House, but the West Virginian seems to have improved his ability to promote party unity and alternative policies.

Ironically, his improved image as a party leader is probably the result of his reduced power. In the view of some of his fellow Democrats, Minority Leader Byrd has become more effective at listening to and working with the rank and file in identifying party goals than was Majority Leader Byrd at the peak of his power and prestige.

Byrd has helped promote consensus among Senate Democrats by scheduling weekly lunch meetings and creating task forces that have agreed this year on recommendations for a jobs package, crime and medicare. These leadership tools have helped fill the void created by the loss of the Democrats' Senate chairmanships.

"The unhappiness with Byrd has dissipated," said a junior Senator who did not want to be identified. "Partly, it's because he's put others up front. He wants to be the leader and has shown a willingness to spread the action around."

As a leader of the loyal opposition, Byrd has discovered some benefits in not being responsible for solving the nation's problems. "You don't need a superstar as Minority Leader," Byrd said in a recent interview. "I don't have to be out front on everything. . . . I pass it around so they all have a piece of the action. In this way, we can best present alternatives to the public.

"When a party is in the majority and has ample votes, there is not the necessity to develop strong unity. In the minority, there is a tendency to get together pretty fast and forget our disagreements."

At times, Byrd has harshly criticized the Reagan Administration's domestic policies, especially proposals to reduce social security benefits. He said the Republicans "created an atmosphere of partisanship when bipartisanship was needed."

As Republican unity has begun to crumble in the 98th Congress, Senate Democrats are using their cohesiveness to wield increasing power to shape the legislative product, a role they played only infrequently during the 97th. As a result, Byrd may find some of the party strains returning.

Democrats have grown increasingly influential in drafting the congressional budget, for example. With the help of five Budget Committee Republicans, they sent to the floor a proposal that included a $30 billion tax increase. Because the committee also approved more than $800 million in medicare cuts for fiscal 1984, the Democrats' medicare task force had to drop its opposition to all medicare cuts and shift its emphasis to attacking President Reagan's plan for even greater reductions.

As their growing influence has forced them to tone down their rhetoric on pending Senate legislation, Byrd has been trying to get the Democratic Party to address major long-term issues, such as industrial policy.

"They have more time to look beyond the recession and address fundamental problems of getting the economy moving again," said Robert G. Liberatore, staff director of the Senate Democratic Policy Committee, which Byrd chairs. "When Democrats had a President and Senate committee chairmen, they didn't look to Sen. Byrd to create the package, they just wanted his help. In the past two years, he has been very much in the lead in preparing the packages."

Byrd continues to employ some of the skills that marked his tenure as Majority Leader, especially his strong knowledge of Senate procedures, which he gained from 24 years of experience in the Senate and before that 6 in the House.

"It's not important to be public for the sake of being public," Byrd said. "The importance for me is to work with my colleagues, to give them a chance to be heard, to help the class of 1984 with their campaign plans, to have occasional meetings with Speaker O'Neill on an agenda. . . ."

MAKING THE ADJUSTMENT

Byrd tries to put the best face on the Democrats' fall to minority status. "I started school in a two-room schoolhouse before the new math," he said. "But I learned early that 54 [votes] exceed 46, and I've never found anyone to convince me otherwise. So the next step was just as simple, to make the best use of the 46 [Democrats] that we could in shaping national policy by developing consensus."

Other Democrats recently said that the adjustment has not been so easy. "The 1980 election was a shock that created an emptiness in the gut, an identity problem," said a senior Democratic aide. "For years, these guys felt they were Mr. Macho, but they found they couldn't perform. They were not dead, but they had to change some assumptions."

During the early 1981 voting on Reagan's spending and tax-cut plans, Democrats made several unsuccessful attempts to reduce the proposed cuts. But eventually, all but 10 voted for the first round of spending cuts and all but 11 for the tax bill. As a result, several news stories suggested the Democrats were in disarray.

Sen. Carl Levin of Michigan, one of the few Democrats who consistently voted against the Reagan program, said that the majority of Democrats had been wrong not only about the merits of the program but also about the political wisdom of supporting it. He did not, however, blame Byrd or the party's minority status. "There was a different judgment of what the public wanted," Levin said.

For Democrats, minority status meant they could no longer rely on committee hearings or ample staffs to initiate their own plans or strategies. As a result, Byrd decided that they should spend more time with one another. Following a tradition practiced for many years by Senate Republicans, Byrd organized luncheon caucuses nearly every Tuesday. Previously, they were held only a few times annually. "He realized sooner than most that the political future of individual Senators was closely tied to the national party identification and he felt there was something wrong with that image," Liberatore said.

Several Democrats agreed that their cohesiveness resulted in part from participating in a private retreat in October 1981 at a state park in Davis, W.Va. It was there that they decided to make an issue of Reagan's alleged lack of fairness. In subsequent votes, Senate Democrats repeatedly stood together when offering amendments for revising taxes, protecting social security benefits, increasing unemployment benefits and providing public works jobs.

While they worked better among themselves, the Senate Democrats and Byrd encountered tensions when dealing with their House counterparts. This happened because of traditional strains between the House and Senate and a view held by many House Members that Senators consider themselves superior.

House Speaker Thomas P. O'Neill, Jr. of Massachusetts has increasingly worked with Senate Majority leader Howard H. Baker, Jr., R-Tenn., instead of with Byrd. O'Neill and Baker have launched initiatives such as the gasoline-tax increase, a jobs program and social security. In recent weeks, however, Byrd and O'Neill have sought to work together more often and amicably and have organized joint staff meetings.

"There have always been and will be times when communications between the House and Senate could have been better, but on the whole, lines are open," Byrd said. "They have the numbers and we don't. I can expect a difference from time to time; that doesn't excite me."

TARGETS OF OPPORTUNITY

Byrd has more frequently chosen to work on issues that he thinks will divide the Republicans. "They still control the agenda, and you can't underestimate the influence of the White House," said a senior Democratic aide. "We'll pick our fights where we think we can win or we know we're making an impact on better policy or with the fairness theme."
